20 all of this red area represents what you see from inside 20 would look like. 21 the crater, looking back toward the park overlook. These 21 MR. MIKE MABERRY: That is ten X magnification. 22 red areas are what you see, places from which you can see 22 DR. CHARLIE FEIN: Of course, that's looking 23 the park overlook inside the crater. A man-made facility. 23 the maked eye, they are 24 looking out, visible to visitors, hikers and so on. 25 The final image, the blue areas represent what 25 25 you can see from the park overlook right at the crater, a 123 125 1 you can see from almost anywhere in the crater. 20 over the island. We have photographs and we've had 26 its position and because of the terrain blocking from 1 over the island. We have photographs and we've had 27 anywhere in the crater. Yes, it would be visible from 3 This one from Maalaea Harbor. Wow, I mean, you 28 so with respect to ATST visibility, because of 5 eye, little dots. But if you use binoculars, this is what you would see. And there is what 29 through bash dosmer Grove. The observatories 10 street 3 DR. CHARLIE FEIN: This is from the top of the <th>19</th> <th></th> <th>19</th> <th>-</th>	19		19	-
21 the crater, looking back toward the park overlook. These 21 MR. MIKE MABERRY: That is ten X magnification. 22 red areas are what you see, places from which you can see 22 DR. CHARLIE FEIN: Of course, that's looking 23 the park overlook inside the crater. A man-made facility, 23 through binoculars. Because with the naked eye, they are 24 looking out, visible to visitors, hikers and so on. 25 The final image, the blue areas represent what 25 123 123 125 124 jou can see from the park overlook right at the crater, a 1 over the island. We have photographs and we've had 2 facility are visible from almost anywhere in the crater. 3 This one from Malaea Harbor. Wow, I mean, you 3 so with respect to ATST visibility, because of 4 know, you can hardly see the observatories with the naked 3 so with respect to ATST visibility, because of 5 so ware not saying that the 9 wisible from those locations on the road. 7 ATST would look like. 9 MR. MIKE MABERRY: This is from the park overlook right at the viewplain 7 10 It would be visible for a brief period as you 10 Noul have yee, it would appear, the viewplain <th>20</th> <th></th> <th>1</th> <th></th>	20		1	
22 red areas are what you see, places from which you can see 22 DR. CHARLIE FEIN: Of course, that's looking 23 the park overlook inside the crater. A man-made facility, 23 through binoculars. Because with the naked eye, they are 24 looking out, visible to visitors, hikers and so on. 23 through binoculars. Because with the naked eye, they are 25 The final image, the blue areas represent what 25 Now, we've done these viewplain studies from all 26 you can see from the park overlook right at the crater, a 1 over the island. We have photographs and we've had 21 you can see from the park overlook right at the crater, a 1 over the island. We have photographs and we've had 3 facility are visible from almost anywhere in the crater. 3 This one from Maalaea Harbor. Wow, I mean, you 4 So with respect to ATST visibility, because of 5 This one from Maalaea Harbor. Wow, I mean, you 6 is position and because of the terrain blocking from 3 This one from Maalaea Harbor. Wow, I mean, you 7 ATST would look like. 5 So we are not saying that the - 9 visible from those locations on the road. 7 ATST would look like. 10 It would be visibl			21	MR. MIKE MABERRY: That is ten X magnification.
23 the park overlook inside the crater. A man-made facility, 23 through binoculars. Because with the naked eye, they are 24 looking out, visible to visitors, hikers and so on. 24 little dots, as you well know. 25 The final image, the blue areas represent what 25 Now, we've done these viewplain studies from all 123 123 125 1 you can see from the park overlook right at the crater, a 1 over the island. We have photographs and we've had 2 facility are visible from almost anywhere in the crater. 3 This one from Maalaea Harbor. Wow, I mean, you 4 So with respect to ATST visibility, because of 1 over the island. We have photographs and we've had 5 its position and because of the terrain blocking from 1 now, you can hardly see the observatories with the naked 6 bioculars, this is what you would see. And there is what 3 ATST would look like. 8 so we are not saying that the 9 So we are not saying that the 9 visible from those locations on the road. 10 It would be visible for a brief period as you 11 drive up the road past Hosmer Grove. The observatories a good example of how the 13 <th>22</th> <th></th> <th>22</th> <th>_</th>	22		22	_
24 looking out, visible to visitors, hikers and so on. 24 little dots, as you well know. 25 The final image, the blue areas represent what 25 Now, we've done these viewplain studies from all 123 123 125 1 you can see from the park overlook right at the crater, a 1 over the island. We have photographs and we've had 3 facility are visible from almost anywhere in the crater. 3 This one from Maalaea Harbor. Wow, I mean, you 4 So with respect to ATST visibility, because of 5 This one from Maalaea Harbor. Wow, I mean, you 6 magnetic peak, and so on, would not be visible from anywhere in the crater. Yes, it would be visible from 7 7 anywhere in the crater. Yes, it would be visible from 7 ATST would look like. 8 some places on the road, but the observatories are already 9 Visible from those locations on the road. 10 It would be visible from that area. 10 So wa are not saying that the 13 With respect to the national park, the viewplain 10 street. 14 would not be significantly altered, there would not be 16 Here 16 Inter visibility of the facility from el			23	-
25 The final image, the blue areas represent what 25 Now, we've done these viewplain studies from all 1 123 123 1 you can see from the park overlook right at the crater, a 123 1 tittle bit further downhill. The flashing windows of that 123 3 facility are visible from almost anywhere in the crater. 3 4 So with respect to ATST visibility, because of 3 5 its position and because of the terrain blocking from 3 6 magnetic peak, and so on, would not be visible from 7 7 anywhere in the crater. Yes, it would be visible from 7 8 some places on the road, but the observatories are already 9 9 visible from those locations on the road. 7 10 It would be visible from that area. 10 11 drive up the road past Hosmer Grove. The observatories 11 12 arealready visible from that area. 12 13 With respect to the national park, the viewplain 14 14 would not be significantly altered, there would be 15 15 visibility from Red Hill. It is a large white facility. <t< th=""><th>24</th><th></th><th>24</th><th></th></t<>	24		24	
1 you can see from the park overlook right at the crater, a 1 over the island. We have photographs and we've had 2 little bit further downhill. The flashing windows of that a 3 facility are visible from almost anywhere in the crater. This one from Maalaea Harbor. Wow, I mean, you 4 So with respect to ATST visibility, because of the crater. 5 its position and because of the terrain blocking from magnetic peak, and so on, would not be visible from 7 anywhere in the crater. Yes, it would be visible from 5 8 some places on the road, but the observatories are already visible from those locations on the road. 7 10 It would be visible for a brief period as you 10 street. 11 drive up the road past Hosmer Grove. The observatories 11 DR. CHARLIE FEIN: This is from the top of the 12 are already visible from that area. 12 street here. So this is a good example of how the 13 With respect to the national park, the viewplain 14 the Air Force facilities, and appear to be either the same 15 visibility form Red Hill. It is a large white facility. 15 size or smaller from that particular location. 14 would not be significantly al	25	-	25	-
1 you can see from the park overlook right at the crater, a 1 over the island. We have photographs and we've had 2 little bit further downhill. The flashing windows of that a 3 facility are visible from almost anywhere in the crater. This one from Maalaea Harbor. Wow, I mean, you 4 So with respect to ATST visibility, because of the crater. 5 its position and because of the terrain blocking from magnetic peak, and so on, would not be visible from 7 anywhere in the crater. Yes, it would be visible from 5 8 some places on the road, but the observatories are already visible from those locations on the road. 7 10 It would be visible for a brief period as you 10 street. 11 drive up the road past Hosmer Grove. The observatories 11 DR. CHARLIE FEIN: This is from the top of the 12 are already visible from that area. 12 street here. So this is a good example of how the 13 With respect to the national park, the viewplain 14 the Air Force facilities, and appear to be either the same 15 visibility form Red Hill. It is a large white facility. 15 size or smaller from that particular location. 14 would not be significantly al		123		125
2little bit further downhill. The flashing windows of that2renderings done.3facility are visible from almost anywhere in the crater.3This one from Maalaea Harbor. Wow, I mean, you4So with respect to ATST visibility, because of4Know, you can hardly see the observatories with the naked5its position and because of the terrain blocking from5eye, little dots. But if you use binoculars, the power6magnetic peak, and so on, would not be visible from6binoculars, this is what you would see. And there is what7anywhere in the crater. Yes, it would be visible from7ATST would look like.8some places on the road, but the observatories are already9MR. MIKE MABERRY: This is from right up the10It would be visible for a brief period as you10street.11drive up the road past Hosmer Grove. The observatories11DR. CHARLIE FEIN: This is from the top of the12are already visible from that area.12facility would appear in between AEOS, for example, and14would not be significantly altered, there would be14the Air Force facility.15visibility from Red Hill. It is a large white facility.15DR. CHARLIE FEIN: There it is.18The visibility of the facility from elsewhere on18DR. CHARLIE FEIN: There it is.19Maui is variable, depending on where you are. In some19lot.20places, it would appear between other facilities. And21DR. CHARLIE FEIN: This is from the main visitor21	1		1	
3facility are visible from almost anywhere in the crater.3This one from Maalaea Harbor. Wow, I mean, you4So with respect to ATST visibility, because of5its position and because of the terrain blocking from65its position and because of the terrain blocking from6magnetic peak, and so on, would not be visible from76magnetic peak, and so on, would not be visible from7anywhere in the crater. Yes, it would be visible from67anywhere in the crater. Yes, it would be visible from7ATST would look like.8some places on the road, but the observatories are already8So we are not saying that the9visible from those locations on the road.9MR. 	126		128
1	That's the alternative site. So the one on the right, the	1	different for different environmental protocols. So when
2	preferred site, it would not be visible from the main	2	we say cumulative impact, does that impact relate solely
3	park.	3	to the site, does it relate to include the national park.
4	DR. CHARLIE FEIN: So we are not saying that the	4	And in the case of the road, it certainly does, as we've
5	facility is invisible or that it has no visual impact.	5	agreed, that the cumulative impact of this project would
6	What we are saying is that, one, the visual impact is	6	extend to the national park road and its historic nature.
7	subjective, it depends on who is looking and from where	7	And so there are varying degrees of region of
8	they are looking, and, secondly, the visual impact from	8	influence and how cumulative impact needs to be addressed.
9	the most visited part of the national park, from the	9	And we are doing that.
10	crater, is there is no impact from that location anywhere	10	MS. TONIA MOY: But I guess the concern is, like
11	in that location.	11	this has a little bit of impact, and the next people are
12	MS. TONIA MOY: Thank you.	12	going to say, well, you let that one go, so we can build
13	MR. JEREMY WAGNER: In terms of avoidance,	13	this one, and the next one, well, you let this go, so you
14	minimization, mitigation, one of reasons that's our	14	got to let this one go.
15	preferred site is because it does minimize the impact.	15	DR. CHARLIE FEIN: Yes. Tonia, that raises
16	MS. CAROLINE BLANCO: I think another way to	16	I'm sorry. I didn't mean to cut you off.
17	look at this is, from what you have heard today, you	17	MS. TONIA MOY: So that's
18	probably were already understood this, but steps were	18	DR. CHARLIE FEIN: That raises an issue about
19	taken from early on in selecting these sites to already	19	the University of Hawaii Haleakala observatories in
20	avoid, already minimize to the extent possible. So if	20	general that is discussed in the long-range development
21	that is helpful.	21	plan. There are only a couple of sites
22	MR. MIKE MABERRY: Because we did meet early on	22	MS. TONIA MOY: Left.
23	with Kahu Maxwell and others when some of these issues	23	DR. CHARLIE FEIN: left. That 18 acres
24	were brought up. So they were already built in when doing	24	cannot be host to ten more facilities, even three more
25	the Draft Environmental Impact Statement.	25	facilities, after ATST, unless something is removed and
	127		129
1	MS. TONIA MOY: The other thing that was in here	1	replaced. There just isn't any undeveloped property left.
2	somewhere was, is there opportunity or because it's not	2	The two sites we've used as alternatives are the
3	only up to NSF but a way to do like an LRDP for the	3	two sites available. ATST could not really be put
4	you know, so that I mean, I think one of the comments	4	anywhere else on Haleakala observatories. There is no
5	was, well, okay, yeah, that has a minimal impact, then		
6		5	land available that's appropriate for that facility.
_	this one will have a minimal. So when are you going to	6	That question was raised in meetings, you know,
7	stop it from, you know	6 7	That question was raised in meetings, you know, why does it have to be there, why can't you move it 500
8	stop it from, you know MR. MIKE MABERRY: Cumulative impact?	6 7 8	That question was raised in meetings, you know, why does it have to be there, why can't you move it 500 feet that way, or whatever. Okay?
8 9	stop it from, you know MR. MIKE MABERRY: Cumulative impact? DR. CHARLIE FEIN: Cumulative impact.	6 7 8 9	That question was raised in meetings, you know, why does it have to be there, why can't you move it 500 feet that way, or whatever. Okay? MS. TONIA MOY: Okay.
8 9 10	stop it from, you know MR. MIKE MABERRY: Cumulative impact? DR. CHARLIE FEIN: Cumulative impact. MR. 33 (Pages 126 to 129)

	130		132
1	MR. MIKE MABERRY: Okay. Well, I thought I	1	And we did take some actions, just to throw in,
2	heard him explaining. That's why we did the LRDP that	2	based on input from the draft LRDP. It was requested that
3	identified the maximum build-out of the area with regards	3	we take action on some alien species, for example. And we
4	to cumulative impact.	4	did do that and we documented, at the request of the
5	MS. TONIA MOY: So has the LRDP been sort of	5	community, and removed some alien species.
6	is it a public document?	6	MS. ANNELLE AMARAL: So let me
7	MR. MIKE MABERRY: Yeah, it's on the web. It	7	MR. MIKE MABERRY: Also I'm sorry we
8	had almost a one-year comment period. And it was highly	8	talked early on about some of the things that we've
9	publicized. It was on the front page of the newspaper.	9	implemented as far as culture goes with regards to the
10	In fact, also, in Honolulu as well.	10	LRDP. But, also, with regards to endangered species and
11	DR. CHARLIE FEIN: It was also presented in	11	the environment, we are requiring, for example, when
12	public meetings.	12	instruments are brought in or shipments come in for
13	MR. MIKE MABERRY: Yeah, it was presented in	13	equipment that they are bug-bombed before they leave their
14	public meetings. It's in the libraries. And, yeah, like	14	place of origin, and it's redone again once we retrieve
15	I said, it had almost a whole year worth of comment	15	them at the harbor, or whatever, before it's brought to
16	period.	16	the top. So we are being a lot more conscious of the
17	MS. TONIA MOY: Okay.	17	potential impact of our operations at the summit.
18	MR. MIKE MABERRY: We did receive comments from	18	MS. TONIA MOY: I am just wondering if that
19	the park and from the Friends of Haleakala National Park	19	could be like a stipulation, another stipulation, that,
20	and others that were all included in the final. And the	20	you know, the LRDP is going to be as approved at this
21	final is on the web.	21	point in time.
22	In fact, since then, for example, you will see	22	DR. CHARLIE FEIN: It actually says that in the
23	sort of a couple of sections at the bottom relative to	23	DEIS, that the LRDP will apply, the provisions will apply
24	stormwater management that grew out of that. So we did	24	to the construction and operations of the facility. But I
25	additional studies even after the FEIS.	25	guess we could put it
	101		1.00
	131		133
1	MS. TONIA MOY: Okay.	1	MS. CAROLINE BLANCO: We might also include that
2	MS. TONIA MOY: Okay. MR. MIKE MABERRY: Like I touched on very	2	MS. CAROLINE BLANCO: We might also include that in the whereas clause, you know, at the beginning.
	MS. TONIA MOY: Okay. MR. MIKE MABERRY: Like I touched on very briefly, early on, even though we didn't do and publish an		MS. CAROLINE BLANCO: We might also include that in the whereas clause, you know, at the beginning. Because it's sort of setting the you love the legal
2 3 4	MS. TONIA MOY: Okay. MR. MIKE MABERRY: Like I touched on very briefly, early on, even though we didn't do and publish an EIS, we did the studies at the same level. I mean, we did	2 3 4	MS. CAROLINE BLANCO: We might also include that in the whereas clause, you know, at the beginning. Because it's sort of setting the you love the legal terms, I know but sort of setting out the whole
2 3 4 5	MS. TONIA MOY: Okay. MR. MIKE MABERRY: Like I touched on very briefly, early on, even though we didn't do and publish an EIS, we did the studies at the same level. I mean, we did a complete archeological, biological, geological survey of	2 3 4 5	MS. CAROLINE BLANCO: We might also include that in the whereas clause, you know, at the beginning. Because it's sort of setting the you love the legal terms, I know but sort of setting out the whole upfront, you know, this is a presumption, this is a
2 3 4 5 6	MS. TONIA MOY: Okay. MR. MIKE MABERRY: Like I touched on very briefly, early on, even though we didn't do and publish an EIS, we did the studies at the same level. I mean, we did a complete archeological, biological, geological survey of the entire 18 acres. And then since then, for other areas	2 3 4 5 6	MS. CAROLINE BLANCO: We might also include that in the whereas clause, you know, at the beginning. Because it's sort of setting the you love the legal terms, I know but sort of setting out the whole upfront, you know, this is a presumption, this is a presumption, this is a presumption and so forth, then
2 3 4 5 6 7	MS. TONIA MOY: Okay. MR. MIKE MABERRY: Like I touched on very briefly, early on, even though we didn't do and publish an EIS, we did the studies at the same level. I mean, we did a complete archeological, biological, geological survey of the entire 18 acres. And then since then, for other areas that we I mean, we went back and did even more detailed	2 3 4 5 6 7	MS. CAROLINE BLANCO: We might also include that in the whereas clause, you know, at the beginning. Because it's sort of setting the you love the legal terms, I know but sort of setting out the whole upfront, you know, this is a presumption, this is a presumption, this is a presumption and so forth, then these are some of the additional ones. So it recognizes
2 3 4 5 6 7 8	MS. TONIA MOY: Okay. MR. MIKE MABERRY: Like I touched on very briefly, early on, even though we didn't do and publish an EIS, we did the studies at the same level. I mean, we did a complete archeological, biological, geological survey of the entire 18 acres. And then since then, for other areas that we I mean, we went back and did even more detailed study of them. Specifically, the two sites that are being	2 3 4 5 6 7 8	MS. CAROLINE BLANCO: We might also include that in the whereas clause, you know, at the beginning. Because it's sort of setting the you love the legal terms, I know but sort of setting out the whole upfront, you know, this is a presumption, this is a presumption, this is a presumption and so forth, then these are some of the additional ones. So it recognizes some areas of concern.
2 3 4 5 6 7 8 9	MS. TONIA MOY: Okay. MR. MIKE MABERRY: Like I touched on very briefly, early on, even though we didn't do and publish an EIS, we did the studies at the same level. I mean, we did a complete archeological, biological, geological survey of the entire 18 acres. And then since then, for other areas that we I mean, we went back and did even more detailed study of them. Specifically, the two sites that are being looked at for this project.	2 3 4 5 6 7 8 9	MS. 	134		136
1	then, in the actual terms, we would say that	1	long-range development plan.
2	MS. TONIA MOY: The future LRDP or whatever will	2	MR. MIKE MABERRY: And our intention is for it
3	be	3	to be not a project specific management plan, but for all
4	DR. CRAIG FOLTZ: The other issue with respect	4	the area under our responsibility.
5	to the LRDP is the mitigation issues that are laid out	5	MS. TONIA MOY: That is how it should be.
6	there, not all of which have we spoken about. But they	6	MR. MIKE MABERRY: Yes. It is not the guidance
7	can presumably be included by reference or specifically.	7	we have been given in the past, but it is what it will be.
8	MS. TONIA MOY: Include it in the LRDP.	8	MS. ANNELLE AMARAL: Let me ask. So with
9	MS. ANNELLE AMARAL: The LRDP applies to the	9	respect to the MOA, I heard one addition of language with
10	cumulative impact on	10	respect to the LRDP.
11	DR. CHARLIE FEIN: No.	11	MS. CAROLINE BLANCO: That is where the whereas
12	MS. CAROLINE BLANCO: management of the	12	clauses
13	summit.	13	MS. ANNELLE AMARAL: A provision that future
14	DR. CHARLIE FEIN: It's the management of the 18	14	MS. CAROLINE BLANCO: That's right. Two
15	acres.	15	different things, yeah.
16	MR. MIKE MABERRY: Of the 18 acres; not of the	16	MS. ANNELLE AMARAL: Future LRDP will be
17	summit.	17	provided to the consulting parties.
18	MR. JEFF BARR: Did you want to talk about how	18	MS. CAROLINE BLANCO: The future one, or do you
19	it's being more formalized now in terms of the	19	want it as I was trying to wonder if it's notice or if
20	comprehensive management plan process that you guys are	20	it's the actual amendment that would be provided to you.
21	going through?	21	MS. TONIA MOY: How do you guys usually send
22	MR. MIKE MABERRY: No. Actually, the LRDP will	22	out?
23	be more comprehensive than the true comprehensive plan.	23	MR. MIKE MABERRY: Well, we have been since
24	MR. JEFF BARR: I know. What I am saying is I	24	the web is so nice these days, we have been pretty much
25	think the question is, is that public and is that an	25	we haven't really well, I take that back.
	135		137
1	official document. And in a sense, the LRDP was certainly	1	There has been additional appendices made
2	a public document, but hasn't been adopted by any agency	2	available, but we haven't republished the whole thing
3	other than	3	since the final. There is just additional emendious that
4	MR. MIKE MABERRY: Okay. That's not entirely		since the final. There is just additional appendices that
		4	are available on the web. And we sent out notices to the
5	true, because it was adopted by the board of regents.	4 5	
			are available on the web. And we sent out notices to the
5	true, because it was adopted by the board of regents.	5	are available on the web. And we sent out notices to the sister agencies, you know, when that has been added.
5 6	true, because it was adopted by the board of regents. MR. JEFF BARR: Okay.	5 6	are available on the web. And we sent out notices to the sister agencies, you know, when that has been added. I understand what you are trying to do. And,
5 6 7	true, because it was adopted by the board of regents. MR. JEFF BARR: Okay. MR. MIKE MABERRY: Which is the ultimate	5 6 7	are available on the web. And we sent out notices to the sister agencies, you know, when that has been added. I understand what you are trying to do. And, unfortunately, I am not thinking of how to word it.
5 6 7 8	true, because it was adopted by the board of regents. MR. JEFF BARR: Okay. MR. MIKE MABERRY: Which is the ultimate responsible entity for that property at the moment. That	5 6 7 8	are available on the web. And we sent out notices to the sister agencies, you know, when that has been added. I understand what you are trying to do. And, unfortunately, I am not thinking of how to word it. Getting some agreement from the project to adhere to
5 6 7 8 9	true, because it was adopted by the board of regents. MR. JEFF BARR: Okay. MR. MIKE MABERRY: Which is the ultimate responsible entity for that property at the moment. That being said, yes, there will be, as part of Attachment	5 6 7 8 9	are available on the web. And we sent out notices to the sister agencies, you know, when that has been added. I understand what you are trying to do. And, unfortunately, I am not thinking of how to word it. Getting some agreement from the project to adhere to future modifications or whatever to the LRDP. Because I
5 6 7 8 9 10	true, because it was adopted by the board of regents. MR. JEFF BARR: Okay. MR. MIKE MABERRY: Which is the ultimate responsible entity for that property at the moment. That being said, yes, there will be, as part of Attachment Three of Title 13 for the Conservation District Use	5 6 7 8 9 10	are available on the web. And we sent out notices to the sister agencies, you know, when that has been added. I understand what you are trying to do. And, unfortunately, I am not thinking of how to word it. Getting some agreement from the project to adhere to future modifications or whatever to the LRDP. Because I could definitely, with konohiki, if that actually
5 6 7 8 9 10 11	true, because it was adopted by the board of regents. MR. JEFF BARR: Okay. MR. MIKE MABERRY: Which is the ultimate responsible entity for that property at the moment. That being said, yes, there will be, as part of Attachment Three of Title 13 for the Conservation District Use Application Process, there will be a management plan,	5 6 7 8 9 10 11	are available on the web. And we sent out notices to the sister agencies, you know, when that has been added. I understand what you are trying to do. And, unfortunately, I am not thinking of how to word it. Getting some agreement from the project to adhere to future modifications or whatever to the LRDP. Because I could definitely, with konohiki, if that actually sorry. If that actually works out, and I am sure there
5 6 7 8 9 10 11 12	true, because it was adopted by the board of regents. MR. JEFF BARR: Okay. MR. MIKE MABERRY: Which is the ultimate responsible entity for that property at the moment. That being said, yes, there will be, as part of Attachment Three of Title 13 for the Conservation District Use Application Process, there will be a management plan, okay, that will be comprehensive in nature, that probably	5 6 7 8 9 10 11 12	are available on the web. And we sent out notices to the sister agencies, you know, when that has been added. I understand what you are trying to do. And, unfortunately, I am not thinking of how to word it. Getting some agreement from the project to adhere to future modifications or whatever to the LRDP. Because I could definitely, with konohiki, if that actually sorry. If that actually works out, and I am sure there will be input from that process, and that will be wanting
5 6 7 8 9 10 11 12 13	true, because it was adopted by the board of regents. MR. JEFF BARR: Okay. MR. MIKE MABERRY: Which is the ultimate responsible entity for that property at the moment. That being said, yes, there will be, as part of Attachment Three of Title 13 for the Conservation District Use Application Process, there will be a management plan, okay, that will be comprehensive in nature, that probably elements of which look very similar to and will be	5 6 7 8 9 10 11 12 13	are available on the web. And we sent out notices to the sister agencies, you know, when that has been added. I understand what you are trying to do. And, unfortunately, I am not thinking of how to word it. Getting some agreement from the project to adhere to future modifications or whatever to the LRDP. Because I could definitely, with konohiki, if that actually sorry. If that actually works out, and I am sure there will be input from that process, and that will be wanting to add to the LRDP or modify the LRDP to include.
5 6 7 8 9 10 11 12 13 14	true, because it was adopted by the board of regents. MR. JEFF BARR: Okay. MR. MIKE MABERRY: Which is the ultimate responsible entity for that property at the moment. That being said, yes, there will be, as part of Attachment Three of Title 13 for the Conservation District Use Application Process, there will be a management plan, okay, that will be comprehensive in nature, that probably elements of which look very similar to and will be probably taken right out of our LRDP that will be approved	5 6 7 8 9 10 11 12 13 14	are available on the web. And we sent out notices to the sister agencies, you know, when that has been added. I understand what you are trying to do. And, unfortunately, I am not thinking of how to word it. Getting some agreement from the project to adhere to future modifications or whatever to the LRDP. Because I could definitely, with konohiki, if that actually sorry. If that actually works out, and I am sure there will be input from that process, and that will be wanting to add to the LRDP or modify the LRDP to include. MS. TONIA MOY: Right. So you would want to
5 6 7 8 9 10 11 12 13 14 15	true, because it was adopted by the board of regents. MR. JEFF BARR: Okay. MR. MIKE MABERRY: Which is the ultimate responsible entity for that property at the moment. That being said, yes, there will be, as part of Attachment Three of Title 13 for the Conservation District Use Application Process, there will be a management plan, okay, that will be comprehensive in nature, that probably elements of which look very similar to and will be probably taken right out of our LRDP that will be approved by the board of Land and Natural Resources. So that will	5 6 7 8 9 10 11 12 13 14 15	are available on the web. And we sent out notices to the sister agencies, you know, when that has been added. I understand what you are trying to do. And, unfortunately, I am not thinking of how to word it. Getting some agreement from the project to adhere to future modifications or whatever to the LRDP. Because I could definitely, with konohiki, if that actually sorry. If that actually works out, and I am sure there will be input from that process, and that will be wanting to add to the LRDP or modify the LRDP to include. MS. TONIA MOY: Right. So you would want to notify all the consulting parties here, anyway, right?
5 6 7 8 9 10 11 12 13 14 15 16	true, because it was adopted by the board of regents. MR. JEFF BARR: Okay. MR. MIKE MABERRY: Which is the ultimate responsible entity for that property at the moment. That being said, yes, there will be, as part of Attachment Three of Title 13 for the Conservation District Use Application Process, there will be a management plan, okay, that will be comprehensive in nature, that probably elements of which look very similar to and will be probably taken right out of our LRDP that will be approved by the board of Land and Natural Resources. So that will then be a requirement for all actions relative to this	5 6 7 8 9 10 11 12 13 14 15 16	are available on the web. And we sent out notices to the sister agencies, you know, when that has been added. I understand what you are trying to do. And, unfortunately, I am not thinking of how to word it. Getting some agreement from the project to adhere to future modifications or whatever to the LRDP. Because I could definitely, with konohiki, if that actually sorry. If that actually works out, and I am sure there will be input from that process, and that will be wanting to add to the LRDP or modify the LRDP to include. MS. TONIA MOY: Right. So you would want to notify all the consulting parties here, anyway, right? MR. MIKE MABERRY: Right.
5 6 7 8 9 10 11 12 13 14 15 16 17	true, because it was adopted by the board of regents. MR. JEFF BARR: Okay. MR. MIKE MABERRY: Which is the ultimate responsible entity for that property at the moment. That being said, yes, there will be, as part of Attachment Three of Title 13 for the Conservation District Use Application Process, there will be a management plan, okay, that will be comprehensive in nature, that probably elements of which look very similar to and will be probably taken right out of our LRDP that will be approved by the board of Land and Natural Resources. So that will then be a requirement for all actions relative to this project.	5 6 7 8 9 10 11 12 13 14 15 16 17	are available on the web. And we sent out notices to the sister agencies, you know, when that has been added. I understand what you are trying to do. And, unfortunately, I am not thinking of how to word it. Getting some agreement from the project to adhere to future modifications or whatever to the LRDP. Because I could definitely, with konohiki, if that actually sorry. If that actually works out, and I am sure there will be input from that process, and that will be wanting to add to the LRDP or modify the LRDP to include. MS. TONIA MOY: Right. So you would want to notify all the consulting parties here, anyway, right? MR. MIKE MABERRY: Right. MS. CAROLINE BLANCO: Is it a notice to modify
5 6 7 8 9 10 11 12 13 14 15 16 17 18	true, because it was adopted by the board of regents. MR. JEFF BARR: Okay. MR. MIKE MABERRY: Which is the ultimate responsible entity for that property at the moment. That being said, yes, there will be, as part of Attachment Three of Title 13 for the Conservation District Use Application Process, there will be a management plan, okay, that will be comprehensive in nature, that probably elements of which look very similar to and will be probably taken right out of our LRDP that will be approved by the board of Land and Natural Resources. So that will then be a requirement for all actions relative to this project. DR. CHARLIE FEIN: Yeah.	5 6 7 8 9 10 11 12 13 14 15 16 17 18	are available on the web. And we sent out notices to the sister agencies, you know, when that has been added. I understand what you are trying to do. And, unfortunately, I am not thinking of how to word it. Getting some agreement from the project to adhere to future modifications or whatever to the LRDP. Because I could definitely, with konohiki, if that actually sorry. If that actually works out, and I am sure there will be input from that process, and that will be wanting to add to the LRDP or modify the LRDP to include. MS. TONIA MOY: Right. So you would want to notify all the consulting parties here, anyway, right? MR. MIKE MABERRY: Right. MS. CAROLINE BLANCO: Is it a notice to modify or of an actual modification?
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	true, because it was adopted by the board of regents. MR. JEFF BARR: Okay. MR. MIKE MABERRY: Which is the ultimate responsible entity for that property at the moment. That being said, yes, there will be, as part of Attachment Three of Title 13 for the Conservation District Use Application Process, there will be a management plan, okay, that will be comprehensive in nature, that probably elements of which look very similar to and will be probably taken right out of our LRDP that will be approved by the board of Land and Natural Resources. So that will then be a requirement for all actions relative to this project. DR. CHARLIE FEIN: Yeah. MR. MIKE MABERRY: Did I say that right?	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	are available on the web. And we sent out notices to the sister agencies, you know, when that has been added. I understand what you are trying to do. And, unfortunately, I am not thinking of how to word it. Getting some agreement from the project to adhere to future modifications or whatever to the LRDP. Because I could definitely, with konohiki, if that actually sorry. If that actually works out, and I am sure there will be input from that process, and that will be wanting to add to the LRDP or modify the LRDP to include. MS. TONIA MOY: Right. So you would want to notify all the consulting parties here, anyway, right? MR. MIKE MABERRY: Right. MS. CAROLINE BLANCO: Is it a notice to modify or of an actual modification? MS. TONIA MOY: Well, it would depend on how
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	true, because it was adopted by the board of regents. MR. JEFF BARR: Okay. MR. MIKE MABERRY: Which is the ultimate responsible entity for that property at the moment. That being said, yes, there will be, as part of Attachment Three of Title 13 for the Conservation District Use Application Process, there will be a management plan, okay, that will be comprehensive in nature, that probably elements of which look very similar to and will be probably taken right out of our LRDP that will be approved by the board of Land and Natural Resources. So that will then be a requirement for all actions relative to this project. DR. CHARLIE FEIN: Yeah. MR. MIKE MABERRY: Did I say that right? DR. CHARLIE FEIN: Yes, you said that right.	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	are available on the web. And we sent out notices to the sister agencies, you know, when that has been added. I understand what you are trying to do. And, unfortunately, I am not thinking of how to word it. Getting some agreement from the project to adhere to future modifications or whatever to the LRDP. Because I could definitely, with konohiki, if that actually sorry. If that actually works out, and I am sure there will be input from that process, and that will be wanting to add to the LRDP or modify the LRDP to include. MS. TONIA MOY: Right. So you would want to notify all the consulting parties here, anyway, right? MR. MIKE MABERRY: Right. MS. CAROLINE BLANCO: Is it a notice to modify or of an actual modification? MS. TONIA MOY: Well, it would depend on how I think
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	true, because it was adopted by the board of regents. MR. JEFF BARR: Okay. MR. MIKE MABERRY: Which is the ultimate responsible entity for that property at the moment. That being said, yes, there will be, as part of Attachment Three of Title 13 for the Conservation District Use Application Process, there will be a management plan, okay, that will be comprehensive in nature, that probably elements of which look very similar to and will be probably taken right out of our LRDP that will be approved by the board of Land and Natural Resources. So that will then be a requirement for all actions relative to this project. DR. CHARLIE FEIN: Yeah. MR. MIKE MABERRY: Did I say that right? DR. CHARLIE FEIN: Yes, you said that right. Title 13-5, Exhibit 3, lays out a very specific	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	are available on the web. And we sent out notices to the sister agencies, you know, when that has been added. I understand what you are trying to do. And, unfortunately, I am not thinking of how to word it. Getting some agreement from the project to adhere to future modifications or whatever to the LRDP. Because I could definitely, with konohiki, if that actually sorry. If that actually works out, and I am sure there will be input from that process, and that will be wanting to add to the LRDP or modify the LRDP to include. MS. TONIA MOY: Right. So you would want to notify all the consulting parties here, anyway, right? MR. MIKE MABERRY: Right. MS. CAROLINE BLANCO: Is it a notice to modify or of an actual modification? MS. TONIA MOY: Well, it would depend on how I think MS. CAROLINE BLANCO: Because a modification
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	true, because it was adopted by the board of regents. MR. JEFF BARR: Okay. MR. MIKE MABERRY: Which is the ultimate responsible entity for that property at the moment. That being said, yes, there will be, as part of Attachment Three of Title 13 for the Conservation District Use Application Process, there will be a management plan, okay, that will be comprehensive in nature, that probably elements of which look very similar to and will be probably taken right out of our LRDP that will be approved by the board of Land and Natural Resources. So that will then be a requirement for all actions relative to this project. DR. CHARLIE FEIN: Yeah. MR. MIKE MABERRY: Did I say that right? DR. CHARLIE FEIN: Yes, you said that right. Title 13-5, Exhibit 3, lays out a very specific description of what a management plan needs to contain.	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	are available on the web. And we sent out notices to the sister agencies, you know, when that has been added. I understand what you are trying to do. And, unfortunately, I am not thinking of how to word it. Getting some agreement from the project to adhere to future modifications or whatever to the LRDP. Because I could definitely, with konohiki, if that actually sorry. If that actually works out, and I am sure there will be input from that process, and that will be wanting to add to the LRDP or modify the LRDP to include. MS. TONIA MOY: Right. So you would want to notify all the consulting parties here, anyway, right? MR. MIKE MABERRY: Right. MS. CAROLINE BLANCO: Is it a notice to modify or of an actual modification? MS. TONIA MOY: Well, it would depend on how I think MS. CAROLINE BLANCO: Because a modification would be a public process, anyway, would it not?

35 (Pages 134 to 137)

	138		140
1	MS. TONIA MOY: And not everybody is going to	1	consulting parties will be notified of proposed
2	know when it comes out.	2	modification, proposed/draft modification, along with the
3	MS. CAROLINE BLANCO: Right. So if that is the	3	public, right? Along with public notice?
4	way if it is normally a public process, what I am	4	MR. MIKE MABERRY: Other state agencies or
5	thinking about is if you normally would then publish the	5	whatever.
6	draft, maybe it would definitely we would commit to	6	DR. CRAIG FOLTZ: All this does is put the
7	or if you are comfortable committing to having notice be	7	consulting parties on the list.
8	provided at that juncture, specific notice to the	8	MS. CAROLINE BLANCO: Right. So they don't have
9	consulting parties	9	to search for it.
10	MS. ANNELLE AMARAL: Of intent?	10	MS. TONIA MOY: Right. Right.
11	MS. CAROLINE BLANCO: Of a draft modification,	11	MS. CAROLINE BLANCO: Okay.
12	right.	12	MS. ANNELLE AMARAL: So with respect to LRDP, in
13	MS. TONIA MOY: And how to get it, you know,	13	addition to normal public notice, when proposed
14	or	14	modification is to take place, notice shall be provided to
15	MS. CAROLINE BLANCO: Yeah.	15	consulting parties? Does that sort of
16	MR. MIKE MABERRY: I would definitely, you know,	16	MS. TONIA MOY: Yeah, to this MOA.
17	imagine that we would end up doing public meetings again.	17	MS. ANNELLE AMARAL: Okay.
18	I mean, you know	18	MS. CAROLINE BLANCO: We will work the language.
19	DR. CHARLIE FEIN: Yeah.	19	MS. TONIA MOY: Thank you.
20	MS. TONIA MOY: People don't know about it.	20	MS. ANNELLE AMARAL: Our consulting parties,
21	DR. CHARLIE FEIN: The original intent of the	21	this group. Okay.
22	LRDP was a ten-year plan.	22	And you brought up the issue of the road and the
23	MR. MIKE MABERRY: Right. Right.	23	issue of the viewplain. I heard explanations. Did you
24	MS. TONIA MOY: So it's going to be modified.	24	want some language in the MOA, or were you satisfied with
25	MR. MIKE MABERRY: Yeah.	25	the explanations that have been provided? I heard
	139		141
1	MS. TONIA MOY: Several times within.	1	MS. TONIA MOY: Well, the road has got to be
2	MS. CAROLINE BLANCO: Something to think about		
	8	2	yeah.
3	as far as	2	•
3 4	as far as MS. TONIA MOY: How you notify		MS. CAROLINE BLANCO: How about the viewshed, if we parse that out? Was that explanation a little bit
	as far as MS. TONIA MOY: How you notify MS. CAROLINE BLANCO: the logistics.	3	MS. CAROLINE BLANCO: How about the viewshed, if we parse that out? Was that explanation a little bit make things a little bit more clear?
4	as far as MS. TONIA MOY: How you notify MS. CAROLINE BLANCO: the logistics. MR. MIKE MABERRY: We're definitely open.	3 4	MS. CAROLINE BLANCO: How about the viewshed, if we parse that out? Was that explanation a little bit make things a little bit more clear? MS. TONIA MOY: Well, it does. But, you know, I
4 5 6 7	as far as MS. TONIA MOY: How you notify MS. CAROLINE BLANCO: the logistics. MR. MIKE MABERRY: We're definitely open. MS. CAROLINE BLANCO: Yes. I am just thinking	3 4 5 6 7	MS. CAROLINE BLANCO: How about the viewshed, if we parse that out? Was that explanation a little bit make things a little bit more clear? MS. TONIA MOY: Well, it does. But, you know, I really can't think of how that is going to be made into a
4 5 6 7 8	as far as MS. TONIA MOY: How you notify MS. CAROLINE BLANCO: the logistics. MR. MIKE MABERRY: We're definitely open. MS. CAROLINE BLANCO: Yes. I am just thinking maybe if it's I am thinking of it as analogous to like	3 4 5 6 7 8	MS. CAROLINE BLANCO: How about the viewshed, if we parse that out? Was that explanation a little bit make things a little bit more clear? MS. TONIA MOY: Well, it does. But, you know, I really can't think of how that is going to be made into a stipulation. Really, you don't want to put plants around
4 5 7 8 9	as far as MS. TONIA MOY: How you notify MS. CAROLINE BLANCO: the logistics. MR. MIKE MABERRY: We're definitely open. MS. CAROLINE BLANCO: Yes. I am just thinking maybe if it's I am thinking of it as analogous to like a general management plan for the Park Service or some of	3 4 5 6 7 8 9	MS. CAROLINE BLANCO: How about the viewshed, if we parse that out? Was that explanation a little bit make things a little bit more clear? MS. TONIA MOY: Well, it does. But, you know, I really can't think of how that is going to be made into a stipulation. Really, you don't want to put plants around it to hide it, right? So what do you do? I don't know
4 5 7 8 9 10	as far as MS. TONIA MOY: How you notify MS. CAROLINE BLANCO: the logistics. MR. MIKE MABERRY: We're definitely open. MS. CAROLINE BLANCO: Yes. I am just thinking maybe if it's I am thinking of it as analogous to like a general management plan for the Park Service or some of the other agencies I've dealt with in the past where they	3 4 5 6 7 8 9 10	MS. CAROLINE BLANCO: How about the viewshed, if we parse that out? Was that explanation a little bit make things a little bit more clear? MS. TONIA MOY: Well, it does. But, you know, I really can't think of how that is going to be made into a stipulation. Really, you don't want to put plants around it to hide it, right? So what do you do? I don't know what you can stipulate to do that. Maybe National Parks
4 5 6 7 8 9 10 11	as far as MS. TONIA MOY: How you notify MS. CAROLINE BLANCO: the logistics. MR. MIKE MABERRY: We're definitely open. MS. CAROLINE BLANCO: Yes. I am just thinking maybe if it's I am thinking of it as analogous to like a general management plan for the Park Service or some of the other agencies I've dealt with in the past where they do something similar to this. There is usually a draft	3 4 5 6 7 8 9 10 11	MS. CAROLINE BLANCO: How about the viewshed, if we parse that out? Was that explanation a little bit make things a little bit more clear? MS. TONIA MOY: Well, it does. But, you know, I really can't think of how that is going to be made into a stipulation. Really, you don't want to put plants around it to hide it, right? So what do you do? I don't know what you can stipulate to do that. Maybe National Parks has some ideas. I don't know.
4 5 6 7 8 9 10 11 12	as far as MS. TONIA MOY: How you notify MS. CAROLINE BLANCO: the logistics. MR. MIKE MABERRY: We're definitely open. MS. CAROLINE BLANCO: Yes. I am just thinking maybe if it's I am thinking of it as analogous to like a general management plan for the Park Service or some of the other agencies I've dealt with in the past where they do something similar to this. There is usually a draft that goes out. And if you provide specific notice, like	3 4 5 6 7 8 9 10 11 12	MS. CAROLINE BLANCO: How about the viewshed, if we parse that out? Was that explanation a little bit make things a little bit more clear? MS. TONIA MOY: Well, it does. But, you know, I really can't think of how that is going to be made into a stipulation. Really, you don't want to put plants around it to hide it, right? So what do you do? I don't know what you can stipulate to do that. Maybe National Parks has some ideas. I don't know. MS. ANNELLE AMARAL: So maybe is it sufficient
4 5 6 7 8 9 10 11 12 13	as far as MS. TONIA MOY: How you notify MS. CAROLINE BLANCO: the logistics. MR. MIKE MABERRY: We're definitely open. MS. CAROLINE BLANCO: Yes. I am just thinking maybe if it's I am thinking of it as analogous to like a general management plan for the Park Service or some of the other agencies I've dealt with in the past where they do something similar to this. There is usually a draft that goes out. And if you provide specific notice, like in addition to your normal public notice, you would just	3 4 5 6 7 8 9 10 11 12 13	MS. CAROLINE BLANCO: How about the viewshed, if we parse that out? Was that explanation a little bit make things a little bit more clear? MS. TONIA MOY: Well, it does. But, you know, I really can't think of how that is going to be made into a stipulation. Really, you don't want to put plants around it to hide it, right? So what do you do? I don't know what you can stipulate to do that. Maybe National Parks has some ideas. I don't know. MS. ANNELLE AMARAL: So maybe is it sufficient that we've raised the point in our discussion, we're going
4 5 6 7 8 9 10 11 12 13 14	as far as MS. TONIA MOY: How you notify MS. CAROLINE BLANCO: the logistics. MR. MIKE MABERRY: We're definitely open. MS. CAROLINE BLANCO: Yes. I am just thinking maybe if it's I am thinking of it as analogous to like a general management plan for the Park Service or some of the other agencies I've dealt with in the past where they do something similar to this. There is usually a draft that goes out. And if you provide specific notice, like in addition to your normal public notice, you would just agree to have a separate list that you would, you know	3 4 5 6 7 8 9 10 11 12 13 14	MS. CAROLINE BLANCO: How about the viewshed, if we parse that out? Was that explanation a little bit make things a little bit more clear? MS. TONIA MOY: Well, it does. But, you know, I really can't think of how that is going to be made into a stipulation. Really, you don't want to put plants around it to hide it, right? So what do you do? I don't know what you can stipulate to do that. Maybe National Parks has some ideas. I don't know. MS. ANNELLE AMARAL: So maybe is it sufficient that we've raised the point in our discussion, we're going to return to the point after we type up the motion,
4 5 6 7 8 9 10 11 12 13 14 15	as far as MS. TONIA MOY: How you notify MS. CAROLINE BLANCO: the logistics. MR. MIKE MABERRY: We're definitely open. MS. CAROLINE BLANCO: Yes. I am just thinking maybe if it's I am thinking of it as analogous to like a general management plan for the Park Service or some of the other agencies I've dealt with in the past where they do something similar to this. There is usually a draft that goes out. And if you provide specific notice, like in addition to your normal public notice, you would just agree to have a separate list that you would, you know MR. MIKE MABERRY: From the consulting parties	3 4 5 6 7 8 9 10 11 12 13 14 15	MS. CAROLINE BLANCO: How about the viewshed, if we parse that out? Was that explanation a little bit make things a little bit more clear? MS. TONIA MOY: Well, it does. But, you know, I really can't think of how that is going to be made into a stipulation. Really, you don't want to put plants around it to hide it, right? So what do you do? I don't know what you can stipulate to do that. Maybe National Parks has some ideas. I don't know. MS. ANNELLE AMARAL: So maybe is it sufficient that we've raised the point in our discussion, we're going to return to the point after we type up the motion, everything in the future meetings, and, hopefully, by
4 5 6 7 8 9 10 11 12 13 14 15 16	as far as MS. TONIA MOY: How you notify MS. CAROLINE BLANCO: the logistics. MR. MIKE MABERRY: We're definitely open. MS. CAROLINE BLANCO: Yes. I am just thinking maybe if it's I am thinking of it as analogous to like a general management plan for the Park Service or some of the other agencies I've dealt with in the past where they do something similar to this. There is usually a draft that goes out. And if you provide specific notice, like in addition to your normal public notice, you would just agree to have a separate list that you would, you know MR. MIKE MABERRY: From the consulting parties of this	3 4 5 6 7 8 9 10 11 12 13 14 15 16	MS. CAROLINE BLANCO: How about the viewshed, if we parse that out? Was that explanation a little bit make things a little bit more clear? MS. TONIA MOY: Well, it does. But, you know, I really can't think of how that is going to be made into a stipulation. Really, you don't want to put plants around it to hide it, right? So what do you do? I don't know what you can stipulate to do that. Maybe National Parks has some ideas. I don't know. MS. ANNELLE AMARAL: So maybe is it sufficient that we've raised the point in our discussion, we're going to return to the point after we type up the motion, everything in the future meetings, and, hopefully, by then, National Parks is here.
4 5 6 7 8 9 10 11 12 13 14 15 16 17	as far as MS. TONIA MOY: How you notify MS. CAROLINE BLANCO: the logistics. MR. MIKE MABERRY: We're definitely open. MS. CAROLINE BLANCO: Yes. I am just thinking maybe if it's I am thinking of it as analogous to like a general management plan for the Park Service or some of the other agencies I've dealt with in the past where they do something similar to this. There is usually a draft that goes out. And if you provide specific notice, like in addition to your normal public notice, you would just agree to have a separate list that you would, you know MR. MIKE MABERRY: From the consulting parties of this MS. CAROLINE BLANCO: Exactly.	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	MS. CAROLINE BLANCO: How about the viewshed, if we parse that out? Was that explanation a little bit make things a little bit more clear? MS. TONIA MOY: Well, it does. But, you know, I really can't think of how that is going to be made into a stipulation. Really, you don't want to put plants around it to hide it, right? So what do you do? I don't know what you can stipulate to do that. Maybe National Parks has some ideas. I don't know. MS. 	142		144
1	and, hopefully, they will join us again the following week	1	the construction equipment, the materials, and the trucks
2	at the consulting parties meeting.	2	and so forth to take it up, and some of the information
3	MS. ANNELLE AMARAL: Okay.	3	you are trying to seek from the park?
4	MS. CAROLINE BLANCO: That might be helpful.	4	MR. JEFF BARR: Yeah.
5	I am curious about whether HHF has any	5	MS. CAROLINE BLANCO: And, also, the intent of
6	particular concerns about historic road impacts.	6	once construction is done, if there is any damage to the
7	MS. TONIA MOY: We would be, yeah. That would	7	road or the bridges and so forth, how you intend to deal
8	be more, you know, our issue rather than Native Hawaiian	8	with that.
9	issues. We're more geared toward the architecture side of	9	DR. CHARLIE FEIN: Jeff, do you have that little
10	things. So, you know, as a more modern history site,	10	presentation we did for the park?
11	there would be concern to make sure that it gets impacted	11	MR. JEFF BARR: Yes, I do have.
12	as little as possible and any damage gets repaired. And	12	I am not sure whether or not that is the most
13	not so much another big concern is if the bridge gets	13	useful use of the time here now. I could pull that up and
14	severely damaged, then FHWA is going to come in and put a	14	we can go through.
15	40-foot wide bridge.	15	The number of trucks, the number of concrete
16	MR. MIKE MABERRY: Which the public and	16	trucks, we've kind of quantified that.
17	everybody doesn't want.	17	As I say, the park did do a study with the
18	MS. TONIA MOY: I know. That is you know,	18	Federal Highways Administration. And we cooperated in
19	that would be a that would be a big concern, I guess.	19	that. We gave them as much information as we could
20	MR. JEFF BARR: We are working hard right now,	20	possibly put together on what kinds of trucks, what kinds
21	trying to find out more about the bridge and to, as I say,	21	of loads, what kinds of weights, how many vehicles, during
22	open a dialogue with the park about how we go about	22	what periods, how frequently. And, again, some of this is
23	protecting it.	23	speculation because we don't have a contractor on board
24	DR. CHARLIE FEIN: Tonia, is there any other	24	yet, but based on the construction project and range of
25	historic structure that you are aware of along the	25	activities, we could reasonably postulate how many
	143		145
1	right-of-way or that is in the park that you think might	1	truckloads and what kinds they would be.
2	be an issue?	2	We shared that all with the Federal Highways
3	MS. TONIA MOY: You know, I haven't been up	3	Administration and with the park.
4	there for a long time. Maybe the lookout is probably over	4	And I do have that information here. That is
5	50 years old.	5	what Charlie is referring to. And I can put that up and
6	MR. MIKE MABERRY: But it's well off the road.	6	show you.
7	MS. TONIA MOY: Okay.	7	It is something like 450 concrete truckloads
8	MR. MIKE MABERRY: There's a huge parking lot	8	over a period of maybe those weren't all concrete
9	between the two, between the road.	9	but truckloads over a period of something like two years
10	MS. TONIA MOY: I don't know of any structure.	10	or three years of intensive onsite actual building
11	There's the visitor's center, but that is new, right?	11	construction period. And then some larger loads for items
12	MR. MIKE MABERRY: Yeah, the visitor center is	12	like the primary mirror and big pieces of the telescope,
13	new.	13	big pieces of the dome. Those extra-wide loads would
		14	
14	MR. JEFF BARR: One of the other concerns the		require special provisions, and extra heavy loads might
14 15	MR. JEFF BARR: One of the other concerns the park has is their entrance station which actually does	15	require special provisions for protection of the bridge,
14 15 16	MR. JEFF BARR: One of the other concerns the park has is their entrance station which actually does constrict the roadway. And it's not a historic structure.	15 16	require special provisions for protection of the bridge, getting past the entrance station, those kinds of issues.
14 15 16 17	MR. JEFF BARR: One of the other concerns the park has is their entrance station which actually does constrict the roadway. And it's not a historic structure. MR. MIKE MABERRY: No. It's like six years old.	15 16 17	require special provisions for protection of the bridge, getting past the entrance station, those kinds of issues. Those are exactly the sorts of things we would
14 15 16 17 18	MR. JEFF BARR: One of the other concerns the park has is their entrance station which actually does constrict the roadway. And it's not a historic structure. MR. MIKE MABERRY: No. It's like six years old. MR. JEFF BARR: But it's convenient to them to	15 16 17 18	require special provisions for protection of the bridge, getting past the entrance station, those kinds of issues. Those are exactly the sorts of things we would like to put more specifics around and be able to figure
14 15 16 17 18 19	MR. JEFF BARR: One of the other concerns the park has is their entrance station which actually does constrict the roadway. And it's not a historic structure. MR. MIKE MABERRY: No. It's like six years old. MR. JEFF BARR: But it's convenient to them to have it. And to us, in terms of the width of the road, it	15 16 17 18 19	require special provisions for protection of the bridge, getting past the entrance station, those kinds of issues. Those are exactly the sorts of things we would like to put more specifics around and be able to figure out how we are going to address those things in
14 15 16 17 18 19 20	MR. JEFF BARR: One of the other concerns the park has is their entrance station which actually does constrict the roadway. And it's not a historic structure. MR. MIKE MABERRY: No. It's like six years old. MR. JEFF BARR: But it's convenient to them to have it. And to us, in terms of the width of the road, it restricts. So that is another issue that the park has	15 16 17 18 19 20	require special provisions for protection of the bridge, getting past the entrance station, those kinds of issues. Those are exactly the sorts of things we would like to put more specifics around and be able to figure out how we are going to address those things in cooperation with the park, the stewards of the road.
14 15 16 17 18 19 20 21	MR. JEFF BARR: One of the other concerns the park has is their entrance station which actually does constrict the roadway. And it's not a historic structure. MR. MIKE MABERRY: No. It's like six years old. MR. JEFF BARR: But it's convenient to them to have it. And to us, in terms of the width of the road, it restricts. So that is another issue that the park has raised, and you probably maybe have seen in some of the	15 16 17 18 19 20 21	require special provisions for protection of the bridge, getting past the entrance station, those kinds of issues. Those are exactly the sorts of things we would like to put more specifics around and be able to figure out how we are going to address those things in cooperation with the park, the stewards of the road. And it's really the eleven-mile section of the
14 15 16 17 18 19 20 21 22	MR. JEFF BARR: One of the other concerns the park has is their entrance station which actually does constrict the roadway. And it's not a historic structure. MR. 1	uses of it and the potential historic value of it.	1	access around Haleakala National Park entrance station
2	And, again, I am not sure, I can put that	2	which could best be addressed in mutual consultation
3	information up if you are interested.	3	between an appropriate agent between ATST and staff
4	MS. TONIA MOY: But is it going to be so wide	4	representatives. He asked some specific questions in
5	that it will affect the bridges or the culverts or just	5	particular. Going down the email, does HNP expect to
6	that center?	6	pursue a supplemental pavement condition investigation for
7	MR. JEFF BARR: Well, it's close in terms of the	7	the Haleakala Highway. And followed up on some additional
8	bridge. The culverts don't really project up above the	8	question, or some additional issue there. Is there a
9	sides of the roads. So they don't really restrict the	9	threshold of vehicle trips or equivalent single-axle loads
10	width of the road. Some of our loads will be as wide as	10	as described in the FHWA report which would trigger impact
11	20 or 24 feet. So they will take up the entire width of	11	conditions. We are currently working on better definition
12	the road, and won't allow traffic coming in the other	12	of our construction logistics and could plan for
13	direction, or even behind it, at the same time.	13	particular truck types and target specific numbers of
14	So they go up very closely. They tend to go up	14	trips if those factors are considered critical.
15	at night when nothing else is happening. And maybe they	15	And then, what is the rated capacity of the box
16	can get up in one night, maybe they have to pull off the	16	culverts on Haleakala Highway. And some other additional
17	side of the road and allow full use of the road during	17	ones.
18	other periods. So those kinds of loads.	18	And what is the optimal means to provide
19	And that is only for something less than ten, I	19	clearance around the park entrance station for wide-load
20	can't really tell you how many, of those extra-wide loads	20	vehicles, and, you know, questions such as that.
21	would require those kinds of special protections and	21	And those questions still have not been
22	provisions.	22	answered. This was back in February. These were asked of
23	Most of the other loads will be a normal, as you	23	the park. The efforts have been to try to find out from
24	say, concrete truck or a flatbed truck carrying building	24	her what we could do to move that process forward. And
25	materials. And those kinds of loads are not uncommon	25	the response, basically, has been August 22nd.
	147		149
1	going up right now to the Air Force facility, like a bus.	1	DR. CRAIG FOLTZ: We reiterated it.
2	MR. MIKE MABERRY: Or the national park.	2	MS. CAROLINE BLANCO: Craig's May letter to the
3	MR. JEFF BARR: Or the national park or any	3	park you will see that again it reiterates the
4	other project. So those kinds of loads would be much more	4	attempt to try to find out the conditions of the road,
5	normal and could be accommodated in amongst the normal	5	that information, so we could be better prepared for that
6	kinds of traffic on the road.	6	August meeting even. And that was the response. So
7	The special kind of loads, we would have to work	7	MS. ANNELLE AMARAL: There's a comment back
8	with the park on how and when we take those up. And they	8	here.
9	would be a very limited quantity and for very short	9	MR. JEREMY WAGNER: Jeff, we were prepared to
10	durations. We would have to actually close off the road	10	try to get answers to those questions back in July of last
11	and utilize it for only the purposes of that one trip.	11	year when we met.
12	MS. CAROLINE BLANCO: Just so you are aware I	12	MR. JEFF BARR: We started back in July. We
13	think this is in the packet of correspondence back in	13	actually had a productive meeting with the maintenance
14	February, Jeff had some correspondence with Marilyn	14	superintendent for the park in September, something like
15	Parris. And, you know, she had requested that he deal	15	that. Then this letter that Caroline just read was an
16	with her directly and said it was taking up his	16	attempt to follow up on that, in February, because it
17	questions were taking up park resources and so forth. And	17	basically seemed to have fallen off their map. And then,
18	he had a response letter that asked some particular	18	basically, we have been stonewalled since then.
19	questions.	19 20	MS. CAROLINE BLANCO: And I think the reason for
20	The questions in my originating email have	20	even the delay between last summer and February is that there were back in July of last year, the park had said
21 22	potential bearing on the discussions about the issuance of a special use permit for ATST and the preservation of the	21	there may be a special use permit that is required for
22	road as a historic property. I don't mean to burden your	22	using the park road. There were several requests for that
24	staff, et cetera. There are issues, though, such as the	24	permit application, so that they would know how to what
25	recommended follow-up road condition investigation and	25	it was, what it entailed, how we could prepare for it.
15		1 2 3	it was, what it cinance, now we could prepare for it.

38 (Pages 146 to 149)

	150		152
1	And they didn't provide it.	1	MS. CAROLINE BLANCO: Yeah.
2	And there was some correspondence last fall in	2	MR. HINANO RODRIGUES: Do we have a defined list
3	addition. And they still hadn't provided it. Then this	3	of parties to the MOA?
4	February email exchange occurred.	4	MS. CAROLINE BLANCO: Well, we have a list of
5	I think it might have started in January. I	5	consulting parties.
6	didn't have the trail.	6	MR. HINANO RODRIGUES: Okay.
7	MR. JEFF BARR: And several attempts since then,	7	MS. CAROLINE BLANCO: The question came up
8	really, to follow up. Even as much as just a week or two	8	yesterday. Pua asked us who would be the signatories.
9	before this meeting, we were trying to make last-minute	9	And I answered her by saying certainly the hope would be
10	attempts to try to get them to make somebody, a resource	10	that NSF, SHPD, the Advisory Counsel, and anybody else who
11	person from the park, available to us just to talk about	11	would be interested in signing on to it. Of course, since
12	these things, even if we weren't trying to reach any	12	the project team is working so closely with NSF, sometimes
13	conclusions. And I think you can sense a certain amount	13	I forget to mention they are consulting parties as well.
14	of frustration on lack of communications from the park.	14	But IFA is and NSO is as well. And I am sure they would
15	DR. CHARLIE FEIN: Then there was the latest	15	be signatories to this as well.
16	email, there is no application.	16	I am not sure we clarified this. Maybe Craig
17	DR. CRAIG FOLTZ: There is no application form.	17	did. If NSF decides to fund this, the money would go to
18	MS. TONIA MOY: No such thing as a special use	18	NSO. NSO would then provide the money to IFA.
19	permit.	19	No? How does that work?
20	MS. CAROLINE BLANCO: Yeah. But they still	20	MR. MIKE MABERRY: No. NSO would build it.
21	intend to have a permit. There is no defined application	21	MS. CAROLINE BLANCO: Built in conjunction.
22	for it. As I think I mentioned earlier, we are awaiting	22	DR. CRAIG FOLTZ: But there would be a number of
23	some document that she said she was going to be preparing	23	sub awards.
24	for us. I think she said it would be available in two	24	MS. CAROLINE BLANCO: To IFA, right? Is that
25	weeks which this week would have been at least two	25	how it works?
	151		153
1	weeks, if not last week, I am not sure where it	1	DR. CRAIG FOLTZ: I am not sure exactly how
2	outlined the way to communicate and how they would	2	that
3	approach this. We're unsure exactly what she has in mind,	3	MR. MIKE MABERRY: We are not building it.
4	but look forward to seeing it.	4	MS. CAROLINE BLANCO: I'm sorry. IFA would be
5	MS. ANNELLE AMARAL: Just to give you a heads	5	the permittee.
6	up, my watch says it's about five until 2:00.	6	DR. CRAIG FOLTZ: The scope of this project
7	DR. CRAIG FOLTZ: Close.	7	includes instruments. And these instruments are being
8	MS. ANNELLE AMARAL: We had said we were going	8	developed in a lot of places. So there's small sub awards
9	to end at 2:00. Is it all right if we continue on, or do	9	to a lot of other institutions.
10	you want to bring this to an end?	10	MR. MIKE MABERRY: That is true.
11	DR. CRAIG FOLTZ: We're almost done with the	11	MS. CAROLINE BLANCO: But IFA's interest is that
12	MS. ANNELLE AMARAL: We're right here.	12	they are basically the land manager on top of the 18
13	MS. CAROLINE BLANCO: I think it would be	13	acres or University of Hawaii is?
14	helpful certainly, I think, most of us can stay around.	14	MR. MIKE MABERRY: We don't get money.
15 16	I am thinking, you know, we came to present to you this morning, we have been presenting you with a summary of	15 16	MS. CAROLINE BLANCO: No, no. I am just saying the interest.
17	yesterday, and going through these issues. Now I think we	17	MR. MIKE MABERRY: Oh, okay.
18	are done doing that.	18	MS. CAROLINE BLANCO: As a consulting party.
19	And you mentioned, Tonia, the additional park	19	So I don't know if that is helpful in terms of
20	resources issues. And to ask again, at this point, do you	20	who would be signing this.
21	have other issues that maybe we may want to look at?	21	Part of the problem up to these last couple of
22	MS. TONIA MOY: I think you've got your	22	days is we have been unclear of who was interested in
23	placeholders in there for the Park Service, so	23	working with us to try to achieve something.
24	MS. CAROLINE BLANCO: Yeah.	24	Sol, I would certainly hope that you would be
25	MR. HINANO RODRIGUES: Minor issue.	25	participating in this as well.
		1	

39 (Pages 150 to 153)

	156
1 And, you know, Tonia, you, too. 1 Kilakila o Haleakala.	
	Z: We did discuss the benefit to
3 know, we certainly would invite. 3 them of being a signatory.	, even if they disagreed.
4 MR. MIKE MABERRY: It seems we have a problem 4 MS. CAROLINE B	LANCO: Right.
<u>^</u>	Z: So Kilakila o Haleakala and
	ala, which I guess is not an
	ndividual consulting party.
	lting parties who were in sort
9 support the project. That is a hard one to educate people 9 opposition of the project v	who at least heard us say, for
10 on. 10 not the first time, that it w	as in their benefit to be a
11 MR. HINANO RODRIGUES: That is why I asked the 11 signatory.	
12 question. Because my fear is that the people who have a 12 MR. HINANO ROL	DRIGUES: Okay.
13 stake in this aren't here. And, you know, one thing no 13 MS. CAROLINE B	LANCO: It may be, also, Verna
14 one wants it hear is, oh, it's too late, where were you. 14 might be interested in sign	ning this. She seemed very
15 MS. CAROLINE BLANCO: Right. 15 MR. MIKE MABE	RRY: She would if she is here.
16 MR. HINANO RODRIGUES: I don't know that is 16 She, unfortunately, thinks	she's moving in fact, I
17 your program. This is your project kind of thing. But I 17 thought she was already g	gone.
18don't know how we can find a way to bring 'em in, even at18MS. SHARON LOA	ANDO-MONRO: No. She showed up
19 this stage of the game, because what you just said is 19 this morning. We should	put it for the record.
20 really important. So maybe they need to be educated on 20 I don't know if you	mentioned it, Tony.
21that. It's really important, you know. You don't have to21She showed up. She	e had an appointment to go to
22 agree, but, you know, at least we all sat down and we all 22 and said she apologizes for	or not being here. She wants to
	was going to say today and submit
24 you are not agreeing to the project itself, but we all 24 it. So we should just get t	
25agreed we made an effort to mitigate, minimize and25MR. MIKE MABE	RRY: Isn't she moving to the
155	157
1yeah, mitigate and minimize.1mainland, though?	
	ANDO-MONRO: While she's still
3 about how we can engage? I mean, I look at this now and 3 here	
°	RRY: Even so, she is still Native
e e	able to be a signatory regardless
6 you know, with people who or organizations that do have 6 where she lives.	
7 an interest and would want to express that interest. 7 Sorry for bringing i	•
	BLANCO: No, it's not
9 a reason why Kilakila o Haleakala is not here? 9 resident-based.	
	RRY: And it's like it hit me,
11MS. ANNELLE AMARAL: They couldn't make it11she's moving, and I am like12today. They came vesterday to give their comment because12MS. ANNELLE AMARALICAN	-
12today. They came yesterday to give their comment because12MS. ANNELLE Al13they could not come today, they said.13Vegas.	MARAL: Well, at least it's not Las

40 (Pages 154 to 157)

	158		160
1	they can still be against it.	1	MR. JEFF BARR: Mine, too.
2	MS. ANNELLE AMARAL: Can we use some of these	2	MS. TONIA MOY: They can actually be parties and
3	people who have come and commented to get the word out to	3	not sign?
4	their supporters?	4	MS. CAROLINE BLANCO: That's right.
5	MR. HINANO RODRIGUES: That would be the best	5	MR. JEFF BARR: They can do that, too.
6	approach, is to utilize whoever showed up, Mikahala,	6	MS. CAROLINE BLANCO: Unfortunately for them,
7	Warren and Kiope. I don't know Verna. I know the other	7	they wouldn't have the same rights
8	ones. I went to college with them. We all have our	8	MR. MIKE MABERRY: Standing, yeah.
9	Hawaiian studies degrees, more or less at the same time.	9	MS. CAROLINE BLANCO: to enforce it. You
10	So I know them. And I am happy that, you know, they would	10	know, that is obviously their choice. Maybe we should
11	be signatories because those are people that I have	11	just, before I forget it, write it down. Perhaps consider
12	respect for.	12	provision
13	MS. CAROLINE BLANCO: I don't know if Kiope	13	MS. ANNELLE AMARAL: Certainly if
14	expressed an interest in signing anything yet. It was	14	MS. CAROLINE BLANCO: noting objection,
15	unclear. I mean, he made certain suggestions to be	15	right?
16	provided in an MOA that he thought would be helpful. But,	16	MR. MIKE MABERRY: Do you have any experience in
17	at the same time, he said he was not in support of the	17	this?
18	project. So I am not sure he understood that, you know,	18	MS. ANNELLE AMARAL: I mean, if Camille is an
19	perspective of you can still be against it, but you can	19	attorney with NHLC, Kilakila o Haleakala, she was here
20	sign it and have enforceable rights.	20	representing them, wouldn't she understand that one need
21	MR. MIKE MABERRY: We provided that information	21	not be supportive of the project and could be a signatory?
22	to him in writing and email before.	22	MS. CAROLINE BLANCO: That is true. But I think
23	MS. CAROLINE BLANCO: I am sure that is true.	23	I tend to find in this area and, you know, if anybody
24	MR. MIKE MABERRY: In painful detail.	24	else has any other experience, then please share it
25	MS. CAROLINE BLANCO: I am not sure it was at	25	there is often confusion about that point. So
	159		161

41 (Pages 158 to 161)

	162		164
1	MS. TONIA MOY: Can you sign with objection or	1	us who love place names and for whom place names help to
2	something like that?	2	educate people about the history of the place, this is
3	MS. CAROLINE BLANCO: Well, I just wonder if we	3	something Hawaiians don't give up quickly, so it's there
4	could have a whereas clause that says, you know, Kiope	4	to push you forward.
5	Raymond, dah, dah, dah, whoever it is, these consulting	5	There is a question
6	parties object to the construction of the ATST telescope,	6	DR. CRAIG FOLTZ: The facilitator takes the rap.
7	however they agreed to these conditions if it is built.	7	MR. MIKE MABERRY: I thought you convinced us to
8	So at least their position is preserved, or at least it's	8	put the signs up, anyhow.
9	recognized somehow.	9	MS. ANNELLE AMARAL: What we have been known to
10	MR. HINANO RODRIGUES: So maybe in the form of	10	do is to actually bring cut rock into areas with names of
11	an update as to what happened, as of July 17, we're here,	11	places and just place it there, whether your rules allow
12	we worked on MOA issues, what is an MOA. The only reason	12	it or not. We are a very aggressive people.
13	why I know what an MOA is, is because of what I do. But	13	With respect to preferential hiring, there is
14	everybody out there don't know what that is.	14	some question about can we give preference to one race
15	MS. CAROLINE BLANCO: Right.	15	versus another. So there is some question. Though, this
16	MR. HINANO RODRIGUES: So if you explain that,	16	is not having to do with a lack of commitment, it's more
17	and why you have an MOA and why it's important for them to	17	there are some other things we need to look into here.
18	be a part of that process, you might have a different	18	DR. CRAIG FOLTZ: It a placeholder.
19	attitude and behavior on their part.	19	MS. ANNELLE AMARAL: So it's a place saver.
20	MR. MIKE MABERRY: Good idea.	20	Cultural monitors I think we've dealt with.
21	MR. JEFF BARR: In fact, in the MOA, the word	21	There is certainly a commitment to it.
22	"agreement" in there sounds kind of dubious to them, I am	22	Sense of place training. There already is a
23	sure. It sounds like agreement.	23	commitment to that, so that certainly is there.
24	DR. CRAIG FOLTZ: I am finding how that happens.	24	And including practices that are outlined in the
25	MR. JEFF BARR: Words, go figure.	25	long-range development plan, the parties yesterday did not
	163		165
1	MR. MIKE MABERRY: Ed Stephens, when he signed	1	want to just sort of create this long list of things that
2	as a party concurring on the agreement wrote in, note, we	2	we know is listed somewhere else, or give the appearance
3	signed this MOA with the understanding that it is not an	3	that we are simply padding. I think that was the thought.
4	endorsement of the proposed Keck Outrigger project, in	4	But there is
5	principle we object to any activity, and blah, blah, blah,	5	DR. CRAIG FOLTZ: We may change our mind.
6	and the Hawaii Conservation District Use Application, dah,	6	MS. ANNELLE AMARAL: We may change our mind. We
7	dah, dah. Anyhow, he actually wrote it in.	7	leave that one open, too.
8	DR. CRAIG FOLTZ: That is what I was thinking	8	It looks like we've kind of covered everything,
9	about.	9	yes?
10	MS. CAROLINE BLANCO: And that may be something,	10	Let me ask one more time. Is there any burning
11	too.	11	issue you think we need to add today?
12	MS. ANNELLE AMARAL: Okay. Have we sort of	12	This is not the last day, by any means. We're
13	addressed I know you have to leave. But we've put the	13	coming back for two more meetings sometime in August. But
14	placeholder there for the issues you've raised. We've	14	I am ready to add anything else that you may have. If
15	added some of your concerns here.	15	not, then
16	Let me say quickly, with respect to the place	16	MR. JEFF BARR: I want to ask one no, please.
17	names here, one of the issues that was raised was the idea	17	MR. SOL KAHO'OHALAHALA: No. I just think this
18	of being able to give appropriate Hawaiian place names to	18	is beginning step. And what is going to happen is that
19	the roads up at Mauna Kea.	19	there will emerge other statements or issues once there is
20	DR. CRAIG FOLTZ: Haleakala.	20	something put out.
21	MS. ANNELLE AMARAL: Sorry. Haleakala.	21	So let this be the first pass at this. And it's
22	The larger issue here is one of the roads are	22	going to encourage a few others to start coming forward.
23	not owned by any one entity and is a collaborative effort	23	Because if they feel strongly about any one component that
24 25	that is needed with state and feds and multiple agencies.	24	they believe is either lacking or not being sufficiently covered in any of these, it will come forward.
20	So this is easier said than done. However, for those of	25	covered in any or mese, it will come for ward.

42 (Pages 162 to 165)

	166		168
1	MR. JEFF BARR: I was just going to ask, because	1	discussed.
2	of the most intensive discussion of the road, and Tonia	2	DR. CRAIG FOLTZ: In broad terms. I mean, I
3	has said that HHF, one of their big concerns would be the	3	worry about us hitting hot buttons that we don't know are
4	road, the most intensive discussion is likely to be with	4	hot.
5	the park on those dates, that aren't necessarily the full	5	MS. CAROLINE BLANCO: If we could, if
6	consulting party consultation. Would it be appropriate to	6	MS. TONIA MOY: Just the idea that they think
7	bring anybody else other than the park into those	7	you finalized it when you didn't.
8	discussions, do you think?	8	MS. CAROLINE BLANCO: I could run some of the
9	MS. CAROLINE BLANCO: I think since that one is	9	language by some of you, just to be sure that I am
10	focused mostly on the SUP	10	handling it in a sensitive way. If we are drafting this
11	MR. JEFF BARR: Is it? Okay.	11	letter, I would not want to be presumptuous about trying
12	MS. CAROLINE BLANCO: Special use permit.	12	to, you know, talk about a konohiki when I just heard
13	There's overlap because, you know, the road issues are	13	about it yesterday. So I think it's a great concept, but
14	involved, it's the reason for the SUP. And it's also one	14	I want to be careful. I want to be careful in how I
15	of the reasons for I mean, it also covers the issues	15	present that.
16	involved in impacts to the park. So my hope is that, in	16	And I have a question, also, given the comments
17	addition, that either they can provide us with information	17	you had made, Sol, and the nodding of heads that I saw
18	that we can present to the rest of the consulting parties,	18	about how, once this gets out and people understand, that
19	if they cannot make it, on the 27th and 28th, or, best	19	they may want a role in this and see that there is some
20	case scenario, they can join us on the 27th and 28th.	20	forward movement here. Do you feel that it is possible to
21	DR. CRAIG FOLTZ: But not join us on the 22nd.	21	ultimately reach an MOA that the SHPO could sign, and
22	MS. CAROLINE BLANCO: Oh, other parties? No.	22	Advisory Counsel we will talk to in Washington, and,
23	I am talking about the park joining the rest of	23	hopefully, the SHPO will talk with as well with them?
24	the group.	24	MR. HINANO RODRIGUES: Before I answer that
25	DR. CRAIG FOLTZ: I understand. But I thought	25	question, you are talking about sending something out and
	167		169
1	Jeff's	1	then talking about the importance of being a signatory to
2	MS. CAROLINE BLANCO: That is why I say I think	2	an MOA?
3	it should be a meeting with the park, follow-up on the	3	MS. CAROLINE BLANCO: Right.
4	SUP. But, hopefully, that can inform the meetings the	4	MR. HINANO RODRIGUES: Maybe even take maybe a
5	following week. And best case scenario, the park will	5	step back. The importance not necessarily of being a
6	join us on the 27th, 28th.	6	signatory to an MOA, but actually being a part of the
7	MR. JEFF BARR: That is probably the better way.	7	process itself.
8	MS. ANNELLE AMARAL: Is there a commitment,	8	MS. CAROLINE BLANCO: Okay.
9	then, to taking some of the notes that have come out of	9	MR. HINANO RODRIGUES: That way it is a little
10	this discussion and circulating it with all consulting	10	bit less strong.
11	parties?	11	DR. CRAIG FOLTZ: Right.
12	MS. CAROLINE BLANCO: Yeah. My sense from what	12	MS. CAROLINE BLANCO: Then just explaining that
13	I wrote down here is that we would send out another letter	13	signatories do have enforcement rights.
14	to the consulting parties. It would include several	14	MR. HINANO RODRIGUES: Yeah. That way, those
15	different things. It would explain what is an MOA, what	15	who don't want to be signatory to it can say, at least I
16	is the purpose of it, explain the benefits of signing it,	16	participated in it and I didn't compromise or you know,
17	is the purpose of it, explain the benefits of signing it,		I didn't compromise my position or you know, it gives
	that you get the ability to enforce the terms of it, that	17	I didit compromise my position of you know, it gives
18		17	them a way to stand more neutral.
18 19	that you get the ability to enforce the terms of it, that		
	that you get the ability to enforce the terms of it, that you can still object to the underlying project but agree	18	them a way to stand more neutral.
19	that you get the ability to enforce the terms of it, that you can still object to the underlying project but agree to sign the MOA, and outline the progress of the meetings	18 19	them a way to stand more neutral. MS. CAROLINE BLANCO: So it's more of like note
19 20	that you get the ability to enforce the terms of it, that you can still object to the underlying project but agree to sign the MOA, and outline the progress of the meetings we've had today and yesterday, and, also, announce the	18 19 20	them a way to stand more neutral. MS. CAROLINE BLANCO: So it's more of like note that signatories have enforcement rights, but that is the
19 20 21	that you get the ability to enforce the terms of it, that you can still object to the underlying project but agree to sign the MOA, and outline the progress of the meetings we've had today and yesterday, and, also, announce the next meetings for August 27th and 28th.	18 19 20 21	them a way to stand more neutral. MS. CAROLINE BLANCO: So it's more of like note that signatories have enforcement rights, but that is the side piece of it. The main part of it is that it is a
19 20 21 22	that you get the ability to enforce the terms of it, that you can still object to the underlying project but agree to sign the MOA, and outline the progress of the meetings we've had today and yesterday, and, also, announce the next meetings for August 27th and 28th. DR. CRAIG FOLTZ: I think we need to be very	18 19 20 21 22	them a way to stand more neutral. MS. CAROLINE BLANCO: So it's more of like note that signatories have enforcement rights, but that is the side piece of it. The main part of it is that it is a benefit to being a part of the process.
19 20 21 22 23	that you get the ability to enforce the terms of it, that you can still object to the underlying project but agree to sign the MOA, and outline the progress of the meetings we've had today and yesterday, and, also, announce the next meetings for August 27th and 28th. DR. CRAIG FOLTZ: I think we need to be very careful with specifics.	18 19 20 21 22 23	them a way to stand more neutral. MS. CAROLINE BLANCO: So it's more of like note that signatories have enforcement rights, but that is the side piece of it. The main part of it is that it is a benefit to being a part of the process. MR. HINANO RODRIGUES: That you participated in

43 (Pages 166 to 169)

	170		172
1	So your question regarding what was the	1	sentences and not understand, but that is what will hit
2	question? I'm sorry.	2	them.
3	MS. CAROLINE BLANCO: As far as do you see that	3	MS. CAROLINE BLANCO: Right.
4	there is	4	MR. HINANO RODRIGUES: So this, I think, kind of
5	MR. HINANO RODRIGUES: Oh, yeah. Well, we have	5	this is everybody's talk. This is what the people on
6	to look at it that way, yeah. We got to be optimistic.	6	Maui understand. And that is why I am optimistic. I
7	MS. CAROLINE BLANCO: Right.	7	think that we can move, we can start movement again.
8	MR. HINANO RODRIGUES: So, yeah, it's hoped it	8	MS. CAROLINE BLANCO: That is good. That is
9	is possible. We have to work with the idea that it is.	9	good.
10	MS. CAROLINE BLANCO: Right.	10	MR. HINANO RODRIGUES: I hope.
11	MR. HINANO RODRIGUES: If not, we could just	11	MS. CAROLINE BLANCO: I hope so, too. I mean,
12	pack up now and leave and that is it.	12	sort of the hope is that, at the end of the two meetings
13	MS. CAROLINE BLANCO: Right.	13	in August, we will be able to actually have a draft and
14	MR. HINANO RODRIGUES: We don't want to do that.	14	will be able to start exchanging the draft for comment and
15	MS. CAROLINE BLANCO: Right. It's just been	15	work to finalization of it. That is the hope that I would
16	hard to gauge a bit, to find out, when parties haven't	16	put forward.
17	been responsive, are they interested.	17	MR. HINANO RODRIGUES: Personally, I don't think
18	This, to me, has been very encouraging because	18	any of us in this room truly understand how the people
19	it seems like we can really have some benefits to be able	19	feel yet. But I think in the next at the next two
20	to give back to the community, and yet, you know, still	20	meetings we will. Provided the dissemination of this
21	work something out that is going to be a win-win for	21	information is successful, I think we will.
22	everybody. And so it gives me hope. But I just wanted to	22	MS. CAROLINE BLANCO: Okay.
23	calibrate that a little bit and just see.	23	MR. SOL KAHO'OHALAHALA: The only thing I would
24	MR. HINANO RODRIGUES: You will be able to find	24	add is I think that along the lines of what was already
25	that out in the next two meetings.	25	expressed, is that there needs to be some manner in which
	171		173
1	MS. CAROLINE BLANCO: Okay.	1	this information is digested and interpreted at a level
2	MR. HINANO RODRIGUES: You can gauge from what	2	that is going to be understood by our community. Too
3	happens. You can look at the dynamics as to the 27th and	3	often these discussions happen at a higher level
4	the 28th of August and then get the answer to that	4	terminology. You lose a lot of the people who are most
5	question right then.	5	concerned because they simply just don't understand
6	MS. CAROLINE BLANCO: What do you think is a	6	definitions or concepts that are being utilized in these
7	realistic expectation for the 27th and 28th as far as, at	7	more formal discussions. So the key to that is
8	the end of the 28th, what will we have accomplished in the	8	communicating back to the community at a level that they
9	best case scenario? Or a realistic scenario, let's put it	9	understand.
10	that way?	10	And I am not saying that they are unable to
11	MR. HINANO RODRIGUES: Based on what I heard	11	comprehend, but oftentimes I find, having been in
12	and I think I've seen some correspondence because they	12	political arena, is that we talk at the level that is
13	normally CC stuff that go to Oahu back to Maui. And based	13	understood by the entire system of lawmakers, but it's not
1	on what I heard you express yourself this morning, about	14	often understood at the community level. And they get
14	on what I neural you express yoursen and morning, about		
14 15	not having response, responses	15	confused. One word might just turn them off altogether.
		15 16	But the importance of it is in you know, in the meat of
15	not having response, responses		
15 16	not having response, responses MS. CAROLINE BLANCO: Right.	16	But the importance of it is in you know, in the meat of
15 16 17	not having response, responses MS. CAROLINE BLANCO: Right. MR. HINANO RODRIGUES: I think you will after	16 17	But the importance of it is in you know, in the meat of all of it. If they are not able to understand that, then
15 16 17 18	not having response, responses MS. CAROLINE BLANCO: Right. MR. HINANO RODRIGUES: I think you will after today, you know.	16 17 18	But the importance of it is in you know, in the meat of all of it. If they are not able to understand that, then that one word could do more damage, because no one took
15 16 17 18 19	not having response, responses MS. CAROLINE BLANCO: Right. MR. HINANO RODRIGUES: I think you will after today, you know. MS. CAROLINE BLANCO: That is good. MR. HINANO RODRIGUES: Something like this is a little more concrete for the people of Maui to understand	16 17 18 19	But the importance of it is in you know, in the meat of all of it. If they are not able to understand that, then that one word could do more damage, because no one took the time to explain a little bit more in terms of how we understand. So that is what I think, in my view, along with
15 16 17 18 19 20 21 22	not having response, responses MS. CAROLINE BLANCO: Right. MR. HINANO RODRIGUES: I think you will after today, you know. MS. CAROLINE BLANCO: That is good. MR. HINANO RODRIGUES: Something like this is a little more concrete for the people of Maui to understand versus this. You know, this is for those of us with	16 17 18 19 20 21 22	But the importance of it is in you know, in the meat of all of it. If they are not able to understand that, then that one word could do more damage, because no one took the time to explain a little bit more in terms of how we understand. So that is what I think, in my view, along with the fact that you'll disseminate this, if there is no
15 16 17 18 19 20 21 22 23	not having response, responses MS. CAROLINE BLANCO: Right. MR. HINANO RODRIGUES: I think you will after today, you know. MS. CAROLINE BLANCO: That is good. MR. HINANO RODRIGUES: Something like this is a little more concrete for the people of Maui to understand versus this. You know, this is for those of us with college degrees and graduate degrees. But the person	16 17 18 19 20 21 22 23	But the importance of it is in you know, in the meat of all of it. If they are not able to understand that, then that one word could do more damage, because no one took the time to explain a little bit more in terms of how we understand. So that is what I think, in my view, along with the fact that you'll disseminate this, if there is no communication at the community level that will help them
15 16 17 18 19 20 21 22	not having response, responses MS. CAROLINE BLANCO: Right. MR. HINANO RODRIGUES: I think you will after today, you know. MS. CAROLINE BLANCO: That is good. MR. HINANO RODRIGUES: Something like this is a little more concrete for the people of Maui to understand versus this. You know, this is for those of us with	16 17 18 19 20 21 22	But the importance of it is in you know, in the meat of all of it. If they are not able to understand that, then that one word could do more damage, because no one took the time to explain a little bit more in terms of how we understand. So that is what I think, in my view, along with the fact that you'll disseminate this, if there is no

44 (Pages 170 to 173)

	174		176
1	DR. CRAIG FOLTZ: But let's be careful. How	1	in a way that they will listen to you. So it's a matter,
2	does that happen? The meetings in August are aimed at the	2	I guess, of evaluating, analyzing the list of consulting
3	consulting parties.	3	parties, and figuring out who is the best people you send
4	MR. SOL KAHO'OHALAHALA: Okay. Your consulting	4	in to talk to them to prepare them for the upcoming
5	parties are going to be part of community entities and	5	meetings, answer their questions, respond.
6	organizations. So you can start with bringing them in,	6	MR. SOL KAHO'OHALAHALA: Hinano said something
7	but they are going to bring in a slew of other people.	7	about talk story. That is the level at which I think that
8	DR. CRAIG FOLTZ: You are saying that will	8	I want to be supportive of, in the talk story level, with
9	happen naturally?	9	these individuals, these organizations. Because that is
10	MR. SOL KAHO'OHALAHALA: Not naturally. I think	10	the level at which I think we understand that there can be
11	part of what I see, my responsibility will be, is to touch	11	an exchange and an openness and a degree of trust, you
12	bases with these consulting parties and looking at their	12	know. It's always important. So I think I can lend
13	leadership, and then taking their lead as to how this is	13	support in that area.
14	going to be further disseminated into their organizations.	14	MS. CAROLINE BLANCO: I greatly appreciate that.
15	To me, it's important that I be there in that process.	15	MR. MIKE MABERRY: Would it be appropriate,
16	So what he expressed earlier is that, you know,	16	would it be acceptable to suggest that the next couple of
17	there needs to be a manner in which you are introduced	17	meetings are talk story meetings with an emphasis on
18	into the organization and into the family, into the	18	working on mitigation, or not use that word, use something
19	entity. And it's not just I sent you a formal notice.	19	else? Would that just not look right coming from the NSF
20	And it's that process that is going to build that kind of	20	in a letter?
21	opportunity for building support and trust. And it's that	21	MS. ANNELLE AMARAL: Are you talking about the
22	process that I hope that we will be involved in that helps	22	two meetings, 27th, 28th?
23	to explain fully to the point that everyone understands	23	MR. MIKE MABERRY: Yeah.
24	and that brings us all at the same level.	24	MS. ANNELLE AMARAL: Those are not talk story
25	MS. CAROLINE BLANCO: Do you have thoughts, to	25	meetings, right?
	175		177
1	speak for NSF, how we can do that to better communicate	1	MR. MIKE MABERRY: By his definition, it is talk
2	with the public or with the consulting parties, at least,	2	story.
3	in this process, Sol, since we're in Washington?	3	MR. SOL KAHO'OHALAHALA: Earlier, you had asked
4	MR. SOL KAHO'OHALAHALA: Depending on who your	4	me, yesterday, what could be accomplished by August. I
5	parties are. Obviously, you know who the more involved	5	think my hope is that I would be involved in these talk
6	and the more sophisticated your parties are that you have	6	story opportunities.
7	direct relationships with. But there are others that are	7	MR. MIKE MABERRY: I am melding the two. No. I
8	not as involved or as are not as savvy and informed.	8	understand what you were saying, but I was asking, based
9	And that is the ones that I think represent the broader	9	on what you had said, that people might have been willing
10	base of people. If they are not informed, then they are	10	to sit down at this table if they thought it was more of a
11	not understanding, then you have that out there that will	11	talk story rather than a mitigation discussion. And so
12		12	that is what prompted me to ask is it appropriate in
	drive a broader community of supporters or non-supporters.		
13	So it's that component that I think I would like to be at	13	sending out the letters or the invitations for the next
14	So it's that component that I think I would like to be at least helpful in helping to bring clarity, to bring	14	meetings to suggest something along those lines? Or is
14 15	So it's that component that I think I would like to be at least helpful in helping to bring clarity, to bring understanding, and then just let it continue from that	14 15	meetings to suggest something along those lines? Or is that going to look funny coming from the NSF in
14 15 16	So it's that component that I think I would like to be at least helpful in helping to bring clarity, to bring understanding, and then just let it continue from that point.	14 15 16	meetings to suggest something along those lines? Or is that going to look funny coming from the NSF in Washington, D.C. to come to Maui to do a talk story. You
14 15 16 17	So it's that component that I think I would like to be at least helpful in helping to bring clarity, to bring understanding, and then just let it continue from that point. MS. ANNELLE AMARAL: Let me jump in here.	14 15 16 17	meetings to suggest something along those lines? Or is that going to look funny coming from the NSF in Washington, D.C. to come to Maui to do a talk story. You know where I am coming from?
14 15 16 17 18	So it's that component that I think I would like to be at least helpful in helping to bring clarity, to bring understanding, and then just let it continue from that point. MS. ANNELLE AMARAL: Let me jump in here. Someone like Sol going to the Royal Order and	14 15 16 17 18	meetings to suggest something along those lines? Or is that going to look funny coming from the NSF in Washington, D.C. to come to Maui to do a talk story. You know where I am coming from? MR. JEFF BARR: Well, looks sort of patronizing
14 15 16 17 18 19	So it's that component that I think I would like to be at least helpful in helping to bring clarity, to bring understanding, and then just let it continue from that point. MS. ANNELLE AMARAL: Let me jump in here. APPENDIX C(4): TRANSCRIPTS - SECTION 106 MEETING, UH IfA, MAIKALANI FACILITY, JUNE 17, 2008

1	reason why, I am sure, you can sort of see this as a	1	mainland. Ten seconds is unacceptable. And I stood there
2	question. I am concerned that at the close of the	2	and I was losing my patience. And I told the guy, you
3	meetings on the 27th and 28th, we do make progress, which	3	know what, I'll come back tomorrow, Sunday, and I will buy
4	would be great, but then things are continued on, and it's	4	the scoop net, I will just take the other ten items, by
5	not until six months later that an MOA really starts to	5	then you have a price. He looked at me and he said, why,
6	materialize. And part of the concern I have while I am	6	do you have someplace important to go like the airport.
7	absolutely delighted with the progress we have made over	7	And it clicked. This guy is so right. He is so right.
8	the last two days, and it gives me tremendous hope that we	8	You know, it takes me back to, you know, the
9	will have very productive meetings later on. And with the	9	best time is the right time. And, obviously, this is not
10	efforts that you have talked about to occur in the	10	it, you know. So I know that is a very weak answer to
11	interim, I think that really makes things very positive.	11	give you, but I found, in my two and-a-half years of being
12	And I don't want to be too pushy, but, at the same time, I	12	frustrated with the inefficiencies of life here in Hawaii,
13	want to be cognizant of some practical realities of moving	13	that is the way it is.
14	the process toward closure and how do we do that in a	14	MS. CAROLINE BLANCO: Right.
15	sensitive way, and, yet, still, you know, make it happen.	15	MR. HINANO RODRIGUES: If I want something out
16	So that is a question I pose to the two of you. And I	16	of it, I got to change and live my life the way they live
17	want to be sensitive, as I said, but I also do want to	17	their life. That is it. I can't change that.
18	make sure it moves to closure.	18	MS. CAROLINE BLANCO: And I appreciate that. I
19	MR. HINANO RODRIGUES: You have to be prepared	19	am trying to get my arms around a process that has already
20	for that to happen, to be perfectly honest.	20	been going on for over three years and how to provide
21	MS. CAROLINE BLANCO: If you were to	21	advice to clients in terms of what will I mean,
22	MR. HINANO RODRIGUES: You have to be prepared	22	obviously, we can't all predict the future. We don't know
23	to maybe accept the fact that you might the 106 process	23	what is going to happen. It could be that everybody wants
24	might be extended, let's say, another six months. It's a	24	to sign that day, who knows. Likely not. But to allow
25	very Hawaiian thing. The Hawaiian thing is it's always	25	them to be as patient, what will give them enough
	179		181
1		1	incentive to continue on for an additional several months,
1	about the process, never the end, yeah. And if you deal	2	or whatever it might end up being? In other words, where
2	with the process, in the end, the end comes out okay.	3	is the credibility the two moving forward, that it's okay,
3 4	It's if you push it that it doesn't come okay. In Hawaii, we at least in the Hawaiian culture, we say that the	4	trust me, just keep on moving forward and we will be able
5	best time is the right time. And we don't quite know when	5	to see what we can do?
6	is the right time. But it will appear, you know, sooner	6	MR. HINANO RODRIGUES: Do you to respond to
7	or later.	7	that, let me ask you this question.
8	And so that being said, I mean, I know that	8	MS. CAROLINE BLANCO: Sure.
9	takes a lot of patience on our part, but, you know, that	9	MR. HINANO RODRIGUES: Do you feel good about
10	is why we live to old age here in Hawaii, because we live	10	what happened today?
11	that. But to be honest, since you asked a very frank	11	MS. CAROLINE BLANCO: Yes.
12	question, my frank answer is I think you should be	12	MR. HINANO RODRIGUES: Okay. There's your
13	prepared to maybe go on a little bit longer, you know.	13	answer right there.
14	And like I said, I I share I empathize with your	14	MS. CAROLINE BLANCO: I do.
15	frustration. Because that is part of my daily job, too,	15	MR. HINANO RODRIGUES: So it's up to you now to
16	in finding closure to everything.	16	convince your higher ups that you feel good about what
17	But I've learned.	17	happened today and you feel good about what is going to
18	Let me give you an example. I lived on the	18	happened today and you reel good about what is going to happen at the next two meetings, and then may be another
		19	six months. Now it's your job to convince them of that,
19	mainland for 20 years. So I became very westernized. And	20	
20 21	I came home two years ago. And I went to Kmart. And I	20	trust me. Okay.
22	bought ten items. And the tenth item was a scoop net	21	MS. CAROLINE BLANCO: I appreciate it. MR. SOL KAHO'OHALAHALA: I was just going to add
22 23	because I wanted to go catch 'opae, shrimp, in the stream. And the tenth item just didn't have the price tag on it.	22	and say that we have a period of two months. That is why,
23 24	And the tenth hern just didn't have the price tag on it. And I stood there. And I swear it was ten minutes. Ten	24	when you asked me that question, what can be done by
24 25	minutes standing for a price check is unacceptable on the	24	August, and the only thing in my mind is that it's a
· /)	minutes staticing for a drice check is infaccediable on the	1 L J	August, and the only time in my filling is that it's a

46 (Pages 178 to 181)

APPENDIX C(4): TRANSCRIPTS - SECTION 106 MEETING, UH IFA, MAIKALANI FACILITY, JUNE 17, 2008

	182		184
1	period of time in which we will have an opportunity to be	1	CERTIFICATE
2	engaged in these kinds of talk story.	2	
3	MS. CAROLINE BLANCO: Right.	3	
4	MR. SOL KAHO'OHALAHALA: If you are asking me	4	
5	about what the outcome will be in this timeframe, I don't	5	
6	have a clear answer for you. But I can tell you that in	6	
7	the process of utilizing that time that there will be	7	I, TONYA MCDADE, a Court Reporter of the State
8	active talk story sessions. It may be at the end of the	8	of Hawaii, do hereby certify that the proceedings
9	two months that we have been successful in having good	9	contained herein were taken by me in machine shorthand and
10	talk story sessions, that you will find that that point in	10 11	thereafter was reduced to print by means of computer-aided transcription; that the foregoing represents, to the best
11	August that you will have support. But whether or not I	12	of my ability, a true and accurate transcript of the
12	can define that, whether or not I can guarantee that, that	13	proceedings had in the foregoing matter.
13	is something I am not prepared to say other than I have a	14	I further certify that I am not an attorney for
14	period of time of which to be involved, you know.	15	any of the parties hereto, nor in any way concerned with
15	MS. CAROLINE BLANCO: I really appreciate your	16	the cause.
16	candor. Thank you.	17	
17	And I may be asking you questions, running	18	DATED this day of, 2008.
18	things by, as we talked about before, to make sure it's	19	
19	done in a sensitive manner.	20	Signature on File
20	MR. SOL KAHO'OHALAHALA: You know, like we are		
21	just the fact that we are looking at the consulting	21	Tonya McDade, RPR, CRR, CBC Hawaii CSR #447
22	parties. I am not necessarily looking at consulting	22	Hawaii CSK #447
23	parties as I am looking at who the specific layers of	23	
24	people that are necessary to help support the consultant	24	
25	on this, you know. So while you are defining that as	25	
	183		
1	specific entities or individuals, I am looking at the		
2	network of who those parties are.		
3	And it may be that they are not involved at all,		
4	but they are important people to have these discussions		
5	with, so that it can be part of the foundation for		
6	consulting parties.		
7	MS. ANNELLE AMARAL: Uh-huh.		
8	MR. SOL KAHO'OHALAHALA: So if you don't make a		
9	contact or you don't have an opportunity to identify and		
10	build that foundation, then there is nothing to hold your		
11	consulting parties, yeah.		
12	MS. CAROLINE BLANCO: Right.		
13	MR. SOL KAHO'OHALAHALA: So it's that part that		
14	I find more important than identification of the		
15	consulting parties. So		
16	MS. CAROLINE BLANCO: I appreciate that.		
17	Thank you both so much.		
18	MS. ANNELLE AMARAL: Yes. Thank you. It's a		
19	good productive day. Thank you for your time.		
20	We are going to bring this to a close now?		
21	Thank you.

	1	You are talking to a room that is filled with
		people. And I am sorry, we had just done the
		introductions. So just accept that there are lots of
		people in the room.
		MS. MARTHA CATLIN: Wonderful.
		MS. CAROLINE BLANCO: Martha, I think this is
		Caroline. I think maybe just the entities
		MS. ANNELLE AMARAL: All right. Then we will go
		around and at least do the entities that are gathered
		here. We have three representatives from Kilakila o
		Haleakala. We have a representative from the Office of
		Hawaiian Affairs, Public Policy Division. We have a
		representative from the State two representatives from
	14	the State historic sites
		MULTIPLE SPEAKERS: Preservation District.
		MS. ANNELLE AMARAL: Yeah, State Historic
		Preservation Division.
		MS. CAROLINE BLANCO: And, of course, Charlene
		is here, Martha and Betsy, from the Advisory Council.
		MS. ANNELLE AMARAL: Yes. And we have Shad Kar
		who represents a number of organizations, but here with us
		here today as a Native American Advisory Group.
		MS. CHARLENE DWIN VAUGHN: To the Advisory
		Council.
	25	MS. ANNELLE AMARAL: Yes, to the Advisory
		1
	1	Council.
	2	We also have representatives from the National
	3	Parks, Haleakala National Parks, including the Director,
	4	in the guise of Marilyn Parris.
	5	Representative from Hawaiian Historic
	6	Foundation.
	7	MS. TONIA MOY: Historic Hawaii Foundation.
	8	MS. ANNELLE AMARAL: Historic Hawaii Foundation
	9	Mahalo.
· · · · · · · · · · · · · · · · · · ·	10	Have I left any other organizations out?
	11	DR. CRAIG FOLTZ: National Science Foundation.
	12	MS. ANNELLE AMARAL: And the very small group
		from the National Science Foundation.
with which we would be a reaction of the second		DR. CRAIG FOLTZ: And the project.
		MS. ANNELLE AMARAL: And the project.
	16	DR. CRAIG FOLTZ: And they are distinct.
MS. ANNELLE AMARAL: Thank you.	17	MS. ANNELLE AMARAL: Okay. Thank you and
Aloha. This is Hawaii. Who do we have on the	18	welcome.
		And as we've explained, this is a conversation,
	19	
line?		it's a dialogue. And so I've asked people who need to
line? MS. BETSY MERRITT: Betsy Merritt, National	20	it's a dialogue. And so I've asked people who need to speak to indicate. And we will try not to step over one
line? MS. BETSY MERRITT: Betsy Merritt, National Trust for Historic Preservation in Washington, D.C.	20 21	speak to indicate. And we will try not to step over one
line? MS. BETSY MERRITT: Betsy Merritt, National Trust for Historic Preservation in Washington, D.C. MS. ANNELLE AMARAL: Aloha, Betsy. Is there	20 21 22	speak to indicate. And we will try not to step over one another so all voices can be heard.
line? MS. BETSY MERRITT: Betsy Merritt, National Trust for Historic Preservation in Washington, D.C.	20 21	speak to indicate. And we will try not to step over one
	<text><text><text><text><text><text><text></text></text></text></text></text></text></text>	finish their thought, finish what it is they have to say before we recognize someone else. So if you do want to speak, if you could sort of indicate it, and I will make eye contact with you, and we will get to you as soon as people have finished saying what they need to say. So the bottom line is, we let people finish what they have to say. We don't interrupt them as much as possible.3I arm going to try to keep an eye open to make sure that everyone has an opportunity to speak at least once before we return back to someone to speak a second time. So no one person dominates the conversation. There are going to be times, however, when people have specialized knowledge, and a question is raised, and someone is going to indicate, "I have the answer to that question." So then you will see me recognize that person just spoke. That resource person may end up speaking more than once because they have the specialized knowledge. But in the end, let's all sort of be patient with one another.211112We will try to take frequent breaks. In part, because it is difficult for the court reporter to always be listening and taking notes. So I am going to do that. I would note, also, that there is a bathroom outside and down the hall. If you need to use the facilities, just go. You don't need permission for that. And before we begin the consultation, we need to sort of set some foundation of where we have been and what we have accomplished.9Nort?10Mix charlen the Advisory Council and, also, Betsy11Martha Catlin from the Advisory Council and, also, Betsy13Merritt from the National Trust for Historic Preservation.14So I wonder if we could just take a quick break to make sure that they are included

So those were the 13 environmental protocols that were considered. In considering those protocols, the various surveys, analyses, studies, inventories, and so on that were conducted from 2005 through August of 2006, were all designed to elicit a determination in the document as to	1 2 3 4 5 6 7 8 9 10 11	2 the exception of the potential impact to historic and cultural resources. In post-DEIS or post-draft environment impact statement period, we received numerous comments on draft. There were many suggestions and recommendations as to how to further analyze and further develop a means of mitigating the impacts we described. We conducted additional studies in the intervening year and-a-half, including a supplemental cultural impact assessment, which was a rather large undertaking and produced a rather large document, which is
1 2 3 4 5 6 7 8 9 10 11 12	19 particular viewplain and visual impact; water resources for the local and island-wide aquifer system; hazardous materials and solid waste; infrastructure and utilities; noise; air quality; socioeconomics and environmental justice, specifically for the Island of Maui; public services and facilities. So those were the 13 environmental protocols that were considered. In considering those protocols, the various surveys, analyses, studies, inventories, and so on that were conducted from 2005 through August of 2006, were all designed to elicit a determination in the document as to whether there would be significant impact to those	1 2 3 4 5 6 7 8 9 10 11 12	2 the exception of the potential impact to historic and cultural resources. In post-DEIS or post-draft environment impact statement period, we received numerous comments on draft. There were many suggestions and recommendations as to how to further analyze and further develop a means of mitigating the impacts we described. We conducted additional studies in the intervening year and-a-half, including a supplemental cultural impact assessment, which was a rather large undertaking and produced a rather large document, which is publicly available.
1 2 3 4 5 6 7 8 9 10 11 12 13	19 particular viewplain and visual impact; water resources for the local and island-wide aquifer system; hazardous materials and solid waste; infrastructure and utilities; noise; air quality; socioeconomics and environmental justice, specifically for the Island of Maui; public services and facilities. So those were the 13 environmental protocols that were considered. In considering those protocols, the various surveys, analyses, studies, inventories, and so on that were conducted from 2005 through August of 2006, were all designed to elicit a determination in the document as to whether there would be significant impact to those resources, significant impact, but impact which was	1 2 3 4 5 6 7 8 9 10 11 12 13	2 the exception of the potential impact to historic and cultural resources. In post-DEIS or post-draft environment impact statement period, we received numerous comments on draft. There were many suggestions and recommendations as to how to further analyze and further develop a means of mitigating the impacts we described. We conducted additional studies in the intervening year and-a-half, including a supplemental cultural impact assessment, which was a rather large undertaking and produced a rather large document, which is publicly available. We also produced a supplemental entomological
1 2 3 4 5 6 7 8 9 10 11 12 13 14	19 particular viewplain and visual impact; water resources for the local and island-wide aquifer system; hazardous materials and solid waste; infrastructure and utilities; noise; air quality; socioeconomics and environmental justice, specifically for the Island of Maui; public services and facilities. So those were the 13 environmental protocols that were considered. In considering those protocols, the various surveys, analyses, studies, inventories, and so on that were conducted from 2005 through August of 2006, were all designed to elicit a determination in the document as to whether there would be significant impact to those resources, significant impact, but impact which was mitigatable, less than significant impact, no impact, or,	1 2 3 4 5 6 7 8 9 10 11 12 13 14	22 the exception of the potential impact to historic and cultural resources. In post-DEIS or post-draft environment impact statement period, we received numerous comments on draft. There were many suggestions and recommendations as to how to further analyze and further develop a means of mitigating the impacts we described. We conducted additional studies in the intervening year and-a-half, including a supplemental cultural impact assessment, which was a rather large undertaking and produced a rather large document, which is publicly available. We also produced a supplemental entomological study, supplemental botanical studies. We did an
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15	19 particular viewplain and visual impact; water resources for the local and island-wide aquifer system; hazardous materials and solid waste; infrastructure and utilities; noise; air quality; socioeconomics and environmental justice, specifically for the Island of Maui; public services and facilities. So those were the 13 environmental protocols that were considered. In considering those protocols, the various surveys, analyses, studies, inventories, and so on that were conducted from 2005 through August of 2006, were all designed to elicit a determination in the document as to whether there would be significant impact to those resources, significant impact, but impact which was mitigatable, less than significant impact, no impact, or, actually, beneficial impact. So those were the various	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15	2 the exception of the potential impact to historic and cultural resources. In post-DEIS or post-draft environment impact statement period, we received numerous comments on draft. There were many suggestions and recommendations as to how to further analyze and further develop a means of mitigating the impacts we described. We conducted additional studies in the intervening year and-a-half, including a supplemental cultural impact assessment, which was a rather large undertaking and produced a rather large document, which is publicly available. We also produced a supplemental entomological study, supplemental botanical studies. We did an additional viewplain analysis, and several other analyses
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	19 particular viewplain and visual impact; water resources for the local and island-wide aquifer system; hazardous materials and solid waste; infrastructure and utilities; noise; air quality; socioeconomics and environmental justice, specifically for the Island of Maui; public services and facilities. So those were the 13 environmental protocols that were considered. In considering those protocols, the various surveys, analyses, studies, inventories, and so on that were conducted from 2005 through August of 2006, were all designed to elicit a determination in the document as to whether there would be significant impact to those resources, significant impact, but impact which was mitigatable, less than significant impact, no impact, or, actually, beneficial impact. So those were the various criteria that were used to assess the various impacts to	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	2 the exception of the potential impact to historic and cultural resources. In post-DEIS or post-draft environment impact statement period, we received numerous comments on draft. There were many suggestions and recommendations as to how to further analyze and further develop a means of mitigating the impacts we described. We conducted additional studies in the intervening year and-a-half, including a supplemental cultural impact assessment, which was a rather large undertaking and produced a rather large document, which is publicly available. We also produced a supplemental entomological study, supplemental botanical studies. We did an additional viewplain analysis, and several other analyses as well. Those are all going to appear in the Final
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	19 particular viewplain and visual impact; water resources for the local and island-wide aquifer system; hazardous materials and solid waste; infrastructure and utilities; noise; air quality; socioeconomics and environmental justice, specifically for the Island of Maui; public services and facilities. So those were the 13 environmental protocols that were considered. In considering those protocols, the various surveys, analyses, studies, inventories, and so on that were conducted from 2005 through August of 2006, were all designed to elicit a determination in the document as to whether there would be significant impact to those resources, significant impact, but impact which was mitigatable, less than significant impact, no impact, or, actually, beneficial impact. So those were the various criteria that were used to assess the various impacts to the resources that I mentioned.	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	21 the exception of the potential impact to historic and cultural resources. In post-DEIS or post-draft environment impact statement period, we received numerous comments on draft. There were many suggestions and recommendations as to how to further analyze and further develop a means of mitigating the impacts we described. We conducted additional studies in the intervening year and-a-half, including a supplemental cultural impact assessment, which was a rather large undertaking and produced a rather large document, which is publicly available. We also produced a supplemental entomological study, supplemental botanical studies. We did an additional viewplain analysis, and several other analyses as well. Those are all going to appear in the Final Environmental Impact Statement.
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	19 particular viewplain and visual impact; water resources for the local and island-wide aquifer system; hazardous materials and solid waste; infrastructure and utilities; noise; air quality; socioeconomics and environmental justice, specifically for the Island of Maui; public services and facilities. So those were the 13 environmental protocols that were considered. In considering those protocols, the various surveys, analyses, studies, inventories, and so on that were conducted from 2005 through August of 2006, were all designed to elicit a determination in the document as to whether there would be significant impact to those resources, significant impact, but impact which was mitigatable, less than significant impact, no impact, or, actually, beneficial impact. So those were the various criteria that were used to assess the various impacts to the resources that I mentioned. In the document, we identified various	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	2 the exception of the potential impact to historic and cultural resources. In post-DEIS or post-draft environment impact statement period, we received numerous comments on draft. There were many suggestions and recommendations as to how to further analyze and further develop a means of mitigating the impacts we described. We conducted additional studies in the intervening year and-a-half, including a supplemental cultural impact assessment, which was a rather large undertaking and produced a rather large document, which is publicly available. We also produced a supplemental entomological study, supplemental botanical studies. We did an additional viewplain analysis, and several other analyses as well. Those are all going to appear in the Final Environmental Impact Statement. So where the process is at now is, as Caroline
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	19 particular viewplain and visual impact; water resources for the local and island-wide aquifer system; hazardous materials and solid waste; infrastructure and utilities; noise; air quality; socioeconomics and environmental justice, specifically for the Island of Maui; public services and facilities. So those were the 13 environmental protocols that were considered. In considering those protocols, the various surveys, analyses, studies, inventories, and so on that were conducted from 2005 through August of 2006, were all designed to elicit a determination in the document as to whether there would be significant impact to those resources, significant impact, but impact which was mitigatable, less than significant impact, no impact, or, actually, beneficial impact. So those were the various criteria that were used to assess the various impacts to the resources that I mentioned. In the document, we identified various environmental concerns. Some of which did lead us to conclude or issue a determination in the document that	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	2 the exception of the potential impact to historic and cultural resources. In post-DEIS or post-draft environment impact statement period, we received numerous comments on draft. There were many suggestions and recommendations as to how to further analyze and further develop a means of mitigating the impacts we described. We conducted additional studies in the intervening year and-a-half, including a supplemental cultural impact assessment, which was a rather large undertaking and produced a rather large document, which is publicly available. We also produced a supplemental entomological study, supplemental botanical studies. We did an additional viewplain analysis, and several other analyses as well. Those are all going to appear in the Final Environmental Impact Statement. So where the process is at now is, as Caroline said, it awaits Section 106 input to the Section 4, which
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	19 particular viewplain and visual impact; water resources for the local and island-wide aquifer system; hazardous materials and solid waste; infrastructure and utilities; noise; air quality; socioeconomics and environmental justice, specifically for the Island of Maui; public services and facilities. So those were the 13 environmental protocols that were considered. In considering those protocols, the various surveys, analyses, studies, inventories, and so on that were conducted from 2005 through August of 2006, were all designed to elicit a determination in the document as to whether there would be significant impact to those resources, significant impact, but impact which was mitigatable, less than significant impact, no impact, or, actually, beneficial impact. So those were the various criteria that were used to assess the various impacts to the resources that I mentioned. In the document, we identified various environmental concerns. Some of which did lead us to conclude or issue a determination in the document that there would be significant impact.	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	2 the exception of the potential impact to historic and cultural resources. In post-DEIS or post-draft environment impact statement period, we received numerous comments on draft. There were many suggestions and recommendations as to how to further analyze and further develop a means of mitigating the impacts we described. We conducted additional studies in the intervening year and-a-half, including a supplemental cultural impact assessment, which was a rather large undertaking and produced a rather large document, which is publicly available. We also produced a supplemental entomological study, supplemental botanical studies. We did an additional viewplain analysis, and several other analyses as well. Those are all going to appear in the Final Environmental Impact Statement. So where the process is at now is, as Caroline said, it awaits Section 106 input to the Section 4, which is the impact section.
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	19 particular viewplain and visual impact; water resources for the local and island-wide aquifer system; hazardous materials and solid waste; infrastructure and utilities; noise; air quality; socioeconomics and environmental justice, specifically for the Island of Maui; public services and facilities. So those were the 13 environmental protocols that were considered. In considering those protocols, the various surveys, analyses, studies, inventories, and so on that were conducted from 2005 through August of 2006, were all designed to elicit a determination in the document as to whether there would be significant impact to those resources, significant impact, but impact to those resources, significant impact. So those were the various criteria that were used to assess the various impacts to the resources that I mentioned. In the document, we identified various environmental concerns. Some of which did lead us to conclude or issue a determination in the document that there would be significant impact. Impacts to historic and cultural resources were	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	2 the exception of the potential impact to historic and cultural resources. In post-DEIS or post-draft environment impact statement period, we received numerous comments on draft. There were many suggestions and recommendations as to how to further analyze and further develop a means of mitigating the impacts we described. We conducted additional studies in the intervening year and-a-half, including a supplemental cultural impact assessment, which was a rather large undertaking and produced a rather large document, which is publicly available. We also produced a supplemental entomological study, supplemental botanical studies. We did an additional viewplain analysis, and several other analyses as well. Those are all going to appear in the Final Environmental Impact Statement. So where the process is at now is, as Caroline said, it awaits Section 106 input to the Section 4, which is the impact section. And, also, we will then be able to further
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	19 particular viewplain and visual impact; water resources for the local and island-wide aquifer system; hazardous materials and solid waste; infrastructure and utilities; noise; air quality; socioeconomics and environmental justice, specifically for the Island of Maui; public services and facilities. So those were the 13 environmental protocols that were considered. In considering those protocols, the various surveys, analyses, studies, inventories, and so on that were conducted from 2005 through August of 2006, were all designed to elicit a determination in the document as to whether there would be significant impact to those resources, significant impact, but impact which was mitigatable, less than significant impact, no impact, or, actually, beneficial impact. So those were the various criteria that were used to assess the various impacts to the resources that I mentioned. In the document, we identified various environmental concerns. Some of which did lead us to conclude or issue a determination in the document that there would be significant impact.	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	21 the exception of the potential impact to historic and cultural resources. In post-DEIS or post-draft environment impact statement period, we received numerous comments on draft. There were many suggestions and recommendations as to how to further analyze and further develop a means of mitigating the impacts we described. We conducted additional studies in the intervening year and-a-half, including a supplemental cultural impact assessment, which was a rather large undertaking and produced a rather large document, which is publicly available. We also produced a supplemental entomological study, supplemental botanical studies. We did an additional viewplain analysis, and several other analyses as well. Those are all going to appear in the Final Environmental Impact Statement. So where the process is at now is, as Caroline said, it awaits Section 106 input to the Section 4, which is the impact section. And, also, we will then be able to further complete the cumulative impact section of the document as

6 (Pages 18 to 21)

1	22		24
1	So that is where we are with the document as of	1	Also, educational programs. There was
2	right now.	2	expression of interest in promoting educational programs.
3	MS. CAROLINE BLANCO: It's Caroline again.	3	Signage.
4	What I wanted to also say is Charlie is speaking	4	There were other comments about some of the
5	in NEPA language. The two processes, the Section 106	5	three proposals that were given, the formal proposals that
6	process and the NEPA process, we're working hand-in-hand.	6	were given in advance of those meetings.
7	More emphasis had been given because of the significance	7	I think copies of those proposals have gotten to
8	of the cultural impacts to the 106 process. So we have	8	all of you. If not, they are also posted on the website
9	had additional meetings in addition to those that were	9	as well.
10	also covered through the NEPA process.	10	If you do not have internet access, we can make
11	And so I think that, you know, another way to	11	arrangements to provide them to you. Any of the
12	look at this is to say that the impacts that were	12	information that is on the website, we can make
13	identified in 106 terms were considered to be adverse.	13	arrangements to provide that to you.
14	And so at this point, what we take a look at is how do we	14	And so of the three proposals that were out
15	resolve those adverse impacts, which leads us to this	15	there, one was for the Maui Community College and had a
16	meeting today, and looking under the Section 106	16	suite of programs that could be available to help with
17	regulations, the avoidance, minimization and mitigation.	17	Native Hawaiian education and science and technology and
18	Also, just to note, in May, the Advisory Council	18	furtherance.
19	came out with their protocols dealing with how to do	19	But, actually, I think, with regard to these,
20	consultation with Hawaiian organizations. And we have	20	Craig, if you want to give just a very quick summary of
21	been working with that, those protocols, and trying to	21	those three proposals that were provided. And then I
22	work within that context.	22	believe, hopefully, we can move forward, unless folks have
23	And, again, that is part of the reason why we	23	questions.
24	are here today, hoping to reach out to the Native Hawaiian	24	DR. CRAIG FOLTZ: I am Craig Foltz, again,
	community, to try to learn more about how we can go	25	Division of Astronomy at NSF.
25	community, to try to rear more about now we can go	20	Division of Astronomy at 1851.

1	MS. CAROLINE BLANCO: And, Craig this is	1	MS. LEIOHU RYDER: Questions before we this
2	Caroline again if you wanted to explain to folks what a	2	is Leiohu Ryder questions before we
3	lifetime would look like.	3	MS. CAROLINE BLANCO: Before Ms. Parris is go
4	DR. CRAIG FOLTZ: Okay.	4	to give some remarks about the Park's role. And then the
5	MS. CAROLINE BLANCO: Because that was a	5	SHPO would like to and then, also, the Advisory Council.
6	separate NSF idea as well.	6	And then get into a discussion of ideas and thoughts that
7	DR. CRAIG FOLTZ: Sure. Sure.	7	people have.
8	The telescope and I don't want to I won't	8	MS. LEIOHU RYDER: I have a question. How do
9	get too technical, unless you ask me to, in which case I	9	you mitigate spiritualty?
LO	will get more technical than you want. And I will refer	10	MS. CAROLINE BLANCO: Well
11	to the resource people who will even baffle me. The	11	MS. LEIOHU RYDER: How do you mitigate
12	telescope is designed to study the real outstanding	12	spirituality?
13	problem a set of outstanding problems with respect to	13	How do you mitigate the inalienable right of a
14	solar physics. These are problems that actually bear on	14	consciousness of Haleakala?
15	life on Earth.	15	MS. CAROLINE BLANCO: If I could maybe help t
		16	address that a bit.
16	For somebody who is an astronomer, who never	17	Caroline, again.
	really considered anything closer than a billion light	18	I guess I would ask in what ways do you see the
8	years, in my research career, it's actually kind of	19	impacts impinging upon your ability to practice and your
19	refreshing to talk about something that has actual impact	20	ability to have spirituality?
20	on the Earth. And that has to do with the phenomenon	20	Charlene.
21	called solar activity, which is a whole suite of	22	MS. CHARLENE DWIN VAUGHN: I think we sho
22	phenomenon. Basically, sunspots, solar flares and giant		
23	eruptions from the sun that spew out literally trillions	23	finish the background. Because we've got a finite amount
24	of tons of material at 3,000 to 5,000 kilometers per	24	of time. So this conversation needs to flow orderly. So
25	second. We don't understand the genesis of that. And	25	let's wrap it up, understand the resources, and then I
	27		
1	this telescope is being designed to study solar activity.	1	think these questions flow.
2	It turns out that the sun has a very cyclic	2	MS. LEIOHU RYDER: All right.
3	behavior with respect to activity. And it varies on a	3	MS. CHARLENE DWIN VAUGHN: You'll have a l
4	22-year cycle. During that 22 years, sunspots, the number	4	context.
5			
5	of sunspots increases, decreases, increases and decreases	5	MS. LEIOHU RYDER: That is why I asked, because
5	of sunspots increases, decreases, increases and decreases again. And during that time, the magnetic field of the	5 6	I wanted to make sure that came out.
	•		I wanted to make sure that came out.
6	again. And during that time, the magnetic field of the	6	I wanted to make sure that came out.
6 7	again. And during that time, the magnetic field of the sun switches.	6 7	I wanted to make sure that came out. MS. BETSY MERRITT: This is Betsy Merritt. I am having a hard time hearing Caroline and Charlene in particular.
6 7 8 9	again. And during that time, the magnetic field of the sun switches. We want to be able to ensure that we can observe	6 7 8	I wanted to make sure that came out. MS. BETSY MERRITT: This is Betsy Merritt. I am having a hard time hearing Caroline and Charlene in
6 7 8 9 10	again. And during that time, the magnetic field of the sun switches. We want to be able to ensure that we can observe the sun for at least two solar cycles, 34 years. 1	And I just wanted to add something for to be	1	Foundation and all the groups involved. We are working on
2	sure it's clarified. That at the last meeting that you	2	drafting a Memorandum of Understanding, an MOU, that wil
3	were here, I notice that in the minutes they I think	3	lay out how we go about working through that special use
4	or in your letter noted that there were several of us who	4	process.
5	were for avoidance, and then you went on, like today, and	5	A Special Use Permit does require all NEPA
6	explained the discussion or ideas about mitigation. And	6	compliance, it requires compliance with the National
7	so I wanted to be clear that the reason there were only a	7	Historic Preservation Act and with the Endangered Species
8	few of us there is because only a few of us were included	8	Act. So it's 106, Section 7, and NEPA.
9	in that invitation letter for that meeting to who	9	Our goal is to work together on the compliance
10	represented avoidance. And that the focus seemed to be	10	with the National Science Foundation, but, in the end, the
11	underlining on focusing on people who have come along more	11	compliance will have to meet Park Service standards. And,
12	recently, at least one of them meaning entity of Maui	12	again, we are drafting a Memorandum of Understanding right
13	Community College in focusing on proposals which may be	13	now, how we will work through that process to do the
14	focusing on mitigation.	14	compliance and allow the that access.
15	And so I just wanted to make sure that, you	15	Is that it? Does that cover what we talked
16	know, that has been now Craig sent that second letter,	16	about last week?
17	including what he entitled interested parties. And my	17	We are this is our first opportunity for 106
18	correspondence to Craig was that majority of these people	18	consultation. We don't know the impacts to the historic
19	under interested parties, in his letter, were actually	19	road. So that is kind of a void for us right now. We
20	individuals who submitted requests to be Section 106	20	will have to look at mitigation issues such as we better
21	consultants toward somewhere between September and the end	21	understand what the impacts to that historic structure are
22	of 2006. So I think I may have said in the last letter,	22	going to be, by not only the construction of this project,
23	it was 2007. But when I went back and checked, I think it	23	but the operation of the facility. The Special Use Permit
24	was 2006.	24	will cover would fall under construction and operation.
25	So I am glad that he extended that including	25	So

So we are very encouraged that there has been an	5 6 7 8 9 10 11 12 13 14 15 16 17	out there. There is nothing that is off the table. MS. ANNELLE AMARAL: Good. Thank you. At this point, then, I think sufficient background information has been provided. And we would like to invite the parties to begin to address some of what you have heard. And we will record it, we will try to talk about it and let's see where we go. Who wants to start? Shad, you want to start? MR. SHAD KANE: Shad Kane. I am the Native Hawaiian rep of the Native American Advisory Group. Before I share my thoughts, I just want to say a couple things to kind of clarify how I see my role. I
7 8 9 10 11 12 13 14 15 16 17 18	an undertaking as defined in the Council's regulations that requires the National Science Foundation to coordinate with stakeholders or consulting parties to evaluate how to avoid, minimize and mitigate adverse effects. I think it's very important and germane that the SHPO identify those historic properties because that is, at this juncture, the focus of what the SHPO and the Advisory Council are looking at with regard to what are the historic properties that we need to deal with in the secess. So we are very encouraged that there has been an ongoing collaboration, but consultation to us is very	5 6 7 8 9 10 11 12 13 14 15 16 17 18	out there. There is nothing that is off the table. MS. ANNELLE AMARAL: Good. Thank you. At this point, then, I think sufficient background information has been provided. And we would like to invite the parties to begin to address some of what you have heard. And we will record it, we will try to talk about it and let's see where we go. Who wants to start? Shad, you want to start? MR. SHAD KANE: Shad Kane. I am the Native Hawaiian rep of the Native American Advisory Group. Before I share my thoughts, I just want to say a couple things to kind of clarify how I see my role. I also want to say that I don't like burning bridges and the door is always open. So irregardless, you know, how I feel about different things, I think it's important that
7 8 9 10 11 12 13 14 15 16 17 18 19	an undertaking as defined in the Council's regulations that requires the National Science Foundation to coordinate with stakeholders or consulting parties to evaluate how to avoid, minimize and mitigate adverse effects. I think it's very important and germane that the SHPO identify those historic properties because that is, at this juncture, the focus of what the SHPO and the Advisory Council are looking at with regard to what are the historic properties that we need to deal with in the secess. So we are very encouraged that there has been an ongoing collaboration, but consultation to us is very distinct and different from NEPA in that NEPA is	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	out there. There is nothing that is off the table. MS. ANNELLE AMARAL: Good. Thank you. At this point, then, I think sufficient background information has been provided. And we would like to invite the parties to begin to address some of what you have heard. And we will record it, we will try to talk about it and let's see where we go. Who wants to start? Shad, you want to start? MR. SHAD KANE: Shad Kane. I am the Native Hawaiian rep of the Native American Advisory Group. Before I share my thoughts, I just want to say a couple things to kind of clarify how I see my role. I also want to say that I don't like burning bridges and the door is always open. So irregardless, you know, how I
7 8 9 10 11 12 13 14 15 16 17 18 19 20	an undertaking as defined in the Council's regulations that requires the National Science Foundation to coordinate with stakeholders or consulting parties to evaluate how to avoid, minimize and mitigate adverse effects. I think it's very important and germane that the SHPO identify those historic properties because that is, at this juncture, the focus of what the SHPO and the Advisory Council are looking at with regard to what are the historic properties that we need to deal with in the secess. So we are very encouraged that there has been an ongoing collaboration, but consultation to us is very distinct and different from NEPA in that NEPA is disclosure. It tells people things. Consultation is	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	out there. There is nothing that is off the table. MS. ANNELLE AMARAL: Good. Thank you. At this point, then, I think sufficient background information has been provided. And we would like to invite the parties to begin to address some of what you have heard. And we will record it, we will try to talk about it and let's see where we go. Who wants to start? Shad, you want to start? MR. SHAD KANE: Shad Kane. I am the Native Hawaiian rep of the Native American Advisory Group. Before I share my thoughts, I just want to say a couple things to kind of clarify how I see my role. I also want to say that I don't like burning bridges and the door is always open. So irregardless, you know, how I feel about different things, I think it's important that
7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	an undertaking as defined in the Council's regulations that requires the National Science Foundation to coordinate with stakeholders or consulting parties to evaluate how to avoid, minimize and mitigate adverse effects. I think it's very important and germane that the SHPO identify those historic properties because that is, at this juncture, the focus of what the SHPO and the Advisory Council are looking at with regard to what are the historic properties that we need to deal with in the secess. So we are very encouraged that there has been an ongoing collaboration, but consultation to us is very distinct and different from NEPA in that NEPA is disclosure. It tells people things. Consultation is conversation, where you seek views and perspectives. And	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	out there. There is nothing that is off the table. MS. ANNELLE AMARAL: Good. 1	share a little bit. I am not exactly sure how many	1	into that statement, that ACHP statement, that was adopted
2	members, but it's made up of Native Americans from across	2	was there's several. And one of particular interest to
3	the country, from Indian country. I am the Native	3	me, and that is acknowledging religious and cultural,
4	Hawaiian representative in this group. And there is one	4	traditional practices into their interaction with federal
5	from Alaska that sits on this group. And we, basically,	5	agencies, in this case AC in this case the Advisory
6	advise ACHP on matters of concern to Native Americans.	6	Council on Historic Preservation. And it's that where we
7	Real quickly, we just adopted the policy	7	find the significance of Haleakala. And I think that was
8	statement. Some of you may be familiar with that	8	shared. And it's really something that is really
9	particular policy statement. And, basically, it's an	9	difficult for any one person to explain. I think you got
10	effort to integrate the religious practices and traditions	10	to hear it from everybody, how important these places are
11	and culture into the interaction between Native Hawaiian	11	in terms of religious and cultural practices.
12	organizations and ACHP. And, hopefully, to get other	12	I can share one thing with you from my
13	federal agencies to also adopt similar policies.	13	perspective. On the island of Oahu, there's a direct
14	But my role is I don't feel I really	14	relationship between Haleakala well, the eastern gate
15	represent all the Native Hawaiian organization. I see my	15	of the rising sun is Kumukahi on the Big Island of Hawaii.
16	role as drawing attention to the need to talk to as many	16	And the western gate of the setting sun is at
17	Native Hawaiian organizations that we can.	17	Pu'uokapolei, Island of Oahu. And associated with
18	And, for example, I am from the Island of Oahu;	18	Pu'ukapolei is Pu'umakakilo, whose name comes from place
19	I am not from Maui. So for me, what is most important is	19	of observation. Pu'umakakilo is one of the few places
20	consultation with Native Hawaiian organizations, amongst	20	where you can actually see six of all the main islands.
21	other places, but, really, with those Native Hawaiian	21	You can see Haleakala.
22	organizations from the Island of Maui.	22	So for us, the significance of Haleakala with
23	One of the things that I am very much involved	23	respect to the traditional cultural practices, it has
24	in is trying to get different Native Hawaiian	24	we can't see we can't see we can see Haleakala. If
25	organizations such within the Hawaiian civic clubs because	25	you see Haleakala, we know where (inaudible). So we know
	39		41
1	it's organized geographically amongst different items,	1	where the sun needs to be different times of year. So for
2	seven states in the mainland. So, basically, the whole	2	us, Haleakala plays that divine role for us. So I have a
3	idea and it's defined in the bill that just passed last	3	personal attachment in terms of Haleakala with respect to
4	year, basically trying to get Native Hawaiian	4	traditions and cultural practices.
5	organizations to take responsibility for their respective	5	But I think the main concern that I have is
6	kuleana, their respective places. And it makes it	6	making certain that we talk to the people of Maui. And
7	makes the work and effort much more much more	7	getting paid should not be a criteria. You need to
8	manageable.	8	include all those other Native Hawaiian organizations, not
9	So, you know, although I am the Native Hawaiian	9	just those who are involved by way of a paycheck, to
10	representative, for me, irregardless of the position or	10	really, you know, determine the sincerity of those people.
11	comments you hear coming from me, what is most important	11	And you need to include those people who are willing to
12	to me is that you include as many other Native Hawaiian	12	get involved on a voluntary basis.
13	organizations. If that is done, in our opinion, that is	13	In addition to that, it's establishing the kind
14	mitigation. That is trying to work it out with the people	14	of relationship with these organizations into perpetuity,
15	who who who are really, you know, from this	15	in other words, memorandum of agreements, being able to
16	particular place.	16	come up with the kind of language to secure the kinds of
17	One of the things I did before I even came to	17	relationships that I think would be supportive of
18	this meeting is that I wanted to I called as many	18	different Native Hawaiian organizations.
19	different friends of mine in those organizations here on	19	All too often even the Native American
20	the Island of Maui to kind of get their get a sense on	20	Indians, all too often when they sit amongst federal
21	where they they stand with respect to the things that I	21	agencies where something might be said within these
22	am concerned about. And interesting enough, I found quite	22	discussions but, you know, when the project is all
23	a few organizations that don't feel basically the same	23	going and the project is done, the focus shifts to the primary purpose of the construction.
0.4			
24 25	way. One of the policy statements that was integrated	24 25	So, basically, I think what I am trying to say,

11 (Pages 38 to 41)

	42		44
1	and get us to help us to understand, how important it is	1	MR. SHAD KANE: Shad Kane again.
2	to work with the Native Hawaiian organizations from Maui	2	And I fully understand. Like I said earlier,
3	and draft that or have it written into those long-term	3	it's it should not be a criteria to get a date. I
4	documents, to secure that relationship with its people	4	think for example, I think the person that you hired,
5	into perpetuity.	5	the cultural person that you hired, is I think I heard
6	MS. ANNELLE AMARAL: Mahalo. Thank you.	6	earlier on that there was plans to put something together,
7	MS. CAROLINE BLANCO: I wonder if I could just	7	some kind of plan with respect to
8	follow up on your comments, Shad?	8	MS. MIKAHALA HELM: Mitigation.
9	What I was hearing from you is that you are	9	MR. SHAD KANE: the cultural into perpetuity.
10	wanting to have a long-term relationship being encouraged	10	I thought I heard someone say that. But in addition to
11	with the Native Hawaiian organizations in Maui. I	11	that person and his family in addition to just that
12	wondered if you had any particular thoughts in mind about	12	person and his family, I think we need to make a better
13	how to accomplish that?	13	effort and to try to find others where money is not an
14	MR. SHAD KANE: One of the things I can only	14	issue, where Haleakala is important.
15	speak from a personal perspective. So the things I share	15	MS. PUA AIU: I think we have some of those
16	with you are from a personal perspective on the Island of	16	people here, so perhaps they want to talk.
17	Oahu. And I am only assuming that might be the situation	17	MS. CAMILLE KALAMA: If I could make a quick
18	in Maui, but I am not really certain.	18	comment, too.
19	But I am very much involved in the preservation	19	This is Camille Kalama from Native Hawaiian
20	of archeological sites, cultural landscape.	20	Legal Corporation. I am here on behalf Kilakila o
21	And Pua is very aware, very aware of that.	21	Haleakala.
22	And it's actually an attempt that you know,	22	Sorry.
23	that it will serve as a venue to share and to teach and	23	This is coming from the last meeting and about
24	share the cultural with with the people from the island	24	the consultation process. And, you know, I heard I
25	and, ultimately, with our ancestors and our children, so	25	didn't get involved until the last meeting. Some of the
	43		45
1	that they have these special places.	1	members of the group were involved for a long time. And I

And so there were a lot of people that probably weren't there that may have wanted to participate. But because of the format that we're used to with that, you know, they didn't slow up. So I didn't to me, that wasn't a meeting that really counted as one of those. So when I saw the correspondence and I saw that that was being considered as one, then today and, I guess, tomorrow I am still unclear about what tomorrow who
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	 state, federal agencies, private landowners. So the difficulty is access for religious and cultural practices. So it needs to be at a time and place mutually agreed upon between the landowner and the organization, but we all know that's not that easy. You got little league concerns and interests and all these kinds of things. So it makes it if the organization is very sincere about visiting a place for religious and cultural practices. I think special effort has to be made in these situations, especially one as great as Haleakala. MS. CHARLENE DWIN VAUGHN: This is Charlene from the Advisory Council. I think NSF has been introducing and has participated in discussions about access and use and traditional cultural properties. My dilemma is how do you 	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	did hear, you know, criticism, especially from Nancy and Pua, about the process, and some concern. And after, Caroline, you asked them what their proposal was, they suggested at least three more meetings. Now, to me, that was because the meeting that we were at, they didn't feel I think a lot of people didn't feel like that was I think the invitation said open house. And so there were a lot of people that probably weren't there that may have wanted to participate. But because of the format that we're used to with that, you know, they didn't slow up. So I didn't to me, that wasn't a meeting that really counted as one of those. So when I saw the correspondence and I saw that that was being considered as one, then today and, I guess, tomorrow I am still unclear about what tomorrow who is involved and what it's for. But that those are being
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	state, federal agencies, private landowners. So the difficulty is access for religious and cultural practices. So it needs to be at a time and place mutually agreed upon between the landowner and the organization, but we all know that's not that easy. You got little league concerns and interests and all these kinds of things. So it makes it if the organization is very sincere about visiting a place for religious and cultural practices. I think special effort has to be made in these situations, especially one as great as Haleakala. MS. CHARLENE DWIN VAUGHN: This is Charlene from the Advisory Council. I think NSF has been introducing and has participated in discussions about access and use and traditional cultural properties. My dilemma is how do you find the appropriate Native Hawaiian organizations to	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	did hear, you know, criticism, especially from Nancy and Pua, about the process, and some concern. And after, Caroline, you asked them what their proposal was, they suggested at least three more meetings. Now, to me, that was because the meeting that we were at, they didn't feel I think a lot of people didn't feel like that was I think the invitation said open house. And so there were a lot of people that probably weren't there that may have wanted to participate. But because of the format that we're used to with that, you know, they didn't slow up. So I didn't to me, that wasn't a meeting that really counted as one of those. So when I saw the correspondence and I saw that that was being considered as one, then today and, I guess, tomorrow I am still unclear about what tomorrow who is involved and what it's for. But that those are being considered the three meetings and that there would be an
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	state, federal agencies, private landowners. So the difficulty is access for religious and cultural practices. So it needs to be at a time and place mutually agreed upon between the landowner and the organization, but we all know that's not that easy. You got little league concerns and interests and all these kinds of things. So it makes it if the organization is very sincere about visiting a place for religious and cultural practices. I think special effort has to be made in these situations, especially one as great as Haleakala. MS. CHARLENE DWIN VAUGHN: This is Charlene from the Advisory Council. I think NSF has been introducing and has participated in discussions about access and use and traditional cultural properties. My dilemma is how do you find the appropriate Native Hawaiian organizations to develop those protocols. Because I don't think it's about	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	did hear, you know, criticism, especially from Nancy and Pua, about the process, and some concern. And after, Caroline, you asked them what their proposal was, they suggested at least three more meetings. Now, to me, that was because the meeting that we were at, they didn't feel I think a lot of people didn't feel like that was I think the invitation said open house. And so there were a lot of people that probably weren't there that may have wanted to participate. But because of the format that we're used to with that, you know, they didn't slow up. So I didn't to me, that wasn't a meeting that really counted as one of those. So when I saw the correspondence and I saw that that was being considered as one, then today and, I guess, tomorrow I am still unclear about what tomorrow who is involved and what it's for. But that those are being considered the three meetings and that there would be an MOA signed, I guess, tomorrow.
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	 state, federal agencies, private landowners. So the difficulty is access for religious and cultural practices. So it needs to be at a time and place mutually agreed upon between the landowner and the organization, but we all know that's not that easy. You got little league concerns and interests and all these kinds of things. So it makes it if the organization is very sincere about visiting a place for religious and cultural practices. I think special effort has to be made in these situations, especially one as great as Haleakala. MS. CHARLENE DWIN VAUGHN: This is Charlene from the Advisory Council. I think NSF has been introducing and has participated in discussions about access and use and traditional cultural properties. My dilemma is how do you find the appropriate Native Hawaiian organizations to develop those protocols. Because I don't think it's about meeting with one or two groups; it's about having an 	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	did hear, you know, criticism, especially from Nancy and Pua, about the process, and some concern. And after, Caroline, you asked them what their proposal was, they suggested at least three more meetings. Now, to me, that was because the meeting that we were at, they didn't feel I think a lot of people didn't feel like that was I think the invitation said open house. And so there were a lot of people that probably weren't there that may have wanted to participate. But because of the format that we're used to with that, you know, they didn't slow up. So I didn't to me, that wasn't a meeting that really counted as one of those. So when I saw the correspondence and I saw that that was being considered as one, then today and, I guess, tomorrow I am still unclear about what tomorrow who is involved and what it's for. But that those are being considered the three meetings and that there would be an MOA signed, I guess, tomorrow. MS. CAROLINE BLANCO: No.
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	state, federal agencies, private landowners. So the difficulty is access for religious and cultural practices. So it needs to be at a time and place mutually agreed upon between the landowner and the organization, but we all know that's not that easy. You got little league concerns and interests and all these kinds of things. So it makes it if the organization is very sincere about visiting a place for religious and cultural practices. I think special effort has to be made in these situations, especially one as great as Haleakala. MS. CHARLENE DWIN VAUGHN: This is Charlene from the Advisory Council. I think NSF has been introducing and has participated in discussions about access and use and traditional cultural properties. My dilemma is how do you find the appropriate Native Hawaiian organizations to develop those protocols. Because I don't think it's about meeting with one or two groups; it's about having an inclusive opportunity for people to share what their needs	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	did hear, you know, criticism, especially from Nancy and Pua, about the process, and some concern. And after, Caroline, you asked them what their proposal was, they suggested at least three more meetings. Now, to me, that was because the meeting that we were at, they didn't feel I think a lot of people didn't feel like that was I think the invitation said open house. And so there were a lot of people that probably weren't there that may have wanted to participate. But because of the format that we're used to with that, you know, they didn't slow up. So I didn't to me, that wasn't a meeting that really counted as one of those. So when I saw the correspondence and I saw that that was being considered as one, then today and, I guess, tomorrow I am still unclear about what tomorrow who is involved and what it's for. But that those are being considered the three meetings and that there would be an MOA signed, I guess, tomorrow. MS. CAROLINE BLANCO: No. MS. CAMILLE KALAMA: Well, that is I mean,
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	state, federal agencies, private landowners. So the difficulty is access for religious and cultural practices. So it needs to be at a time and place mutually agreed upon between the landowner and the organization, but we all know that's not that easy. You got little league concerns and interests and all these kinds of things. So it makes it if the organization is very sincere about visiting a place for religious and cultural practices. I think special effort has to be made in these situations, especially one as great as Haleakala. MS. CHARLENE DWIN VAUGHN: This is Charlene from the Advisory Council. I think NSF has been introducing and has participated in discussions about access and use and traditional cultural properties. My dilemma is how do you find the appropriate Native Hawaiian organizations to develop those protocols. Because I don't think it's about meeting with one or two groups; it's about having an inclusive opportunity for people to share what their needs are. So how would NSF approach that in a meaningful way	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	did hear, you know, criticism, especially from Nancy and Pua, about the process, and some concern. And after, Caroline, you asked them what their proposal was, they suggested at least three more meetings. APPENDIX C(5): TRANSCRIPTS - SECTION 106 MEETING, UH IFA, MAIKALANI FACILITY, AUGUST 27, 2008 AFTERNOON SESSION

	46		4
1	we are talking about real consultation and Native Hawaiian	1	that it would be built on top of the observatory that IFA
2	organizations, if you come here and say, you know,	2	has jurisdiction over. So that was the idea for
3	avoidance and minimization is off the table, we're only	3	tomorrow was to have those of us that would be signatories
4	talking mitigation, you are already talking to a lot fewer	4	to any Memorandum of Agreement to sit down, reflect on
5	groups, you know.	5	what has happened today, come up with some particular
6	Because, for example, Kilakila o Haleakala, they	6	ideas hi, good to see you and then to try to see if
7	are not talking about mitigation. They are talking about	7	we can you know, what next step should happen. You
8	avoidance, in particular.	8	know, is there enough material to begin the draft of the
9	So, you know, I think that, to me, a real	9	Memorandum of Agreement or how do we move forward, i
10	consultation process allows for those groups to be	10	there an additional meeting that is necessary to clarify
11	involved, and not just getting to the point, you know,	11	some information, what are the next steps. And that is
12	really quickly. If we are only talking about mitigation,	12	that is the purpose of that meeting.
13	I think you are losing a lot of the groups that really	13	And if I Charlene, I know you want to speak.
14	have a stake here.	14	I just wanted to make one last comment about avoidance at
15	MS. CAROLINE BLANCO: If I could respond to her	15	minimization.
16	comment.	16	We had you are correct. We had made a focus
17	MS. ANNELLE AMARAL: Please.	17	on mitigation last time because we thought that we had
		18	that we were being responsive to what the Advisory Counc
18	MS. CAROLINE BLANCO: Last meeting, I had asked		
19	Pua how many more meetings would we need. I think we're	19	had asked us to do, and set forth our position on
20	correct on that. And you are welcome to go ahead and look	20	avoidance and minimization. Talking about, well, we coul
21	at the transcript that is on the website. And my	21	only make it a certain color for scientific reasons, we
22	recollection and we went back to look after the	22	could only make it so high for scientific reasons. And
23	meeting, to be sure we heard it correctly was one to	23	that can be explained here again if you folks have
24	two more meetings. And we talked about we were meeting	24	questions. And we hadn't heard back from anybody else.
25	with the Park Service on the 22nd, would it be okay if we	25	We explained to them in the letters. So we honestly

So that wouldn't resolve adverse effects other than to say, if you don't build it, of course, that would resolve adverse effects because it wouldn't be built. But if it would be built, you couldn't address certain of those things. But in any event, this is a meeting to discuss. And we did send out letters to everybody who had expressed an interest, that we became aware of, who were potentially
1 2 3 4 5 6 7 8 9 10 11 12 13 14	held those meetings the following week, the one or two meetings. And the answer was yes. And so that is that is why we are holding these meetings. And the meetings today, as I said, there are two of them that are the same, but they will accommodate different schedules. Tomorrow, the meetings are between who will be the signatories if an MOA is reached. And that would be the SHPO and the Advisory Council, the Park Service, because of the jurisdiction that they have with regard to the Special Use Permit, NSF and the permittee, which would be AURA, which is the if an award is made to allow construction, the federal funds would go to AURA. And a part of AURA is it's a consortium of universities, in	2 3 4 5 6 7 8 9 10 11 12 13	thought we were at that stage. And, also, the thought was, what we were hearing back from people, they just didn't want it. Some people did not want it and some did. But some people did not want it. So that wouldn't resolve adverse effects other than to say, if you don't build it, of course, that would resolve adverse effects because it wouldn't be built. But if it would be built, you couldn't address certain of those things. But in any event, this is a meeting to discuss. And we did send out letters to everybody who had expressed an interest, that we became aware of, who were potentially interested parties. And it has been an invitation to
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15	held those meetings the following week, the one or two meetings. And the answer was yes. And so that is that is why we are holding these meetings. And the meetings today, as I said, there are two of them that are the same, but they will accommodate different schedules. Tomorrow, the meetings are between who will be the signatories if an MOA is reached. And that would be the SHPO and the Advisory Council, the Park Service, because of the jurisdiction that they have with regard to the Special Use Permit, NSF and the permittee, which would be AURA, which is the if an award is made to allow construction, the federal funds would go to AURA. And a part of AURA is it's a consortium of universities, in part, in sum. It's more complicated than that.	2 3 4 5 6 7 8 9 10 11 12 13 14 15	thought we were at that stage. And, also, the thought was, what we were hearing back from people, they just didn't want it. Some people did not want it and some did. But some people did not want it. So that wouldn't resolve adverse effects other than to say, if you don't build it, of course, that would resolve adverse effects because it wouldn't be built. But if it would be built, you couldn't address certain of those things. But in any event, this is a meeting to discuss. And we did send out letters to everybody who had expressed an interest, that we became aware of, who were potentially interested parties. And it has been an invitation to allow everybody to discuss.
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	held those meetings the following week, the one or two meetings. And the answer was yes. And so that is that is why we are holding these meetings. And the meetings today, as I said, there are two of them that are the same, but they will accommodate different schedules. Tomorrow, the meetings are between who will be the signatories if an MOA is reached. And that would be the SHPO and the Advisory Council, the Park Service, because of the jurisdiction that they have with regard to the Special Use Permit, NSF and the permittee, which would be AURA, which is the if an award is made to allow construction, the federal funds would go to AURA. And a part of AURA is it's a consortium of universities, in part, in sum. It's more complicated than that. DR. CRAIG FOLTZ: I will explain, Caroline. But	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	thought we were at that stage. And, also, the thought was, what we were hearing back from people, they just didn't want it. Some people did not want it and some did. But some people did not want it. So that wouldn't resolve adverse effects other than to say, if you don't build it, of course, that would resolve adverse effects because it wouldn't be built. But if it would be built, you couldn't address certain of those things. But in any event, this is a meeting to discuss. And we did send out letters to everybody who had expressed an interest, that we became aware of, who were potentially interested parties. And it has been an invitation to allow everybody to discuss. And if, today, people have questions about avoidance or minimization, we will do our best to address
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	held those meetings the following week, the one or two meetings. And the answer was yes. And so that is that is why we are holding these meetings. And the meetings today, as I said, there are two of them that are the same, but they will accommodate different schedules. Tomorrow, the meetings are between who will be the signatories if an MOA is reached. And that would be the SHPO and the Advisory Council, the Park Service, because of the jurisdiction that they have with regard to the Special Use Permit, NSF and the permittee, which would be AURA, which is the if an award is made to allow construction, the federal funds would go to AURA. And a part of AURA is it's a consortium of universities, in part, in sum. It's more complicated than that. DR. CRAIG FOLTZ: I will explain, Caroline. But let's finish and then I will explain, if that is all	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	thought we were at that stage. And, also, the thought was, what we were hearing back from people, they just didn't want it. Some people did not want it and some did. But some people did not want it. So that wouldn't resolve adverse effects other than to say, if you don't build it, of course, that would resolve adverse effects because it wouldn't be built. But if it would be built, you couldn't address certain of those things. But in any event, this is a meeting to discuss. And we did send out letters to everybody who had expressed an interest, that we became aware of, who were potentially interested parties. And it has been an invitation to allow everybody to discuss. And if, today, people have questions about avoidance or minimization, we will do our best to address that.
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	held those meetings the following week, the one or two meetings. And the answer was yes. And so that is that is why we are holding these meetings. And the meetings today, as I said, there are two of them that are the same, but they will accommodate different schedules. Tomorrow, the meetings are between who will be the signatories if an MOA is reached. And that would be the SHPO and the Advisory Council, the Park Service, because of the jurisdiction that they have with regard to the Special Use Permit, NSF and the permittee, which would be AURA, which is the if an award is made to allow construction, the federal funds would go to AURA. And a part of AURA is it's a consortium of universities, in part, in sum. It's more complicated than that. DR. CRAIG FOLTZ: I will explain, Caroline. But let's finish and then I will explain, if that is all right.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	thought we were at that stage. And, also, the thought was, what we were hearing back from people, they just didn't want it. Some people did not want it and some did. But some people did not want it. So that wouldn't resolve adverse effects other than to say, if you don't build it, of course, that would resolve adverse effects because it wouldn't be built. But if it would be built, you couldn't address certain of those things. But in any event, this is a meeting to discuss. And we did send out letters to everybody who had expressed an interest, that we became aware of, who were potentially interested parties. And it has been an invitation to allow everybody to discuss. And if, today, people have questions about avoidance or minimization, we will do our best to address that. As I said, and as Charlene had mentioned,
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	held those meetings the following week, the one or two meetings. And the answer was yes. And so that is that is why we are holding these meetings. And the meetings today, as I said, there are two of them that are the same, but they will accommodate different schedules. Tomorrow, the meetings are between who will be the signatories if an MOA is reached. And that would be the SHPO and the Advisory Council, the Park Service, because of the jurisdiction that they have with regard to the Special Use Permit, NSF and the permittee, which would be AURA, which is the if an award is made to allow construction, the federal funds would go to AURA. And a part of AURA is it's a consortium of universities, in part, in sum. It's more complicated than that. DR. CRAIG FOLTZ: I will explain, Caroline. But let's finish and then I will explain, if that is all right. MS. CAROLINE BLANCO: Then underneath AURA,	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	thought we were at that stage. And, also, the thought was, what we were hearing back from people, they just didn't want it. Some people did not want it and some did. But some people did not want it. So that wouldn't resolve adverse effects other than to say, if you don't build it, of course, that would resolve adverse effects because it wouldn't be built. But if it would be built, you couldn't address certain of those things. But in any event, this is a meeting to discuss. And we did send out letters to everybody who had expressed an interest, that we became aware of, who were potentially interested parties. And it has been an invitation to allow everybody to discuss. And if, today, people have questions about avoidance or minimization, we will do our best to address that. As I said, and as Charlene had mentioned, everything is on the table for us to discuss.
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	held those meetings the following week, the one or two meetings. And the answer was yes. And so that is that is why we are holding these meetings. And the meetings today, as I said, there are two of them that are the same, but they will accommodate different schedules. Tomorrow, the meetings are between who will be the signatories if an MOA is reached. And that would be the SHPO and the Advisory Council, the Park Service, because of the jurisdiction that they have with regard to the Special Use Permit, NSF and the permittee, which would be AURA, which is the if an award is made to allow construction, the federal funds would go to AURA. And a part of AURA is it's a consortium of universities, in part, in sum. It's more complicated than that. DR. CRAIG FOLTZ: I will explain, Caroline. But let's finish and then I will explain, if that is all right. MS. CAROLINE BLANCO: Then underneath AURA, there's a division, the National Solar Observatory. They	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	 thought we were at that stage. And, also, the thought was, what we were hearing back from people, they just didn't want it. Some people did not want it and some did. But some people did not want it. So that wouldn't resolve adverse effects other than to say, if you don't build it, of course, that would resolve adverse effects because it wouldn't be built. But if it would be built, you couldn't address certain of those things. But in any event, this is a meeting to discuss. And we did send out letters to everybody who had expressed an interest, that we became aware of, who were potentially interested parties. And it has been an invitation to allow everybody to discuss. And if, today, people have questions about avoidance or minimization, we will do our best to address that. As I said, and as Charlene had mentioned, everything is on the table for us to discuss.
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	held those meetings the following week, the one or two meetings. And the answer was yes. And so that is that is why we are holding these meetings. And the meetings today, as I said, there are two of them that are the same, but they will accommodate different schedules. Tomorrow, the meetings are between who will be the signatories if an MOA is reached. And that would be the SHPO and the Advisory Council, the Park Service, because of the jurisdiction that they have with regard to the Special Use Permit, NSF and the permittee, which would be AURA, which is the if an award is made to allow construction, the federal funds would go to AURA. And a part of AURA is it's a consortium of universities, in part, in sum. It's more complicated than that. DR. CRAIG FOLTZ: I will explain, Caroline. But let's finish and then I will explain, if that is all right. MS. CAROLINE BLANCO: Then underneath AURA, there's a division, the National Solar Observatory. They are the ones who actually would be carrying this out. But	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	thought we were at that stage. And, also, the thought was, what we were hearing back from people, they just didn't want it. Some people did not want it and some did. But some people did not want it. So that wouldn't resolve adverse effects other than to say, if you don't build it, of course, that would resolve adverse effects because it wouldn't be built. But if it would be built, you couldn't address certain of those things. But in any event, this is a meeting to discuss. And we did send out letters to everybody who had expressed an interest, that we became aware of, who were potentially interested parties. And it has been an invitation to allow everybody to discuss. And if, today, people have questions about avoidance or minimization, we will do our best to address that. As I said, and as Charlene had mentioned, everything is on the table for us to discuss. MS. LEIOHU RYDER: So may we have an opportunit to speak, then?
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	held those meetings the following week, the one or two meetings. And the answer was yes. And so that is that is why we are holding these meetings. And the meetings today, as I said, there are two of them that are the same, but they will accommodate different schedules. Tomorrow, the meetings are between who will be the signatories if an MOA is reached. And that would be the SHPO and the Advisory Council, the Park Service, because of the jurisdiction that they have with regard to the Special Use Permit, NSF and the permittee, which would be AURA, which is the if an award is made to allow construction, the federal funds would go to AURA. And a part of AURA is it's a consortium of universities, in part, in sum. It's more complicated than that. DR. CRAIG FOLTZ: I will explain, Caroline. But let's finish and then I will explain, if that is all right. MS. CAROLINE BLANCO: Then underneath AURA, there's a division, the National Solar Observatory. They are the ones who actually would be carrying this out. But AURA is the legal entity. And so federal funds would	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	thought we were at that stage. 1	operating under regulations. And regulations,	1	little bit more comfortable as well.
2	fortunately, describe and define consultation, which is	2	MS. CAMILLE KALAMA: Thank you.
3	what this is about. And it says, "Consultation means the	3	MS. CAROLINE BLANCO: And any MOA would, of
4	process of seeking, discussing and considering the views	4	course, be circulated among consulting parties and allowed
5	of other participants, and, where feasible, seeking	5	for input and comments and so forth. That is an
6	agreement with them regarding matters arising in the	6	interactive process as we do it.
7	Section 106 consultation."	7	MS. ANNELLE AMARAL: Charlie has his hand up.
8	I don't know how to say this, but 106 doesn't	8	DR. CRAIG FOLTZ: Craig. This is Craig.
9	prescribe a set number of meetings. It doesn't establish	9	And I just wanted to this is a different
10	time limits. Our regulations have limitations on timing	10	subject, but I wanted to get back to defining AURA, so
11	and everything. For this process, it doesn't.	11	there is no confusion here.
12	So I think the notion that you got two	12	The National Science Foundation is a federal
13	opportunities and two more meetings or whatever is not	13	agency that, by law, cannot operate facilities directly.
14	really conducive to free-flowing open communication.	14	We are not like the Department of Energy, which has
15	And I think NSF has tried to operate in good	15	laboratories under which it operates, or NASA. It
16	faith, but they are seeking guidance and getting varied	16	operates them directly.
17	suggestions.	17	We operate our observatories and our
18	But the notion that two more meetings will do	18	laboratories through entities that are called managing
19	it, three more meetings will do it, put that out of your	19	organizations. These tend to either be universities or
20	head. Because I think that limits how we interface with	20	small nonprofit corporations whose job it is to oversee
21	each other. I think good faith consultation means that	21	the management of the facilities.
22	you meet until you try to resolve all the issues, or, if	22	So in the case of the National Solar Observatory
23	you find they can't be resolved, you go another way.	23	and the National Optical Astronomy Observatory, and, in
24	So tomorrow's meeting, as Caroline said, is with	24	fact, the Gemini Observatory, which is on Mauna Kea, one
25	the major stakeholders, to gauge what is needed here, what	25	of the telescopes on Mauna Kea. The managing organization

APPENDIX C(5): TRANSCRIPTS - SECTION 106 MEETING, UH IFA, MAIKALANI FACILITY, AUGUST 27, 2008 AFTERNOON SESSION

	54		56
1	it is a corporation.	1	do you mitigate spirituality, which also gets to some of
2	National Solar Observatory is not. Okay.	2	the comments that Shad was making about special sites,
3	National Solar Observatory and National Optical	3	cultural practices. And I wondered if anyone wanted to
4	Astronomy Observatory employees are AURA employees. They	4	speak more to that?
5	are not federal employees. So we need to make this	5	And I am going to start with Camille.
6	distinction.	6	MS. MARILYNN PARRIS: I am wondering if they got
7	MS. CAROLINE BLANCO: And it's a not-for-profit	7	their full comment out.
8	agency.	8	MS. PUA AIU: Right.
9	DR. CRAIG FOLTZ: As I said, it's a	9	MS. MARILYNN PARRIS: Because you were kind of
10	not-for-profit corporation.	10	cut off while we finished this other technical stuff.
11	MS. ANNELLE AMARAL: Okay.	11	MS. LEIOHU RYDER: It's been happening the whole
12	DR. CRAIG FOLTZ: So, you know, if you are	12	time.
13	talking about if you have to have a legal relationship	13	MS. MARILYN PARRIS: Well, I would just like to
14	with the project, you don't have it with NSF, and you	14	hear
15	don't have it with NSO, you have it with AURA.	15	MS. LEIOHU RYDER: Thank you.
16	MS. CHARLENE DWIN VAUGHN: So, Craig, just a	16	MS. MARILYNN PARRIS: I would like to hear you
17	follow-up for that.	17	finish your comment.
18	DR. CRAIG FOLTZ: Sure.	18	It was a good summary, but I don't think she was
19	MS. CHARLENE DWIN VAUGHN: That means that	19	through.
20	negotiating any agreement where follow-up is needed and	20	MS. ANNELLE AMARAL: I wasn't summarizing. I
21	oversight over implementation, it would be with AURA more	21	was trying to get back to that question.
22	than NSF on a day-to-day?	22	MS. LEIOHU RYDER: I would appreciate that.
23	DR. CRAIG FOLTZ: On a day-to-day, yes.	23	MS. MARILYNN PARRIS: All right.
24	MS. CHARLENE DWIN VAUGHN: Okay.	24	MS. LEIOHU RYDER: Okay. But I am clear on that
25	DR. CRAIG FOLTZ: On the other hand, what we	25	this is a consultation and we are putting it out there.
	55		57
1	would do, for example, if we had an MOA that prescribed	1	And, you know, when I read the word mitigation,
2	certain things, you know that steps would be taken, for	2	it was a red flag for me because how do you mitigate your
3	example, to guarantee access which I think is something	3	bones, how do you mitigate your ancestral ties to
4	we want to get back to later.	4	something that is unique and sacred to those of us whose
5	MS. CHARLENE DWIN VAUGHN: Right.	5	bones are related to the DNA of these very volcanic
6	DR. CRAIG FOLTZ: Or to establish workforce	6	islands.
7	development programs. We would actually write that into	7	The inalienable right for Haleakala to be its
8	the special terms and conditions of the cooperative	8	own consciousness will be a travesty if we dig and
9	agreement. Think of the cooperative agreement sort of as	9	desecrate the mana of this mountain.
10	a softer contract. We don't manual contract. But NSF	10	You know, you speak of studying the sun. The
11	would put those special terms and conditions in, and then	11	eloquence of our forefathers knew of the sun. Why is it
12	the performance of the managing organization, and in fact	12	not that the National Foundation does not speak to us as
13	the performance of the observatory, would be measured	13	ones of these islands in the language of the native
14	against those.	14	perspective, in the language and in the protocols of the
15	MS. ANNELLE AMARAL: Thank you.	15	native perspective, the native lineage of Earth, not only
16	MS. MARILYNN PARRIS: And as we discussed on	16	the natives of this land?
17	Friday, the Special Use Permit will likely be with AURA.	17	Our forefathers came from the stars. This
18	DR. CRAIG FOLTZ: That's correct.	18	energy grounded this land. These are our mo'olelos, these
19	MS. MARILYNN PARRIS: It will definitely not be	19	are our stories.
20	with the National Science Foundation.	20	If we picture Haleakala as a human, as a human
21	DR. CRAIG FOLTZ: That's right. Absolutely.	21	body, will all of you live, will you still be connected,
22	MS. MARILYNN PARRIS: Is that correct?	22	will you still be able to survive, if we cut all our heads
23	DR. CRAIG FOLTZ: Absolutely correct.	23	off right here and now? Will you be able to survive?
24	MS. ANNELLE AMARAL: Let me see if I can bring	24	Haleakala is a living, breathing consciousness
		1	
25	us back to the the question was asked much earlier, how	25	from those planetary explorers of the sun, of the stars

15 (Pages 54 to 57)

	58		60
1	and beyond.	1	mountain is compromised.
2	Science is limited in its perspective because it	2	MS. CAROLINE BLANCO: If I could try to address
3	does not consider the science beyond the science, which is	3	a couple points that were raised.
4	that spiritual force that co-created what we are now.	4	I think, first of all, I want to reemphasize
5	How can you mitigate the energy of those of	5	that part of the purpose of the meeting today is to make
6	this force where our ancient kahunas, the spiritual force	6	sure we are all sitting at a table, around a table, so to
7	of these islands, represented in the DNA of those of us	7	speak, before a decision has been made. So it's not after
8	who practiced this spirituality?	8	the fact; it is now.
9	My forefathers went to that mountain, many of my	9	And I think that, hopefully, you will see that
10	forefathers from all the islands. It was a place where	10	we are here for a purpose. Many of us have traveled a
11	many gathered.	11	long way, have spent an inordinate amount of time,
12	This is not a foregone thought of something that	12	dedicated to trying to reach out to people, to find out
13	we read in the textbooks, something that we do not	13	what their views are. And that is why we are here again
14	remember. Many gathered from all parts of the Pacific,	14	today.
15	from Maui, from Hawaii, to pray on that mountaintop,	15	And we appreciate your views very much. And
16	specifically on that mountaintop.	16	certainly they will be taken into consideration. I think
17	And so every grid, astral grid, geological grid,	17	that what might be helpful, although I don't think they
18	it is an entity in and of itself.	18	would fully address the concerns you raise but I think
19	You will kill the life force of the spirit of	19	it might be helpful for Mike, for you to describe the
20	the body of this mountaintop.	20	access that is already allowed for traditional practices
21	It does not matter where we cut on the mountain,	21	now. And the same would be true if funding were approved
22	but when you go to the top which is already desecrated	22	And, again, I am not suggesting that this
23	by what has happened to the top of that mountain, what	23	completely addresses your concerns. However, I do want to
24	stands there now. So much has been destroyed. But when	24	make sure that people do understand that there are steps
25	you do what you are planning on doing, to dig into the	25	that have been taken to try and recognize the desire of
	59		6
1	belly, the womb, of this mother, then it will desecrate so	1	people to carry out traditional practices.
2	much more. And the ancient ones that speak to us when we	2	Mike.
3	go to pray, they show us the grids.	3	MR. MIKE MABERRY: I am in Hawaii because
4	But, see, science, because it has to be a	4	followed my wife out from Hawaii from the mainland.
5	special proof, cannot taste, touch, feel and explore their	5	And I have had the honor of living and working on
6	the DNA of what is pono and truthful in the mind, the	6	Haleakala for almost 25 years. And I know a lot of peopl
7	duality of the science mind.	7	in this room I am speaking as loud as I can, if you
8	You cannot mitigate spirituality. You cannot	8	really want me to be able to get through this. Okay?
9	mitigate the life force of this mountain. It is that	9	I have a lot of friends in the Native Hawaiian
10	special and sacred.	10	community who aren't here today. I when I for many
11	And the invitation as Native Hawaiians to be a	11	years, I I was a worker bee at the summit and just
12	part of this is very limited, because the scope is limited	12	enjoying the great opportunity to be there. And from
13	to study the sun, to create jobs, to create all of these	13	talking with my friends, I knew early on and recognized
14	things, when all could have been done eons ago. We have	14	that it is a church, that it is a sacred place. And there
15	never been invited to sit at the table to co-create	15	wasn't any protocol established for the people who worke
16	together. It's always an afterthought, an after,	16	up there, so that everyone who worked up there actually
17	after-fact.	17	understood that and could take that into consideration and
18	And so I implore this question again. How do	18	appreciate that in their daily lives as far as their work
19	you mitigate something that is inalienable, that has a	19	activities go. So that they could show as much respect as
20	right to be, it is a life force? It is an entity in and	20	possible under the circumstances.
21	of itself. It connects us to the portals of times, to the	21	We set about a consultation process as best as
22	portals of the universe.	22	we could and understood how to. Meeting with elders in
23	MS. CAROLINE BLANCO: Annelle	23	the community, meeting with leaders in the community,
04	MS. LEIOHU RYDER: That is my biggest concern.	24	asking who we should talk to.
24 25	That is that is the spiritual aspect of this	25	I met with Kiope Raymond and Clyde Sakamoto ju

16 (Pages 58 to 61)

	62		6
1	as one of the groups of people, and asked them who should	1	development plan, we looked at the carrying capacity end
2	we consult with, who should we talk to as we develop a	2	of our site and recognized that there are only two sites
3	process to try to show some respect for the host culture.	3	that could be developed that are left, that aren't already
4	And we did what we were told, or what was	4	developed in the area. And that is the two areas being
5	suggested. We met with those people. We took notes. We	5	looked at for this project.
6	established what studies we would undertake. We met with	6	One is actually one of the areas was,
7	people and asked what kind of things we can do.	7	actually, the first site that was ever developed in the 18
8	And what that led to was the development of our	8	acres, which is referred to as Reber Circle. And the
9	long-range development plan which is only relevant to the	9	other site is, basically, across the street from that,
10	18 acres that we are the temporary stewards of, until, you	10	which at any rate.
11	know, a Native Hawaiian government is established that	11	So when asked what our future desires or
12	takes control of ceded lands. And recognizing that that	12	potential plans or whatever, however you want to put it,
13	particular piece of land has a specific land use. As I've	13	were discussed, we shared with them the potential of this
14	shared with others before, Mauna Kea is a completely	14	particular project. And we were asked to show them whe
15	different situation. It has both commercial and	15	that project where the proposed site was. And we went
16	recreational uses associated with it.	16	there and we looked at it. And they walked it and they
17	That 18 acres doesn't. According to state law,	17	looked at it. And they looked at the crater and the
18	that 18 acres is has one use, and that is observatory	18	crater rim and they looked at the Big Island. And they
19	purposes. It's the only land use it's the only area	19	recommended that we offer something. Not a quid pro q
20	with that land use designation on Maui.	20	just a gift to start the conversation, so to speak, or to
21	And what we heard, and what we did our best to	21	show some sincerity.
22	to put together, in our long-range development plan,	22	And so they recommended and we accepted, and
23	was to study the entire 18 acres as thoroughly as	23	we went through the process, in order to see it to
24	possible, as humanly possible, to despite the land use	24	fruition the collection of stones from the proposed
25	issues, to make sure that we provided unrestricted access	25	project area to create the east-facing ahu. So that there
	63		
1	for cultural practitioners. That we provided places where	1	would be a place that looks out and you can see the rim of
1 2	for cultural practitioners. That we provided places where there could be practice of the culture, where there would	1 2	would be a place that looks out and you can see the rim of the crater that is above Kalepeamoa, which is an area I
	for cultural practitioners. That we provided places where there could be practice of the culture, where there would be minimal impediment and the ability to do so in		the crater that is above Kalepeamoa, which is an area I
2	there could be practice of the culture, where there would be minimal impediment and the ability to do so in	2	the crater that is above Kalepeamoa, which is an area I
2 3 4	there could be practice of the culture, where there would be minimal impediment and the ability to do so in traditional dress, without having 1.7 million tourists	2 3	the crater that is above Kalepeamoa, which is an area I understand is where Maui stood when he last looked at the sun, and then across the ahu to realize the connection
2 3 4 5	there could be practice of the culture, where there would be minimal impediment and the ability to do so in traditional dress, without having 1.7 million tourists with cameras standing around, flashing photos of you.	2 3 4	the crater that is above Kalepeamoa, which is an area I understand is where Maui stood when he last looked at the sun, and then across the ahu to realize the connection
2 3 4	there could be practice of the culture, where there would be minimal impediment and the ability to do so in traditional dress, without having 1.7 million tourists with cameras standing around, flashing photos of you. And to that end and to and to ask	2 3 4 5	the crater that is above Kalepeamoa, which is an area I understand is where Maui stood when he last looked at the sun, and then across the ahu to realize the connection between Haleakala and Mauna Kea and the Big Island, wh
2 3 4 5 6	there could be practice of the culture, where there would be minimal impediment and the ability to do so in traditional dress, without having 1.7 million tourists with cameras standing around, flashing photos of you. And to that end and to and to ask forgiveness. Because one of the things we heard is, you	2 3 4 5 6	the crater that is above Kalepeamoa, which is an area I understand is where Maui stood when he last looked at the sun, and then across the ahu to realize the connection between Haleakala and Mauna Kea and the Big Island, wh where Pele went after she left Haleakala.
2 4 5 6 7 8	there could be practice of the culture, where there would be minimal impediment and the ability to do so in traditional dress, without having 1.7 million tourists with cameras standing around, flashing photos of you. And to that end and to and to ask forgiveness. Because one of the things we heard is, you know, ask permission, give thanks, and leave with minimal	2 3 4 5 6 7	the crater that is above Kalepeamoa, which is an area I understand is where Maui stood when he last looked at the sun, and then across the ahu to realize the connection between Haleakala and Mauna Kea and the Big Island, wh where Pele went after she left Haleakala. And so, anyhow, we did put together some signage. While recognizing that and wanting to
2 3 4 5 6 7 8 9	there could be practice of the culture, where there would be minimal impediment and the ability to do so in traditional dress, without having 1.7 million tourists with cameras standing around, flashing photos of you. And to that end and to and to ask forgiveness. Because one of the things we heard is, you know, ask permission, give thanks, and leave with minimal impact. And to give thanks.	2 3 4 5 6 7 8	the crater that is above Kalepeamoa, which is an area I understand is where Maui stood when he last looked at the sun, and then across the ahu to realize the connection between Haleakala and Mauna Kea and the Big Island, wh where Pele went after she left Haleakala. And so, anyhow, we did put together some signage. While recognizing that and wanting to
2 4 5 6 7 8 9	there could be practice of the culture, where there would be minimal impediment and the ability to do so in traditional dress, without having 1.7 million tourists with cameras standing around, flashing photos of you. And to that end and to and to ask forgiveness. Because one of the things we heard is, you know, ask permission, give thanks, and leave with minimal impact. And to give thanks. And so there we wanted to ask forgiveness.	2 3 5 7 8 9	the crater that is above Kalepeamoa, which is an area I understand is where Maui stood when he last looked at the sun, and then across the ahu to realize the connection between Haleakala and Mauna Kea and the Big Island, wh where Pele went after she left Haleakala. And so, anyhow, we did put together some signage. While recognizing that and wanting to acknowledge because those of you that have been there,
2 3 5 6 7 8 9 10	there could be practice of the culture, where there would be minimal impediment and the ability to do so in traditional dress, without having 1.7 million tourists with cameras standing around, flashing photos of you. And to that end and to and to ask forgiveness. Because one of the things we heard is, you know, ask permission, give thanks, and leave with minimal impact. And to give thanks. And so there we wanted to ask forgiveness. And we had discussions with elders and others at State	2 3 6 7 8 9	the crater that is above Kalepeamoa, which is an area I understand is where Maui stood when he last looked at the sun, and then across the ahu to realize the connection between Haleakala and Mauna Kea and the Big Island, wh where Pele went after she left Haleakala. And so, anyhow, we did put together some signage. While recognizing that and wanting to acknowledge because those of you that have been there, the area is extremely small. There is not very much room for turning around or for parking. So we wanted to for
2 3 5 6 7 8 9 10 11	there could be practice of the culture, where there would be minimal impediment and the ability to do so in traditional dress, without having 1.7 million tourists with cameras standing around, flashing photos of you. And to that end and to and to ask forgiveness. Because one of the things we heard is, you know, ask permission, give thanks, and leave with minimal impact. And to give thanks. And so there we wanted to ask forgiveness. And we had discussions with elders and others at State Historic Preservation and State Parks Department. And we	2 3 4 5 6 7 8 9 10 11	the crater that is above Kalepeamoa, which is an area I understand is where Maui stood when he last looked at the sun, and then across the ahu to realize the connection between Haleakala and Mauna Kea and the Big Island, wh where Pele went after she left Haleakala. 1	any construction at the site.	1	are taking ten minutes. Thank you.
2	Protocol was established that the aina is never	2	(Recess, 2:35 p.m. to 2:51 p.m.)
3	removed from Haleakala. That when the aina is disturbed	3	MS. ANNELLE AMARAL: I wonder if I can begin to
4	for projects that there is a cultural monitor onsite who	4	call us back into the discussion. We have some wonderful
5	provides appropriate consultation and pule, if that is	5	things to tape.
6	what is considered appropriate for the type of activity	6	I need to know, are the people on the conference
7	that is done. And to make sure that the construction	7	call back with us?
8	workers are respectful during their process, that trash is	8	MS. BETSY MERRITT: This is Betsy Merritt. I am
9	controlled, that that things are done as pono as	9	here.
10	possible under the circumstances, recognizing that we are,	10	MS. ANNELLE AMARAL: Thank you.
11	in a sense, working in a church.	11	In an effort to assure that all voices are
12	Is there more we can do? Absolutely, I am sure.	12	heard, it was pointed out to me that there are certain
13	And we are open to considering what more we can do.	13	people here that I have not called on or asked to see if
14	We have heard and it's really difficult,	14	they wanted to make comment. It's not my intention to
15	right, because you know, you will hear one thing from	15	ignore anyone. If you want my attention, you sort of have
16	one group of people, make recommendations, you will hear	16	to wave at me. But
17	something from another group of people that may even	17	MS. PUA AIU: Can I introduce Hinano who came in
18	contradict what was recommended by this group of Native	18	a little bit late?
19	Hawaiians. And we really have tried in good faith to do	19	MS. ANNELLE AMARAL: Hinano can introduce
20	as best we can. And we are always open for input as to	20	himself.
21	how we can more respectfully share this space that we are	21	Aloha.
22	where we are at the moment.	22	MR. HINANO RODRIGUES: Hinano Rodrigues,
23	MS. CAROLINE BLANCO: And if I could follow up,	23	Cultural Historian for the Islands of Maui and Lanai, with
24	Mike.	24	State Historic Preservation.
25	If the project were approved for funding and if	25	And I know kind of half of you guys already from
			69
	67		
1	it were built, would any of those protocols change? I	1	the last time.
2	mean, would people still have access to the site for	2	MS. ANNELLE AMARAL: Aloha. Welcome.
3	practices?	3	Warren, did you want to introduce yourself as
4	MR. MIKE MABERRY: Absolutely. The project	4	well?
5	would not be allowed to restrict access.	5	MR. WARREN SHIBUYA: Hello. I am Warren
6	MS. LEIOHU RYDER: If I could this is Leiohu	6	Shibuya.
7	Ryder.	7	I notice my name was mentioned here. I am the
8	If I could follow up with a question. If and	8	guy that mentioned that.
9	I appreciate what is there. And knowing that the ahus are	9	And thank you very much, Craig.
10	there for many of us to go and share our prayers and	10	MS. PUA AIU: Can I also mention something?
11	and other areas of Haleakala. But knowing this, that it	11 12	Shad didn't mention it because he probably
12	is a church and you brought up faith why couldn't	12	didn't know, but Uncle Charlie is in the hospital. He got
13	that mana'o, that concern, that you represent being there,		his leg amputated on Friday. So I thought that we could
14	why wasn't that is that not shared amongst those that	14 15	just remember him for a minute because he has been important in this process as well.
15	represents this ATS? Why is that why wasn't that		
16	honored in the way that you honor it today, the idea of	16 17	MS. ANNELLE AMARAL: Okay. We can take a
17	faith, honoring the sacredness of the mountain? Because		moment.
18	the mountain is a, in your word, "church."	18 19	(Silence.) MS. ANNELLE AMARAL: Mahalo.
19	MR. MIKE MABERRY: I'm sorry. I don't know I	20	
20	don't know how to answer that.	20	Thank you for pointing that out to us.
21	MS. LEIOHU RYDER: Well, it's just a point,	1	Specifically, I wanted to ask if the Historic
22	then.	22	Foundation had any comments it wanted to make?
23	MS. ANNELLE AMARAL: Okay. Having made that	23	MS. TONIA MOY: I think a lot of them are going
24	point, I'm sorry, we have gone two and-a-half hours into	24 25	to be addressed upcoming. I think we brought up most of what we wanted to really bring up at the last one.
25	this discussion, and the stenographer needs a break. We	20	what we wanted to really offing up at the last one.

18 (Pages 66 to 69)

	70		
1	I did want to make one little comment about	1	And there is a component of this in the Maui
2	I'm sorry what you were saying.	2	Community College proposal. That we we don't want to
3	MS. LEIOHU RYDER: Leiohu Ryder.	3	drive a wedge between tradition and science, but we want
4	MS. TONIA MOY: Because we are not we are	4	to try to integrate them so that those guys learn, and
5	not	5	they learn science and tradition and they learn and
6	MS. ANNELLE AMARAL: You want to say your name	6	maintain respect. So I think that this has been in the
7	again?	7	minds of the project, actually, for several years.
8	MS. TONIA MOY: This is Tonia with Historic	8	MS. CAROLINE BLANCO: And something that co
9	Hawaii Foundation.	9	continue beyond the project consistent with a comment you
10	You know, we're more on the building side of	10	were making earlier, Shad.
11	consultation. But I think, you know, from what I got from	11	MS. ANNELLE AMARAL: Hinano.
12	what you were saying is more to involve the Hawaiian	12	MR. HINANO RODRIGUES: I think the point Ton
13	community in the actual science part of the of this	13	was trying to make is that when Leiohu spoke, Leiohu spok
14	whole process, not just not just culture, but that	14	whereby science and tradition is one of the same.
15	there's a lot of science that the Hawaiian community knew	15	And our existence goes back to cosmology. The
16	and maybe could share and bring some light into the	16	source of life for the from the Hawaiian perspective is
17	process as well. I don't know.	17	a matter of cosmology. It goes back to evolution. It
18	MS. LEIOHU RYDER: Yes. And I am talking about	18	goes back to the Kumulipo that actually starts with there
19	traditional knowledge, you know.	19	is nothing and then now there is something in the bottom
20	MS. TONIA MOY: Right. Right, which is kind of	20	of the sea that eventually moves out from the bottom of
21	like a science.	21	the sea and comes onto land, and then there's evolution
22	MS. LEIOHU RYDER: Yes. Yes.	22	and everything changes.
23	MS. TONIA MOY: It is a science, though.	23	Well, it's it's the same thing. And so,
24	MS. LEIOHU RYDER: It's an inherent quality that	24	spiritually, it's cosmology. Science is evolution. It's
25	is in us, you know.	25	one of the same. So I think Tonia was trying to say that
	71		
-			
1	MS. TONIA MOY: Uh-huh.	1	what Leiohu was saying is our traditions do contribute
1	MS. TONIA MOY: Uh-huh. MS. LEIOHU RYDER: That is never tapped until	1 2	what Leiohu was saying is our traditions do contribute maybe do not have the label of science, but it's one in
2	MS. LEIOHU RYDER: That is never tapped until	2	maybe do not have the label of science, but it's one in the same.
2 3	MS. LEIOHU RYDER: That is never tapped until you want to pass a project or, you know, it's sometimes	2 3	maybe do not have the label of science, but it's one in the same.
2 3 4	MS. LEIOHU RYDER: That is never tapped until you want to pass a project or, you know, it's sometimes it becomes an afterthought.	2 3 4	maybe do not have the label of science, but it's one in the same. MS. LEIOHU RYDER: And I, you know this
2 3 4 5	MS. LEIOHU RYDER: That is never tapped until you want to pass a project or, you know, it's sometimes it becomes an afterthought. MS. TONIA MOY: Yeah. So, I mean so what I	2 3 4 5	maybe do not have the label of science, but it's one in the same. MS. LEIOHU RYDER: And I, you know this Leiohu again. You know, I appreciate what you shared, Mike,
2 3 4 5 6	MS. LEIOHU RYDER: That is never tapped until you want to pass a project or, you know, it's sometimes it becomes an afterthought. MS. TONIA MOY: Yeah. So, I mean so what I was looking at was kind of like include them as part of	2 3 4 5 6	maybe do not have the label of science, but it's one in the same. MS. LEIOHU RYDER: And I, you know this Leiohu again. You know, I appreciate what you shared, Mike, but, at the same time, you don't speak on behalf of me
2 3 4 5 6 7	MS. LEIOHU RYDER: That is never tapped until you want to pass a project or, you know, it's sometimes it becomes an afterthought. MS. TONIA MOY: Yeah. So, I mean so what I was looking at was kind of like include them as part of the whole science of it.	2 3 4 5 6 7	maybe do not have the label of science, but it's one in the same. MS. LEIOHU RYDER: And I, you know this Leiohu again. You know, I appreciate what you shared, Mike, but, at the same time, you don't speak on behalf of me And and and this is some of the points that those
2 3 4 5 6 7 8 9	MS. LEIOHU RYDER: That is never tapped until you want to pass a project or, you know, it's sometimes it becomes an afterthought. MS. TONIA MOY: Yeah. And what I am worried about is that from the past thrust. And I hear, you know, from what is being shared, that we don't have to worry about this being number two meeting and then	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	regulations which is what brings us here today. MS. MIKAHALA HELM: Well, what will the agreement be about? That is what because my sense was MS. CAROLINE BLANCO: Go ahead, Pua. MS. MIKAHALA HELM: My sense was an agreement about approved mitigation or something like that. MS. CAROLINE BLANCO: It won't be signed tomorrow, or anything like that. MS. PUA AIU: What happens is that if we feel like we can get through an MOA, like a draft MOA, tomorrow, then we might have one, we might not. We might not feel like we are there yet. Once you have a draft MOA, it will be circulated amongst all of the parties. So you might get the first Draft MOA. And you might say, this really sucks, I don't like this part, this part, this part. Then it goes around again. So that the but the process of a 106 is to get to a Memorandum of Agreement so that you car mitigate. Because that is what the process is.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	white, that hurts. Because we have been going through years of all of this testimony, and that is what is in the Draft EIS, and that is why the supplemental cultural statement, or whatever project you did needed to be done, because there were so many questions about how this was going to affect. And so much strong testimony about how this proposed white 14-story telescope would affect the historic property that, you know, you call historic property, Haleakala. For us, it's much more. And so I want to make sure you know that when we don't say something at the meeting, that is because we come with the history of being here and being present, to let the voice be heard, that it is a sacred place, that there is no price on the sacredness of Haleakala. And so I want to be really clear about this process we're going through. Because I can be here today, I can be here tonight; I cannot be here tomorrow. And what I am worried about is that from the past thrust. And I hear, you know, from what is being shared, that we don't have to worry about this being number two meeting and then tomorrow is number three or whatever. I just want to	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	regulations which is what brings us here today. MS. MIKAHALA HELM: Well, what will the agreement be about? That is what because my sense was MS. CAROLINE BLANCO: Go ahead, Pua. MS. MIKAHALA HELM: My sense was an agreeme about approved mitigation or something like that. MS. CAROLINE BLANCO: It won't be signed tomorrow, or anything like that. MS. PUA AIU: What happens is that if we feel like we can get through an MOA, like a draft MOA, tomorrow, then we might have one, we might not. We might not feel like we are there yet. Once you have a draft MOA, it will be circulated amongst all of the parties. So you might get the first Draft MOA. And you might say, this really sucks, I don't like this part, this part, this part. Then it goes around again. So that the but the process of a 106 is to get to a Memorandum of Agreement so that you can
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	white, that hurts. Because we have been going through years of all of this testimony, and that is what is in the Draft EIS, and that is why the supplemental cultural statement, or whatever project you did needed to be done, because there were so many questions about how this was going to affect. And so much strong testimony about how this proposed white 14-story telescope would affect the historic property that, you know, you call historic property, Haleakala. For us, it's much more. And so I want to make sure you know that when we don't say something at the meeting, that is because we come with the history of being here and being present, to let the voice be heard, that it is a sacred place, that there is no price on the sacredness of Haleakala. And so I want to be really clear about this process we're going through. Because I can be here today, I can be here tonight; I cannot be here tomorrow. And what I am worried about is that from the past thrust. And I hear, you know, from what is being shared, that we don't have to worry about this being number two meeting and then tomorrow is number three or whatever. I just want to clarify certain things. And that is, it seems that the	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	regulations which is what brings us here today. MS. MIKAHALA HELM: Well, what will the agreement be about? That is what because my sense was MS. CAROLINE BLANCO: Go ahead, Pua. MS. MIKAHALA HELM: My sense was an agreement about approved mitigation or something like that. MS. CAROLINE BLANCO: It won't be signed tomorrow, or anything like that. MS. PUA AIU: What happens is that if we feel like we can get through an MOA, like a draft MOA, tomorrow, then we might have one, we might not. We might not feel like we are there yet. Once you have a draft MOA, it will be circulated amongst all of the parties. So you might get the first Draft MOA. And you might say, this really sucks, I don't like this part, this part, this part. Then it goes around again. So that the but the process of a 106 is to get to a Memorandum of Agreement so that you can mitigate. Because that is what the process is. So one of the mitigations is avoidance. But that is what the process is. So that is if
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	white, that hurts. Because we have been going through years of all of this testimony, and that is what is in the Draft EIS, and that is why the supplemental cultural statement, or whatever project you did needed to be done, because there were so many questions about how this was going to affect. And so much strong testimony about how this proposed white 14-story telescope would affect the historic property that, you know, you call historic property, Haleakala. For us, it's much more. And so I want to make sure you know that when we don't say something at the meeting, that is because we come with the history of being here and being present, to let the voice be heard, that it is a sacred place, that there is no price on the sacredness of Haleakala. And so I want to be really clear about this process we're going through. Because I can be here today, I can be here tonight; I cannot be here tomorrow. And what I am worried about is that from the past thrust. And I hear, you know, from what is being shared, that we don't have to worry about this being number two meeting and then tomorrow is number three or whatever. I just want to	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	regulations which is what brings us here today. MS. MIKAHALA HELM: Well, what will the agreement be about? That is what because my sense was MS. CAROLINE BLANCO: Go ahead, Pua. MS. MIKAHALA HELM: My sense was an agreement about approved mitigation or something like that. MS. CAROLINE BLANCO: It won't be signed tomorrow, or anything like that. MS. PUA AIU: What happens is that if we feel like we can get through an MOA, like a draft MOA, tomorrow, then we might have one, we might not. We might not feel like we are there yet. Once you have a draft MOA, it will be circulated amongst all of the parties. So you might get the first Draft MOA. And you might say, this really sucks, I don't like this part, this part, this part. Then it goes around again. So that the but the process of a 106 is to get to a Memorandum of Agreement so that you can mitigate. Because that is what the process is. So one of the mitigations is avoidance. But

20 (Pages 74 to 77)

	78		80
1	what we are proposing," and you guys saying, "No, we don't	1	participants. And out of that came three solid
2	want it."	2	proposals. We thought there was still more
3	We have to in order for this otherwise, we	3	communication to come forward. We're here to hear that
4	just shouldn't meet. Because in order for this process to	4	in the context of those meetings as well.
5	work, we have to come out with something.	5	But I don't think we have a trajectory where,
6	And you guys may end up saying, you know, we	6	in two months, we will be done. We might, in two
7	don't agree, but we want to we want we don't agree	7	months, have the framework of what we think is
8	with this, but we want to be part of determining what	8	mitigation, but it's still open to input.
9	happens on the mountain in the future, so we will be	9	And this end point that we are rushing to is
10	concurring parties, even though we don't agree with the	10	troublesome for me because, again, the regs do not
11	concept. And you can do that.	11	preordain a timeframe. There is nothing in here.
12	So we will not get to a signed MOA tomorrow. I	12	But at any point, NSF can say, we don't feel
13	can guarantee you that.	13	this is going forward, or, we don't feel this is
14	MS. CHARLENE DWIN VAUGHN: Let me amplify that,	14	productive. They can shut it down. We can shut it down.
15	though. Because I think she needs to understand the regs	15	Pua can shut it down. But the bottom line is we are
16	and be able to go to our website and understand the	16	trying not to get to that point. We are trying to work
17	process of 106.	17	through the issues.
18	106 does not preordain an outcome. So we can go	18	MS. MIKAHALA HELM: Okay. I am just wanting to
19	through all of this, and the Council can make a decision	19	make sure that the EI the Draft EIS and all the
20	that it doesn't want to entertain an MOA.	20	supplemental work that was done in this upcoming EIS is a
21	In which case, this goes to the group of	21	part of whatever decision is made. That is my big
22	presidentially-appointed members with the recommendation	22	concern.
23	that we feel that this can't be mitigated, cannot, and	23	MS. CHARLENE DWIN VAUGHN: It is
24	that we would recommend these steps be taken. Likewise,	24	MS. CAROLINE BLANCO: If I can maybe, hopefully,
25	we can all agree that we would never agree, but it's in	25	give you some comfort with that concern.
	79		81
1		1	Yes, it's true, there were two attorneys that
1	the public interest to go forward with this project,	2	were on this case before I came along. And certainly
2	having heard everything that has been shared, and we	3	there are transcripts of a lot of comments that were made
3	would take all of the comments and try to shape them	4	during public hearings, heartfelt comments, significant
4	into something that reflected a balance between this	5	concerns that were expressed. That is all part of what we
5	spirit, the project needs, and try to codify it in a way	6	call the administrative record. Everything that happened
6	that we would then share for your feedback.	7	through this entire process is what is to be before the
7	And you could say, "I don't like nine of the	8	decision-maker and, ultimately, the Director of the
8	ten." But if we feel that it represents our best effort	9	National Science Foundation. In thinking about all of
9	to capture what has been said, and we feel that this	10	that, in making the final decision as to whether or not to
10	project can in fact embrace a preservation at the and	11	fund, even if we come up with a Memorandum of Agreement
11	a traditional cultural effort in that the decision is	12	just as a hypothetical, if we did and let's say your
12	made that you will get more out of us formalizing, in a	13	comments were that you completely disagreed with this, you
13	legal document, your right to establish protocols for	14	think avoidance of the whole thing is the only way to deal
14	participating in future projects.	15	with this. The Director could look at that and say, you
15	We might go through, but I think what we	16	know what, I agree with Mikahala and I am going to
16	are moving real fast for me. And we do this all the	17	disapprove it. So it is all before the Director, all of
17	time, and they are big projects.	18	these comments.
18	The purpose of today's meeting is to hear what	19	But as Charlene just said, the effort here is to
19	you have to say about different concepts, be it	20	try to see what are the viewpoints, what are the various
20	avoidance, do nothing, be it mitigate it, be it do it a	21	thoughts that people have, and can we find a way to work
21	different way. And I think tomorrow's meeting is,	22	together. And even if there is opposition to the project,
22	again, from my perspective, or the Council's	23	if there is a way that maybe we can do something that is
23	perspective, to see where we are at, what are people	24	positive to come up with this.
24 25	saying, what is the summary that is coming out of this. The last meeting had eight people, eight	25	By signing an MOA, it doesn't mean you
20	The last meeting had eight people, eight	1	

^{21 (}Pages 78 to 81)

	82		84
1	necessarily support the project. But you may think that	1	question of the project proponents or whoever is working
2	there are benefits to the mitigation proposals that are	2	on the design, which I assume is not final yet.
3	in there. And you may want a part of it.	3	What other parameters or information can you
4	And if, for example, you think down the line	4	give us about how you can avoid or minimize in your
5	if this project is funded and if these mitigation measures	5	design, or other things, part of the project, that we can,
6	go into effect, then what would happen is if something	6	you know, sort of consider if we were going to propose
7	went wrong and you signed it, you would be in the legal	7	mitigation or anything else? You know yeah, what is on
8	position to challenge it. So, you know, that is a benefit	8	the table?
9	of being involved in the process as well. Even if you	9	I mean, you have said that maybe decommissioning
10	continue to object to the project. I am not saying you do	10	things in, you know, 50 years is on the table. Is there
11	or don't, but, you know, whatever the viewpoint may be	11	any other information you can provide us so we can have
12	that you may have.	12	some more background about what is on the table from the
13	So all of these viewpoints are considered and	13	project proponents' perspective?
14	are part of the administrative records. One reason we	14	DR. CRAIG FOLTZ: You want me to speak to that?
15	have a court reporter here so it's all documented. So	15	MR. JEREMY WAGNER: Go ahead, Craig.
16	everything is before the Director and he can see that.	16	DR. CRAIG FOLTZ: Okay. We can give you lots
17	MS. MIKAHALA HELM: I'm sorry. Can I just	17	and lots of technical information, which these gentleman
18	reiterate two things? And that is about the two out of	18	can provide in copious detail, more than you probably
19	three proposals.	19	want. But I do want to point out a few things.
20	And one is that Uncle Charlie stated clearly	20	And above them all is the National Science
21	that when we went to one of the meetings in Pukalani,	21	Foundation does not have a limitless budget. And so when
22	he said that he is submitting the proposal, but that he	22	we consider proposals and when we consider and we
23	was against it and that he was he did it because they	23	review designs very, very critically with panels of
24	were going to do it, anyway. And that is the words I	24	experts from all over the world. We look at designs to be
25	remember him saying.	25	as economical as possible. All right. We don't if
	83		85
1	Number two, the MCC proposal, it was authored	1	there is a design that has well, we consider to be
2	not to be used as a mitigation, but it is being used as a	2	excess scope, we tell them cut that out, make this do
3	mitigation.	3	this we want you to if you are going to have a
4	So that is my that is all I wanted to share.	4	design that is designed to do a certain job, prove to us
5	MS. CHARLENE DWIN VAUGHN: MCC, for those of us	5	that it can do it, but prove to us that it's the least
6	who don't know, what does that mean?	6	that you have to do to do it in order to minimize the
7	MS. MIKAHALA HELM: Means Maui Community	7	cost.
8	College.	8	So it is not, I think, generally understood when
9	MS. MARILYN PARRIS: Local branch of UH.	9	we have these discussions, but this design is very highly
10	MS. CAROLINE BLANCO: Our understanding,	10	optimized. That is, it's been worked over for a number of
	Mikahala, is that they are mitigation proposals and they	11	years to be the best way to do the job that it's putting
	all want to be considered as mitigation proposals by the	12	itself out to do at the lowest cost and the lowest impact.
12 13	all want to be considered as mitigation proposals by the authors of those three written proposals that we've had.	12 13	itself out to do at the lowest cost and the lowest impact. MS. LIZ GORDON: For the science.
12 13 14	all want to be considered as mitigation proposals by the authors of those three written proposals that we've had. And I consider those NSF would consider those proposals	12 13 14	itself out to do at the lowest cost and the lowest impact. MS. LIZ GORDON: For the science. DR. CRAIG FOLTZ: For the science. Well, and
12 13 14 15	all want to be considered as mitigation proposals by the authors of those three written proposals that we've had. And I consider those NSF would consider those proposals part of the mitigation proposals.	12 13 14 15	itself out to do at the lowest cost and the lowest impact. MS. LIZ GORDON: For the science. DR. CRAIG FOLTZ: For the science. Well, and MR. JEREMY WAGNER: But there are a lot of
12 13 14 15 16	all want to be considered as mitigation proposals by the authors of those three written proposals that we've had. And I consider those NSF would consider those proposals part of the mitigation proposals. Also, the Star Compass and some of the other	12 13 14 15 16	itself out to do at the lowest cost and the lowest impact. MS. LIZ GORDON: For the science. DR. CRAIG FOLTZ: For the science. Well, and MR. JEREMY WAGNER: But there are a lot of dividers in there. For example, we talked about a church.
12 13 14 15 16 17	all want to be considered as mitigation proposals by the authors of those three written proposals that we've had. And I consider those NSF would consider those proposals part of the mitigation proposals. Also, the Star Compass and some of the other ideas that were generated out of the last meetings are	12 13 14 15 16 17	itself out to do at the lowest cost and the lowest impact. MS. LIZ GORDON: For the science. DR. CRAIG FOLTZ: For the science. Well, and MR. JEREMY WAGNER: But there are a lot of dividers in there. For example, we talked about a church. Jeremy Wagner. I'm sorry. Jeremy Wagner, ATST
12 13 14 15 16 17 18	all want to be considered as mitigation proposals by the authors of those three written proposals that we've had. And I consider those NSF would consider those proposals part of the mitigation proposals. Also, the Star Compass and some of the other ideas that were generated out of the last meetings are likewise proposals. NSF has not made any decision to	12 13 14 15 16 17 18	 itself out to do at the lowest cost and the lowest impact. MS. LIZ GORDON: For the science. DR. CRAIG FOLTZ: For the science. Well, and MR. JEREMY WAGNER: But there are a lot of dividers in there. For example, we talked about a church. Jeremy Wagner. I'm sorry. Jeremy Wagner, ATST Project Manager.
12 13 14 15 16 17 18 19	all want to be considered as mitigation proposals by the authors of those three written proposals that we've had. And I consider those NSF would consider those proposals part of the mitigation proposals. Also, the Star Compass and some of the other ideas that were generated out of the last meetings are likewise proposals. NSF has not made any decision to build. So that may be what what others might have	12 13 14 15 16 17 18 19	 itself out to do at the lowest cost and the lowest impact. MS. LIZ GORDON: For the science. DR. CRAIG FOLTZ: For the science. Well, and MR. JEREMY WAGNER: But there are a lot of dividers in there. For example, we talked about a church. Jeremy Wagner. I'm sorry. Jeremy Wagner, ATST Project Manager. We talked about a church, Haleakala being
12 13 14 15 16 17 18 19 20	all want to be considered as mitigation proposals by the authors of those three written proposals that we've had. And I consider those NSF would consider those proposals part of the mitigation proposals. Also, the Star Compass and some of the other ideas that were generated out of the last meetings are likewise proposals. NSF has not made any decision to build. So that may be what what others might have said, but that is not the position of the agency.	12 13 14 15 16 17 18 19 20	 itself out to do at the lowest cost and the lowest impact. MS. LIZ GORDON: For the science. DR. CRAIG FOLTZ: For the science. Well, and MR. JEREMY WAGNER: But there are a lot of dividers in there. For example, we talked about a church. Jeremy Wagner. I'm sorry. Jeremy Wagner, ATST Project Manager. We talked about a church, Haleakala being essentially a church environment. So we looked at noise
12 13 14 15 16 17 18 19 20 21	all want to be considered as mitigation proposals by the authors of those three written proposals that we've had. And I consider those NSF would consider those proposals part of the mitigation proposals. Also, the Star Compass and some of the other ideas that were generated out of the last meetings are likewise proposals. NSF has not made any decision to build. So that may be what what others might have said, but that is not the position of the agency. MS. ANNELLE AMARAL: Okay. There's a hand here.	12 13 14 15 16 17 18 19 20 21	 itself out to do at the lowest cost and the lowest impact. MS. LIZ GORDON: For the science. DR. CRAIG FOLTZ: For the science. Well, and MR. JEREMY WAGNER: But there are a lot of dividers in there. For example, we talked about a church. Jeremy Wagner. I'm sorry. Jeremy Wagner, ATST Project Manager. We talked about a church, Haleakala being essentially a church environment. So we looked at noise levels that would be appropriate for a church environment.
12 13 14 15 16 17 18 19 20 21 22	all want to be considered as mitigation proposals by the authors of those three written proposals that we've had. And I consider those NSF would consider those proposals part of the mitigation proposals. Also, the Star Compass and some of the other ideas that were generated out of the last meetings are likewise proposals. NSF has not made any decision to build. So that may be what what others might have said, but that is not the position of the agency. MS. ANNELLE AMARAL: Okay. There's a hand here. MS. Well, and MR. JEREMY WAGNER: But there are a lot of dividers in there. For example, we talked about a church. Jeremy Wagner. I'm sorry. Jeremy Wagner, ATST Project Manager. We talked about a church, Haleakala being essentially a church environment. So we looked at noise levels that would be appropriate for a church environment. And so we have done a lot of engineering to try to

22 (Pages 82 to 85)

	86		8
1	environment when it comes to the noise produced by that	1	of difference. If it's going to be white, it's going to
2	telescope. Okay. And that is our attempt at being	2	be very visible. And so that is what is sort of wrong.
3	respectful of that environment.	3	But even within that, the range of white, there's a
4	The height of the facility. Craig talked about	4	variation. So we have to minimize in order for the
5	the dollar cost. But we understood when we were doing the	5	telescope to be able to observe through clear,
6	design that the viewplain issues are a real issue. And we	6	un-thermally disturbed air.
7	went through the scoping. We understand that people don't	7	The enclosure itself, all the structure that
8	want to see the telescopes anymore than they have to. So	8	surrounds the telescope, has to be a very light color that
9	we made that telescope as short as we possibly could and	9	doesn't absorb heat. And that color, because of all the
10	still meet the science requirements. So it isn't it	10	coatings we have looked at in the thermal analyses and the
11	isn't a millimeter higher than it has to be, for example.	11	modeling we have done with some various sort of technica
12	DR. CRAIG FOLTZ: Yeah, those are the specific	12	methods, it proves out to be only white.
13	examples.	13	And certainly we looked at, because we were
14	And as far as noise issues, for example, I mean,	14	aware in the long-range development plan that Mike talked
15	we would like to hear, because we don't know, you know,	15	about, that if a building can be and anything other
16	are there are there specific times of day that would be	16	than solar observatories should blend in with the natural
17	critical for this site to be quiet? These could fold into	17	terrain so that it's as invisible as it can be. So we
18	the operations model for the telescope.	18	took that color and modeled that, that brown color, the
19	Really, that is the kind of input that we need,	19	natural brown color of the rock there. And that turns out
20	you know. Is the period just before sunrise important,	20	to be four times as much heat that is absorbed. And that
21	that we could be quiet. Because although one wants to	21	means that, in order to cool that, we would take four
22	observe the sun shortly after sunrise, if the period just	22	times as much electricity.
23	before sunrise is critical, we will quiet everything down.	23	And this gets back to Craig's point. We don't
24	We will make sure everything is taken care of before that,	24	have an unlimited budget and we can't bring a new power
25	quiet it down and not make a peep until practitioners	25	line up to the to the to the summit in order to
	87		8
1	leave the site if they are on the site. We can	1	provide all that additional power that would be necessary.
2	accommodate that.	2	So we are constrained by practical limitations in some
3	I speak for myself and physicist friends. And	3	ways. But, essentially, it comes down to anything other
4	Steve agrees with that. But that is the sort of concrete	4	than that white color of the dome will basically damage
5	thing that we need to hear because we don't understand.	5	the observing to the extent that we can't do the science.
5	uning that we need to near because we don't understand.		the observing to the extent that we can't do the setence.
6	And we want to understand	6	MR MIKE MABERRY Annelle
6	And we want to understand.	6 7	MR. MIKE MABERRY: Annelle.
7	MS. CHARLENE DWIN VAUGHN: Color continues to be	7	MS. ANNELLE AMARAL: Uh-huh.

1	DR. CRAIG FOLTZ: Important.	1	MR. JEREMY WAGNER: Yes.
2	MR. JEREMY WAGNER: It's like if you put a	2	MS. ANNELLE AMARAL: Okay. There's a comment
3	hammer out in the sun, it gets hot, right, you burn	3	down here at the front.
4	yourself when you pick it up. The rock gets hot. Well,	4	MS. LEIOHU RYDER: Which leads to, you know, if
5	the air above the rock is disturbed by that.	5	you want to be respectful of the church, because it is,
6	DR. CRAIG FOLTZ: It gets hot.	6	the height is, also. It's going to be the largest
7	MR. JEREMY WAGNER: Yeah, it gets hot.	7	building on Maui.
8	MR. MIKE MABERRY: It's like driving down the	8	MR. JEFF BARR: Yes.
9	road and seeing the shimmer.	9	MS. LEIOHU RYDER: Now, how can that I mean,
10	MR. JEREMY WAGNER: Okay. So if we build a	10	I don't know if a church is that big, but if Haleakala is
11	telescope at ground level and try to observe through that,	11	that sacred, why would we want something looking with
12	the air is disturbed and we can't see what we have to see.	12	that visual to disturb the clarity of the spirit?
13	All right. If you build the telescope up high to get up	13	Number two, also, is
14	above that disturbed layer and then you paint it the same	14	MS. CAROLINE BLANCO: I'm sorry.
15	color as the rock, you bring that disturbed layer up with	15	MS. LEIOHU RYDER: the electricity. Okay.
16	you.	16	We live on limited resources here on Maui. It's got to
17	MR. MIKE MABERRY: Same thing.	17	come from somewhere. So it's going to put additional
18	MR. JEREMY WAGNER: And you've destroyed it.	18	stress on the resources, the shared resources of the
19	There is no point in building it high. So if you build it	19	population on Maui. And that is going to affect
20	high to get above the layer and then you paint it white	20	everything, all life here.
21	and cool it, then you are above that layer. You are	21	MS. CAROLINE BLANCO: Mike, can you address
22	looking through this stable atmosphere and you can	22	two at least two of the points, about the impact on the
23	actually meet the science requirements and see what you	23	electricity, and, also, whether it would be the highest
24	are supposed to be able to see to do the science.	24	building on Maui?
25	MR. JEFF BARR: The only thing I would take	25	MR. MIKE MABERRY: I am not sure that I can

2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	 issue with is what Mike said, is that, basically, we could paint it black, we could paint it as dark as we possibly could, and, if we provided enough cooling to it, we could prevent that thermal plume. But we can't do that. As I say, there are practical limitations to how much coolant we can really apply to that surface. It has to do with electricity and has to do with some very sort of, you know MR. MIKE MABERRY: My point is it's not just electricity. There are some technical challenges with regard to how DR. CRAIG FOLTZ: Well, there's also the uniformity question. Uniformity of cooling. MR. MIKE MABERRY: Yes. I apologize. I know you didn't want to get interaction, but let's make it correct. MS. CAROLINE BLANCO: And it's not just money is what your point is. MR. MIKE MABERRY: No. My point is it's not just money. There are technical issues. 	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	address electricity. I think well, I am not sure who can, but it definitely will not be the tallest building on Maui. There are two buildings right now in Kaanapali while the County does not define the height of a story, it is typically 13 feet. Okay. And there are two 14-story, real 14-story tall buildings in Lahaina. MS. CHARLENE DWIN VAUGHN: But are they visible in the same way that this telescope MR. MIKE MABERRY: They are not on top of mountains. MS. CHARLENE DWIN VAUGHN: Right. DR. CRAIG FOLTZ: But you might make an estimate as to the comparison of, say, the electric power compared to a county building compared to a hotel. MR. MIKE MABERRY: If I am not mistaken, it's the entire Haleakala summit uses less energy than the Grand Wailea, I think is what we saw, all of the facilities. DR. CRAIG FOLTZ: With 17 telescopes plus MR. MIKE MABERRY: Yeah, over 17 total telescopes.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	 issue with is what Mike said, is that, basically, we could paint it black, we could paint it as dark as we possibly could, and, if we provided enough cooling to it, we could prevent that thermal plume. But we can't do that. As I say, there are practical limitations to how much coolant we can really apply to that surface. It has to do with electricity and has to do with some very sort of, you know MR. MIKE MABERRY: My point is it's not just electricity. There are some technical challenges with regard to how DR. CRAIG FOLTZ: Well, there's also the uniformity question. Uniformity of cooling. MR. MIKE MABERRY: Yes. I apologize. I know you didn't want to get interaction, but let's make it correct. MS. CAROLINE BLANCO: And it's not just money is what your point is. MR. MIKE MABERRY: No. My point is it's not just money. There are technical issues. MS. CHARLENE DWIN VAUGHN: So let's take it out another decimal point. Would this project be rendered 	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	address electricity. I think well, I am not sure who can, but it definitely will not be the tallest building on Maui. There are two buildings right now in Kaanapali while the County does not define the height of a story, it is typically 13 feet. Okay. And there are two 14-story, real 14-story tall buildings in Lahaina. MS. CHARLENE DWIN VAUGHN: But are they visible in the same way that this telescope MR. MIKE MABERRY: They are not on top of mountains. MS. CHARLENE DWIN VAUGHN: Right. DR. CRAIG FOLTZ: But you might make an estimate as to the comparison of, say, the electric power compared to a county building compared to a hotel. MR. MIKE MABERRY: If I am not mistaken, it's the entire Haleakala summit uses less energy than the Grand Wailea, I think is what we saw, all of the facilities. DR. CRAIG FOLTZ: With 17 telescopes plus MR. MIKE MABERRY: Yeah, over 17 total telescopes. MR. JEREMY WAGNER: The project has worked

24 (Pages 90 to 93)

	94		96
1	MR. JEFF BARR: Yeah. And we are very sensitive	1	MS. CAROLINE BLANCO: And so because of viewshed
2	to how much power we're using, because, again, that is an	2	issues, you know, the preferred alternative is what is
3	operational cost that goes out for the entire life of the	3	the preferred alternative? I just wonder if we
4	telescope.	4	I wanted to be sure that, Liz, we addressed your
5	MR. JEREMY WAGNER: For example, we've minimized	5	question about what else is on the table. I mean, I think
6	the number of cooling panels that we need to just the	6	part of what you are hearing and and I think what NSF
7	minimum load.	7	would look at as its position here with regard to what is
8	MS. LEIOHU RYDER: And also considering the	8	on the table. A lot has been put into this already in
9	present the present situation with energy now as we	9	terms of mitigation or minimization, you know, what
10	speak	10	what is the most efficient way of doing this so that it
11	MR. MIKE MABERRY: Yeah.	11	could reduce viewshed issues, so that it could still
12	MS. LEIOHU RYDER: and those rising costs for	12	obtain the science objectives without having as much of an
13	our community.	13	impact. So a lot of that has already gone into it. And I
14	MR. JEREMY WAGNER: That is where	14	am not sure if you have other ideas about what might be
15	MS. LEIOHU RYDER: And global	15	helpful.
16	MR. JEREMY WAGNER: Global warming.	16	MS. LIZ GORDON: No. I guess the issue is that
17	MS. LEIOHU RYDER: Exactly.	17	this is a discussion, we're trying to come up with things.
18	MR. JEREMY WAGNER: I am very concerned about	18	It's really hard. You know, it's good to know these
19	that in my personal life.	19	things. So, obviously, there's really nothing that can be
20	MS. LEIOHU RYDER: Exactly.	20	done in the design to avoid or minimize unless it was a
21	MS. CAROLINE BLANCO: I wonder if maybe one	21	different site.
22	of the points that she had raised, I think, might be the	22	MR. JEREMY WAGNER: Well, I would state it as
23	height of the building. I think that was partially	23	nothing more.
24	answered earlier, but I wondered if Jeremy might speak to	24	DR. CRAIG FOLTZ: No further.
25	that.	25	MR. JEREMY WAGNER: Yeah. We've tried the
	95		97
1	MR. JEREMY WAGNER: It's driven by the	1	placement at the Mees site, our preferred site, back a way
2	characteristics of the site. And it's science-based. It	2	from the ridge, so that it's blocked by the existing
3	is no higher than it has to be.	3	telescopes, it's blocked by the topology. So we prefer
4	MS. LEIOHU RYDER: Yes.	4	that site because of that. If we put it up at Reber
5	MR. JEREMY WAGNER: Absolutely not a millimeter	5	Circle, as Caroline said, it's potentially a better site
6	higher than it has to be.	6	scientifically, but we trade that off because we can hide
7	DR. CRAIG FOLTZ: The cost scale is not quite	7	some of the facility from view.
8	linear with height, but probably the difference in cost	8	It's a bit closer to the birds. So we worked
9	scales are on height. So it is very you know, we are	9	very closely with U.S. Fish and Wildlife to understand,
10	very conscious of cost. And we hammer I mean, if it's	10	you know, what we could do to mitigate our impact on the
11	funded, it is funded out of us. And we want to make sure	11	birds. And we were successful with that, if we take into
12	that	12	account what concerns they had and what mitigation efforts
13	MR. JEREMY WAGNER: I want to make it clear,	13	they asked us to do during construction.
14	though, the discussion that I had with the project	14	And then the cultural issues, we went straight
15	scientists when we were arguing it was an argument	15	ahead and tried to identify a Maui-based local
16	about, you know, heat the scientists would put it much,	16	environmental engineering firm. We tried to get Uncle
17	much taller if they could. And we argued. And the	17	Charlie, for example, involved right away.
18	viewplain issue, the fact that you could see it from down	18	And he made it very clear to me the day he shook
19	below or from the road or whatever was in that argument.	19	my hand that he was against the project. Okay. And we
20	MS. CAROLINE BLANCO: And in fact	20	brought him on board so that we could have that connection
	MR. JEREMY WAGNER: We needed to consider that	21	to the folks on Maui and understand what the issues were
21			night environ
21 22	in making it short as we possibly could.	22	right away.
	MS. CAROLINE BLANCO: In fact, I think the	23	The project I was actually invited to
22			

25 (Pages 94 to 97)

	98		100
1	tell you the story. I just well, anyway, it was a very	1	And I think what she is trying to say is you did
2	moving experience. There were a couple things that	2	this Draft EIS in 2006 with the same information.
3	happened that were pretty interesting, as Tony would say.	3	MR. JEFF BARR: Uh-huh.
4	I've talked with a Native Hawaiian astronomer.	4	MS. NANCY McMAHON: We don't understand how you
5	We drank tequila until we couldn't walk, for heaven's	5	got there, to give that information out. You already had
6	sake, to understand what the perspective was. We've come	6	the consultations that we were never involved in, that any
7	out here and listened, tried to understand what folks were	7	of us participated in, to make that Draft EIS. And maybe
8	concerned about.	8	you did it and you tried to reach out, but we didn't
9	And I have learned so much about Hawaii, about	9	understand that.
10	the culture. I've met so many people. We have all all	10	Usually, when you do the Draft EIS, when you get
11	of us in the project have made, I think, lifelong friends	11	to the final, the changes happen. This in-between, we
12	out here.	12	would be doing this right now. Because you are you may
13	And so it's really from my perspective,	13	have already had a 30-foot telescope, and it came down to
14	anyway, it's been a very positive experience. It's	14	being a 14 one because we told you this is more realistic
15	emotional and it's on both sides, because you talk	15	to do.
16	about a church. You know, the most spiritual experience I	16	MS. ANNELLE AMARAL: So is it
17	ever had was in a telescope was with a telescope. You	17	MS. NANCY McMAHON: Because the public part,
18	know, my mom bought me telescope when I was eight years	18	what we see is the Draft EIS, and nothing has changed.
19	old, and I have been in astronomy ever since. And so you	19	Is that pretty clear?
20	want you talk about respect. Absolutely, we have	20	I think that is pretty clear with everybody
21	respect.	21	here. We are still three years later still at the same
22	MS. CHARLENE DWIN VAUGHN: But, you know, I	22	level.
23	think this is Charlene again. I am listening and I am	23	MR. JEREMY WAGNER: But we did
24	trying to follow the conversation trying to come out of	24	MS. NANCY McMAHON: And we may and I know
25	the other side of my brain. But here here is where I	25	what you are saying. And I think we understand you.
	99		101
1	am lost. In the design of this project, you all have	1	MS. CHARLENE DWIN VAUGHN: We can see you
2	taken in information and comments over a three or	2	MS. NANCY McMAHON: We see you all are stressed
3	four-year period. And in receiving this information, you	3	about this, too. We all know the importance of this site
4	all have made changes, modifications, evaluated things.	4	and the spirituality. There is not one person here who
5	And while you can articulate it, I think that, for	5	has never been up there.
6	transparency purposes, it's not real clear to us because	6	MS. CHARLENE DWIN VAUGHN: That's not the
7	it do you understand what I am saying?	7	subject of debate.
8	You probably have done the right thing with the	8	MS. NANCY McMAHON: We're not arguing about
9	right intent and the right spirit, but the package is	9	that. We're all on the same table with that level.
10	offputting in that it seems like it's a package with a bow	10	It's how did you come to the you were at
11	and it's presented. Yet, we're now here to talk about it.	11	final in 2006. And we were just coming on board.
12	And that and hear me out.	12	MS. CHARLENE DWIN VAUGHN: To have a discussion
10	MR. JEREMY WAGNER: I am. I am.	13	MS. ANNELLE AMARAL: Okay. All right.
13	With JEREIVIT WARDALIN, Fund. Fund.		
13	MS. CHARLENE DWIN VAUGHN: I am trying to	14	MS. NANCY McMAHON: So you need to explain that
		14 15	MS. NANCY MCMAHON: So you need to explain that to us. How did you get 2006 you should have been
14	MS. CHARLENE DWIN VAUGHN: I am trying to		
14 15	MS. CHARLENE DWIN VAUGHN: I am trying to navigate. And I can see they are, too. How do you untie	15	to us. How did you get 2006 you should have been
14 15 16	MS. CHARLENE DWIN VAUGHN: I am trying to navigate. And I can see they are, too. How do you untie this bow, open the package up, give us clarity about the	15 16	to us. How did you get 2006 you should have been trying to work it out now.
14 15 16 17	MS. CHARLENE DWIN VAUGHN: I am trying to navigate. And I can see they are, too. How do you untie this bow, open the package up, give us clarity about the contents and the substance, so we can see how you moved	15 16 17	to us. How did you get 2006 you should have been trying to work it out now. MS. ANNELLE AMARAL: Okay. Let me let me ask
14 15 16 17 18	MS. CHARLENE DWIN VAUGHN: I am trying to navigate. And I can see they are, too. How do you untie this bow, open the package up, give us clarity about the contents and the substance, so we can see how you moved from point A to point B, to get here now where we are	15 16 17 18	to us. How did you get 2006 you should have been trying to work it out now. MS. ANNELLE AMARAL: Okay. Let me let me ask the question.
14 15 16 17 18 19	MS. CHARLENE DWIN VAUGHN: I am trying to navigate. And I can see they are, too. How do you untie this bow, open the package up, give us clarity about the contents and the substance, so we can see how you moved from point A to point B, to get here now where we are dealing with this project as proposed. It's a disconnect	15 16 17 18 19	to us. How did you get 2006 you should have been trying to work it out now. MS. ANNELLE AMARAL: Okay. Let me let me ask the question. MS. NANCY McMAHON: Okay.
14 15 16 17 18 19 20	MS. CHARLENE DWIN VAUGHN: I am trying to navigate. And I can see they are, too. How do you untie this bow, open the package up, give us clarity about the contents and the substance, so we can see how you moved from point A to point B, to get here now where we are dealing with this project as proposed. It's a disconnect somewhere.	15 16 17 18 19 20	to us. How did you get 2006 you should have been trying to work it out now. MS. ANNELLE AMARAL: Okay. Let me let me ask the question. MS. NANCY McMAHON: Okay. MS. ANNELLE AMARAL: I am hearing what I hear
14 15 16 17 18 19 20 21	MS. CHARLENE DWIN VAUGHN: I am trying to navigate. And I can see they are, too. How do you untie this bow, open the package up, give us clarity about the contents and the substance, so we can see how you moved from point A to point B, to get here now where we are dealing with this project as proposed. It's a disconnect somewhere. Do you understand?	15 16 17 18 19 20 21	to us. How did you get 2006 you should have been trying to work it out now. MS. ANNELLE AMARAL: Okay. Let me let me ask the question. MS. NANCY McMAHON: Okay. MS. ANNELLE AMARAL: I am hearing what I hear is a process question, that an EIS was drafted with some
14 15 16 17 18 19 20 21 22	MS. CHARLENE DWIN VAUGHN: I am trying to navigate. And I can see they are, too. How do you untie this bow, open the package up, give us clarity about the contents and the substance, so we can see how you moved from point A to point B, to get here now where we are dealing with this project as proposed. It's a disconnect somewhere. Do you understand? MS. NANCY McMAHON: Yeah. This is Nancy.	15 16 17 18 19 20 21 22	to us. How did you get 2006 you should have been trying to work it out now. MS. ANNELLE AMARAL: Okay. Let me let me ask the question. MS. NANCY McMAHON: Okay. MS. ANNELLE AMARAL: I am hearing what I hear is a process question, that an EIS was drafted with some conclusions in 2008

26 (Pages 98 to 101)

	102		10
1	with some conclusions reached without public input. That	1	time, like many of you folks are today out of your daily
2	is what is being said.	2	lives, to come in and testify, that it's not showing the
3	Now, I need to know who in this process can	3	appropriate respect for the host community I mean the
4	begin to address that. And that's Jeremy or that's	4	host culture, you need to do an EIS. They finally reached
5	Michael.	5	the point where they did one. It took years for them to
6	MR. MIKE MABERRY: I had my hand up longer than	6	finally come around.
7	you have.	7	So we told the project, right up front, if you
8	MR. JEREMY WAGNER: All right.	8	don't want to do an EIS, there's the door.
9	MR. MIKE MABERRY: Okay.	9	He was in the room.
10	MS. ANNELLE AMARAL: Process.	10	There's the door if you don't want to do a
11	MR. MIKE MABERRY: Folks, I represent the	11	federal EIS.
12	Institute for Astronomy at the University of Hawaii. I am	12	So, I mean, you know
13	sure most of you are familiar with the issues on Mauna Kea	13	MS. CHARLENE DWIN VAUGHN: But I think
14	for the last 12 years. And it has to do with	14	MR. MIKE MABERRY: It's been a challenge, I
15	observatories and sacred sites.	15	mean, you know, for us to want to acknowledge that we have
16	I think it would be incredibly disingenuous and	16	learned something.
17	incredibly rude and really stupid of us to have gone	17	MS. CHARLENE DWIN VAUGHN: Okay. But let m
18	through all of those public meetings where the Native	18	please
19	Hawaiians expressed their concern over specific issues	19	MS. ANNELLE AMARAL: And before you let me
20	and the public, over specific issues, for us to just let	20	get to Jeremy to answer the question, and then you can
21	the NSF come in and say, okay, we're not going to tell you	21	comment.
22	anything, we will just let you run amok here and then we	22	Go ahead.
23	will rein you in later after we get comment from the	23	MR. JEREMY WAGNER: We did part of the site
24	public and you get to hear what we already know. We had a	24	survey that we did, we also looked at site impacts. All
25	responsibility as a state agency to share with them that,	25	right. So when we got to the point where we had about six
	103		10
1		1	sites listed, after we went through the 72 originally,
1	you know, because we have land responsibilities,	2	Jeff, for example, went around a group of us went
2	responsibilities to the lands that we are temporary	3	around and we did a site impact study. And the things we
3	stewards of, you will do this, this, this and this, and	4	looked at, for example, were environmental issues, would
4	you will consider these issues.		you do an EA and EIS, cultural issues, viewplain issues,
5	Because that is what we have heard over the last	5	
6	ten years, of mistakes that have been made. And, you	6	all of those things. We went around and looked at the
7		-	1100 A the day of the second dependence of
	know, we don't want you to make those mistakes.	7	different sites that were under consideration to
8	So it's it's a very delicate issue. It's a	8	understand what those sorts of things would be that we
	So it's it's a very delicate issue. It's a it's a big challenge. I mean, take, for example, just	8	understand what those sorts of things would be that we might have to deal with.
8	So it's it's a very delicate issue. It's a it's a big challenge. I mean, take, for example, just the fact that we are doing a federal EIS, federal and	8 9 10	understand what those sorts of things would be that we might have to deal with. So right up front, since Haleakala was mentioned
8 9 10 11	So it's it's a very delicate issue. It's a it's a big challenge. I mean, take, for example, just the fact that we are doing a federal EIS, federal and state EIS. And we worked very hard to distribute them around the island. At one of the public meetings,
25 1 2 3 4	MR. JEFF BARR: Uh-huh. 107 MS. ANNELLE AMARAL: Comment here. MS. CAROLINE BLANCO: I think it's helpful to understand the NEPA process is a separate process to some extent, with different requirements, pursuant to different	25 1 2 3 4	public meetings and we had more public meetings than 105 were required by statute at the recommendation of our consultant. And we worked very hard to distribute them around the island. At one of the public meetings, somebody said this is a solar telescope and, yet, I don't
25 1 2 3 4 5	MR. JEFF BARR: Uh-huh. 107 MS. ANNELLE AMARAL: Comment here. MS. CAROLINE BLANCO: I think it's helpful to understand the NEPA process is a separate process to some extent, with different requirements, pursuant to different it's a different statute, different regulations. There	25 1 2 3 4 5	public meetings and we had more public meetings than 109 were required by statute at the recommendation of our consultant. And we worked very hard to distribute them around the island. At one of the public meetings, somebody said this is a solar telescope and, yet, I don't see solar panels anywhere. And that is you know, that
25 1 2 3 4 5 6	MR. JEFF BARR: Uh-huh. 107 MS. ANNELLE AMARAL: Comment here. MS. CAROLINE BLANCO: I think it's helpful to understand the NEPA process is a separate process to some extent, with different requirements, pursuant to different it's a different statute, different regulations. There are lots of similarities. And it requires public input.	25 1 2 3 4 5 6	public meetings and we had more public meetings than 109 were required by statute at the recommendation of our consultant. And we worked very hard to distribute them around the island. At one of the public meetings, somebody said this is a solar telescope and, yet, I don't see solar panels anywhere. And that is you know, that is kind of an embarrassing point, you know.
25 1 2 3 4 5 6 7	MR. JEFF BARR: Uh-huh. 107 MS. ANNELLE AMARAL: Comment here. MS. CAROLINE BLANCO: I think it's helpful to understand the NEPA process is a separate process to some extent, with different requirements, pursuant to different it's a different statute, different regulations. There are lots of similarities. And it requires public input. That is a very important component of NEPA.	25 1 2 3 4 5 6 7	public meetings and we had more public meetings than 105 were required by statute at the recommendation of our consultant. And we worked very hard to distribute them around the island. At one of the public meetings, somebody said this is a solar telescope and, yet, I don't see solar panels anywhere. And that is you know, that is kind of an embarrassing point, you know. So we talked to the project and said, can you
25 1 2 3 4 5 6 7 8	MR. JEFF BARR: Uh-huh. 107 MS. ANNELLE AMARAL: Comment here. MS. CAROLINE BLANCO: I think it's helpful to understand the NEPA process is a separate process to some extent, with different requirements, pursuant to different it's a different statute, different regulations. There are lots of similarities. And it requires public input. That is a very important component of NEPA. It's a little different than consultation. NEPA	25 1 2 3 4 5 6 7 8	public meetings and we had more public meetings than 105 were required by statute at the recommendation of our consultant. And we worked very hard to distribute them around the island. At one of the public meetings, somebody said this is a solar telescope and, yet, I don't see solar panels anywhere. And that is you know, that is kind of an embarrassing point, you know. So we talked to the project and said, can you guys look into whether you can run this thing. And Jeff
25 1 2 3 4 5 6 7	MR. JEFF BARR: Uh-huh. 107 MS. ANNELLE AMARAL: Comment here. MS. CAROLINE BLANCO: I think it's helpful to understand the NEPA process is a separate process to some extent, with different requirements, pursuant to different it's a different statute, different regulations. There are lots of similarities. And it requires public input. That is a very important component of NEPA. It's a little different than consultation. NEPA doesn't require this kind of sitting around a room,	25 1 2 3 4 5 6 7 8 9	public meetings and we had more public meetings than 109 were required by statute at the recommendation of our consultant. And we worked very hard to distribute them around the island. At one of the public meetings, somebody said this is a solar telescope and, yet, I don't see solar panels anywhere. And that is you know, that is kind of an embarrassing point, you know. So we talked to the project and said, can you guys look into whether you can run this thing. And Jeff did a study. And it turns out that it's not practical,
25 1 2 3 4 5 6 7 8 9 10	MR. JEFF BARR: Uh-huh. 107 MS. ANNELLE AMARAL: Comment here. MS. CAROLINE BLANCO: I think it's helpful to understand the NEPA process is a separate process to some extent, with different requirements, pursuant to different it's a different statute, different regulations. There are lots of similarities. And it requires public input. That is a very important component of NEPA. It's a little different than consultation. NEPA doesn't require this kind of sitting around a room, talking back and forth, trying to figure out what would go	25 1 2 3 4 5 6 7 8 9 10	public meetings and we had more public meetings than 105 were required by statute at the recommendation of our consultant. And we worked very hard to distribute them around the island. At one of the public meetings, somebody said this is a solar telescope and, yet, I don't see solar panels anywhere. And that is you know, that is kind of an embarrassing point, you know. So we talked to the project and said, can you guys look into whether you can run this thing. And Jeff did a study. And it turns out that it's not practical, but he did a study. And it was give and take.
25 1 2 3 4 5 6 7 8 9 10 11	MR. JEFF BARR: Uh-huh. 107 MS. ANNELLE AMARAL: Comment here. MS. CAROLINE BLANCO: I think it's helpful to understand the NEPA process is a separate process to some extent, with different requirements, pursuant to different it's a different statute, different regulations. There are lots of similarities. And it requires public input. That is a very important component of NEPA. It's a little different than consultation. NEPA doesn't require this kind of sitting around a room, talking back and forth, trying to figure out what would go into mitigation. It does require public input.	25 1 2 3 4 5 6 7 8 9 10 11	public meetings and we had more public meetings than 105 were required by statute at the recommendation of our consultant. And we worked very hard to distribute them around the island. At one of the public meetings, somebody said this is a solar telescope and, yet, I don't see solar panels anywhere. And that is you know, that is kind of an embarrassing point, you know. So we talked to the project and said, can you guys look into whether you can run this thing. And Jeff did a study. And it turns out that it's not practical, but he did a study. And it was give and take. MS. NANCY McMAHON: But do people know that?
25 1 2 3 4 5 6 7 8 9 10	MR. JEFF BARR: Uh-huh. 107 MS. ANNELLE AMARAL: Comment here. MS. CAROLINE BLANCO: I think it's helpful to understand the NEPA process is a separate process to some extent, with different requirements, pursuant to different it's a different statute, different regulations. There are lots of similarities. And it requires public input. That is a very important component of NEPA. It's a little different than consultation. NEPA doesn't require this kind of sitting around a room, talking back and forth, trying to figure out what would go into mitigation. It does require public input. So the Draft EIS was shaped through public	25 1 2 3 4 5 6 7 8 9 10 11 12	public meetings and we had more public meetings than 103 were required by statute at the recommendation of our consultant. And we worked very hard to distribute them around the island. At one of the public meetings, somebody said this is a solar telescope and, yet, I don't see solar panels anywhere. And that is you know, that is kind of an embarrassing point, you know. So we talked to the project and said, can you guys look into whether you can run this thing. And Jeff did a study. And it turns out that it's not practical, but he did a study. And it was give and take. MS. NANCY McMAHON: But do people know that? That information is
25 1 2 3 4 5 6 7 8 9 10 11	MR. JEFF BARR: Uh-huh. 107 MS. ANNELLE AMARAL: Comment here. MS. CAROLINE BLANCO: I think it's helpful to understand the NEPA process is a separate process to some extent, with different requirements, pursuant to different it's a different statute, different regulations. There are lots of similarities. And it requires public input. That is a very important component of NEPA. It's a little different than consultation. NEPA doesn't require this kind of sitting around a room, talking back and forth, trying to figure out what would go into mitigation. It does require public input. So the Draft EIS was shaped through public input. And there were meetings that occurred. And in the	25 1 2 3 4 5 6 7 8 9 10 11 12 13	public meetings and we had more public meetings than 109 were required by statute at the recommendation of our consultant. And we worked very hard to distribute them around the island. At one of the public meetings, somebody said this is a solar telescope and, yet, I don't see solar panels anywhere. And that is you know, that is kind of an embarrassing point, you know. So we talked to the project and said, can you guys look into whether you can run this thing. And Jeff did a study. And it turns out that it's not practical, but he did a study. And it was give and take. MS. NANCY McMAHON: But do people know that? That information is MS. CAROLINE BLANCO: There were 13 meetings
25 1 2 3 4 5 6 7 8 9 10 11 12	MR. JEFF BARR: Uh-huh. 107 MS. ANNELLE AMARAL: Comment here. MS. CAROLINE BLANCO: I think it's helpful to understand the NEPA process is a separate process to some extent, with different requirements, pursuant to different it's a different statute, different regulations. CRAIG FOLTZ: There were 13 meetings. MS. CAROLINE BLANCO: for the Draft EIS. MS. NANCY McMAHON: People didn't know DR. CRAIG FOLTZ: And that was then presented at
25 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	MR. JEFF BARR: Uh-huh. 107 MS. ANNELLE AMARAL: Comment here. MS. CAROLINE BLANCO: I think it's helpful to understand the NEPA process is a separate process to some extent, with different requirements, pursuant to different it's a different statute, different regulations. There are lots of similarities. And it requires public input. That is a very important component of NEPA. It's a little different than consultation. NEPA doesn't require this kind of sitting around a room, talking back and forth, trying to figure out what would go into mitigation. It does require public input. So the Draft EIS was shaped through public input. And there were meetings that occurred. And in the all of that led to the development of the Draft EIS. So what led up to the Draft EIS was a process that included a lot of public input.	25 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	public meetings and we had more public meetings than 103 were required by statute at the recommendation of our consultant. And we worked very hard to distribute them around the island. At one of the public meetings, somebody said this is a solar telescope and, yet, I don't see solar panels anywhere. And that is you know, that is kind of an embarrassing point, you know. So we talked to the project and said, can you guys look into whether you can run this thing. And Jeff did a study. And it turns out that it's not practical, but he did a study. And it was give and take. MS. NANCY McMAHON: But do people know that? That information is MS. CAROLINE BLANCO: There were 13 meetings. MS. CAROLINE BLANCO: for the Draft EIS. MS. NANCY McMAHON: People didn't know DR. CRAIG FOLTZ: And that was then presented at a subsequent meeting.
25 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	MR. JEFF BARR: Uh-huh. 107 MS. ANNELLE AMARAL: Comment here. MS. each one feels it in this room, then the universal spirit
of pono and truth and righteousness and grace would
indicate to me that to have a an an entity of this
type would be a tremendous a tremendous I can't even
describe the word to humanity, to creation. And it
would never have gone this far for me. This is my
personal view.
MS. CAROLINE BLANCO: Thank you. I appreciate
your answer.
MS. ANNELLE AMARAL: Okay. Thank you.
I am coming now to Jeremy.
MR. JEREMY WAGNER: The Park was ahead of me.
MS. ANNELLE AMARAL: No. I am coming to Jeremy,
then I am going to Liz, then I am coming to Warren. And
that is the way it goes.
Thank you.
Jeremy.
MR. JEREMY WAGNER: No comment.
MS. ANNELLE AMARAL: No comment now?
MR. JEREMY WAGNER: No.
MS. ANNELLE AMARAL: Then I am coming to Liz,
then I am coming to Warren.
MS. LIZ GORDON: Okay. I guess I had a question
about the issue of science goals, that, obviously, for
whatever particular goal of science, it has to be this
113
way. Is there a way that maybe have you set you
know, certain goals for science, but can you minimize your
goals a little so that would be on the table for
minimizing or avoiding certain issues that, you know, are
to be had with the height, the excavation depth, the
color? I mean, there is the give and take.
But, I mean, have you reached so much for the
moon is on the table that you or the sun can you
lower the goals a little and help, you know, the
discussion about or the negotiation of this, for this
particular site?
MS. CAROLINE BLANCO: Steve, can you remind
folks who you are?
MS. ANNELLE AMARAL: Identify yourself.
MR. STEVE KEIL: This is Steve Keil. I
initiated this project with the community, on behalf of
the community.
MS. CAROLINE BLANCO: The scientific community.
MR. STEVE KEIL: The scientific community, solar
astronomers, and astronomy in general. This project has a
long lifetime. It came through for funding the last
survey of astronomy in 2000. It is something that needs to be done. That laid out the things that we wanted the
to be done. That laid out the things that we wanted the telescope to do. And having given that range of
scientific goals that we wanted the telescope, we then

ANNELLE AMARAL: I am coming to Warren, and then Nancy, and then Charlene. Warren. MR. WARREN SHIBUYA: Okay. I am Warren Shibuya. When I first found out about ATST, it was in 2005. I was retired at that time, and had worked in the space and missile systems, designing satellites and rockets. And I thought it was a wonderful career that I had for over 32 years. I wanted to have this experience experienced by someone on Maui, more particularly a 	11 12 13 14 15 16 17 18 19 20 21 22 23	 photovoltaics. And there is no long screwdriver that fixes our panels up there. I have them in my house. So, you know, I am not only thinking and talking about it, I have done it. And it's working for over five years now. The point here is that I've worked with this. And I've worked with Craig personally to come up with solar panels. Why don't you have solar panels? What about mitigating some of these the height? Can't. We went through all of these engineerin studies, went through the technical details. I sympathize with many of these items.
12 13 14 15 16 17 18 19 20 21 22	 is responsive to the scientific community. So that is why I say it's a little different than other federal agencies in that respect. MS. ANNELLE AMARAL: I am coming to Warren, and then Nancy, and then Charlene. Warren. MR. WARREN SHIBUYA: Okay. I am Warren Shibuya. When I first found out about ATST, it was in 2005. 1	project, we apply permanency. And so it came about, the	1	understand that from this side. And I don't know how to
2	sunset clause. That idea came about in our discussions.	2	and you've had to address different people. And you've
3	So now the sunset clause is going to be part of	3	had to and there are various views. And you may have
4	that, I hope it is, a part of the MOA. That is after you	4	taken and thought you were following the right one and you
5	are pau with your four sun cycles, you clear it up. Okay.	5	were open about that. I think that is important. And we
6	You take your rubbish and go home. You clean up the place	6	are here because of that reason.
7	and make it look good.	7	I think, you know, that you have beyond the
8	But in the meantime, you share this knowledge,	8	timeframe, maybe we don't not all of us understand all
9	you share this opportunity, you provide for the chance for	9	the documents and the studies that you did to get there.
10	people to worship this sacred area. You share this with	10	But it seems like we've reached this point where we got to
11	both the science and the spiritual aspects of it.	11	now, which is what we got involved in because you've
12	That was part of the discussion. And that is	12	done concessions, and now we and you've done a lot.
13	why this sunset clause was developed.	13	You probably have done a lot. It's just hard for us to
14	Also, the institute that Uncle Charlie proposed	14	see that.
15	was a means of mitigating, allow for the residents,	15	And I just wanted to have you understand that
16	especially the native host people, to come up and bring	16	from this side. And I don't think because of the
17	themselves up. I am not talking about OJT, on-the-job,	17	situation, and several that went up the other day with us,
18	training. I am talking education, basic education of	18	you heard from Pua, there has been a lot of desecration up
19	math, science, engineering, technology, all of these	19	there. And there is a lot of hurt. So you are also
20	matters. Bring yourself up, bootstrap is fine, but you	20	taking the burden of that with you. And you are being
21	need the basis of education, you need a chance to have a	21	asked to heal that. And that is huge to have it on you.
22	mentor, you have a chance to see it in action, as I had	22	And there is probably no right or wrong answer
23	that opportunity.	23	here for any of us. And so I think, you know, trying to
24	This is a rare opportunity. I hope everyone has	24	keep this door on this communication is the best thing we
25	a chance in some field or another.	25	can do in trying to figure out, you know, okay, we we

You have done all this, but we're still here and they didn't they didn't participate. MR. WARREN SHIBUYA: Yes.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	maybe we can do something. What are we and we juss need to hear these things and let acknowledge the fact. And I think you tried this time to do that, but people aren't going to be happy with this no matter what. But acknowledge that is their right to know that. MR. WARREN SHIBUYA: Sure. And, Mike, can you tell them about the part that we came about in terms of cleaning up some of this mess that she is talking about? MS. CAROLINE BLANCO: That's right. MR. WARREN SHIBUYA: Like Reber Circle. MR. MIKE MABERRY: I apologize. I am not sure that I remember who had suggested it. I think it was Kiope. But, for example, the very first telescope that was ever built at the summit, in the in the Kolekole area, the first the first observing was actually done from Puu Ulaula, Red Hill. And that is the reason there's a building there today. But Reber Circle is a it's an area where there is a concrete circle, and there may be still some pieces of the track that was on it, that was built in the

31 (Pages 118 to 121)

1 we're - we're open. 1 per an ant, you know. So, koday, we're bere tuking about so with take can be done. But in having that discussion, so we keep having what has bee ond or with at decision has 2 DR_CAGIGFOLTZ: The broadcast. we keep having what has been done or what decision has 4 MK_MIKE MABERRY: The broadcast, weap. we keep having what has been done or what decision has 6 one of the first thing you are in the foreground is a point forward? 7 orgoup of hads: an antennas. hods: has 8 thads: and antennas. hods: has 9 trailer - mailer trash. The project team has sought and for as sen of the high start hods: has, very the end of behauser of the high start hods: and its and they will be gone forward? 11 the end of February of 100. So that is - 4 hat is part of the dest for hod. 14 far as sen of the high start of hods: and it we worked differently. And is 15 And we are open - we are open to suggestions as is 16 Charlene. MK. CHARLIE FEN: Mode Sen SHDO 17 MK. SCHARLIE DEWIN VAUGHN: Breve sen structure. is 18 apart from NSF and is partsec. is 19 theid, in aboynee un		122		124
3 DR. CRAIC FOLT2: The broadest, easely. 3 we keep hearing what has been done or what duckion has 4 MR. MIKE MABERRY: The broadcast, yeah, easely. 4 been reached or how this will help long-term. 6 one of the first things you see in the foreground is a 7 Im mot sure. So how do you fold that into 7 group of hacks and attemans. In those shack. And they will be gane before 1 Im mot sure. So how do you fold that into 10 the end of February of 09. So that is - that is part of 1 MK. MIKE MABERRY: If a state agency. 11 the end of February of 09. So that is - that is part of 1 MK. MIKE MABERRY: If a state agency. 12 MK. MIKE MABERRY: If a state agency. MK. MIKE MABERRY: If a state agency. 13 And we are open - we are open to suggestions as 13 14 first, first agency. MK. MIKE MABERRY: If a state agency. 15 MS. CHARLENE DWIN VAUGHN: Nave, and the is separate and aput how this process. 10 16 MK. OLLARLENE DWIN VAUGHN: So you - 20 17 Mk in haw been for a lot of activity and resources. 10 18 about how this processtand 10	1	we're we're open.	1	per an act, you know. So, today, we're here talking about
4 MR_MIKE MABERRY: The brandens, yeah, exactly. 4 been reached or how this will voor of how this is, you 5 When you are standing at Ulaula, looking toward Kolekole, 5 know, something that will help long-term. 6 new of the first things you are in the foreground is a 7 group of shacks and atterman. It look ilks, you know, 7 truits - unifer trait. The project train at sought and 9 helpful to understand that IPA has separate 10 atterms and those shacks. And they will be gone before 10 matemats and those shacks. And they will be gone before 11 the claump that we are looking at. 12 MS. CAROLINE BLANCO: You know, it might be 12 the ease of be things that we can try to do. 13 MS. CAROLINE BLANCO: So they continue to go 13 how two do we are open - we are open to suggestions as 14 fre as some of the things that we tont 14 think, for me, one of the things that might have been 15 oppole understond with you we putting on the whe ben 15 about how this yout diverse put we putting on the the lin 12 DR. CHARLE FED WIN VAUGHN: So you - 14 the kink degrader porterive, thit we ben 12 DR. CHARLE FED: With	2	You want to follow up on that, Craig?	2	so what else can be done. But in having that discussion,
5 When you are standing at Ulaula, looking toward Kolckole, 6 5 know, something that will help long-term. 6 one of the first things you see in the foreground is a group of hacks and internas. I looks like, you know, 1 I arm not sure. So how do you fold that into group of hacks and internas. 8 secured funding and is in the process of relocating those antennas and those shacks. And they will be gone before 1 MK NIKE MABERNY. If is a state agency. 11 the end of Pebruary of V9. So that is - that is part of 1 MK NIKE MABERNY. If is a state agency. 12 MK CHARLENE DWIN VAUGHN: There was a question about how this process could have worked differently. And 1 1 13 And we are open - we are open to suggestions as about how this process could have worked in of activity and resources. 1 MK. CHARLENE DWIN VAUGHN: But does the SHPO collaboration, a discussion and a buy-in. 14 far as some of the fings that might have been useful work hayone unit we got through this process, and about have been expended being proactive, that have been sectored a lot of the string and three would to a tradictional negatizations, a discussion and a buy-in. 123 12 MR I MARE MABERRY: The provious Director. 13 MR MIKE MABERRY: The provious Director. 14 far as some of the fings that might have been sectored a lot of these maign	3	DR. CRAIG FOLTZ: The broadcast.	3	we keep hearing what has been done or what decision has
6 one of the first things you see in the foreground is a 7 group of shacks and antennas. It looks like, you know, 7 group of shacks and antennas. It looks like, you know, 7 group of shacks and antennas. It looks like, you know, 7 group of shacks and antennas. It looks like, you know, 7 group of shacks and antennas. It looks like, you know, 7 group of shacks and antennas. It looks like, you know, 7 group of shacks and antennas. It looks like, you know, 7 group of shacks and antennas. It looks like, you know, 7 group of shacks and the shack a	4	MR. MIKE MABERRY: The broadcast, yeah, exactly.	4	been reached or how this will work or how this is, you
7 going of shacks and antennas. It looks like, you know, it miler – miler mush. The project team has sought and secured funding and is it he process of rolexing these antennas and hose shacks. And they will be gone before the cleam that we are boking at. 7 going forward? 11 the end of February of '09. So that is – that is part of the cleam that we are boking at. 10 11 13 And we are open - we are open in suggestions as far as some of the things that we are boking at. 13 MS. CHARLENE DWIN VAUGHN: There was a question 16 Charlane. 13 MS. CHARLENE DWIN VAUGHN: There was a question 16 Charlane. 14 17 MS. CHARLENE DWIN VAUGHN: There was a question 16 18 about how this process. 17 19 I think, for me, on of the hings that might have been secured that have been or a lot of activity and resources a collaboration, a discussion and a buy-in. 18 20 MS. CHARLENE DWIN VAUGHN: But does the SHPO collaboration, ad iscussion and a buy-in. 19 21 The loss have any or things that might have been secured things that might have been a collaboration, ad iscussion and a buy-in. 19 22 The CHARLE FEDN: Constantly. 10 23 Collaboration, ad iscussion and a buy-in. 21 24 The claboration, ad iscussion and a buy-in. 22 25 MR. MIKE MABERRY: The previous Director.	5	When you are standing at Ulaula, looking toward Kolekole,	5	know, something that will help long-term.
8 Initer - trailer trush. The project team has sought and 9 9 secured funding and is in the process of relocating those 10 and those shacks. And they will be gone before 11 the ead of February of '9. So that is - that is part of 12 the cleanup that we are looking at. 13 And we are open - ware open to suggestions as 14 far as some of the things that we ean ty to do. 15 MS, ANNELLE AMARAL: Okay, I am coming back to 16 Charlene. 17 MS, CHARLENE DWIN VAUGHN: There was a question 18 about how this process could have worked differently. And 19 I think, for me, one of the things that might have been 10 I think, for me, one of the things that may been 20 useful would have been dore lable in 21 Thore the own things that have been 22 I think, for me, one of the things that have been 23 people understood whaty ou were putting on the table in 24 terms of migation or whatever. So that three would be a 25 Collaboration, a discussion and a tuy-in. 1223 124 1 When I look through the National Historic	6	one of the first things you see in the foreground is a	6	I am not sure. So how do you fold that into
 secured funding and is in the process of relocating those maternas and those shacks. And they will be gone before the end of Pehrany of VP, So that is - that is part of the cleanup that we are looking at. And we are opon - we are open to suggestions as far as some of the things that we can ty to do. MS, ANNELLE AMARAL: Okay. I am coming back to Charlene. MS, CHARLENE DWIN VAUGHN: Bart oes and MS, ANNELLE AMARAL: Okay. I am coming back to Charlene. MS, CHARLENE DWIN VAUGHN: Bart oes a question about how this process. Could have worked differently. And I think, for me, one of the things that might have been usefid would have been for a lot of activity and resources bed in abeyance until we got through this process, and collaboration, a discussion and a buy-in. When I look through the National Historic Preservation Act, and it talks about properties of traditional religious and cultural significance that may be oligible for the National Register, consistent throughout this is consult with Native Hawaiians' organizations - consult with Native Hawaiian' down with people understanding what you are doing it, the intent, and how it ultimately will benefit the long-term goals and needs of that community. when we went out in carly 2003-2004, and asked, who is the elafe kupma who has responsibility and resport for soil. down with yeople understanding what you are to be consult with Native eva on the end where forum at this time. So, again, 1 think we got way ahead of consultation thysing on spectrum on Molified this, left's this were way outhreer on the end where this were way out there o	7	group of shacks and antennas. It looks like, you know,	7	going forward?
10 metermas and those shacks. And they will be gone before 11 responsibilities than the NSF. 11 the celoup that we are booking at. 12 MR. MIKE MABERRY: If's a state agency. 12 the celoup that we are booking at. 13 MS. CHARLENE DWIN VAUGHN: Okay. 13 And we are open - we are open to suggestions as 14 fir as some of the things that we own try to do. 14 fir as some of the things that might have been 16 Groward with their progress. And that is separate and 14 fir as some of the things that might have been 16 MS. CHARLENE DWIN VAUGHN: But does the SHPO 15 MS. ANNELLE AMARAL: Okay. I am coming back to 16 Groward with their progress. And that is separate and 16 MS. CHARLENE DWIN VAUGHN: But does the SHPO 17 collaborate with you on any of this? Because there is 16 about how this process could have been for a lof a civity and resources 18 MS. CHARLENE DWIN VAUGHN: So you 12 that have been expended being proactive, that have been 19 MR. MIKE MABERRY: Documenting. 12 the dia theyanee unil we got through the station? 12 MR. MIKE MABERRY: Documenting. 12 The cleaun this inocesistent 12 12	8	trailer trailer trash. The project team has sought and	8	MS. CAROLINE BLANCO: You know, it might be
11 the end of February of '09. So that is - that is part of 11. MR. MIKE MABERRY: The state agency. 12 the clearup that we are looking at. 12 MS. CHARLENE DWIN VAUGHN: Okay. 13 And we are ogen - we are ogen to suggestions as 13 MS. CLARLENE DWIN VAUGHN: So they continue to go 14 far as some of the things that we nu ty to do. 13 MS. CLARLENE DWIN VAUGHN: There was a question 16 about how this process could have worked differently. And 14 forward with their progress. And that is separate and 16 MS. CHARLENE DWIN VAUGHN: There was a question 16 MS. CHARLENE DWIN VAUGHN: So you - 11 that have been ore, alor of the things that night have been 19 DR. CHARLENE DWIN VAUGHN: So you - 12 that have been expended being proactive, that have been 19 DR. CHARLENE DWIN VAUGHN: So you - 12 that have been expended being proactive, that have been 19 DR. CHARLENE DWIN VAUGHN: So you - 14 that have been expended being proactive, that have been 19 DR. CHARLE FEIN: They con say whatever they 14 terms of mitigation or whatever. So that there would be a 25 DR. CHARLE FEIN: They con say whatever they 14 When I look through the National His	9	secured funding and is in the process of relocating those	9	helpful to understand that IFA has separate
11 the end of February of '09. So that is - that is part of 11. MR. MIKE MABERRY: The state agency. 12 the clearup that we are looking at. 12 MS. CHARLENE DWIN VAUGHN: Okay. 13 And we are ogen - we are ogen to suggestions as 13 MS. CLARLENE DWIN VAUGHN: So they continue to go 14 far as some of the things that we nu ty to do. 13 MS. CLARLENE DWIN VAUGHN: There was a question 16 about how this process could have worked differently. And 14 forward with their progress. And that is separate and 16 MS. CHARLENE DWIN VAUGHN: There was a question 16 MS. CHARLENE DWIN VAUGHN: So you - 11 that have been ore, alor of the things that night have been 19 DR. CHARLENE DWIN VAUGHN: So you - 12 that have been expended being proactive, that have been 19 DR. CHARLENE DWIN VAUGHN: So you - 12 that have been expended being proactive, that have been 19 DR. CHARLENE DWIN VAUGHN: So you - 14 that have been expended being proactive, that have been 19 DR. CHARLE FEIN: They con say whatever they 14 terms of mitigation or whatever. So that there would be a 25 DR. CHARLE FEIN: They con say whatever they 14 When I look through the National His	10	antennas and those shacks. And they will be gone before	10	responsibilities than the NSF.
13 And we are open – we are open to suggestions as 13 MS. CAROLINE BLANCO: So they continue to go 14 fir ar some of the things that we can try to do. 14 fir ar some of the things that we can try to do. 15 MS. ANNELLE AMARAL: Okay. I am coming back to 15 apart from NSF and its process. 16 Charlene. 16 apart from NSF and its process. 16 17 MS. CHARLENE DWIN VAUGHN: There was a question 16 apart from NSF and its process. 18 about how this process could have worked differently. And 19 DR. CHARLENE DWIN VAUGHN: So you – 20 that have been of a lot of activity and resources 20 MS. TONIA MOY: When? 20 the about how onked being proactive, that have been 21 MR. MIKE MABERRY: The previous Director. 21 The preservation Act, and it talks about properties of 23 DR. CHARLE FEIN: Document - 22 Preservation Act, and it talks about properties of 24 MS. CHARLE FEIN: Document - 24 Through the National Register, consistent 25 MR. MIKE MABERRY: Well, first off, there is a 23 concept in Hawaii, and that we discussed at the last 26 meeting, for example, and that is the connohili. And to it as	11		11	MR. MIKE MABERRY: It's a state agency.
14 far as some of the things that we can try to do. 14 forward with their progress. And that is separate and apart from NSF and its process. 15 MS. ANNELLE AMARAL: Okay. I an coming back to 15 apart from NSF and its process. 16 Charlene. 16 MS. CHARLENE DWIN VAUGHN: But does the SHPO 17 about how this process could have worked differently. And 16 some commonality here. 19 I think, for me, one of the things that may the been 19 DR. CHARLE FED WIN VAUGHN: So you - 21 that have been for a lot of activity and resources 10 MS. CHARLE FED WIN VAUGHN: So you - 21 that have been for a lot of activity and resources 10 MS. CHARLE FED WIN VAUGHN: So you - 22 held in absyance until we opt through this process, and 22 MS. CHARLE FEDN: Constantly. 22 people understood what you were putting on the table in 23 MR. MIKE MABERRY: The provious Director. 23 collaboration, a discussion and a buy-in. 123 ICARLE FEDN: Document - 123 ICARLE MEDERNY: Weln? Inc. CHARLIE FEIN: Document - MS. CHARLENE DWIN VAUGHN: Where they have 24 be eligible for the National Register, consistent Thor componet. MR. MIKE MABERR	12	the cleanup that we are looking at.	12	MS. CHARLENE DWIN VAUGHN: Okay.
15 MS. ANNELLE AMARAL: Okay. I am coming back to 15 apart from NSF and its process. 16 Charlene. 16 MS. CHARLENE DWIN VAUGHN: There was a question 17 MS. CHARLENE DWIN VAUGHN: And 16 MS. CHARLENE DWIN VAUGHN: But does the SHPO 19 I think, for me, one of the things that night have been 16 MS. CHARLENE DWIN VAUGHN: So you - 20 useful would have been for a lot of activity and resources 20 MS. CHARLENE DWIN VAUGHN: So you - 21 that have been of ningiation or whatever. So that there would be a 21 MS. CHARLENE DWIN VAUGHN: So you - 22 held in abeyance until we got through this process, and 22 MR. 2	MS. CHARLENE DWIN VAUGHN: I don't think it's a	2	MR. JEREMY WAGNER: for the site. So we want
3	violation at all. It's a clarity of the process and how	3	to make it as short as we can.
4	the collaboration unfolded to sanction. What really is	4	So were people consulted? Yeah, because they
5	being presented as a lot of concessions, as Nancy said, a	5	told us height was an issue.
6	lot of mitigation to be sympathetic to Haleakala, or at	6	Did they have input into the design?
7	least respectful of, when it doesn't seem to be that a lot	7	Absolutely.
8	of stakeholders participated in sanctioning it or saying	8	MS. CHARLENE DWIN VAUGHN: Did the SHPO ever
9	that, yes, this is acceptable to move this forward.	9	come to the table or meeting representing Native Hawaiian
10	You are saying the record is there, that you	10	interests or your organization?
11	have the authority under state law to do that. For us,	11	I mean, there seem to be some established
12	again, it seems like there had to be some linkage with the	12	entities here that tend to come to all the meetings that I
13	state agency that we work with, which is the SHPO. And I	13	know my office is involved with on Oahu for the Navy and
14	have just never heard the SHPO go on record indicating	14	the Army. And, I mean, it's their work, but I know we
15	they understood all this was going on.	15	bring select people to most meetings to have these
16	MS. ANNELLE AMARAL: That is all right. That	16	discussions. I am just trying to figure out how they were
17	is just a simple factual statement that somebody can	17	involved.
18	clearly answer, right? I mean, there has	18	MR. JEREMY WAGNER: Well, I am trying to use the
19	MS. CHARLENE DWIN VAUGHN: Who sat at the table?	19	height as a specific example.
20	I heard Charlie Maxwell. But did Charlie share with the	20	MS. CHARLENE DWIN VAUGHN: Okay. But
21	other people, what was the process, or is there one?	21	MR. JEREMY WAGNER: So we didn't we did not
22	MS. ANNELLE AMARAL: There must be a process.	22	wait for SHPO to tell us to make it shorter.
23	MR. JEREMY WAGNER: Well	23	MS. CHARLENE DWIN VAUGHN: But did you tell the
24	MS. ANNELLE AMARAL: Jeremy.	24	SHPO, in the context of complying with the federal
25	MR. JEREMY WAGNER: I am not sure this is	25	regulation for this project that had an impact on a
	127		129
1	Jeremy Wagner again. I am not sure I am following	1	property that was known to be a traditional, cultural
2	exactly.	2	property, was there a discussion please hear me out.
3	But for the height, for example	3	MR. JEREMY WAGNER: Uh-huh.
4	MS. CHARLENE DWIN VAUGHN: Okay.	4	MS. CHARLENE DWIN VAUGHN: Was there a
5	MR. JEREMY WAGNER: the viewplain was	5	discussion that said this is going to be critical to us
6	identified as the issue essentially the day we looked at	6	having this consultation, can you come to a meeting, or
7	Haleakala. All right. And it was from discussions with	7	won't you look at a memo, or can you give us insight or
8	people out here. It was from experience through the	8	feedback into? I am still struggling with the
9	long-range development plan, and our environmental	9	coordination.
10	contractor and such. They said viewplain will be a	10	MS. ANNELLE AMARAL: Okay. Here. Here,
11	significant issue. It was cultural, birds, the viewplain.	11	here, here. Here, the answer.
12	That is those were the three big ones that we	12	DR. CHARLIE FEIN: If you would like us to
13	identified.	13	gather the documentation for all of the invitations to the
14	And the project team and the National Solar	14	SHPO with specific requests for input, month after month
15	Observatory is responsible for executing the project. And	15	after month would you like us to do that?
16	the project at this point is the design and development of	16	MS. CHARLENE DWIN VAUGHN: What is that going to
17	this facility. It's not construction, because we haven't	17 18	share with me? Tell me, because they need to hear. DR. CHARLIE FEIN: What that is going to share
18	been awarded funds for that. It is an improvement. So	19	is that we expressed our concerns
19	design and development.	20	MS. CHARLENE DWIN VAUGHN: Okay.
20	So we hear that the viewplain is an issue. So immediately that becomes part of the requirement list that	20	DR. CHARLE FEIN: to the SHPO, invited the
21	goes into or feeds into the engineering studies, into the	22	SHPO to the 13-some-odd meetings that we had between the
23	engineers' work, to design the facility. So height needs	23	scoping and the issuance of the DEIS to request their
24	to be minimized. Not only is it a cost issue, but it's	24	input, their particular
25	it's an issue for the folks on Maui	25	MR. JEREMY WAGNER: Process.
			22 (Decce 126 to 120)

	130		132
1	DR. CHARLIE FEIN: perspective on those	1	needed to happen. I would love to see that.
2	specific issues. We have that documented.	2	MS. CAROLINE BLANCO: Charlene.
3	MS. CHARLENE DWIN VAUGHN: Okay. I don't want	3	MS. CHARLENE DWIN VAUGHN: That, at least, gives
4	to come across as pedantic, but under our regulations,	4	me a chronology that helps me to understand.
5	800.8(c), says specifically if it's the agency's intent to	5	DR. CHARLIE FEIN: Did we not provide that to
6	coordinate Section 106 and NEPA, the SHPO has to document	6	you?
7	that they agree to such coordination.	7	MS. CAROLINE BLANCO: We have sent that to you
8	Can you show me that letter where there was	8	in several different letters. And the process is all out
9	buy-in that this was going to happen this way?	9	there on the website.
10	DR. CHARLIE FEIN: Yes.	10	MS. CHARLENE DWIN VAUGHN: Okay.
11	MS. CHARLENE DWIN VAUGHN: You have that?	11	MS. CAROLINE BLANCO: To revisit it all now does
12	DR. CHARLIE FEIN: We have that letter.	12	not seem to me to be productive.
13	MS. CHARLENE DWIN VAUGHN: Okay. So you feel	13	I think that we have a transparent process. We
14	that by not participating, the SHPO, in a default	14	have a website. We have people who can explain things.
15	manner	15	The problem is if people haven't familiarized themselves
16	DR. CHARLIE FEIN: Thank you.	16	with the entire record that has occurred over years, that
17	MS. CHARLENE DWIN VAUGHN: allowed you all to	17	is not something that I think we should do right now
18	take some of the actions that you did?	18	MS. CHARLENE DWIN VAUGHN: Okay. But
19	DR. CHARLIE FEIN: Thank you.	19	MS. CAROLINE BLANCO: to use the time most
20	MS. CHARLENE DWIN VAUGHN: Okay.	20	effectively.
21	MS. MARTHA CATLIN: Excuse me. This is Martha.	21	MS. CHARLENE DWIN VAUGHN: Okay. But it's a
22	I don't think that we have ever seen any kind of	22	yeomen's task for you to expect everybody here to go to a
23	documentation to the Advisory Council	23	website and read through three to four years of background
24	MS. CHARLENE DWIN VAUGHN: And my office.	24	to get to today. So what are we talking about, what could
25	MS. MARTHA CATLIN: and that was intending to	25	be considered mitigation, where are we at in coming up
25	MS. MARTHA CATLIN: and that was intending to 131	25	be considered mitigation, where are we at in coming up

CAROLINE BLANCO: Well, you know, part of the problem is, too, if there are invitations to meetings that people don't attend, that is not something you can do. Not just that, I am talking about years ago, and how the process has been involved. I wouldn't expect that anybody would be completely intimately involved with all of the process that has gone on at any given time. MS. CHARLENE DWIN VAUGHN: So we're to accept the color is set, the height is set, a lot of other
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	131 use 800.8(c). Could that be clarified? MS. CAROLINE BLANCO: I MS. CHARLENE DWIN VAUGHN: It will be a letter. It can't be clarified out of the written comment, Martha. They are saying it exists. MS. CAROLINE BLANCO: Well, I don't think I think this isn't getting us where we really need to go. If there were problems in the process, the problems existed years ago. MS. CHARLENE DWIN VAUGHN: But there are MS. CAROLINE BLANCO: I understand what you are saying, Charlene. And I understand you are trying to grasp with how did they get to this point. MS. CHARLENE DWIN VAUGHN: Foundation. Foundation. To say we're at the point to execute and negotiate an agreement, you have to have a foundation. There has to be a history. Everybody who is going to get a circulated agreement needs to understand how it built and evolved over time. I am not saying it didn't have a basis for its	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	133 with a proposal. MS. CAROLINE BLANCO: Charlene, I realize that, but, the truth is, we have let people know from the time it began. So regardless of the fact that we have people now that may be new to the process, the entities involved have been involved from day-one and have had access to the documents and have been familiar. MS. CHARLENE DWIN VAUGHN: Liz is sitting there at the Park Service, saying, no, she hasn't. She's a critical player. She doesn't know this information. MS. CAROLINE BLANCO: Well, you know, part of the problem is, too, if there are invitations to meetings that people don't attend, that is not something you can do. Not just that, I am talking about years ago, and how the process has been involved. I wouldn't expect that anybody would be completely intimately involved with all of the process that has gone on at any given time. MS. CHARLENE DWIN VAUGHN: So we're to accept the color is set, the height is set, a lot of other factors are set, they are cast in concrete for the

Not just that, I am talking about years ago, and how the process has been involved. I wouldn't expect that anybody would be completely intimately involved with all of the process that has gone on at any given time. MS. CHARLENE DWIN VAUGHN: So we're to accept the color is set, the height is set, a lot of other factors are set, they are cast in concrete for the scientific needs, so we need to go forward with this as a given, there is no opportunity to discuss certain things,

34 (Pages 130 to 133)

	134		136
1	MS. ANNELLE AMARAL: That doesn't sound all	1	But, of course, there's a lot of overlap. NEPA
2	right. Let me what I hear, quite frankly, is a	2	requires consideration of a federal activity on cultural
3	discussion about we're missing some foundational	3	resources, historic resources. And, of course, that is
4	information.	4	the center of Section 106. So there is overlap. The
5	MS. CHARLENE DWIN VAUGHN: That is all I am	5	regulations are wonderful in that they allow for that
6	saying.	6	combination of it.
7	MS. ANNELLE AMARAL: We are missing some factual	7	But there are specific requirements to do it.
8	information.	8	And I think what happened here is that there was an
9	MS. CHARLENE DWIN VAUGHN: All right. Do you	9	attempt to try to combine the processes, but there was no
10	agree?	10	announcement, formal letter that said this is exactly how
11	MS. LIZ GORDON: Yes.	11	we're going to do it and we got the buy-in of the SHPO and
12	MS. ANNELLE AMARAL: So we did not can we	12	everybody else to understand this is the way it's going.
13	take a bit of a break? I believe we have the information	13	That being said, a lot of the process happened
14	available on a computer for Powerpoint presentation.	14	in a de facto way of a combination of these two. I
15	MS. CHARLENE DWIN VAUGHN: Okay.	15	explained this at the last meeting, but I really didn't go
16	MS. ANNELLE AMARAL: So let's walk through that	16	ahead and explain this at this meeting. And, largely,
17	timeline of what documents	17	because I wanted to keep the background parts, you know,
18	DR. CRAIG FOLTZ: We're past time.	18	very summarized and so we could have more of a discussion
19	MS. ANNELLE AMARAL: Okay.	19	about impacts and how to resolve them.
20	In the meantime, let me take a little okay.	20	But just to clarify, there was no specific
21	We were supposed to end at 4:00.	21	letter that said, pursuant to the NHPA, Section 106
22	And, Marilyn, you have got to go?	22	regulations, we're combining these two processes such that
	Superintendent, you have to go?	23	everything that happens under NEPA gets critical 106, vice
23	Supermendence, you nave to go.		
23 24	MS. MARILYN PARRIS: Well, I have to leave	24	versa, and so forth.
24	MS. MARILYN PARRIS: Well, I have to leave	24	versa, and so forth.
24	MS. MARILYN PARRIS: Well, I have to leave before 5:00.	24	versa, and so forth. With that being said, there was an awful lot of
24 25	MS. MARILYN PARRIS: Well, I have to leave before 5:00. 135 MS. ANNELLE AMARAL: Before 5:00. Just talk	24 25	versa, and so forth. With that being said, there was an awful lot of
24 25 1	MS. MARILYN PARRIS: Well, I have to leave before 5:00.	24 25 1	versa, and so forth. With that being said, there was an awful lot of 137 transparency that happened in terms of public process.
24 25 1 2	MS. MARILYN PARRIS: Well, I have to leave before 5:00. 135 MS. ANNELLE AMARAL: Before 5:00. Just talk amongst yourselves while I ask the process question.	24 25 1 2	versa, and so forth. With that being said, there was an awful lot of 137 transparency that happened in terms of public process. Now, whether it's public process for purposes of 106, we
24 25 1 2 3	MS. MARILYN PARRIS: Well, I have to leave before 5:00. 135 MS. ANNELLE AMARAL: Before 5:00. Just talk amongst yourselves while I ask the process question. (Recess, 4:17 p.m. to 4:34 p.m.)	24 25 1 2 3	versa, and so forth. With that being said, there was an awful lot of 137 transparency that happened in terms of public process. Now, whether it's public process for purposes of 106, we get into some confusion there.
24 25 1 2 3 4	MS. MARILYN PARRIS: Well, I have to leave before 5:00. 135 MS. ANNELLE AMARAL: Before 5:00. Just talk amongst yourselves while I ask the process question. (Recess, 4:17 p.m. to 4:34 p.m.) MS. ANNELLE AMARAL: Back on the record. We're	24 25 1 2 3 4	versa, and so forth. With that being said, there was an awful lot of 137 transparency that happened in terms of public process. Now, whether it's public process for purposes of 106, we get into some confusion there. So that being said, what did appear in the Draft
24 25 1 2 3 4 5	MS. MARILYN PARRIS: Well, I have to leave before 5:00. 135 MS. ANNELLE AMARAL: Before 5:00. Just talk amongst yourselves while I ask the process question. (Recess, 4:17 p.m. to 4:34 p.m.) MS. ANNELLE AMARAL: Back on the record. We're back on the record.	24 25 1 2 3 4 5	versa, and so forth. With that being said, there was an awful lot of 137 transparency that happened in terms of public process. Now, whether it's public process for purposes of 106, we get into some confusion there. So that being said, what did appear in the Draft EIS was the tower as it is now determined to be proposed.
24 25 1 2 3 4 5 6	MS. MARILYN PARRIS: Well, I have to leave before 5:00. 135 MS. ANNELLE AMARAL: Before 5:00. Just talk amongst yourselves while I ask the process question. (Recess, 4:17 p.m. to 4:34 p.m.) MS. ANNELLE AMARAL: Back on the record. We're back on the record. And before we proceed any further, Caroline has	24 25 1 2 3 4 5 6	versa, and so forth. With that being said, there was an awful lot of 137 transparency that happened in terms of public process. Now, whether it's public process for purposes of 106, we get into some confusion there. So that being said, what did appear in the Draft EIS was the tower as it is now determined to be proposed. Correct? The height of it, the color of it and so forth.
24 25 1 2 3 4 5 6 7	MS. MARILYN PARRIS: Well, I have to leave before 5:00. 135 MS. ANNELLE AMARAL: Before 5:00. Just talk amongst yourselves while I ask the process question. (Recess, 4:17 p.m. to 4:34 p.m.) MS. ANNELLE AMARAL: Back on the record. We're back on the record. And before we proceed any further, Caroline has said there's a five-minute explanation.	24 25 1 2 3 4 5 6 7	versa, and so forth. With that being said, there was an awful lot of 137 transparency that happened in terms of public process. Now, whether it's public process for purposes of 106, we get into some confusion there. So that being said, what did appear in the Draft EIS was the tower as it is now determined to be proposed. Correct?
24 25 1 2 3 4 5 6 7 8	MS. MARILYN PARRIS: Well, I have to leave before 5:00. 135 MS. ANNELLE AMARAL: Before 5:00. Just talk amongst yourselves while I ask the process question. (Recess, 4:17 p.m. to 4:34 p.m.) MS. ANNELLE AMARAL: Back on the record. We're back on the record. And before we proceed any further, Caroline has said there's a five-minute explanation. MS. CAROLINE BLANCO: Or less.	24 25 1 2 3 4 5 6 7 8	versa, and so forth. With that being said, there was an awful lot of 137 transparency that happened in terms of public process. Now, whether it's public process for purposes of 106, we get into some confusion there. So that being said, what did appear in the Draft EIS was the tower as it is now determined to be proposed. Correct? The height of it, the color of it and so forth. And so I think where we stand now, in terms of how we move
24 25 1 2 3 4 5 6 7 8 9	MS. MARILYN PARRIS: Well, I have to leave before 5:00. 135 MS. ANNELLE AMARAL: Before 5:00. Just talk amongst yourselves while I ask the process question. (Recess, 4:17 p.m. to 4:34 p.m.) MS. ANNELLE AMARAL: Back on the record. We're back on the record. And before we proceed any further, Caroline has said there's a five-minute explanation. MS. CAROLINE BLANCO: Or less. MS. ANNELLE AMARAL: Or less.	24 25 1 2 3 4 5 6 7 8 9	versa, and so forth. With that being said, there was an awful lot of 137 transparency that happened in terms of public process. Now, whether it's public process for purposes of 106, we get into some confusion there. So that being said, what did appear in the Draft EIS was the tower as it is now determined to be proposed. Correct? The height of it, the color of it and so forth. And so I think where we stand now, in terms of how we move forward, is to look at it in terms of this is the tower
24 25 1 2 3 4 5 6 7 8 9 10	MS. MARILYN PARRIS: Well, I have to leave before 5:00. 135 MS. ANNELLE AMARAL: Before 5:00. Just talk amongst yourselves while I ask the process question. (Recess, 4:17 p.m. to 4:34 p.m.) MS. ANNELLE AMARAL: Back on the record. We're back on the record. And before we proceed any further, Caroline has said there's a five-minute explanation. MS. CAROLINE BLANCO: Or less. MS. ANNELLE AMARAL: Or less. MS. CAROLINE BLANCO: The question had come up	24 25 1 2 3 4 5 6 7 8 9 10	versa, and so forth. With that being said, there was an awful lot of 137 transparency that happened in terms of public process. Now, whether it's public process for purposes of 106, we get into some confusion there. So that being said, what did appear in the Draft EIS was the tower as it is now determined to be proposed. Correct? The height of it, the color of it and so forth. And so I think where we stand now, in terms of how we move forward, is to look at it in terms of this is the tower that is minimized to the most efficient in the most
24 25 1 2 3 4 5 6 7 8 9 10 11	MS. MARILYN PARRIS: Well, I have to leave before 5:00. 135 MS. ANNELLE AMARAL: Before 5:00. Just talk amongst yourselves while I ask the process question. (Recess, 4:17 p.m. to 4:34 p.m.) MS. ANNELLE AMARAL: Back on the record. We're back on the record. And before we proceed any further, Caroline has said there's a five-minute explanation. MS. CAROLINE BLANCO: Or less. MS. ANNELLE AMARAL: Or less. MS. CAROLINE BLANCO: The question had come up about whether I mean, we started to get into some	24 25 1 2 3 4 5 6 7 8 9 10 11	versa, and so forth. With that being said, there was an awful lot of 137 transparency that happened in terms of public process. Now, whether it's public process for purposes of 106, we get into some confusion there. So that being said, what did appear in the Draft EIS was the tower as it is now determined to be proposed. Correct? The height of it, the color of it and so forth. And so I think where we stand now, in terms of how we move forward, is to look at it in terms of this is the tower that is minimized to the most efficient in the most efficient way to meet the scientific objectives.
24 25 1 2 3 4 5 6 7 8 9 10 11 12	MS. MARILYN PARRIS: Well, I have to leave before 5:00. 135 MS. ANNELLE AMARAL: Before 5:00. Just talk amongst yourselves while I ask the process question. (Recess, 4:17 p.m. to 4:34 p.m.) MS. ANNELLE AMARAL: Back on the record. We're back on the record. And before we proceed any further, Caroline has said there's a five-minute explanation. MS. CAROLINE BLANCO: Or less. MS. ANNELLE AMARAL: Or less. MS. CAROLINE BLANCO: The question had come up about whether I mean, we started to get into some specific 106 speak, so to speak. And in that there's a	24 25 1 2 3 4 5 6 7 8 9 10 11 12	versa, and so forth. With that being said, there was an awful lot of 137 transparency that happened in terms of public process. Now, whether it's public process for purposes of 106, we get into some confusion there. So that being said, what did appear in the Draft EIS was the tower as it is now determined to be proposed. Correct? The height of it, the color of it and so forth. And so I think where we stand now, in terms of how we move forward, is to look at it in terms of this is the tower that is minimized to the most efficient in the most efficient way to meet the scientific objectives. So is there a way to make it smaller and meet
24 25 1 2 3 4 5 6 7 8 9 10 11 12 13	MS. MARILYN PARRIS: Well, I have to leave before 5:00. 135 MS. ANNELLE AMARAL: Before 5:00. Just talk amongst yourselves while I ask the process question. And before we proceed any further, Caroline has said there's a five-minute explanation. MS. CAROLINE BLANCO: Or less. MS. ANNELLE AMARAL: Or less. MS. CAROLINE BLANCO: The question had come up about whether I mean, we started to get into some specific 106 speak, so to speak. And in that there's a question about these two environmental compliance processes, there's NEPA and Section 106. And if you're going to combine the two processes, which the regulations allow for, the and the National Historic Preservation Act allows for Section 106, there is specific procedures	24 25 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	versa, and so forth. With that being said, there was an awful lot of 137 transparency that happened in terms of public process. Now, whether it's public process for purposes of 106, we get into some confusion there. So that being said, what did appear in the Draft EIS was the tower as it is now determined to be proposed. Correct? The height of it, the color of it and so forth. And so I think where we stand now, in terms of how we move forward, is to look at it in terms of this is the tower that is minimized to the most efficient in the most efficient way to meet the scientific objectives. So is there a way to make it smaller and meet the purpose of the project? The answer is no. Would we like to have that be the case? Yes, of course. It would be great to be able to tell you, in all honesty, sure, we would love to lower it by 15 feet or 100 feet, but we can't do that if it's going to beat the
24 25 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	MS. MARILYN PARRIS: Well, I have to leave before 5:00. 135 MS. ANNELLE AMARAL: Before 5:00. Just talk amongst yourselves while I ask the process question. (Recess, 4:17 p.m. to 4:34 p.m.) MS. ANNELLE AMARAL: Back on the record. We're back on the record. And before we proceed any further, Caroline has said there's a five-minute explanation. MS. CAROLINE BLANCO: Or less. MS. ANNELLE AMARAL: Or less. MS. CAROLINE BLANCO: The question had come up about whether I mean, we started to get into some specific 106 speak, so to speak. And in that there's a question about these two environmental compliance processes, there's NEPA and Section 106. And if you're going to combine the two processes, which the regulations allow for, the and the National Historic Preservation Act allows for Section 106, there is specific procedures that have to be followed to go ahead and do that.	24 25 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	versa, and so forth. And if you're going to combine the two processes, which the regulations allow for, the and the National Historic Preservation Act allows for Section 106, there is specific procedures that have to be followed to go ahead and do that. J can say, having been around the 106 world for a while, agencies are fairly they are getting you	24 25 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	versa, and so forth. With that being said, there was an awful lot of 137 transparency that happened in terms of public process. Now, whether it's public process for purposes of 106, we get into some confusion there. So that being said, what did appear in the Draft EIS was the tower as it is now determined to be proposed. Correct? The height of it, the color of it and so forth. And so I think where we stand now, in terms of how we move forward, is to look at it in terms of this is the tower that is minimized to the most efficient in the most efficient way to meet the scientific objectives. So is there a way to make it smaller and meet the purpose of the project? The answer is no. Would we like to have that be the case? Yes, of course. It would be great to be able to tell you, in all honesty, sure, we would love to lower it by 15 feet or 100 feet, but we can't do that if it's going to beat the scientific goals of the project that is being proposed. So that is where we are at with regard to those, those issues, height and color.
24 25 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	MS. MARILYN PARRIS: Well, I have to leave before 5:00. 135 MS. ANNELLE AMARAL: Before 5:00. Just talk amongst yourselves while I ask the process question. (Recess, 4:17 p.m. to 4:34 p.m.) MS. ANNELLE AMARAL: Back on the record. We're back on the record. And before we proceed any further, Caroline has said there's a five-minute explanation. MS. CAROLINE BLANCO: Or less. MS. CAROLINE BLANCO: The question had come up about whether I mean, we started to get into some specific 106 speak, so to speak. And in that there's a question about these two environmental compliance processes, there's NEPA and Section 106. And if you're going to combine the two processes, which the regulations allow for, the and the National Historic Preservation Act allows for Section 106, there is specific procedures that have to be followed to go ahead and do that. I can say, having been around the 106 world for a while, agencies are fairly they are getting you know, it's becoming more common that they combine	24 25 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	versa, and so forth. With that being said, there was an awful lot of 137 transparency that happened in terms of public process. Now, whether it's public process for purposes of 106, we get into some confusion there. So that being said, what did appear in the Draft EIS was the tower as it is now determined to be proposed. Correct? The height of it, the color of it and so forth. And so I think where we stand now, in terms of how we move forward, is to look at it in terms of this is the tower that is minimized to the most efficient in the most efficient way to meet the scientific objectives. So is there a way to make it smaller and meet the purpose of the project? The answer is no. Would we like to have that be the case? Yes, of course. It would be great to be able to tell you, in all honesty, sure, we would love to lower it by 15 feet or 100 feet, but we can't do that if it's going to beat the scientific goals of the project that is being proposed. So that is where we are at with regard to those, those issues, height and color. And so what I would like to do is, first of all,
24 25 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	MS. MARILYN PARRIS: Well, I have to leave before 5:00. 135 MS. ANNELLE AMARAL: Before 5:00. Just talk amongst yourselves while I ask the process question. (Recess, 4:17 p.m. to 4:34 p.m.) MS. ANNELLE AMARAL: Back on the record. We're back on the record. And before we proceed any further, Caroline has said there's a five-minute explanation. MS. CAROLINE BLANCO: Or less. MS. ANNELLE AMARAL: Or less. MS. CAROLINE BLANCO: The question had come up about whether I mean, we started to get into some specific 106 speak, so to speak. And in that there's a question about these two environmental compliance processes, there's NEPA and Section 106. And if you're going to combine the two processes, which the regulations allow for, the and the National Historic Preservation Act allows for Section 106, there is specific procedures that have to be followed to go ahead and do that. I can say, having been around the 106 world for a while, agencies are fairly they are getting you know, it's becoming more common that they combine processes. I think you would probably agree. I mean,	24 25 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	versa, and so forth. With that being said, there was an awful lot of 137 transparency that happened in terms of public process. Now, whether it's public process for purposes of 106, we get into some confusion there. So that being said, what did appear in the Draft EIS was the tower as it is now determined to be proposed. Correct? The height of it, the color of it and so forth. And so I think where we stand now, in terms of how we move forward, is to look at it in terms of this is the tower that is minimized to the most efficient in the most efficient way to meet the scientific objectives. So is there a way to make it smaller and meet the purpose of the project? The answer is no. Would we like to have that be the case? Yes, of course. It would be great to be able to tell you, in all honesty, sure, we would love to lower it by 15 feet or 100 feet, but we can't do that if it's going to beat the scientific goals of the project that is being proposed. So that is where we are at with regard to those, those issues, height and color. And so what I would like to do is, first of all, answer or direct folks to answer questions if there are

35 (Pages 134 to 137)

	138		140
1	clarification of that issue, we would be happy to try to	1	which was this concept of a konohiki that would work with
2	help explain it.	2	the with the IFA to allow for there is access now
3	MS. CHARLENE DWIN VAUGHN: So can you clarify	3	that is allowed for traditional purposes, practices. But
4	for all of us what is on the table? Because that is what	4	I think it was for the purpose of looking at how to
5	you are saying	5	interpret this site.
6	MS. CAROLINE BLANCO: Sure.	6	I think that was the main purpose, was it not?
7	MS. CHARLENE DWIN VAUGHN: we need to focus	7	It was the main purpose of the konohiki concept,
8	on. What can we look at in terms of mitigation,	8	for interpretation and purposes of that.
9	minimization and you said all three.	9	Did you remember something else to remember?
10	MS. CAROLINE BLANCO: Absolutely. Absolutely.	10	MS. TONIA MOY: Actually, I just want to say
11	Okay.	11	avoidance is actually still on the table in that if he
12	With avoidance, to sort of categorize, I have	12	chooses not to fund it.
13	it's not that NSF is opposed to avoidance. That is not	13	MS. CAROLINE BLANCO: Excellent point.
14	the I want to make sure that message is conveyed. The	14	Excellent point.
15	problem is that we can't see any way to avoid the impacts	15	And that is if we are
16	based on the scientific need for the tower to be X number	16	MS. CHARLENE DWIN VAUGHN: Okay.
17	of feet and to be a certain color. So as far as that	17	MS. CAROLINE BLANCO: If we are looking at
18	goes, it's hard to imagine what avoidance would look like	18	trying to reach an agreement between everybody, that
19	unless somebody has an idea that we haven't thought about.	19	wouldn't be I mean, that would not be the way to go
20	And nobody is perfect. So, by all means, if	20	with it, but for obvious reasons. But certainly we can
21	anybody has ideas, understanding that the scientific goals	21	look at minimization with regard to the sunset provision,
22	would still have to be met in order for it to go forward,	22	or, again, any other ideas that folks have. And
23	then then please let us know.	23	mitigation, certainly we're open to any other additional
24	Minimization, I think that there was one	24	thoughts that that may come about.
25	proposal that did come under the category of minimization.	25	MS. CHARLENE DWIN VAUGHN: And I would like t
	139		143
1	And that is some the sunset provision, limiting the	1	go on record saying some of the things Mike is doing are
2	life of the telescope, if it's approved for funding, and	2	clearly mitigation. They need to be documented and
3	restoring it back to the community. That is on the table.	3	presented as such. He is doing a lot of things that he
4	And then we look at mitigation, which are, you	4	has worked out.
5	know, some other types of proposals. We have the three	5	MS. CAROLINE BLANCO: Excellent point.
6	written proposals that were presented. That is the Maui	6	MS. CHARLENE DWIN VAUGHN: But it doesn't come
7	Community College, Warren Shibuya and Uncle Charlie's,	7	across as mitigation
8	those three proposals.	8	MS. CAROLINE BLANCO: Right.
9	We also had from the last meeting, we had the	9	MS. CHARLENE DWIN VAUGHN: so he needs
10	Star Compass as being a possibility. That is on the	10	MS. CAROLINE BLANCO: Which reminds me, the
11	table.	11	Reber Circle.
12	Dr or Craig Foltz here. He's a doctor, too,	12	MS. PUA AIU: Wait, wait, wait. That is not
13	but we will call him Craig. So he had also talked about	13	mitigation for this project. My concern is that's
14	might people be interested in looking at ways to help with	14	different context.
15	traditional practices with regard to noise, are there	15	MR. MIKE MABERRY: Exactly.
16	certain times that are more important to Native Hawaiians	16	MS. CHARLENE DWIN VAUGHN: What I heard, it wa
17	that should be under consideration. That is on the table.	17	a couple, can you
18	MS. CHARLENE DWIN VAUGHN: And I heard another	18	MS. CAROLINE BLANCO: Reber Circle cleanup.
19	one, and that is how it involved Native Hawaiians and	19	MS. CHARLENE DWIN VAUGHN: That is what I am
20	protocols or access and use	20	talking about.
21	MS. CAROLINE BLANCO: Absolutely.	21	MS. CAROLINE BLANCO: And, also
22	MS. CHARLENE DWIN VAUGHN: to be on the	22	MS. CHARLENE DWIN VAUGHN: Oh, no, no.
23	table.	23	MS. CAROLINE BLANCO: I think the broadcast
20	MS. CAROLINE BLANCO: And that kind of goes	24	tower cleanup. Because, at the last meeting, we did talk
21	WELL CANCELINE DEPENDED. AND HIZE KIND UP 2005	4 1	to not eloundp. Decuase, at the last meeting, we did tark
24 25	nicely with one of the proposals from the last meeting,	25	about a lot about the cleanup of the

36 (Pages 138 to 141)

MR. MIKE MABERRY: And the east-facing ahu. DR. CRAIG FOLTZ: They actually were proposals. MR. MIKE MABERRY: That's the reason. MS. ANNELLE AMARAL: There were comments and Mike	1 2 3	from a cultural perspective. And we need to really understand that Haleakala as a whole is a sacred place. And that being said, it's almost impossible to talk about
MR. MIKE MABERRY: That's the reason. MS. ANNELLE AMARAL: There were comments and		
MS. ANNELLE AMARAL: There were comments and	3	And that being said it's almost impossible to talk about
		And that being said, it's annost impossible to talk about
Mike	4	mitigation.
	5	MR. MIKE MABERRY: It is.
MR. JEREMY WAGNER: Hey, you guys need to be	6	MS. CHARLENE DWIN VAUGHN: So with that being
cognizant of her need to record this.	7	said, help the group understand if you are saying all
MR. MIKE MABERRY: I'm sorry.	8	discussions are shut down, off the table. Because a lot
MS. ANNELLE AMARAL: There was the projects that	9	of the things that are being cast as mitigation, you're
Mike is working on also as mitigation, there was a Reber	10	right, don't speak to the spirituality, don't speak to the
Circle, the broadcast tower cleanup.	11	culture, don't speak to the tradition.
	12	Nevertheless, there are things that are on the
	13	table that could help deal with some desecration issues,
DR. CRAIG FOLTZ: There are a number of other	14	that would preserve access and use, and formalize
things that are still on the table.	15	something that is now very fluid, unformal, unstructured.
	16	So you have to put this in context for us. I heard what
-	17	you said, but then help me with that next linkage to that.
	18	MR. HINANO RODRIGUES: Right. And the thing is,
	19	I don't see how we can get to the next linkage until we
MS. LEIOHU RYDER: Petrels?	20	actually address it. And it looks as though no we are
DR. CRAIG FOLTZ: The Petrel. We have monitored	21	not addressing it.
the burrows. We would continue to monitor the burrows.	22	MS. CHARLENE DWIN VAUGHN: Okay.
We are not we could not construct during breeding	23	MR. HINANO RODRIGUES: We heard Leiohu. And I
season. We would not build fences.	24	would say that almost everybody in this room feels exactly
There are the viewshed improvements, there	25	what she is saying. But I am not quite too sure that it's
143		145
are issues of access and coordinating access.	1	dead, that the issue is dead. It's just that the issue is
	2	not being discussed.
	3	MS. ANNELLE AMARAL: So allowing, Hinano, the
· ·	4	issue, how do you mitigate spirituality, is that the issue
	5	we are talking about?
	6	MR. HINANO RODRIGUES: Right.
	7	MS. ANNELLE AMARAL: Okay. And in what ways car
	8	you mitigate spirituality?
	9	MR. HINANO RODRIGUES: Let's all discuss it, you
	10	know.
	11	MS. ANNELLE AMARAL: Okay. Start it. You start
	12	it.
	13	MR. HINANO RODRIGUES: How do we mitigate
	14	spirituality? How do you I hear this talk about
	15	church. Why are you applying Western concepts?
	16	MR. JEREMY WAGNER: No.
	17	MR. HINANO RODRIGUES: It's not a church. Well,
	18	because when somebody said, "Oh, well, let's bring down
	19	the volume," I go, "What." "Oh, do we do it before the
	20	sun come up or the sun come down," I go, "What." You
		know, our church is not Sunday, our church is not one day
		out of the week. Our church is 24 hours, seven days. So
		that we shouldn't even use that perspective. Let's
Marquesan, half Tahitian. So if I am Marquesan, then I go	24	just throw it to the side because it's a poor analogy. It
back 1,500 years here. We need we need to look at it	25	doesn't work. Because you cannot understand our way you
	things that are still on the table. MS. CHARLENE DWIN VAUGHN: Okay. DR. CRAIG FOLTZ: I mean, for example, the bird which has cultural significance, according to our understanding. We have monitored the MS. LEIOHU RYDER: Petrels? DR. CRAIG FOLTZ: The Petrel. We have monitored the burrows. We would continue to monitor the burrows. We are not we could not construct during breeding season. We would not build fences. There are the viewshed improvements, there 143 are issues of access and coordinating access. MS. CAROLINE BLANCO: And all the mitigation proposals in the letter and the draft. I will tell those in a moment, but, by all means, go ahead. MR. HINANO RODRIGUES: Hinano Rodrigues, State Historic Preservation. We are talking and I am approaching this strictly from a cultural perspective. We are talking all about our mitigation proposals. And in talking about all those mitigation proposals. And in talking about all those mitigation proposals. We are talking all about our mitigation proposals. And in talking about all those in the cultural perspective in the sense that and I think Leiohu has very well articulated what the Hawaiian perspective is, in the sense that Haleakala as a whole is a sacred site. What we are trying to do when we discuss our mitigation proposals is to take that whole and say, well, yeah, it's all important, but maybe we can just narrow down to the specific area. I I really think we are totally missing the point that Leiohu is trying to make. And we need we really need as someone whose ancestors have lived on Maui for at least 900 years, if not 1,500, if I am half Maoli half not Maoli, but	MR. WARREN SHIBUYA: East-facing ahu.13DR. CRAIG FOLTZ: There are a number of other14things that are still on the table.15MS. CHARLENE DWIN VAUGHN: Okay.16DR. CRAIG FOLTZ: I mean, for example, the bird17which has cultural significance, according to our18understanding. We have monitored the19MS. LEIOHU RYDER: Petrels?20DR. CRAIG FOLTZ: The Petrel. We have monitored21the burrows. We would continue to monitor the burrows.22We are not we could not construct during breeding23season. We would not build fences.24There are the viewshed improvements, there2514314are issues of access and coordinating access.1MS. CAROLINE BLANCO: And all the mitigation2proposals in the letter and the draft.3I will tell those in a moment, but, by all4means, go ahead.5MR. HINANO RODRIGUES: Hinano Rodrigues, State6Histric Preservation.7We are talking and I am approaching this8strictly from a cultural perspective. We are talking all10those mitigation proposals. And in talking about all10those mitigation proposals. And in talking about all13the Hawaiian perspective is, in the sense that Haleakala14as a whole is a sacred site. What we are trying to do15when we discuss our mitigation proposals is to take that16whole and say, well, yeah, it's all important, but maybe17<

37 (Pages 142 to 145)

	146		148
1	want to use the word church.	1	an effort that you have made with regard to the site
2	So, you know, once we start to do that, we are	2	itself. And I wonder if maybe that might be one way to
3	on a slippery slope. So we need to look we need to,	3	approach this.
4	all of us, take off our Western hats and put on our	4	MS. CHARLENE DWIN VAUGHN: Another way, I think
5	Hawaiian hats and see, like she said, if we can come up	5	that you deal with spirituality is to acknowledge that it
6	with ways to define or to mitigate spirituality.	6	is unfettered use and access. There are minimum, if any,
7	I think I think we can	7	prohibitions to connecting with something that is
8	MS. ANNELLE AMARAL: Okay.	8	spiritual and that is part of and defines who you are.
9	MR. HINANO RODRIGUES: you know.	9	MS. CAROLINE BLANCO: And that should be
10	MS. CHARLENE DWIN VAUGHN: So give us an example	10	actually up there on the list of mitigation, is access.
11	of how we can.	11	And I also had to or wanted to add to that
12	MR. HINANO RODRIGUES: Why don't we go around	12	list of mitigation. These are actually defined in the
13	the room and ask everybody what they think spirituality	13	Draft EIS, if anyone wants to take a look at that.
14	is? We can can't discuss spirituality unless we know what	14	It's
15	it is.	15	MS. ANNELLE AMARAL: It's there.
16	MS. ANNELLE AMARAL: We're speaking of the	16	MS. CAROLINE BLANCO: This is consistent with
17	sacredness of Haleakala. We are speaking of this is a	17	what Mike was explaining earlier about the site. That NSF
18	spiritual center, it is a sacred site.	18	would require the presence of a cultural specialist
19	So, Hinano, I thought I heard you say that you	19	engaged at the earliest stages of the planning process to
20	don't hear any disagreement in the room acknowledging that	20	monitor construction process and consult with and advise
21	this is a spiritual sacred place. You don't hear any I	21	the onsite project manager regarding any cultural or
22	didn't hear any disagreement in the room. I didn't hear	22	spiritual concerns. And then NSF would also require that
23	anybody say it's not spiritual, it's not sacred. So I	23	all construction crew members attend sense of place
24	don't know that we need to discuss spiritual and sacred.	24	training by qualified Native Hawaiian practitioners. And
25	MR. JEREMY WAGNER: This is Jeremy Wagner again.	25	then
	147		149
1		1	MS. CHARLENE DWIN VAUGHN: Go ahead.
1	I would like to say, I mean, from my experience	2	MS. MARILYN PARRIS: I think that's all well and
2	to not mitigate, but show respect for the spiritualness of		
3	the site, basically, it comes from knowledge, knowledge of	3	good, but what Leiohu this is Marilyn, Park Service
4	how that spirituality developed, what the culture involved	4	was that she doesn't feel don't let me speak for you
5	considers in respect to that site. And so it might be	5	somebody cuts off the head, it dies. How can you mitigate
6	shown you might show respect through being quiet. You	6	someone's head? And was that your point?
7	might show respect by covering your head. You might show	7	MS. LEIOHU RYDER: And something that is at
8	respect in lots of different ways. And so the knowledge	8	risk.
9	of how that spirituality exists up there, I think, is the	9	MS. MARILYN PARRIS: At risk of dying?
	first way you maybe not mitigate it, but you show	10	MS. LEIOHU RYDER: Yes. Energetic.
10			
10 11	respect to it.	11	MS. MARILYN PARRIS: It's going to be difficult
	respect to it. MS. ANNELLE AMARAL: Jeremy, I need to expand on	11 12	to mitigate that.
11 12	respect to it.		to mitigate that. MS. CAROLINE BLANCO: Can you think of a way
11	respect to it. MS. ANNELLE AMARAL: Jeremy, I need to expand on	12	to mitigate that. MS. CAROLINE BLANCO: Can you think of a way
11 12 13	respect to it. MS. ANNELLE AMARAL: Jeremy, I need to expand on this. When you say "by knowledge," do you mean that if we	12 13	to mitigate that.
11 12 13 14	respect to it. MS. ANNELLE AMARAL: Jeremy, I need to expand on this. When you say "by knowledge," do you mean that if we provide for a way for non-practitioners to be explained or	12 13 14	to mitigate that. MS. CAROLINE BLANCO: Can you think of a way MS. CHARLENE DWIN VAUGHN: That is what he was
11 12 13 14 15	respect to it. MS. ANNELLE AMARAL: Jeremy, I need to expand on this. When you say "by knowledge," do you mean that if we provide for a way for non-practitioners to be explained or to help them understand the sacredness, that the conduct	12 13 14 15	to mitigate that. MS. CAROLINE BLANCO: Can you think of a way MS. CHARLENE DWIN VAUGHN: That is what he was saying.
11 12 13 14 15 16	respect to it. MS. ANNELLE AMARAL: Jeremy, I need to expand on this. When you say "by knowledge," do you mean that if we provide for a way for non-practitioners to be explained or to help them understand the sacredness, that the conduct of those practitioners, then, would be more in keeping	12 13 14 15 16	to mitigate that. MS. CAROLINE BLANCO: Can you think of a way MS. CHARLENE DWIN VAUGHN: That is what he was saying. MS. ANNELLE AMARAL: To mitigate something in
11 12 13 14 15 16 17	respect to it. MS. ANNELLE AMARAL: Jeremy, I need to expand on this. When you say "by knowledge," do you mean that if we provide for a way for non-practitioners to be explained or to help them understand the sacredness, that the conduct of those practitioners, then, would be more in keeping with the sacredness of the site? Is that what you are	12 13 14 15 16 17	to mitigate that. MS. CAROLINE BLANCO: Can you think of a way MS. CHARLENE DWIN VAUGHN: That is what he was saying. MS. ANNELLE AMARAL: To mitigate something in danger of dying?
11 12 13 14 15 16 17 18	respect to it. MS. ANNELLE AMARAL: Jeremy, I need to expand on this. When you say "by knowledge," do you mean that if we provide for a way for non-practitioners to be explained or to help them understand the sacredness, that the conduct of those practitioners, then, would be more in keeping with the sacredness of the site? Is that what you are trying to say by knowledge, teach more?	12 13 14 15 16 17 18	to mitigate that. MS. CAROLINE BLANCO: Can you think of a way MS. CHARLENE DWIN VAUGHN: That is what he was saying. MS. ANNELLE AMARAL: To mitigate something in danger of dying? Well, I would just point out our experience.
11 12 13 14 15 16 17 18 19	respect to it. MS. ANNELLE AMARAL: Jeremy, I need to expand on this. When you say "by knowledge," do you mean that if we provide for a way for non-practitioners to be explained or to help them understand the sacredness, that the conduct of those practitioners, then, would be more in keeping with the sacredness of the site? Is that what you are trying to say by knowledge, teach more? MR. JEREMY WAGNER: Yes. I think the more you	12 13 14 15 16 17 18 19	to mitigate that. MS. CAROLINE BLANCO: Can you think of a way MS. CHARLENE DWIN VAUGHN: That is what he was saying. MS. ANNELLE AMARAL: To mitigate something in danger of dying? Well, I would just point out our experience. And that was we were about to lose our language. We
11 12 13 14 15 16 17 18 19 20	respect to it. MS. ANNELLE AMARAL: Jeremy, I need to expand on this. When you say "by knowledge," do you mean that if we provide for a way for non-practitioners to be explained or to help them understand the sacredness, that the conduct of those practitioners, then, would be more in keeping with the sacredness of the site? Is that what you are trying to say by knowledge, teach more? MR. JEREMY WAGNER: Yes. I think the more you understood about it, the more respectful, potentially, you	12 13 14 15 16 17 18 19 20	to mitigate that. MS. CAROLINE BLANCO: Can you think of a way MS. CHARLENE DWIN VAUGHN: That is what he was saying. MS. ANNELLE AMARAL: To mitigate something in danger of dying? Well, I would just point out our experience. And that was we were about to lose our language. We retrieved our language. We went to the Maoris, we learned
11 12 13 14 15 16 17 18 19 20 21	respect to it. MS. ANNELLE AMARAL: Jeremy, I need to expand on this. When you say "by knowledge," do you mean that if we provide for a way for non-practitioners to be explained or to help them understand the sacredness, that the conduct of those practitioners, then, would be more in keeping with the sacredness of the site? Is that what you are trying to say by knowledge, teach more? MR. JEREMY WAGNER: Yes. I think the more you understood about it, the more respectful, potentially, you could be. MS. CAROLINE BLANCO: Might this get us back to	12 13 14 15 16 17 18 19 20 21	to mitigate that. MS. CAROLINE BLANCO: Can you think of a way MS. CHARLENE DWIN VAUGHN: That is what he was saying. MS. ANNELLE AMARAL: To mitigate something in danger of dying? Well, I would just point out our experience. And that was we were about to lose our language. We retrieved our language. We went to the Maoris, we learned to tanga leo, we translated that into punana leo.
11 12 13 14 15 16 17 18 19 20 21 22	respect to it. MS. ANNELLE AMARAL: Jeremy, I need to expand on this. When you say "by knowledge," do you mean that if we provide for a way for non-practitioners to be explained or to help them understand the sacredness, that the conduct of those practitioners, then, would be more in keeping with the sacredness of the site? Is that what you are trying to say by knowledge, teach more? MR. JEREMY WAGNER: Yes. I think the more you understood about it, the more respectful, potentially, you could be.	12 13 14 15 16 17 18 19 20 21 22	to mitigate that. MS. CAROLINE BLANCO: Can you think of a way MS. CHARLENE DWIN VAUGHN: That is what he was saying. MS. ANNELLE AMARAL: To mitigate something in danger of dying? Well, I would just point out our experience. And that was we were about to lose our language. We retrieved our language. We went to the Maoris, we learned to tanga leo, we translated that into punana leo. This is Annelle taking facilitator's hat off for

1	run afoul with our kupuna who don't want us to talk about	1	our mana. We can go to those stars. We can be in
2	the old gods and don't want us to talk about the way	2	relationship, as you spoke about the telescope. We are
3	things were. It is a challenge for our people, for us.	3	imbued with the DNA of the stars. But science doesn't
4	Not them; for us. We know that.	4	teach us that. The records in our bones do.
5	MS. MIKAHALA HELM: Something that you brought	5	You cannot mitigate, you cannot litigate you
6	up, though, sparks this. If we are to protect that, then	6	know, you can't you cannot I can't even describe in
7	we would put into place a plan for Haleakala so that it is	7	the Western language what it feels like in my bones, but I
8	protected.	8	can assure you that we are all invited into this this
9	MS. ANNELLE AMARAL: Uh-huh.	9	awareness of clarity about the truth echoing vibrantly to
10	MS. MIKAHALA HELM: So this does not happen. So	10	all through all Haleakalas across the globe.
11	if we are going to protect the sacredness of our we all	11	MS. ANNELLE AMARAL: Here is the dilemma. The
12	know as far as identity for Hawaiian people, if you check	12	dilemma is that the mysterious experience, it can't be
13	any song that is written about Maui, you will almost be	13	translated, then, also, cannot be negotiated, cannot be
14	sure Haleakala is in there.	14	put on paper. I mean, we are at this sort of
15	MS. CHARLENE DWIN VAUGHN: Uh-huh.	15	MS. LEIOHU RYDER: Yes.
16	MS. MIKAHALA HELM: You know, so if we're going	16	MS. ANNELLE AMARAL: juncture where, how do
17	to talk about what you just mentioned, that would be the	17	you bridge.
18	extent to which we would go.	18	Hinano.
19	MS. CHARLENE DWIN VAUGHN: And how would you	19	MR. HINANO RODRIGUES: Let me.
20	MS. MIKAHALA HELM: I would have a plan on how	20	MS. ANNELLE AMARAL: Okay.
21	to protect Haleakala and not have this come up with this	21	MR. HINANO RODRIGUES: Hinano Rodrigues.
22	particular ATST, with Pan-Star sitting in I don't know	22	But let me talk off my SHPD hat. Okay, I will
23	where it is. And all of a sudden, we get another letter,	23	keep it on. Keep it on.
24	one more telescope, some other thing is going to happen.	24	MS. ANNELLE AMARAL: Taking hats off.
25	That is how we are experiencing these kinds of things	25	MR. HINANO RODRIGUES: Let me take off my SH
			1

We need to discuss the only and the best. Because in life we cannot have the best of everything, right? But how about the only of everything? There is only one only. So how do we come how do we reconcile our needs? And I think we are ignoring that because we discuss mitigation. Because when we do, we completely
3 4 5 7 8 9 10 11 12 13 14	Leiohu. And we don't look at it from, you know, one thing and another thing. See, we see the relationship in all things. So when when we speak of the head being removed, the ancient ones show us the grids. Now, how do you document it as a Western scientist? You just got to take our word for it. They show us the grids. They show me the grids. They show me what connects. And then they have us feel it. And then they have us experience, through our bodies, what it feels like when it's drilled or when it's disconnected, when it's something that is cut off from the umbilical of that life force.	2 3 4 5 6 7 8 9 10 11 12 13 14	also Portuguese and Japanese. You know what I see is the we have people on two sides. And on one side, they are saying, and rightfully so, that Haleakala is our best location. And then we have the Kanaka Maoli on the oth side who says Haleakala is our only Haleakala. So, wow, we have a major issue. And I think that is what the issue is right here. We need to discuss the only and the best. Because in life we cannot have the best of everything, right? But how about the only of everything? There is only one only. So how do we come how do we reconcile our needs? And I think we are ignoring that because we discuss mitigation. Because when we do, we completely
3 4 5 6 7 8 9 10 11 12 13 14 15	Leiohu. And we don't look at it from, you know, one thing and another thing. See, we see the relationship in all things. So when when we speak of the head being removed, the ancient ones show us the grids. Now, how do you document it as a Western scientist? You just got to take our word for it. They show us the grids. They show me the grids. They show me what connects. And then they have us feel it. And then they have us experience, through our bodies, what it feels like when it's drilled or when it's disconnected, when it's something that is cut off from the umbilical of that life force. Now, how do we put it into the context of this	2 3 4 5 6 7 8 9 10 11 12 13 14 15	also Portuguese and Japanese. You know what I see is the we have people on two sides. And on one side, they are saying, and rightfully so, that Haleakala is our best location. And then we have the Kanaka Maoli on the oth side who says Haleakala is our only Haleakala. So, wow, we have a major issue. And I think that is what the issue is right here. We need to discuss the only and the best. Because in life we cannot have the best of everything, right? But how about the only of everything? There is only one only. So how do we come how do we reconcile our needs? And I think we are ignoring that because we discuss mitigation. Because when we do, we completely preclude the only argument that the Kanaka Maoli is trying
3 4 5 6 7 8 9 10 11 12 13 14 15 16	Leiohu. And we don't look at it from, you know, one thing and another thing. See, we see the relationship in all things. So when when we speak of the head being removed, the ancient ones show us the grids. Now, how do you document it as a Western scientist? You just got to take our word for it. They show us the grids. They show me the grids. They show me what connects. And then they have us feel it. And then they have us experience, through our bodies, what it feels like when it's drilled or when it's disconnected, when it's something that is cut off from the umbilical of that life force. Now, how do we put it into the context of this discussion? I've just said it. And that is the cultural, that is the spiritual voice. And it's not even my voice.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	also Portuguese and Japanese. You know what I see is the we have people on two sides. And on one side, they are saying, and rightfully so, that Haleakala is our best location. And then we have the Kanaka Maoli on the oth side who says Haleakala is our only Haleakala. So, wow, we have a major issue. And I think that is what the issue is right here. We need to discuss the only and the best. Because in life we cannot have the best of everything, right? But how about the only of everything? There is only one only. So how do we come how do we reconcile our needs? And I think we are ignoring that because we discuss mitigation. Because when we do, we completely preclude the only argument that the Kanaka Maoli is tryin is trying very hard to make.
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	Leiohu. And we don't look at it from, you know, one thing and another thing. See, we see the relationship in all things. So when when we speak of the head being removed, the ancient ones show us the grids. Now, how do you document it as a Western scientist? You just got to take our word for it. They show us the grids. They show me the grids. They show me what connects. And then they have us feel it. And then they have us experience, through our bodies, what it feels like when it's drilled or when it's disconnected, when it's something that is cut off from the umbilical of that life force. Now, how do we put it into the context of this discussion? I've just said it. And that is the cultural,	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	also Portuguese and Japanese. You know what I see is the we have people on two sides. And on one side, they are saying, and rightfully so, that Haleakala is our best location. And then we have the Kanaka Maoli on the oth side who says Haleakala is our only Haleakala. So, wow, we have a major issue. And I think that is what the issue is right here. We need to discuss the only and the best. Because in life we cannot have the best of everything, right? But how about the only of everything? There is only one only. So how do we come how do we reconcile our needs? And I think we are ignoring that because we discuss mitigation. Because when we do, we completely preclude the only argument that the Kanaka Maoli is tryin is trying very hard to make. MS. CAROLINE BLANCO: If I can just ask a
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Leiohu. And we don't look at it from, you know, one thing and another thing. See, we see the relationship in all things. So when when we speak of the head being removed, the ancient ones show us the grids. Now, how do you document it as a Western scientist? You just got to take our word for it. They show us the grids. They show me the grids. They show me what connects. And then they have us feel it. And then they have us experience, through our bodies, what it feels like when it's drilled or when it's disconnected, when it's something that is cut off from the umbilical of that life force. Now, how do we put it into the context of this discussion? I've just said it. And that is the cultural, that is the spiritual voice. And it's not even my voice. It's Maui's voice. Maui who we say is a fictitious hero. He is the real deal, folks. He is sitting right here in	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	also Portuguese and Japanese. You know what I see is the we have people on two sides. And on one side, they are saying, and rightfully so, that Haleakala is our best location. And then we have the Kanaka Maoli on the oth side who says Haleakala is our only Haleakala. So, wow, we have a major issue. And I think that is what the issue is right here. We need to discuss the only and the best. Because in life we cannot have the best of everything, right? But how about the only of everything? There is only one only. So how do we come how do we reconcile our needs? And I think we are ignoring that because we discuss mitigation. Because when we do, we completely preclude the only argument that the Kanaka Maoli is tryin is trying very hard to make. MS. CAROLINE BLANCO: If I can just ask a question.
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	Leiohu. And we don't look at it from, you know, one thing and another thing. See, we see the relationship in all things. So when when we speak of the head being removed, the ancient ones show us the grids. Now, how do you document it as a Western scientist? You just got to take our word for it. They show us the grids. They show me the grids. They show me what connects. And then they have us feel it. And then they have us experience, through our bodies, what it feels like when it's drilled or when it's disconnected, when it's something that is cut off from the umbilical of that life force. Now, how do we put it into the context of this discussion? I've just said it. And that is the cultural, that is the spiritual voice. And it's not even my voice. It's Maui's voice. Maui who we say is a fictitious hero. He is the real deal, folks. He is sitting right here in the room, because I see him. I can describe him.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	also Portuguese and Japanese. You know what I see is the we have people on two sides. And on one side, they are saying, and rightfully so, that Haleakala is our best location. And then we have the Kanaka Maoli on the oth side who says Haleakala is our only Haleakala. 1	and the best. And if maybe you could help us with that.	1	MS. CAMILLE KALAMA: Uh-huh.
2	MR. HINANO RODRIGUES: Hinano Rodrigues.	2	DR. CRAIG FOLTZ: And that would have
3	Someone as old as I am, if there is anything	3	absolutely, positively, by a factor of 12 meter, by a
4	that I ever learned is that there are always solutions to	4	factor of three, been able to see the detail that we need
5	things. And another thing and I have also learned that	5	we know we need to see. But what the project said,
6	I might not have the answer to it, but others might. And	6	that is what the solar physics community said, was we need
7	I think that is a reason why we have a quantity of people	7	to get to a certain resolution and will accept just we
8	here, because maybe you guys have the answers. Because I	8	only need what we need to get there. We don't need more.
9	am the first to admit, maybe I don't have the answer. But	9	And that and I agree with and I think that Charlene
10	I do know that I should never ever in life say, you know,	10	has had difficulties because this part of the process was
11	there is no solution. There always is, but somebody else	11	invisible. This was to you all. This was this was
12	might have that solution that I don't.	12	but it is the natural development of a scientific
13	MS. CHARLENE DWIN VAUGHN: When you say only and	13	project. And I think that that is I understand that is
14	best, does that mean that to save and salvage the only,	14	alien. It's sort of second nature to a lot of us.
15	you have to go someplace else to get to the best? I	15	MR. JEREMY WAGNER: And that is somewhat site
16	you lost me with those concepts, only and best.	16	independent as well. A lot of that was done before the
17	MR. HINANO RODRIGUES: Well, I notice that the	17	selection.
18	words I notice the word best, best is used, but best	18	DR. CRAIG FOLTZ: Yeah, that is site specific.
19	does not equal only. So I am wondering if they are saying	19	MS. ANNELLE AMARAL: Liz, I think, has a
20	that while Haleakala is the best location, is it the only	20	comment.
21	location.	21	MS. LIZ GORDON: And I guess this is kind of a
22	MS. CAROLINE BLANCO: It's the only one that met	22	bit more detailed to get into. But I guess in reading the
23	the scientific criteria.	23	Draft EIS, I did have some questions about I know there
24	MR. JEREMY WAGNER: Best is the wrong word.	24	were 72. And then, from a broad set of criteria, they
25	DR. CRAIG FOLTZ: I think it's the only site.	25	were narrowed down to six. And there was a table at the
	155		157
1	MS. CAROLINE BLANCO: I think we're dealing with	1	end of the appendices that kind of listed some of the

1	get on those 72.	1	when there has been so much input on the sacredness of
2	DR. CRAIG FOLTZ: Without going to them?	2	Haleakala. How can we possibly sit here and talk and
3	MR. STEVE KEIL: We went to some of them. We	3	even if we talk until tonight and talk until tomorrow, we
4	couldn't go to all of them.	4	are not looking at the environmental impact statement or
5	But we looked at the statistics for all 72	5	the full picture of really what what are all these
6	sites, picked the six best, which is what we could afford	6	things to be considered. How can you do a full
7	to actually mount telescopes on, and tested those six best	7	consideration and come up with these kind of piecemeal
8	sites with a number of instruments. We weren't doing this	8	mitigation I mean, I know you know, they seem like
9	in a vacuum because there had been a number of site	9	important things. And they are. However, how can we c
10	surveys before us.	10	about with such a thing?
11	So there was a large one that tested most of the	11	MS. CAROLINE BLANCO: I think it might be
12	mountains in California. The large European solar	12	helpful to remind ourselves that we are talking about the
13	telescope, which never was built, tested a number of	13	106 process and not about all of the other environmental
14	sites, including Mauna Kea. So we had a lot of data to	14	impacts that may or may not occur as a result of the
15	start with.	15	proposed project. And we are not none of us here in
16	The six we picked, by the way, turned out that	16	this room are the decision-maker as to whether or not the
17	four of them had observatories on them, because they were	17	telescope will be built. We are here to gather
18	the results of site surveys. And that is why the	18	information and we are here to propose something to the
19	observatories were there on those six.	19	National Science Director that if the National Science
2.0	And two didn't that we tested.	20	Foundation Director, that, if it is built, these are
21	Then out of all those, only Haleakala has the	21	mitigation measures that people would like to see.
22	skies capable of looking at the sun.	22	And that is what the purpose of this is right
23	MS. CHARLENE DWIN VAUGHN: This has been	23	now. It definitely has gone on record and will continue
24	peer-reviewed?	24	to be considered, maybe avoidance of it completely,
25	MR. STEVE KEIL: Peer-reviewed.	25	because of the significance of it, is a very viable

But those points have definitely been made and definitely been heard and will continue to be heard. And so it may very well be he will decide he
1 2 3 4 5 6 7	159 MS. CHARLENE DWIN VAUGHN: Agreed to by scientists that are not all part of this? MR. MIKE MABERRY: Not part of the project. MS. CHARLENE DWIN VAUGHN: That's not what I am saying. MR. STEVE KEIL: So that was done very, very carefully and not in a vacuum.	1 2 3 4 5 6 7	option. And it may be the turning point for the Director. I don't know. That will be up to him after considering the entire record. But those points have definitely been made and definitely been heard and will continue to be heard. And so it may very well be he will decide he just doesn't want to fund it. It may be that he decides
1 2 3 4 5 6 7 8	159 MS. CHARLENE DWIN VAUGHN: Agreed to by scientists that are not all part of this? MR. MIKE MABERRY: Not part of the project. MS. CHARLENE DWIN VAUGHN: That's not what I am saying. MR. STEVE KEIL: So that was done very, very carefully and not in a vacuum. MS. MIKAHALA HELM: Annelle.	1 2 3 4 5 6 7 8	option. And it may be the turning point for the Director. I don't know. That will be up to him after considering the entire record. But those points have definitely been made and definitely been heard and will continue to be heard. And so it may very well be he will decide he just doesn't want to fund it. It may be that he decides he wants to fund it and this is the mitigation package.
1 2 3 4 5 6 7 8 9	159 MS. CHARLENE DWIN VAUGHN: Agreed to by scientists that are not all part of this? MR. MIKE MABERRY: Not part of the project. MS. CHARLENE DWIN VAUGHN: That's not what I am saying. MR. STEVE KEIL: So that was done very, very carefully and not in a vacuum. MS. MIKAHALA HELM: Annelle. MS. ANNELLE AMARAL: Yes. MS. MIKAHALA HELM: And Haleakala was the only	1 2 3 4 5 6 7 8 9	option. And it may be the turning point for the Director. I don't know. That will be up to him after considering the entire record. But those points have definitely been made and definitely been heard and will continue to be heard. And so it may very well be he will decide he just doesn't want to fund it. It may be that he decides he wants to fund it and this is the mitigation package. So here is an opportunity that, if he makes that
1 2 3 4 5 6 7 8 9 10	159 MS. CHARLENE DWIN VAUGHN: Agreed to by scientists that are not all part of this? MR. MIKE MABERRY: Not part of the project. MS. CHARLENE DWIN VAUGHN: That's not what I am saying. MR. STEVE KEIL: So that was done very, very carefully and not in a vacuum. MS. MIKAHALA HELM: Annelle. MS. ANNELLE AMARAL: Yes.	1 2 3 4 5 6 7 8 9 10	option. And it may be the turning point for the Director. I don't know. That will be up to him after considering the entire record. But those points have definitely been made and definitely been heard and will continue to be heard. And so it may very well be he will decide he just doesn't want to fund it. It may be that he decides he wants to fund it and this is the mitigation package. So here is an opportunity that, if he makes that decision, based on the entire record, these are ways in
1 2 3 4 5 6 7 8 9 10 11	159 MS. CHARLENE DWIN VAUGHN: Agreed to by scientists that are not all part of this? MR. MIKE MABERRY: Not part of the project. MS. CHARLENE DWIN VAUGHN: That's not what I am saying. MR. STEVE KEIL: So that was done very, very carefully and not in a vacuum. MS. MIKAHALA HELM: Annelle. MS. ANNELLE AMARAL: Yes. MS. MIKAHALA HELM: And Haleakala was the only site that native people said was sacred, is that correct?	1 2 3 4 5 6 7 8 9 10 11	option. And it may be the turning point for the Director. I don't know. That will be up to him after considering the entire record. But those points have definitely been made and definitely been heard and will continue to be heard. And so it may very well be he will decide he just doesn't want to fund it. It may be that he decides he wants to fund it and this is the mitigation package. So here is an opportunity that, if he makes that decision, based on the entire record, these are ways in which we can go ahead and let him know that these are
1 2 3 4 5 6 7 8 9 10 11 12	159 MS. CHARLENE DWIN VAUGHN: Agreed to by scientists that are not all part of this? MR. MIKE MABERRY: Not part of the project. MS. CHARLENE DWIN VAUGHN: That's not what I am saying. MR. STEVE KEIL: So that was done very, very carefully and not in a vacuum. MS. MIKAHALA HELM: Annelle. MS. ANNELLE AMARAL: Yes. MS. MIKAHALA HELM: And Haleakala was the only site that native people said was sacred, is that correct? MR. JEREMY WAGNER: Yes.	1 2 3 4 5 6 7 8 9 10 11 12	option. And it may be the turning point for the Director. I don't know. That will be up to him after considering the entire record. But those points have definitely been made and definitely been heard and will continue to be heard. And so it may very well be he will decide he just doesn't want to fund it. It may be that he decides he wants to fund it and this is the mitigation package. So here is an opportunity that, if he makes that decision, based on the entire record, these are ways in which we can go ahead and let him know that these are things that people would like to see. And I think we
1 2 3 4 5 6 7 8 9 10 11 12 13	159 MS. CHARLENE DWIN VAUGHN: Agreed to by scientists that are not all part of this? MR. MIKE MABERRY: Not part of the project. MS. CHARLENE DWIN VAUGHN: That's not what I am saying. MR. STEVE KEIL: So that was done very, very carefully and not in a vacuum. MS. MIKAHALA HELM: Annelle. MS. ANNELLE AMARAL: Yes. MS. MIKAHALA HELM: And Haleakala was the only site that native people said was sacred, is that correct? MR. JEREMY WAGNER: Yes. MS. MIKAHALA HELM: Yes. So this is what I am	1 2 3 4 5 6 7 8 9 10 11 12 13	option. And it may be the turning point for the Director. I don't know. That will be up to him after considering the entire record. But those points have definitely been made and definitely been heard and will continue to be heard. And so it may very well be he will decide he just doesn't want to fund it. It may be that he decides he wants to fund it and this is the mitigation package. So here is an opportunity that, if he makes that decision, based on the entire record, these are ways in which we can go ahead and let him know that these are things that people would like to see. And I think we should also keep in mind that there have been, also,
1 2 3 4 5 6 7 8 9 10 11 12 13 14	159 MS. CHARLENE DWIN VAUGHN: Agreed to by scientists that are not all part of this? MR. MIKE MABERRY: Not part of the project. MS. CHARLENE DWIN VAUGHN: That's not what I am saying. MR. STEVE KEIL: So that was done very, very carefully and not in a vacuum. MS. MIKAHALA HELM: Annelle. MS. ANNELLE AMARAL: Yes. MS. MIKAHALA HELM: And Haleakala was the only site that native people said was sacred, is that correct? MR. JEREMY WAGNER: Yes. MS. MIKAHALA HELM: Yes. So this is what I am so troubled by in this process that is happening right	1 2 3 4 5 6 7 8 9 10 11 12 13 14	option. And it may be the turning point for the Director. I don't know. That will be up to him after considering the entire record. But those points have definitely been made and definitely been heard and will continue to be heard. And so it may very well be he will decide he just doesn't want to fund it. It may be that he decides he wants to fund it and this is the mitigation package. So here is an opportunity that, if he makes that decision, based on the entire record, these are ways in which we can go ahead and let him know that these are things that people would like to see. And I think we should also keep in mind that there have been, also, Native Hawaiians that have suggested that they are Warren said he is very much in support of this. We've
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15	159 MS. CHARLENE DWIN VAUGHN: Agreed to by scientists that are not all part of this? MR. MIKE MABERRY: Not part of the project. MS. CHARLENE DWIN VAUGHN: That's not what I am saying. MR. STEVE KEIL: So that was done very, very carefully and not in a vacuum. MS. MIKAHALA HELM: Annelle. MS. ANNELLE AMARAL: Yes. MS. MIKAHALA HELM: And Haleakala was the only site that native people said was sacred, is that correct? MR. JEREMY WAGNER: Yes. MS. MIKAHALA HELM: Yes. So this is what I am so troubled by in this process that is happening right now, is that in the literature that came with Charlie's	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15	option. And it may be the turning point for the Director. I don't know. That will be up to him after considering the entire record. But those points have definitely been made and definitely been heard and will continue to be heard. And so it may very well be he will decide he just doesn't want to fund it. It may be that he decides he wants to fund it and this is the mitigation package. So here is an opportunity that, if he makes that decision, based on the entire record, these are ways in which we can go ahead and let him know that these are things that people would like to see. And I think we should also keep in mind that there have been, also, Native Hawaiians that have suggested that they are Warren said he is very much in support of this. We've
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	159 MS. CHARLENE DWIN VAUGHN: Agreed to by scientists that are not all part of this? MR. MIKE MABERRY: Not part of the project. MS. CHARLENE DWIN VAUGHN: That's not what I am saying. MR. STEVE KEIL: So that was done very, very carefully and not in a vacuum. MS. MIKAHALA HELM: Annelle. MS. ANNELLE AMARAL: Yes. MS. MIKAHALA HELM: And Haleakala was the only site that native people said was sacred, is that correct? MR. JEREMY WAGNER: Yes. MS. MIKAHALA HELM: Yes. So this is what I am so troubled by in this process that is happening right now, is that in the literature that came with Charlie's letter, it said that NSF will make a decision when it's as	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	option. And it may be the turning point for the Director. I don't know. That will be up to him after considering the entire record. But those points have definitely been made and definitely been heard and will continue to be heard. And so it may very well be he will decide he just doesn't want to fund it. It may be that he decides he wants to fund it and this is the mitigation package. So here is an opportunity that, if he makes that decision, based on the entire record, these are ways in which we can go ahead and let him know that these are things that people would like to see. And I think we should also keep in mind that there have been, also, Native Hawaiians that have suggested that they are Warren said he is very much in support of this. We've heard from other people over the years. And in June, we heard people say that they really are in support of it.
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	159 MS. CHARLENE DWIN VAUGHN: Agreed to by scientists that are not all part of this? MR. MIKE MABERRY: Not part of the project. MS. CHARLENE DWIN VAUGHN: That's not what I am saying. MR. STEVE KEIL: So that was done very, very carefully and not in a vacuum. MS. MIKAHALA HELM: Annelle. MS. ANNELLE AMARAL: Yes. MS. MIKAHALA HELM: And Haleakala was the only site that native people said was sacred, is that correct? MR. JEREMY WAGNER: Yes. MS. MIKAHALA HELM: Yes. So this is what I am so troubled by in this process that is happening right now, is that in the literature that came with Charlie's letter, it said that NSF will make a decision when it's as it has considered and completed analysis on the effects, yeah, on the impacts on the environment, on the	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	option. And it may be the turning point for the Director. I don't know. That will be up to him after considering the entire record. But those points have definitely been made and definitely been heard and will continue to be heard. And so it may very well be he will decide he just doesn't want to fund it. It may be that he decides he wants to fund it and this is the mitigation package. So here is an opportunity that, if he makes that decision, based on the entire record, these are ways in which we can go ahead and let him know that these are things that people would like to see. And I think we should also keep in mind that there have been, also, Native Hawaiians that have suggested that they are Warren said he is very much in support of this. We've heard from other people over the years. And in June, we heard people say that they really are in support of it.
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	159 MS. CHARLENE DWIN VAUGHN: Agreed to by scientists that are not all part of this? MR. MIKE MABERRY: Not part of the project. MS. CHARLENE DWIN VAUGHN: That's not what I am saying. MR. STEVE KEIL: So that was done very, very carefully and not in a vacuum. MS. MIKAHALA HELM: Annelle. MS. ANNELLE AMARAL: Yes. MS. MIKAHALA HELM: And Haleakala was the only site that native people said was sacred, is that correct? MR. JEREMY WAGNER: Yes. MS. MIKAHALA HELM: Yes. So this is what I am so troubled by in this process that is happening right now, is that in the literature that came with Charlie's letter, it said that NSF will make a decision when it's as it has considered and completed analysis on the effects, yeah, on the impacts on the environment, on the historic and cultural resources, you know, as well as	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	option. And it may be the turning point for the Director. I don't know. That will be up to him after considering the entire record. But those points have definitely been made and definitely been heard and will continue to be heard. And so it may very well be he will decide he just doesn't want to fund it. It may be that he decides he wants to fund it and this is the mitigation package. So here is an opportunity that, if he makes that decision, based on the entire record, these are ways in which we can go ahead and let him know that these are things that people would like to see. We've heard from other people over the years. And in June, we heard people say that they really are in support of it. And so, you know, in other some thoughts have come
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	159 MS. CHARLENE DWIN VAUGHN: Agreed to by scientists that are not all part of this? MR. MIKE MABERRY: Not part of the project. MS. CHARLENE DWIN VAUGHN: That's not what I am saying. MR. STEVE KEIL: So that was done very, very carefully and not in a vacuum. MS. MIKAHALA HELM: Annelle. MS. ANNELLE AMARAL: Yes. MS. MIKAHALA HELM: And Haleakala was the only site that native people said was sacred, is that correct? MR. JEREMY WAGNER: Yes. MS. MIKAHALA HELM: Yes. So this is what I am so troubled by in this process that is happening right now, is that in the literature that came with Charlie's letter, it said that NSF will make a decision when it's as it has considered and completed analysis on the effects, yeah, on the impacts on the environment, on the historic and cultural resources, you know, as well as proposals for mitigating those impacts. But this what	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	option. And it may be the turning point for the Director. I don't know. That will be up to him after considering the entire record. But those points have definitely been made and definitely been heard and will continue to be heard. And so it may very well be he will decide he just doesn't want to fund it. It may be that he decides he wants to fund it and this is the mitigation package. So here is an opportunity that, if he makes that decision, based on the entire record, these are ways in which we can go ahead and let him know that these are things that people would like to see. And I think we should also keep in mind that there have been, also, Native Hawaiians that have suggested that they are Warren said he is very much in support of this. We've heard from other people over the years. And in June, we heard people say that they really are in support of it. And so, you know, in other some thoughts have come mind that there might be a way to share this special
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	MS. CHARLENE DWIN VAUGHN: Agreed to by scientists that are not all part of this? MR. MIKE MABERRY: Not part of the project. MS. CHARLENE DWIN VAUGHN: That's not what I am saying. MR. STEVE KEIL: So that was done very, very carefully and not in a vacuum. MS. MIKAHALA HELM: Annelle. MS. ANNELLE AMARAL: Yes. MS. 1	ATTENDANCE		1	NATIONAL SCIENCE FOUNDATION
2	NATIONAL SCIENCE FOUNDATION Dr. Craig Foltz, ATST Program Officer		2	SECTION 106 MEMORANDUM OF AGREEMENT MEETING
3	Ms. Caroline Blanco, Assistant General Counsel Mr. Tony Gibson		3	AUGUST 27, 2008
4			4	TRANSCRIPT OF PROCEEDINGS
5	NATIONAL SOLAR OBSERVATORY Mr. Jeremy Wagner, ATST Project Manager		5	MS. ANNELLE AMARAL: Aloha, everyone, and
6	Mr. Steve Keil, Director Ms. Jennifer Ditsler, Project Assistant		6	welcome back. I hope that everyone had a nice break and
7	Mr. Rex Hunter, Administrative Facilities Manager		7	you have all returned in a good mood. And that makes life
	NATIONAL OPTICAL ASTRONOMY OBSERVATORY		8	easier for me.
B 9	Mr. Jeff Barr, ATST Project Architect UNIVERSITY OF HAWAII INSTITUTE FOR ASTRONOMY		9	
10	Mr. Mike Maberry, Assistant Director			And welcome to our two new people. If you could
11	KC ENVIRONMENTAL, INC. Dr. Charlie Fein, Vice President		10	introduce yourselves to us, and then we will introduce
	Ms. Sharon Loando-Monro, Planning Projects Manager		11	ourselves to you as well.
12	MEETING FACILITATOR		12	MS. MELISSA PRINCE: I am Melissa Prince. And I
13	Ms. Annelle Amaral OTHER ATTENDEES:		13	have been sort of following the solar telescope to date.
15	Ms. Mikahala Helm, Kilakila o Haleakala Ms. Leiohu Ryder, Kilakila o Haleakala		14	And I am the one that was videotaping some of the
	Ms. Camille Kalama, Native Hawaiian Legal Corporation,		15	sessions. The one that was down in the poolroom at the
16	Kilakila o Haleakala Ms. Pua Aiu, State Historic Preservation Office		16	community center, I videotaped that. And another one at
17	Ms. Nancy McMahon, State Historic Preservation Office Mr. Hinano Rodrigues, Cultural Historian, State Historic		17	the Hawaiian Homestead Homes, I videotaped that one, also.
18	Preservation Office Mr. Jason Jeremiah, Office of Hawaiian Affairs, Policy		18	MS. ANNELLE AMARAL: Okay.
19	Advocate, Native Rights Land & Culture Division		19	MS. MELISSA PRINCE: So but my computer broke
20	Ms. Charlene Dwin Vaughn, Advisory Council on Historic Preservation		20	and I wasn't able to bring my camera today. I am just
21	Ms. Martha Catlin, Advisory Council on Historic Preservation (via telephone)		21	here to attend.
22	Ms. Betsy Merritt, National Trust for Historic Preservation (via telephone)		22	MS. ANNELLE AMARAL: Thank you for coming.
	Mr. Warren Shibuya		23	Aloha.
23	Ms. Melissa Prince Mr. Daniel Kanahele		24	MR. DANIEL KANAHELE: Aloha. I am Daniel
24	Ms. Lianna Horovitz Ms. Joyclynn Costa		25	Kanahele from South Maui.
25	Ms. Jamie Fernandez			-
		3		5
1	Ms. Ohua Morando		1	MS. ANNELLE AMARAL: Aloha. Nice to meet you.
	Ms. Claire Apana		2	Now we're going to go around and introduce
2	Mr. Ed Lindsey		3	ourselves so you know who we all are.
3			4	MR. JASON JEREMIAH: My name is Jason Jeremiah.
4			5	I am from the Office of Hawaiian Affairs, today
5			6	representing our office. I am a policy advocate in the
6			7	Native Rights Land and Culture Division.
7			8	MS. CAROLINE BLANCO: I am Caroline Blanco. I
8			9	am Assistant General Counsel over at the National Science
9			10	Foundation, responsible for environmental compliance for
10			11	the agency.
11			12	MS. CHARLENE DWIN VAUGHN: My name is Charlene
12			13	Vaughn. I am with the Advisory Council of Historic
13				Preservation in Washington.
14			14	
15			15	MS. NANCY McMAHON: I am Nancy McMahon. I am
16			16	the Deputy Administrator and Deputy State Historic
17			17	Preservation Officer for the State Historic Preservation
18			18	Division.
19			19	MS. PUA AIU: I am Pua Aiu. I am the
20			20	Administrator for the State Historic Preservation Office.
21			21	MR. HINANO RODRIGUES: You guys know who I am,
22		21	22	but just in case you forgot, Hinano Rodrigues, State
23			23	Historic Preservation Division.
24			24	DR. CRAIG FOLTZ: I am Craig Foltz, I am the
- Beat of			8	
25			25	Director of National Science Foundation, Acting Director.

2 (Pages 2 to 5)

	6		8
1	MR. REX HUNTER: I am Rex Hunter. I am at the	1	suggestions.
2	National Solar Observatory in Sunspot, New Mexico. I am	2	Charlie went through the specifics of what you
3	the Administrative and Facilities Officer.	3	find in the EIS, that you may already have a copy of and
4	MS. MIKAHALA HELM: Aloha. I am Mikahala Helm	4	may have read through.
5	and part of Kilakila o Haleakala, and, also, here for	5	Craig talked a little bit about some of the
6	myself and my family.	6	proposals that have been met when we last met in June,
7	MS. CAMILLE KALAMA: Aloha. I am Camille	7	some specific proposals to try to mitigate the impact,
8	Kalama. I am from Native Hawaiian Legal Corporation. And	8	adverse impact on the project.
9	I am here on behalf of Kilakila o Haleakala.	9	And then we just sort of went around to talk
10	DR. CHARLIE FEIN: Aloha. Charlie Fein. I am	10	about some of the questions we have about the projects or
11	the Environmental Consultant for the project.	11	some of the issues that we may have.
12	MR. JEFF BARR: I am Jeff Barr. I am the	12	Quite frankly, what is, is keeps coming up
13	architect for the ATST Project.	13	over and over again goes to the sacredness of Haleakala
14	MR. JEREMY WAGNER: I am Jeremy Wagner Project	14	and how is it that we are supposed to mitigate sacredness.
15	Manager for the ATST project.	15	And beyond that, a discussion of real attempts to try to
16	MR. STEVE KEIL: I am Steven Keil. I am	16	deal with issues that the community has brought up with
17	Director of the National Solar Observatory.	17	respect to height and color and location and and how we
18	MR. MIKE MABERRY: Hi. I am Mike Maberry. I am	18	arrived at some of the changes that are already proposed
19	Assistant Director for the Institute of Astronomy at UH.	19	and have been dealt with.
20	MS. ANNELLE AMARAL: Tony.	20	But in the end, the question really is one of
21	MR. GIBSON: Hi. I am Tony Gibson with the	21	what is on the table, where are we at this point. And the
22	National Science Foundation.	22	answer to that is quite simply that there are three things
23	MS. ANNELLE AMARAL: Sharon.	23	still very much on the table. One is avoidance, that this
24	MS. SHARON LOANDO-MONRO: Sharon Loando-Monro	24	is not a site that we should be at, that this is not the
25	with KC Environmental, Planning Manager.	25	place for this to take place. That is still on the table.
	7		9
1	MS. JENNIFER DITSLER: Jennifer Ditsler. I am	1	And the National Science Foundation is not opposed to
2	from the ATST Project office in Tucson, Arizona. And I do	2	that, though they are having some difficulty imagining
3	project administration.	3	what that is going to look like.
4	(Off the record for Court Reporter to	4	The issue of minimizing, the minimization effort
5	introduce herself.)	5	for this project. And there have been suggestions. A
6	MS. ANNELLE AMARAL: Aloha. My name is Annelle	6	sunset provision has been put on the table, and that is,
7	Amaral. And I am the facilitator, just trying to help	7	by a time certain, clean up and move on. And there have
8	manage the conversation. You can tell I am the	8	been a number of proposals to mitigate.
9	facilitator because I am the only one that is all marked	9	You all, I think, have seen Uncle Charlie
10	up. It's been a long day. I have markings all over me.	10	Maxwell's proposal. There has been the proposal from the
11	Because we have a court reporter here, what you	11	Maui Community College that perhaps you have already seen
12	will hear us do is we will preface with our names so that	12	in the last discussion that we had with community in June.
13	the court reporter knows who is speaking. We try very	13	There was a proposal for connecting Hawaiian learning,
14	hard not to speak over one another. Otherwise, we get	14	Hawaiian science and Hawaiian traditional knowledge with
15	yelled at by the court reporter, because she cannot write	15	the project that is taking it that is proposed to take
16	down all five voices. So we will try to let people finish	16	place at Haleakala through the use of building a Star
17	what they have to say before we jump in.	17	Compass right next to the site, the Star Compass,
18	If you indicate to me you want to speak, I start	18	utilizing Hawaiian knowledge and connecting it to the
19	a little list in the corner and I will call you in the	19	science that takes place up there.
20	order that you have waved to me and indicated.	20	What is also on the table is the need to
21	As you can tell, we've done a lot of talking	21	maintain the connection to cultural practices that take
22	today. We started out by presenting some background on	22	place there. It has been suggested that a konohiki could
23	where we are on the project. We've been assured that no	23	be named for the site with overall responsibilities for
24	1		
25	decision in fact has been made as of yet and that we are gathered to hear one another's views, ideas and	24 25	that area, and the coordination of culturally appropriate behavior in that area.

3 (Pages 6 to 9)

	10		12
1	Certainly there are ongoing mitigation efforts.	1	appreciate it.
2	Cleaning up of the Reber Circle, taking down or cleaning	2	MS. CAROLINE BLANCO: Annelle, I see there are
3	up of the broadcast towers that are already up there, the	3	two more people that are going to be joining us, so
4	east-facing ahu that has been built.	4	perhaps before we
5	When we last left this discussion, the issue	5	MS. ANNELLE AMARAL: Okay. And it's not really
6	that came up was, well, how do you mitigate spirituality.	6	a public testimony; it really is a consultation session.
7	If we are in fact spiritual and the place is spiritual 24	7	It is a discussion. Public hearings are sort of one-way
8	hours a day, seven days a week, how do you show respect	8	communications. This is very much a dialogue that is
9	for the sacredness of that place, how do you protect that	9	taking place.
10	place and still have this feature on it.	10	I take it, then, that you had not seen any of
11	MS. CAROLINE BLANCO: Annelle, Warren Shibuya	11	the environmental impact statement reports that have come
12	also is not listed up there, his proposal. Warren has a	12	out or any of the work that's come out about the solar
13	mitigation written proposal.	13	telescope at Haleakala?
14	MS. ANNELLE AMARAL: Oh, sorry. Yes. Yes.	14	MR. DANIEL KANAHELE: I know some.
15	Warren also I need to add that in that has a	15	MS. ANNELLE AMARAL: You've read some.
16	proposal that he has submitted in fact and has been	16	MR. DANIEL KANAHELE: I've read some, listened
17	working very closely on working on mitigation efforts.	17	to some. I haven't really read anything.
18	I will make note of that.	18	MS. ANNELLE AMARAL: You haven't?
19	So when we left this discussion, we left this	19	MS. CAROLINE BLANCO: Annelle
20	discussion talking about sacredness. Talking about I	20	MR. DANIEL KANAHELE: Thank you for
20	think we were sort of down to avoidance at this point,	21	MS. CAROLINE BLANCO: I was just wondering if
22	Hinano, yeah. Because trying to reconcile sacredness and	22	it might be helpful to give them context for this meeting.
23	the site, use of the site.	23	This meeting is a consultation meeting pursuant
24	Then I think at that point we all determined we	24	to the National Historic Preservation Act. Under Section
24	just needed to get something to eat and get out of this	25	106 we just finally call it Section 106 is a back

1	And so the way it ends up working is we have a	1	That's correct, Shad Kane was here. Warren
2	discussion here about the adverse effects and, primarily,	2	Shibuya is here as a consulting party.
3	looking at ways to resolve them through either avoidance,	3	MR. GIBSON: National Park Service.
4	minimization or mitigation. And that is the context in	4	MS. CAROLINE BLANCO: National Park Service was
5	which this meeting takes place.	5	here. And, of course, we have the State and the Advisory
6	It's not about other environmental impacts that	6	Council.
7	are pursuant to the process under the National	7	MR. DANIEL KANAHELE: Thank you.
8	Environmental Policy Act. This is focused on historic	8	MS. CAROLINE BLANCO: And anybody who would like
9	resources and cultural resources.	9	to, you know, join in on our meetings.
10	MR. DANIEL KANAHELE: Thank you.	10	MS. ANNELLE AMARAL: And then what is happening
11	MS. ANNELLE AMARAL: I wanted to note the	11	is, as you talk to one another up here, you all sort of
12	arrival of two more people and give you an opportunity to	12	drop your voices, but the court reporter is down here. So
13	introduce yourselves.	13	keep in mind, when you speak, try to project so the court
14	Aloha.	14	reporter can hear you down at this end.
15	MS. JOYCLYNN COSTA: Aloha. My name is Joyclynn	15	You had a comment or question?
16	Costa.	16	MR. DANIEL KANAHELE: Yeah, I did. I was ready
17	MS. JAMIE FERNANDEZ: I am Jamie Fernandez.	17	to say to make a comment, if that is appropriate.
18	MS. ANNELLE AMARAL: Great. And are you	18	MS. ANNELLE AMARAL: Sure, yeah.
19	representing any organization or just yourself?	19	Let me introduce one more person.
20	MS. JOYCLYNN COSTA: Yes, Haleakala.	20	Aloha. I am wondering, you just seated
21	MS. ANNELLE AMARAL: Haleakala. Aloha.	21	yourself, did you want to introduce yourself to the group
22	Welcome.	22	and who you represent?
23	MS. MELISSA PRINCE: I had a question. I	23	MS. OHUA MORANDO: Sure. Okay. Aloha mai
24	realize that you are here to be a consultant to those who	24	kakou.
25	may have signed up to be on the list. So I was wondering,	25	MS. ANNELLE AMARAL: Aloha.
	15		17
1	is there a list of people who are formally asked to be	1	MS. OHUA MORANDO: Ohua Morando. And I am here
2	consulted?	2	as a Maui resident. And I had received a lot of many of
3	MS. CAROLINE BLANCO: The list is made up of	3	the flyers in the beginning, but I wasn't part of this,
4	people who have requested to be consulting parties through	4	either I was away or something. But I am very interested
5	public meetings and so forth. And then they have	5	in being here and and it's nice to meet you. I work at
6	requested to become consulting parties, indicating to us	6	Maui Community College with Na Pua No'eau program.
7	they have an interest that they would like to be involved	7	MS. ANNELLE AMARAL: Great. Aloha and welcome.
8	in this process and stakeholders in this process. Then we	8	So before, perhaps, we pick up where we left off

1	So one question I have is when is something too	1	people have and strong feelings they have, that in light
2	sacred to be built upon? What criteria do you use to	2	of all of the circumstances, the whole situation, he
3	determine the sacredness of a place before you allow it to	3	decides to fund it, one of the things that we can
4	be changed in any shape or form?	4	accomplish here today for his consideration is a
5	For me personally, I think what makes Hawaii in	5	mitigation package, some ideas that even though perhaps
6	total a unique place is that it is, first and foremost, a	6	some people may be opposed to it, they might be
7	Hawaiian place. That is why people come here in the first	7	comfortable having some mitigation measures in place for
8	place, because it is a Hawaiian place.	8	the Director to consider if he does decide to agree and
9	If you want to go to Japan and learn about the	9	approve funding for this proposed project.
10	Japanese culture, you go to Japan. If you want to go to	10	MR. DANIEL KANAHELE: Uh-huh.
11	Mexico and learn about the Mexican culture, you go to	11	MS. CAROLINE BLANCO: So my question to you
12	Mexico. But if you want to learn about Hawaii and the	12	and also to the other folks who have joined us is if
13	Hawaiian culture, you come to Hawaii, because Hawaii is	13	this does go forward, are there mitigation measures that
14	home to all things Hawaiian.	14	you would like to see in place for the Director to
15	Aside from its natural beauty, the thing that	15	consider?
16	sets Hawaii apart from any other place in the world is its	16	MR. DANIEL KANAHELE: Well, I can't mention
17	endemic beauty, it's endemic wildlife, history, culture,	17	anything specifically.
18	language and heritage.	18	I will say this. If you come into somebody's
19	Haleakala is a Hawaiian place. There is no	19	house if you come into my house, and our custom is
20	place like it on this Earth. So is Haleakala a place so	20	at my home, you remove your shoes or slippers before you
21	sacred and so special that it should remain untouched?	21	come in. Now if everybody in the house honors that
22	It has been touched already. And there is a	22	tradition and that custom, but, still, you come into my
23	proposal to to, I would say, add more to what is	23	house with your slippers on and you ignore that, what
24	already up there.	24	impact do you think that would have on the people of that
25	And then I would just conclude with this remark.	25	house?
25	And then I would just conclude with this remark.	25	house?
25		25	It's all about respect, respecting people's
	19 There is one danger that we face today. And that danger is this. That modern day man brings with him the ability		It's all about respect, respecting people's feelings whose house it is.

That is the highest mountain on this island. And for us, as Kanaka Maoli, everything flows from the top to the bottom in the spiritual sense and in a physical sense. So what happens on the top of the mountain affects a lot of things. It affects a lot of things. So what are those impacts? I understand what you are asking me. I don't have a specific answer for you. But what I am putting on the table for you right now is about respecting the host culture. MS. CAROLINE BLANCO: And what I am hearing for you is that avoidance is your your position on this. MR. DANIEL KANAHELE: At this point, yes. MS. CAROLINE BLANCO: If there are any ideas as people start to talk about things, please feel free to mention.
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	19 There is one danger that we face today. And that danger is this. That modern day man brings with him the ability to wipe out everything that defined people of culture. Thank you. MS. ANNELLE AMARAL: Thank you. So let me ask the question, then. Daniel, is it your position that nothing further should be built up on Haleakala? Is that your position? I mean, I see you asking the question. I am wondering if you framed it in this way because that is your position, there is no way to mitigate. MR. DANIEL KANAHELE: I would say that I am favoring avoidance as an option. I would like to look at that as an option. MS. CAROLINE BLANCO: If I could ask Daniel a question. If the Director of the National Science Foundation makes the decision based on comments from you and others, and the whole record, and all of the studies that have been done and so forth and certainly your comment of avoidance and other people's comments of	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	It's all about respect, respecting people's feelings whose house it is. And I am one person who lives in this house. And there are others here who are from this house, too. This is our home. And we have very strong feelings about that mountain. That is the highest mountain on this island. And for us, as Kanaka Maoli, everything flows from the top to the bottom in the spiritual sense and in a physical sense. So what happens on the top of the mountain affects a lot of things. It affects a lot of things. So what are those impacts? I understand what you are asking me. I don't have a specific answer for you. But what I am putting on the table for you right now is about respecting the host culture. MS. CAROLINE BLANCO: And what I am hearing for you is that avoidance is your your position on this. MR. DANIEL KANAHELE: At this point, yes. MS. CAROLINE BLANCO: If there are any ideas as people start to talk about things, please feel free to

6 (Pages 18 to 21)

1 MS, CHARLENE DWIN VAUGHN: You made a point 2 about whether or not there were laws or regulations that 3 probibited the construction or modification of things 4 about whether or not there were laws or regulations that 5 here toright was a regulation that was a law that was 6 here toright was a regulation that was a law that was 7 that require federal agencies to take into account effects 8 of what they are doing on any property fix at meet a 0 definition that is defined as a historic property. So 10 just for the record and for clarification, and I think to 11 get us all on the same page for this conversation, there 12 is absolutely no law that will prohibit one from 13 constructing something at Halexalia. There isn't. And 14 there orannal or of by agars 15 What we do ask is the federal agencies consider 16 the impact of their action on historic properties and law. 19 I don't know if there is a state law for Hawaii, 10 perhaps there is, but there is no federal law that woul 20 perhaps there is, but there is no federal law that woul 21 panaing.		22		24
2 about whether or not there were laws or regulations that 2 level and that two will have nothing to say even though we 3 growthild the construction or modification of things 3 4 ascerd. There are not. And the process which brings us 5 5 here tonight was a regulation that was law that was 5 6 passed in 1966, and regulations promulgated since 1979, 7 7 that require Ideard lagencies to take into account effects 7 9 definition that is defined as a historic property. So 7 10 just for charification, and I think to 10 11 get us all on the same page for this conversation, there 11 12 is absolutely no law that will prohibit one from 11 13 constructing something at Haleakala. There isn't. And 11 14 that was been the program for 40 years. 14 15 what we do as its the foderal agencies consider 15 16 the impact of there is a state law for Hawaii, 19 19 I don't know if there is a state law for Hawaii, 19 20 perhaps there is, but there is no federal law that would 21 astate la			1	
3 prohibited the construction or modification of things 3 live here. This has been a part of my life and a part of 4 sacred. There are not. And the process which brings us or auture. I just think it's a travesty that we have 5 bort tonight was a regulation that was a law what was or auture. I just think it's a travesty that we have 6 of what they are doing on any property that meet a or auture. I just think it's a travesty that we have 9 definition that is defined as a historic property. So if''''''''''''''''''''''''''''''''''''				
4 sacred. There are not. And the process which brings us 5 here tonight was a regulation that was law that was 6 passed in 1966, and regulations promulgated since 1979, 7 that require federal agencies to take into account effects 8 of what they are doing on any property that meet a 9 definition that is defined as a historic property. So 10 just for the record and for clarification, and I think to 11 get us all on the same page for this conversation, there 12 is absolutely no law that will prohibit on form 13 constructing something at Haleakala. There isn't. And 14 that has been the program for 40 years. 15 what we do ask its federal agencies consider 16 that we have its the federal agencies consider 17 into account any comments that may be made during the 18 perhaps there is, but there is a state law for Hawaii, 19 I don't know if there is a state law for Hawaii, 19 palace is sacred and special, but somehow their 23 place is sacred and special, but somehow their 24 - could - an agreement could be reached by parties 25 MR. DANIELL KANAHELE: Thank you - </td <td></td> <td></td> <td></td> <td></td>				
5 here tonight was a regulation that was a law that was 5 not the power or the voice to say, ha'ule, that is enough 6 passed in 1966, and regulations promulgated since 1979, Thank you. 9 definition that is defined as a historic property. So 7 Thank you. 9 definition that is defined as a historic property. So 9 Claire, we wanted to - when we opened this up, 10 just for the record and for clair/fication, and I think to 10 we did point out that no decision has been made about this 11 get us all on the same page for this conversation, there 11 project, yet. 12 and tonight's meeting - there have been 26, as 11 14 that has been the program for 40 years. 14 there years now. But tonight's meeting is the second of 15 What we do ask is the federal agencies consider 16 this is not a public hearing. It is really trying to get 16 this is not a public hearing. 17 from community an idea of what ways can some of the 18 planning. 17 from community an idea of what ways can some of the 19 I don't know if there is a state law for Hawaii, there is a state law for Hawaii, there is a state law for Hawaii, the woluth' 10 <				
6 passed in 1966, and regulations promulgated since 1979, that require federal agencies to take into account effects 6 already. 7 Thank you. 7 Thank you. 9 of what they are doing on any property that meet a 9 MS, ANNELLE AMARAL: Thank you. 10 just for the record and for clarification, and I think to 10 We did point out that no decision has been made about this project yet. 11 get us all on the same page for this conversation, three 11 project yet. 12 is absolutely no law that will prolibit on from 12 And toright's meeting there have been 26, as 13 constructing something at Halekala. There isn't. And 11 Iunderstand, public hearing. It is really trying to get 16 the impact of their action on historic properties and take 16 this is not a public hearing. It is really trying to get 17 into account any comments that may be made during the 18 concernsor of community an idea of what ways can some of the 19 I don't know if there is a state law for Hawaii, 20 And if there are popelo here who can act as resource 22 a state law, either. Which means that we all know their 23 a conversation and a dialogue. 23 MS. CHARLENE DW				
7 that require federal agencies to take into account effects 7 Thank you. 8 of what they are doing on any property that met a 8 MS. ANNELLE MARAL: Thank you. 10 just for the record and for clarification, and I think to 10 we did point out that no decision has been made about this 11 get us all on the same page for this conversation, there 11 12 And toight's meeting there have been 26, as 12 is absolutely no law that will prohibit one from 12 And toight's meeting is the second of 14 that may beam de during the 13 I understand, public hearings on this thing, for close to 14 there are any comments that may be made during the 16 this is not a public hearing. It is really trying to get 16 the impact of their action on historic properties and take 16 from community an idea of what ways can some of the 19 I don't know if there is a state law for Hawaii, 19 project. 20 2 a state law, either. Which means that we all know their 21 unanswerd, there are people here who can act as resource 23 1 MS. CHARLE KANAHELE: Thank you - 22 is move towards a place where a Memorandum of Agreement co 24 <td></td> <td></td> <td></td> <td></td>				
8 of what they are doing on any property that meet a 9 MS. ANNELLE AMARAL: Thank you. 9 definition that is defined as a historic property. So 9 Clairs, we wanted to — when we opened this up, 10 just for the record and for clarification, and I think to 9 Clairs, we wanted to — when we opened this up, 11 get us all on the same page for this conversation, there 10 we did point out that no decision has been made about this 12 is absolutely no law that will prohibit one from 11 Iunderstand, public hearings on this thing, for close to 14 that has been the program for 40 years. 14 that has been the program for 40 years. 15 15 What they are calling sort of consultation meetings. So 16 this is not a public hearings on this thing, for close to 16 the impact of their action on historic properties and take 16 this is not a public hearings ont is the second of 19 I don't know if there is as tatel and for Hawaii, 19 project. 10 20 perhaps there is, but there is an federal law that would 20 And if there are questions still remaining 21 establish such a prohibition. And I don't think there is 10 move towards a place where a Memorandium of Agreement				
9 definition that is defined as a historic property. So 9 Claire, we wanted to when we opened this up, 10 just for the record and for clarification, and I think to 10 we did point out that no decision has been made about this 12 is absolutely no law that will prohibit one from 12 And tonight's meeting there have been 26, as 13 constructing something at Haleakala. There isn't. And 13 I understand, public hearings on this thing, for close to 14 that has been the program for 40 years. 14 three years now. But tonight's meeting: It is really trying to get 15 What we do ask is the federal agencies consider 16 three years now. But tonight's meeting. It is really trying to get 16 the impact of their action on historic properties and take 17 from community an idea of what ways can some of the 19 I don't know if there is a state law for Hawaii, 19 project. 20 20 perhaps there is, but there is no federal law that would 20 and if there are questions. Sult me hope is to sort of 23 move towards a place where a Memorandum of Agreement could be reached by parities 11 a conversation and a dialogue. 24 legislation that keeps us from touching. 23 14	7			
10 just for the record and for clarification, and think to 11 get us all on the same page for this conversation, there 12 is absolutely no law that will prohibit one from 13 constructing something at Haleakala. There isn't. And 14 that has been the program for 40 years. 15 What we do ask is the federal agencies consider 16 the impact of their action on historic properties and take 17 into account any comments that may be made during the 19 I don't know if there is a state law for Hawaii, 10 perhaps there is, but there is a state law for Hawaii, 10 perhaps there is, but there is no federal law that would 21 astate law, either. Which means that we all know their 22 a state law, either. Which means that we all know their 23 1 24 legislation that keeps us from touching. 25 MR. DANIEL KANAHELE: Thank you 24 legislation that Keeps us from touching. 25 MS. ANNELLE AMARAL: Uh-huh. 36 MS. ANNELLE AMARAL: Uh-huh. 37 MS. ANNELLE AMARAL: Uh-huh. 38 MS. ANNELE AMARAL: Ch. Aloba. Did you want				
11 get us all on the same page for this conversation, there 11 project yet. 12 is absolutely no law that will prohibit one from 12 And tonight's meeting there have been 26, as 13 constructing something at Haleakala. There isn't. And 13 I understand, public hearings on this thing, for close to 14 that has been the program for 40 years. 14 that has been the program for 40 years. 15 15 What we do ask is the federal agencies consider 15 what they are calling sort of consultation meetings. So 16 this is not a public hearing. It is really trying to get 17 19 I don't know if there is a state law for Hawaii, 19 20 perhaps there is, but there is no federal law that would 20 And if there are questions. But the hope is to sort of 21 unanswered, there are people here who can act as resource 21 uasswer those questions. But the hope is to sort of 22 a state law, either. Which means that we all know their 23 23 10 23 Imove towards a place where a Memorandum of Agreement co 24 - could an agreement could be reached by parties 25 MR. OHUA MORANDO: And I do this not for myself, my own personal reasons, but I do this for my ohana, the
1 2 3 4 5 6 7 8 9 10 11 12	recommendation. DR. CRAIG FOLTZ: Right. But that decision then factors into the preparation of a budget which, of course, must be appropriated by Congress. MS. CAROLINE BLANCO: But the final agency for the decision for the agency is the Director's decision. DR. CRAIG FOLTZ: Right. MS. MELISSA PRINCE: Okay. Yeah, I having attended all those other meetings, I sort of understand the arguments that went into where you are now today. And it just seems like it's a very tough thing because the testifiers at the Hawaiian Homes hall that day I forget	2 3 4 5 6 7 8 9 10 11 12	29 these spots and there is only a small place. It's sad because of it's not fully there. And I am I am concerned about Haleakala because things have been built there. And now we are looking at this and trying to mitigate and avoid and work together on how this happens. And I am I want to say I am avoiding this. I don't want this to happen, you know. I want this to stay and not be built. MS. ANNELLE AMARAL: Uh-huh. MS. OHUA MORANDO: And I do this not for myself, my own personal reasons, but I do this for my ohana, the generations to come after me. Because if we don't save
1 2 3 4 5 6 7 8 9 10 11 12 13	recommendation. DR. CRAIG FOLTZ: Right. But that decision then factors into the preparation of a budget which, of course, must be appropriated by Congress. MS. CAROLINE BLANCO: But the final agency for the decision for the agency is the Director's decision. DR. CRAIG FOLTZ: Right. MS. MELISSA PRINCE: Okay. Yeah, I having attended all those other meetings, I sort of understand the arguments that went into where you are now today. And it just seems like it's a very tough thing because the testifiers at the Hawaiian Homes hall that day I forget the exact date, but it was 100 percent opposition to the	2 3 4 5 6 7 8 9 10 11 12 13	29 these spots and there is only a small place. It's sad because of it's not fully there. And I am I am concerned about Haleakala because things have been built there. I wouldn't venture to guess that I wouldn't suggest I don't think it would be appropriate for me to say how does the Director understand the sacredness of the mountain in the same way you do or somebody else doe I think that is a very difficult question to answer. However, I can say that I certainly will give it tremendous respect because of the comments that have been
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	the Awikiwiki, which is in the dryland forest. I am more concerned that the habitat is kept intact, kept whole and kept healthy. So for me that is more more important than the actual individual species. Because without the habitat, you cannot have the native species. MS. ANNELLE AMARAL: Okay. You wanted to comment MS. CAROLINE BLANCO: I did. MS. ANNELLE AMARAL: Caroline. Then I will come here. MS. CAROLINE BLANCO: I just wanted to make sure that our focus doesn't get too off track. Because this particular meeting is with regard to the National Historic Preservation Act which talks about impacts to historically significant properties. Other statutes like National Environmental Policy Act and the Draft Environmental Impact Statement, as prepared, pursuant to that Act and there will be a final one takes into consideration other types of impacts, wildlife impacts, species, and, of course, the species takes into consideration other habitats and endangered species. But the National Historic Preservation Act,	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	telling them, but if they have never gotten it, then they don't get it. MS. CAROLINE BLANCO: I think maybe it's awful hard to answer that question, but what I can say is that certainly the Foundation has heard many comments such as the ones that have just been made here and heard strong opposition to to the mountain because of its significance. And I don't think there's any question about the the strong feelings that people have. And certainly there's a respect, strong respect for those those those feelings that people have and the positions that they take. And that certainly will be considered in making the final decision. I wouldn't venture to guess that I wouldn't suggest I don't think it would be appropriate for me to say how does the Director understand the sacredness of the mountain in the same way you do or somebody else doe I think that is a very difficult question to answer. However, I can say that I certainly will give it tremendous respect because of the comments that have been made throughout the process, throughout the years, where this has come up.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 20 21 22	the Awikiwiki, which is in the dryland forest. I am more concerned that the habitat is kept intact, kept whole and kept healthy. Is it just about mitigating the impact of the observatory that has already been decided on? And what would you be looking to hear to really consider not putting this telescope here? Because all of the community meetings that I have attended have been vocally opposed to it. And the majority of people who I
25 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15	43 you folks should be lucky that you that they invented boats, because if it wasn't for the invention of boats, or for your canoes, you wouldn't be here. So I said, "No, you don't understand. Do you know what the Kumulipo is?" Does anyone of scientific know the Kumulipo? MS. ANNELLE AMARAL: It's been discussed. MS. JOYCLYNN COSTA: Okay. Now, he didn't know. And I said, "In a Kumulipo, we are evolved from this Earth. Do you understand evolution?" And he said, "Well, yeah." I said, "Then, in the Americas or in the Asias or in the Europes, did boats bring them or did they evolve? Did every single human on this Earth arrive at their destination with a boat?" So now we got to go deeper and understand who you folks addressing. And that is what I want to get at.	25 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15	Lianna. Then I am going to Charlene. MS. LIANNA HOROVITZ: I guess my question really is along the same lines, that how does this community input MS. ANNELLE AMARAL: Louder, please. MS. LIANNA HOROVITZ: How does this community input matter? Is this already a done deal where what we say will not impact, truly, the final decision? Has the decision been made? Is it just about mitigating the impact of the observatory that has already been decided on? And what would you be looking to hear to really consider not putting this telescope here? Because all of the community meetings that I have attended have been vocally opposed to it. And the majority of people who I have spoken with in my community have been vocally opposed to it. So what would it really take for this project to
25 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	43 you folks should be lucky that you that they invented boats, because if it wasn't for the invention of boats, or for your canoes, you wouldn't be here. So I said, "No, you don't understand. Do you know what the Kumulipo is?" Does anyone of scientific know the Kumulipo? MS. ANNELLE AMARAL: It's been discussed. MS. JOYCLYNN COSTA: Okay. Now, he didn't know. And I said, "In a Kumulipo, we are evolved from this Earth. Do you understand evolution?" And he said, "Well, yeah." I said, "Then, in the Americas or in the Asias or in the Europes, did boats bring them or did they evolve? Did every single human on this Earth arrive at their destination with a boat?" So now we got to go deeper and understand who you folks addressing. And that is what I want to get at. I want to know who you are really addressing, or is it	25 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	Lianna. Then I am going to Charlene. MS. LIANNA HOROVITZ: I guess my question really is along the same lines, that how does this community input MS. ANNELLE AMARAL: Louder, please. MS. LIANNA HOROVITZ: How does this community input matter? Is this already a done deal where what we say will not impact, truly, the final decision? Has the decision been made? Is it just about mitigating the impact of the observatory that has already been decided on? And what would you be looking to hear to really consider not putting this telescope here? Because all of the community meetings that I have attended have been vocally opposed to it. And the majority of people who I have spoken with in my community have been vocally opposed to it. So what would it really take for this project to be moved somewhere else is what I want to know. Rather
25 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	is from now. We and he told me this comment. He said, 43 you folks should be lucky that you that they invented boats, because if it wasn't for the invention of boats, or for your canoes, you wouldn't be here. So I said, "No, you don't understand. Do you know what the Kumulipo is?" Does anyone of scientific know the Kumulipo? MS. ANNELLE AMARAL: It's been discussed. MS. JOYCLYNN COSTA: Okay. Now, he didn't know. And I said, "In a Kumulipo, we are evolved from this Earth. Do you understand evolution?" And he said, "Well, yeah." I said, "Then, in the Americas or in the Asias or in the Europes, did boats bring them or did they evolve? Did every single human on this Earth arrive at their destination with a boat?" So now we got to go deeper and understand who you folks addressing. And that is what I want to get at. I want to know who you are really addressing, or is it is this just superficial. And it may be cynical on my part, but because of the amount that we've given my family has given my	25 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	Lianna. Then I am going to Charlene. MS. LIANNA HOROVITZ: I guess my question really is along the same lines, that how does this community input MS. ANNELLE AMARAL: Louder, please. MS. LIANNA HOROVITZ: How does this community input matter? Is this already a done deal where what we say will not impact, truly, the final decision? Has the decision been made? Is it just about mitigating the impact of the observatory that has already been decided on? And what would you be looking to hear to really consider not putting this telescope here? Because all of the community meetings that I have attended have been vocally opposed to it. And the majority of people who I have spoken with in my community have been vocally oppose to it. So what would it really take for this project to be moved somewhere else is what I want to know. Rather than mitigating it, what is it going to really take, what
25 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	is from now. We and he told me this comment. He said, 43 you folks should be lucky that you that they invented boats, because if it wasn't for the invention of boats, or for your canoes, you wouldn't be here. So I said, "No, you don't understand. Do you know what the Kumulipo is?" Does anyone of scientific know the Kumulipo? MS. ANNELLE AMARAL: It's been discussed. MS. JOYCLYNN COSTA: Okay. Now, he didn't know. And I said, "In a Kumulipo, we are evolved from this Earth. Do you understand evolution?" And he said, "Well, yeah." I said, "Then, in the Americas or in the Asias or in the Europes, did boats bring them or did they evolve? Did every single human on this Earth arrive at their destination with a boat?" So now we got to go deeper and understand who you folks addressing. And that is what I want to get at. I want to know who you are really addressing, or is it is this just superficial. And it may be cynical on my part, but because of	25 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	Lianna. Then I am going to Charlene. MS. LIANNA HOROVITZ: I guess my question real is along the same lines, that how does this community input MS. ANNELLE AMARAL: Louder, please. MS. LIANNA HOROVITZ: How does this communi- input matter? Is this already a done deal where what we say will not impact, truly, the final decision? Has the decision been made? Is it just about mitigating the impact of the observatory that has already been decided on? And what would you be looking to hear to really consider not putting this telescope here? Because all of the community meetings that I have attended have been vocally opposed to it. And the majority of people who I have spoken with in my community have been vocally opport to it. So what would it really take for this project to be moved somewhere else is what I want to know. Rather than mitigating it, what is it going to really take, what would you need to hear or understand in order to say,
25 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	is from now. We and he told me this comment. He said, 43 you folks should be lucky that you that they invented boats, because if it wasn't for the invention of boats, or for your canoes, you wouldn't be here. So I said, "No, you don't understand. Do you know what the Kumulipo is?" Does anyone of scientific know the Kumulipo? MS. ANNELLE AMARAL: It's been discussed. MS. JOYCLYNN COSTA: Okay. Now, he didn't know. And I said, "In a Kumulipo, we are evolved from this Earth. Do you understand evolution?" And he said, "Well, yeah." I said, "Then, in the Americas or in the Asias or in the Europes, did boats bring them or did they evolve? Did every single human on this Earth arrive at their destination with a boat?" So now we got to go deeper and understand who you folks addressing. And that is what I want to get at. I want to know who you are really addressing, or is it is this just superficial. And it may be cynical on my part, but because of the amount that we've given my family has given my	25 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	Lianna. Then I am going to Charlene. MS. APPENDIX C(6): TRANSCRIPTS - SECTION 106 MEETING, UH IFA, MAIKALANI FACILITY, AUGUST 27, 2008 EVENING SESSION

	46		48
1	part of that, at least.	1	MS. ANNELLE AMARAL: Okay. I wonder if I can
2	There has been no decision made. And I want to	2	come first to Charlene, who had her hand up. And before I
3	clarify that we have said that at every juncture, that	3	come to Daniel, I need to see if anyone else wants to
4	there really has been no decision made. And there won't	4	speak before you speak again. Okay. Then I will come to
5	be until this process is completed and then the National	5	you.
6	Environmental Policy Act process is completed.	6	So please Charlene.
7	And then it will go through this procedure that	7	MS. CHARLENE DWIN VAUGHN: We're here pursuan
8	we talked about with the National Science Foundation	8	to a regulatory process that clearly states that Native
9	Director making a recommendation to the National Science	9	Hawaiians and Native Americans who have identified a
10	Board, if he decides to make that you know, he might	10	property of religious and cultural significance must
11	decide not to. There is always that possibility. And	11	communicate what that means.
12	then the step with the National Science Board, depending	12	So I hear you saying, you know, do we
13	on what they decide to do and ultimately the Director.	13	understand, have you been to the mountain, have you
14	So no decision has been made.	14	communicated with it, has it spoken to you. Maybe yes;
15	When the Director takes into consideration	15	maybe not.
16	before making a decision, he is going to take into	16	But for the purposes of this conversation, we're
17	consideration all of the views that have been said so far,	17	looking to people who are Native Hawaiians and who hold
18	as I mentioned earlier, and, also, look at other interests	18	this property to be a sacred place to tell us why this is
19	involved as well and the scientific integrity of it, or	19	a good idea, or why it's not a good idea or, more
20	the importance of it, the scientific community. There are	20	importantly, what it is that we need to understand about
21	various communities that also have differing interests as	21	this whole process that perhaps flying in here for a week
22	well. And so he has to look at the entire picture. And	22	we missed.
23	based on the entire administrative record that's taken	23	MS. JOYCLYNN COSTA: Well, okay. In what part
24	place through all of these processes and to listen to	24	of this conversation is a Kanaka Maoli? I like to know in
25	everything that has been said before making a decision.	25	what part does a Kanaka Maoli play? Because you
	47		4
1	MS. LIANNA HOROVITZ: So the money that has been	1	identified us as a Native Hawaiian, yeah.
2	already allocated by the National Science Foundation,	2	MS. CAROLINE BLANCO: Yeah.
3	where has that money gone to the project?	3	MS. JOYCLYNN COSTA: That is by
4	MS. CAROLINE BLANCO: Sure, I can explain it.	4	MS. CHARLENE DWIN VAUGHN: By law.
5	There are two proposals.	5	MS. JOYCLYNN COSTA: federal understanding of
	The first one was a design and development	6	us. But who we are is Kanaka Maoli first. We are the
6	proposal. We are still continuing to fund that. Design	7	host culture. So in what part can Kanaka Maoli now have a
7		8	voice in this?
8	and development of the proposed ATST Project doesn't		MS. ANNELLE AMARAL: I think it's the same as
9	result in construction of it. It results in design.	9	Native Hawaiian.
10	And the second proposal is the one that is for	10	MS. PUA AIU: The law identifies Native Hawaiian
11	construction. That was in 2004. It is that proposal that	11	
12	triggered requirements under federal statutes for the	12	organization. That is what the law identifies and that is
13	National Science Foundation to engage in environmental	13	how this process is run.
14	compliance reviews. One of which is this Section 106	14	MS. JOYCLYNN COSTA: So as Kanaka if I
15	process.	15	identify myself as a Kanaka Maoli, you'll change my
16	So there has been no decision on the	16	identity to a Native Hawaiian?
17	construction proposal. And there won't be until the steps	17	MS. PUA AIU: Yes.
18	that I have just set up.	18	MS. ANNELLE AMARAL: Identified as Native
19	MS. LIANNA HOROVITZ: What is the timeline for	19	Hawaiian.
20	this?	20	MS. CAROLINE BLANCO: Yes.
21	MS. CAROLINE BLANCO: The timeline for this	21	MS. ANNELLE AMARAL: Yeah.
22	is I believe it's next spring or so. Probably go	22	MS. CHARLENE DWIN VAUGHN: Why are we changing
0.0	before the the Director will make his recommendation	23	it? Do we need to change it?
23			NG TOXOLYDDI COSTA V
24	early in the spring. And and then the decision process	24	MS. JOYCLYNN COSTA: Yes. MS. CHARLENE DWIN VAUGHN: Okay.

13 (Pages 46 to 49)

	50		52
1	MS. JOYCLYNN COSTA: Definitely.	1	may come to you, you know, when you wake up tomorrow
2	MS. ANNELLE AMARAL: Jason.	2	morning or it may come to you, you know, a few days from
3	MR. JASON JEREMIAH: I just wanted to kind of	3	now. And you are like, oh, yeah, now I kind of understand
4	comment on like we're going through consultation process	4	where, you know, she was coming from.
5	and we're trying to retrieve information from Native	5	And same thing on the side of a Native Hawaiian
6	Hawaiian organizations, individuals, ohana, you know. And	6	or our agency, too, is, you know, we may understand what,
7	that is part of the new native new policy with the ACHP	7	you know, the project manager or the scientist or other
8	and consulting Native Hawaiians.	8	agency, or even the Native Hawaiian individual that is
9	Just my thoughts on going through consultation	9	sharing the information.
10	process like this is, you know, from an agency	10	You know, all I wanted to express was that it
11	perspective and you got to look in the other person's	11	may take some time.
12	shoes. Like when Native Hawaiians give up information, we	12	MS. ANNELLE AMARAL: Okay. So let me see. Who
13	shouldn't come right back an agency shouldn't come	13	I'm sorry. That was you, Claire, that had your hand
14	right back with a response. Maybe we should think about a	14	up. Yes? Sorry.
15	response that is given, a response going back to a Native	15	MS. CLAIRE APANA: I feel a great disconnect in
16	Hawaiian individual organization, making time to come up	16	this room. And I'm sorry I was not here earlier. I just
17	with the best response. Sometimes it seems like a Native	17	found out about it, so I ran up here.
18	Hawaiian individual says something from their heart, you	18	I feel this gentleman's excitement over this
19	know, from their own breath, and, right away, we have a	19	project, because it really is excitement in the face of
20	response. That maybe maybe it might take a day, two	20	all the things we're saying, his excitement is so great
21	days, to let that let that thought kind of go through	21	that he would it could go negate everything that we
22	your head and process that information. And that is the	22	have to say. So I am wondering, what do you consider
23	kind of disturbing thing when when our office looked at	23	history? Because this is about history today, right?
24	the timing of the consultation meetings.	24	MS. PUA AIU: Shall we go through ours? That
25	We had two consultation meetings, one this	25	would probably be best.
	51		5:
1	afternoon and one tonight, which turned into one in the	1	MS. CHARLENE DWIN VAUGHN: The letter.
2	same meeting.	2	MS. CLAIRE APANA: Because I see a disconnect.
3	My thoughts were that the new people that	3	MS. PUA AIU: This is kind of a structured
4	couldn't make the meeting from 1:00 to 4:00 today came in	4	process, yeah. And I don't know if we should go over the
5	here and we had to do a lot of refreshing instead of I	5	structured process.
6	mean, I am just looking at the agenda. And I was assuming	6	MS. CAROLINE BLANCO: One of the reasons why w
7	the 6:00 to 9:00 meeting was going to go through, you	7	didn't go through the entire agenda is because
8	know, National Science Foundation kind of going over the	8	MS. PUA AIU: Originally.
9	project. So that, you know, everyone has a fair shot if	9	MS. CAROLINE BLANCO: a few minutes after
10	they are in a consultation process.	10	6:00, there were only one or two people that were new to
11	So I mean, my main kind of ideas that I am	11	the room. And we thought we would summarize. And this
12	trying to share with the group is just, you know, it may	12	was something we all discussed.
13	take a while to kind of understand where people are coming	13	MS. PUA AIU: Because there was too few of you.
14	from.	14	But now that there is more
15	MS. ANNELLE AMARAL: Let me understand you,	15	So I am Pua Aiu, I am the Administrator of the
16	Jason. If, however, a direct question is asked, it's	16	State Historic Preservation. This is Nancy McMahon, the
17	appropriate to answer questions, right?	17	Deputy SHPO. And this is Hinano Rodrigues, he is the
18	MR. JASON JEREMIAH: Right.	18	cultural historian here on Maui.
19	MS. ANNELLE AMARAL: Because sometimes what I am	19	Let me just, from my point of view, and they can
19	hearing is confusion about process. And certainly to	20	add in, go through a little bit of what 106 means from our
20			perspective. A 106 consultation looks at cultural and
	answer a direct question is appropriate. What you are	21	
20	answer a direct question is appropriate. What you are speaking to is sort of some I don't know mystical	22	historic properties. And it's structured in a fairly
20 21	answer a direct question is appropriate. What you are speaking to is sort of some I don't know mystical sort of communication, don't react right away.	22 23	historic properties. And it's structured in a fairly lineal sense to try to get at a memorandum of agreement.
20 21 22	answer a direct question is appropriate. What you are speaking to is sort of some I don't know mystical	22	historic properties. And it's structured in a fairly

14 (Pages 50 to 53)

	54		56
		-	
1	is the goal, is to get to some kind of agreement.	1	So it said that the proposed action no. Sorry. Wrong
2	In this particular situation, we have most of	2	one.
3	the people are saying avoidance, in which case advoidance	3	MS. JOYCLYNN COSTA: Irrevocable.
4	you would have a very short Memorandum of Agreement	4	MS. PUA AIU: Definition for significant impact
5	because there's that is all you would agree on.	5	is referencing only irrevocable losses of said resources
6	But if you were to go further, you would need to	6	and is not appropriate in these circumstances. The
7	talk about either minimization or mitigation.	7	implication is that if impact does not result in an
8	When you do a 106 consultation, one of the first	8	irrevocable loss, it is less than significant.
9	things you do is you define the proposed area of effect.	9	In the case of the Haleakala summit area, we
10	So let me talk about that.	10	believe that threshold to be lower given the community
11	In 2006, our office sent the letter and we had	11	input regarding the significance of this traditional
12	some questions about the proposed area effects. So we	12	cultural property. So and I believe we're there. I
13	looked at the crater district and we believed that the	13	believe we reached an agreement on that, that that the
14	crater the crater is a historic district. It has a	14	threshold is not irrevocable loss.
15	site number. It's in the state inventory of historic	15 16	MS. JOYCLYNN COSTA: It shouldn't have to be
16	places. It's on the National Register of Historic Places.	17	just irrevocable.
17	The Park road is significant.	18	MS. PUA AIU: No. It should be impact. So an for example, if you can still go up there, but you got
18	And the Park people were here earlier today for	19	to hear noise, that is an impact. It's not an irrevocable
19	those of you who weren't here. And the Park road is significant under Criterion	20	impact, because it just is kind of inconvenient and makes
20	-	21	the experience less or I mean, you can characterize it
21	A, which in the would be in association with the development of the National Park System, and Criterion C	22	how you want, but it's not an irrevocable impact because
22	for its association with the rest of the park design and	23	it doesn't mean you can't go there. It doesn't mean you
24	early entry of development, circa 1930.	24	can't see the sunrise or sunset, but it's an impact. And
25	There's bridges and box culverts on it that are	25	it may or may not be a significant impact. That is what
2.5			
	55	_	57
1	important as well. So that is one of the first things	1	we are arguing. So this is kind of the framework of what
2	important as well. So that is one of the first things that is going to be affected, is the road.	2	we are arguing. So this is kind of the framework of what we are talking about.
2	important as well. So that is one of the first things that is going to be affected, is the road. We looked at the use of significant impact on	2 3	we are arguing. So this is kind of the framework of what we are talking about. MS. JOYCLYNN COSTA: Who has the jurisdiction of
2 3 4	important as well. So that is one of the first things that is going to be affected, is the road. We looked at the use of significant impact on historic and cultural resources. And it was as	2 3 4	we are arguing. So this is kind of the framework of what we are talking about. MS. JOYCLYNN COSTA: Who has the jurisdiction of that mountain?
2 3 4 5	important as well. So that is one of the first things that is going to be affected, is the road. We looked at the use of significant impact on historic and cultural resources. And it was as referencing only irrevocable losses of said resources.	2 3 4 5	we are arguing. So this is kind of the framework of what we are talking about. MS. JOYCLYNN COSTA: Who has the jurisdiction of that mountain? MS. PUA AIU: Depends on where you are talking
2 3 4 5 6	 important as well. So that is one of the first things that is going to be affected, is the road. We looked at the use of significant impact on historic and cultural resources. 2 3 4 5 6 7	 important as well. So that is one of the first things that is going to be affected, is the road. We looked at the use of significant impact on historic and cultural resources. And it was as referencing only irrevocable losses of said resources. And we thought that might be too high of a of a bar. And we thought this threshold should be lower given input 	2 3 4 5 6 7	 we are arguing. So this is kind of the framework of what we are talking about. MS. JOYCLYNN COSTA: Who has the jurisdiction of that mountain? MS. PUA AIU: Depends on where you are talking about. The Park Service has a lot of jurisdiction, the National Park Service, because it's a national park.
2 3 4 5 6 7 8	 important as well. So that is one of the first things that is going to be affected, is the road. We looked at the use of significant impact on historic and cultural resources. And it was as referencing only irrevocable losses of said resources. And we thought that might be too high of a of a bar. And we thought this threshold should be lower given input from community about the traditional cultural property. 	2 3 4 5 6 7 8	 we are arguing. So this is kind of the framework of what we are talking about. MS. JOYCLYNN COSTA: Who has the jurisdiction of that mountain? MS. PUA AIU: Depends on where you are talking about. The Park Service has a lot of jurisdiction, the National Park Service, because it's a national park. But, yeah, the part that the yeah.
2 3 4 5 6 7 8 9	 important as well. So that is one of the first things that is going to be affected, is the road. We looked at the use of significant impact on historic and cultural resources. And it was as referencing only irrevocable losses of said resources. And we thought that might be too high of a of a bar. And we thought this threshold should be lower given input from community about the traditional cultural property. We also believe that the that the cumulative 	2 3 5 7 8 9	 we are arguing. So this is kind of the framework of what we are talking about. MS. JOYCLYNN COSTA: Who has the jurisdiction of that mountain? MS. PUA AIU: Depends on where you are talking about. The Park Service has a lot of jurisdiction, the National Park Service, because it's a national park. But, yeah, the part that the yeah. MR. MIKE MABERRY: May I?
2 3 4 5 6 7 8 9	 important as well. So that is one of the first things that is going to be affected, is the road. We looked at the use of significant impact on historic and cultural resources. And it was as referencing only irrevocable losses of said resources. And we thought that might be too high of a of a bar. And we thought this threshold should be lower given input from community about the traditional cultural property. We also believe that the that the cumulative impacts of the project have not been addressed regarding 	2 3 6 7 8 9	 we are arguing. So this is kind of the framework of what we are talking about. MS. JOYCLYNN COSTA: Who has the jurisdiction of that mountain? MS. PUA AIU: Depends on where you are talking about. The Park Service has a lot of jurisdiction, the National Park Service, because it's a national park. But, yeah, the part that the yeah. MR. MIKE MABERRY: May I? MS. ANNELLE AMARAL: Michael has something.
2 3 4 5 6 7 8 9 10 11	 important as well. So that is one of the first things that is going to be affected, is the road. We looked at the use of significant impact on historic and cultural resources. And it was as referencing only irrevocable losses of said resources. And we thought that might be too high of a of a bar. And we thought this threshold should be lower given input from community about the traditional cultural property. We also believe that the that the cumulative impacts of the project have not been addressed regarding mitigation. And that is kind of why we are sitting here 	2 3 4 5 6 7 8 9 10 11	 we are arguing. So this is kind of the framework of what we are talking about. MS. JOYCLYNN COSTA: Who has the jurisdiction of that mountain? MS. PUA AIU: Depends on where you are talking about. The Park Service has a lot of jurisdiction, the National Park Service, because it's a national park. But, yeah, the part that the yeah. MR. MIKE MABERRY: May I? MS. ANNELLE AMARAL: Michael has something. MR. MIKE MABERRY: There are some 27 different
2 3 4 5 6 7 8 9 10 11 12	 important as well. So that is one of the first things that is going to be affected, is the road. We looked at the use of significant impact on historic and cultural resources. And it was as referencing only irrevocable losses of said resources. And we thought that might be too high of a of a bar. And we thought this threshold should be lower given input from community about the traditional cultural property. We also believe that the that the cumulative impacts of the project have not been addressed regarding mitigation. And that is kind of why we are sitting here today. And that there are significant impacts to the 	2 3 4 5 6 7 8 9 10 11 12	 we are arguing. So this is kind of the framework of what we are talking about. MS. JOYCLYNN COSTA: Who has the jurisdiction of that mountain? MS. PUA AIU: Depends on where you are talking about. The Park Service has a lot of jurisdiction, the National Park Service, because it's a national park. But, yeah, the part that the yeah. MR. MIKE MABERRY: May I? MS. ANNELLE AMARAL: Michael has something. MR. MIKE MABERRY: There are some 27 different public and private agencies that have responsibilities for
2 3 4 5 6 7 8 9 10 11 12 13	 important as well. So that is one of the first things that is going to be affected, is the road. We looked at the use of significant impact on historic and cultural resources. And it was as referencing only irrevocable losses of said resources. And we thought that might be too high of a of a bar. And we thought this threshold should be lower given input from community about the traditional cultural property. We also believe that the that the cumulative impacts of the project have not been addressed regarding mitigation. And that is kind of why we are sitting here today. And that there are significant impacts to the traditional cultural property, which is what you all are 	2 3 4 5 6 7 8 9 10 11 12 13	 we are arguing. So this is kind of the framework of what we are talking about. MS. JOYCLYNN COSTA: Who has the jurisdiction of that mountain? MS. PUA AIU: Depends on where you are talking about. The Park Service has a lot of jurisdiction, the National Park Service, because it's a national park. But, yeah, the part that the yeah. MR. MIKE MABERRY: May I? MS. ANNELLE AMARAL: Michael has something. MR. MIKE MABERRY: There are some 27 different public and private agencies that have responsibilities for property above 6,000 feet elevation. The area that is
2 3 4 5 6 7 8 9 10 11 12 13 14	 important as well. So that is one of the first things that is going to be affected, is the road. We looked at the use of significant impact on historic and cultural resources. And it was as referencing only irrevocable losses of said resources. And we thought that might be too high of a of a bar. And we thought this threshold should be lower given input from community about the traditional cultural property. We also believe that the that the cumulative impacts of the project have not been addressed regarding mitigation. And that is kind of why we are sitting here today. And that there are significant impacts to the traditional cultural property, which is what you all are talking about. 	2 3 4 5 6 7 8 9 10 11 12 13 14	 we are arguing. So this is kind of the framework of what we are talking about. MS. JOYCLYNN COSTA: Who has the jurisdiction of that mountain? MS. PUA AIU: Depends on where you are talking about. The Park Service has a lot of jurisdiction, the National Park Service, because it's a national park. But, yeah, the part that the yeah. MR. MIKE MABERRY: May I? MS. ANNELLE AMARAL: Michael has something. MR. MIKE MABERRY: There are some 27 different public and private agencies that have responsibilities for property above 6,000 feet elevation. The area that is being discussed for this proposed project is 18 acres
2 3 4 5 6 7 8 9 10 11 12 13 14 15	 important as well. So that is one of the first things that is going to be affected, is the road. We looked at the use of significant impact on historic and cultural resources. And it was as referencing only irrevocable losses of said resources. And we thought that might be too high of a of a bar. And we thought this threshold should be lower given input from community about the traditional cultural property. We also believe that the that the cumulative impacts of the project have not been addressed regarding mitigation. And that is kind of why we are sitting here today. And that there are significant impacts to the traditional cultural property, which is what you all are talking about. So those are those are our basic comments. 	2 3 4 5 6 7 8 9 10 11 12 13 14 15	 we are arguing. So this is kind of the framework of what we are talking about. MS. JOYCLYNN COSTA: Who has the jurisdiction of that mountain? MS. PUA AIU: Depends on where you are talking about. The Park Service has a lot of jurisdiction, the National Park Service, because it's a national park. But, yeah, the part that the yeah. MR. MIKE MABERRY: May I? MS. ANNELLE AMARAL: Michael has something. MR. MIKE MABERRY: There are some 27 different public and private agencies that have responsibilities for property above 6,000 feet elevation. The area that is being discussed for this proposed project is 18 acres which is under the University of Hawaii and the management
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	 important as well. So that is one of the first things that is going to be affected, is the road. We looked at the use of significant impact on historic and cultural resources. And it was as referencing only irrevocable losses of said resources. And we thought that might be too high of a of a bar. And we thought this threshold should be lower given input from community about the traditional cultural property. We also believe that the that the cumulative impacts of the project have not been addressed regarding mitigation. And that is kind of why we are sitting here today. And that there are significant impacts to the traditional cultural property, which is what you all are talking about. So those are those are our basic comments. And that, for us, kind of defines where we need to go. 	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	 we are arguing. So this is kind of the framework of what we are talking about. MS. JOYCLYNN COSTA: Who has the jurisdiction of that mountain? MS. PUA AIU: Depends on where you are talking about. The Park Service has a lot of jurisdiction, the National Park Service, because it's a national park. But, yeah, the part that the yeah. MR. MIKE MABERRY: May I? MS. ANNELLE AMARAL: Michael has something. MR. MIKE MABERRY: There are some 27 different public and private agencies that have responsibilities for property above 6,000 feet elevation. The area that is being discussed for this proposed project is 18 acres which is under the University of Hawaii and the management of the Institute for Astronomy.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	 important as well. So that is one of the first things that is going to be affected, is the road. We looked at the use of significant impact on historic and cultural resources. And it was as referencing only irrevocable losses of said resources. And we thought that might be too high of a of a bar. And we thought this threshold should be lower given input from community about the traditional cultural property. We also believe that the that the cumulative impacts of the project have not been addressed regarding mitigation. And that is kind of why we are sitting here today. And that there are significant impacts to the traditional cultural property, which is what you all are talking about. So those are those are our basic comments. And that, for us, kind of defines where we need to go. So there is, basically, a road. And there's a 	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	 we are arguing. So this is kind of the framework of what we are talking about. MS. JOYCLYNN COSTA: Who has the jurisdiction of that mountain? MS. PUA AIU: Depends on where you are talking about. The Park Service has a lot of jurisdiction, the National Park Service, because it's a national park. But, yeah, the part that the yeah. MR. MIKE MABERRY: May I? MS. ANNELLE AMARAL: Michael has something. MR. MIKE MABERRY: There are some 27 different public and private agencies that have responsibilities for property above 6,000 feet elevation. The area that is being discussed for this proposed project is 18 acres which is under the University of Hawaii and the management of the Institute for Astronomy. MS. JOYCLYNN COSTA: How did they acquire that?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	 important as well. So that is one of the first things that is going to be affected, is the road. We looked at the use of significant impact on historic and cultural resources. And it was as referencing only irrevocable losses of said resources. And we thought that might be too high of a of a bar. And we thought this threshold should be lower given input from community about the traditional cultural property. We also believe that the that the cumulative impacts of the project have not been addressed regarding mitigation. And that is kind of why we are sitting here today. And that there are significant impacts to the traditional cultural property, which is what you all are talking about. So those are those are our basic comments. And that, for us, kind of defines where we need to go. So there is, basically, a road. And there's a traditional cultural property which is important to Native 	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	 we are arguing. So this is kind of the framework of what we are talking about. MS. JOYCLYNN COSTA: Who has the jurisdiction of that mountain? MS. PUA AIU: Depends on where you are talking about. The Park Service has a lot of jurisdiction, the National Park Service, because it's a national park. But, yeah, the part that the yeah. MR. MIKE MABERRY: May I? MS. ANNELLE AMARAL: Michael has something. MR. MIKE MABERRY: There are some 27 different public and private agencies that have responsibilities for property above 6,000 feet elevation. The area that is being discussed for this proposed project is 18 acres which is under the University of Hawaii and the management of the Institute for Astronomy. MS. JOYCLYNN COSTA: How did they acquire that? MR. MIKE MABERRY: Executive order. It would be
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	 important as well. So that is one of the first things that is going to be affected, is the road. We looked at the use of significant impact on historic and cultural resources. And it was as referencing only irrevocable losses of said resources. And we thought that might be too high of a of a bar. And we thought this threshold should be lower given input from community about the traditional cultural property. We also believe that the that the cumulative impacts of the project have not been addressed regarding mitigation. And that is kind of why we are sitting here today. And that there are significant impacts to the traditional cultural property, which is what you all are talking about. So those are those are our basic comments. And that, for us, kind of defines where we need to go. So there is, basically, a road. And there's a traditional cultural property which is important to Native Hawaiians and to their practices. That is kind of the 	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	 we are arguing. So this is kind of the framework of what we are talking about. MS. JOYCLYNN COSTA: Who has the jurisdiction of that mountain? MS. PUA AIU: Depends on where you are talking about. The Park Service has a lot of jurisdiction, the National Park Service, because it's a national park. But, yeah, the part that the yeah. MR. MIKE MABERRY: May I? MS. ANNELLE AMARAL: Michael has something. MR. MIKE MABERRY: There are some 27 different public and private agencies that have responsibilities for property above 6,000 feet elevation. The area that is being discussed for this proposed project is 18 acres which is under the University of Hawaii and the management of the Institute for Astronomy. MS. JOYCLYNN COSTA: How did they acquire that? MR. MIKE MABERRY: Executive order. It would be it was under DLNR prior to being put under the
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	 important as well. So that is one of the first things that is going to be affected, is the road. We looked at the use of significant impact on historic and cultural resources. And it was as referencing only irrevocable losses of said resources. And we thought that might be too high of a of a bar. And we thought this threshold should be lower given input from community about the traditional cultural property. We also believe that the that the cumulative impacts of the project have not been addressed regarding mitigation. And that is kind of why we are sitting here today. And that there are significant impacts to the traditional cultural property, which is what you all are talking about. So those are those are our basic comments. And that, for us, kind of defines where we need to go. So there is, basically, a road. And there's a traditional cultural property which is important to Native Hawaiians and to their practices. That is kind of the framework of what we can talk about from our point of 	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	 we are arguing. So this is kind of the framework of what we are talking about. MS. JOYCLYNN COSTA: Who has the jurisdiction of that mountain? MS. PUA AIU: Depends on where you are talking about. The Park Service has a lot of jurisdiction, the National Park Service, because it's a national park. But, yeah, the part that the yeah. MR. MIKE MABERRY: May I? MS. ANNELLE AMARAL: Michael has something. MR. MIKE MABERRY: There are some 27 different public and private agencies that have responsibilities for property above 6,000 feet elevation. The area that is being discussed for this proposed project is 18 acres which is under the University of Hawaii and the management of the Institute for Astronomy. MS. JOYCLYNN COSTA: How did they acquire that? MR. MIKE MABERRY: Executive order. It would be it was under DLNR prior to being put under the university.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	 important as well. So that is one of the first things that is going to be affected, is the road. We looked at the use of significant impact on historic and cultural resources. And it was as referencing only irrevocable losses of said resources. And we thought that might be too high of a of a bar. And we thought this threshold should be lower given input from community about the traditional cultural property. We also believe that the that the cumulative impacts of the project have not been addressed regarding mitigation. And that is kind of why we are sitting here today. And that there are significant impacts to the traditional cultural property, which is what you all are talking about. So those are those are our basic comments. And that, for us, kind of defines where we need to go. So there is, basically, a road. And there's a traditional cultural property which is important to Native Hawaiians and to their practices. That is kind of the framework of what we can talk about from our point of view. 	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	 we are arguing. So this is kind of the framework of what we are talking about. MS. JOYCLYNN COSTA: Who has the jurisdiction of that mountain? MS. PUA AIU: Depends on where you are talking about. The Park Service has a lot of jurisdiction, the National Park Service, because it's a national park. But, yeah, the part that the yeah. MR. MIKE MABERRY: May I? MS. ANNELLE AMARAL: Michael has something. MR. MIKE MABERRY: There are some 27 different public and private agencies that have responsibilities for property above 6,000 feet elevation. The area that is being discussed for this proposed project is 18 acres which is under the University of Hawaii and the management of the Institute for Astronomy. MS. JOYCLYNN COSTA: How did they acquire that? MR. MIKE MABERRY: Executive order. It would be it was under DLNR prior to being put under the university. MS. MIKAHALA HELM: Excuse me.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	 important as well. So that is one of the first things that is going to be affected, is the road. We looked at the use of significant impact on historic and cultural resources. And it was as referencing only irrevocable losses of said resources. And we thought that might be too high of a of a bar. And we thought this threshold should be lower given input from community about the traditional cultural property. We also believe that the that the cumulative impacts of the project have not been addressed regarding mitigation. And that is kind of why we are sitting here today. And that there are significant impacts to the traditional cultural property, which is what you all are talking about. So those are those are our basic comments. And that, for us, kind of defines where we need to go. So there is, basically, a road. And there's a traditional cultural property which is important to Native Hawaiians and to their practices. That is kind of the framework of what we can talk about from our point of view. 	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	 we are arguing. So this is kind of the framework of what we are talking about. MS. JOYCLYNN COSTA: Who has the jurisdiction of that mountain? MS. PUA AIU: Depends on where you are talking about. The Park Service has a lot of jurisdiction, the National Park Service, because it's a national park. But, yeah, the part that the yeah. MR. MIKE MABERRY: May I? MS. ANNELLE AMARAL: Michael has something. MR. MIKE MABERRY: There are some 27 different public and private agencies that have responsibilities for property above 6,000 feet elevation. The area that is being discussed for this proposed project is 18 acres which is under the University of Hawaii and the management of the Institute for Astronomy. MS. JOYCLYNN COSTA: How did they acquire that? MR. MIKE MABERRY: Executive order. It would be it was under DLNR prior to being put under the university. MS. MIKAHALA HELM: Excuse me. MS. ANNELLE AMARAL: Yes, Mikahala.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	 important as well. So that is one of the first things that is going to be affected, is the road. We looked at the use of significant impact on historic and cultural resources. And it was as referencing only irrevocable losses of said resources. And we thought that might be too high of a of a bar. And we thought this threshold should be lower given input from community about the traditional cultural property. We also believe that the that the cumulative impacts of the project have not been addressed regarding mitigation. And that is kind of why we are sitting here today. APPENDIX C(6): TRANSCRIPTS - SECTION 106 MEETING, UH IFA, MAIKALANI FACILITY, AUGUST 27, 2008 EVENING SESSION

1	58		60
1	matter, so is the National Park.	1	MS. NANCY McMAHON: They are a managing
2	MS. ANNELLE AMARAL: Thank you.	2	MR. MIKE MABERRY: We'll talk about that.
3	MS. JOYCLYNN COSTA: So what effect does the	3	MS. NANCY McMAHON: entity?
4	Supreme Court decision of January 31st	4	DR. CRAIG FOLTZ: It could it would be
5	MR. MIKE MABERRY: When a Native Hawaiian	5	MS. ANNELLE AMARAL: Okay. The court reporter
6	government is formed and takes over all ceded lands, then	6	has just stopped writing because
7	they will have control of this 18-acre area as well.	7	MR. MIKE MABERRY: Sorry.
8	MS. JOYCLYNN COSTA: So what effect does this	8	MS. ANNELLE AMARAL: I've counted at least
9	injunction have for now? Nothing?	9	four voices. She only wrote what I said, but all
10	MR. MIKE MABERRY: No, ma'am.	10	right.
11	MS. JOYCLYNN COSTA: No, ma'am, what?	11	What was the last question that we heard that
12	MR. MIKE MABERRY: I don't believe it as far	12	Michael was trying to answer and Craig was trying to
13	as I know you will have I would recommend talking to	13	answer?
14	the governor's office. But as far as the university with	14	MS. CLAIRE APANA: I have another one. Ask
15	regards to its day-to-day operations, it doesn't at the	15	after I've heard my answer?
16	moment.	16	MS. ANNELLE AMARAL: Okay. So
17	MS. JOYCLYNN COSTA: It doesn't what?	17	MS. CLAIRE APANA: I asked the question about
18	MR. MIKE MABERRY: I am probably the wrong	18	what is the history.
19	person to answer that.	19	MS. ANNELLE AMARAL: What is the I didn't
20	MS. PUA AIU: I believe the injunction affects	20	quite understand that question. What is the history of
21	sales.	21	the land, is that what you are asking?
22	MS. JOYCLYNN COSTA: I'm sorry?	22	MS. CLAIRE APANA: Well, I am trying to figure
23	MS. PUA AIU: I believe the injunction affects	23	out why we are not we don't seem to be communicating.
24	sales, the sale of ceded land.	24	I mean, I see people speaking and
25	MR. MIKE MABERRY: We cannot sell the property,	25	MS. PUA AIU: History of the process or history
	59		61
1	anyhow.	1	of what we are talking about?
2	MS. PUA AIU: Cannot sell the	2	MS. CLAIRE APANA: And you are looking for
3	MS. NANCY McMAHON: If DLNR were to sell the	3	something. So I just want to make a comment. And that is
4	piece to another entity	4	as far as history, the numerous times that this Federal
5	MR. MIKE MABERRY: Right.	5	Government has come in and taken over and taken things
-			and the second
6	MS. NANCY McMAHON: That is when it would	6	from the Hawaiian culture, Hawaiian people. This would be
6 7	MS. NANCY McMAHON: That is when it would have		from the Hawaiian culture, Hawaiian people. This would be one more huge time that they would be coming in, sticking
		6	from the Hawaiian culture, Hawaiian people. This would be
7	have MR. MIKE MABERRY: One of the adjacent property owners like von Tempsky property or Haleakala	6 7	from the Hawaiian culture, Hawaiian people. This would be one more huge time that they would be coming in, sticking that dagger in and just twisting it again. This would be one more time. This is not the time to be doing that.
7 8	have MR. MIKE MABERRY: One of the adjacent property owners like von Tempsky property or Haleakala MS. NANCY McMAHON: So we're holding it in	6 7 8 9 10	from the Hawaiian culture, Hawaiian people. This would be one more huge time that they would be coming in, sticking that dagger in and just twisting it again. This would be one more time. This is not the time to be doing that. This is not the time to be doing that. You have been
7 8 9	have MR. MIKE MABERRY: One of the adjacent property owners like von Tempsky property or Haleakala	6 7 8 9	from the Hawaiian culture, Hawaiian people. This would be one more huge time that they would be coming in, sticking that dagger in and just twisting it again. This would be one more time. This is not the time to be doing that. This is not the time to be doing that. You have been making your own history.
7 8 9 10	have MR. MIKE MABERRY: One of the adjacent property owners like von Tempsky property or Haleakala MS. NANCY McMAHON: So we're holding it in trust. If you can think of it, the State is holding it in trust. But they are there is no governing body that is	6 7 8 9 10	from the Hawaiian culture, Hawaiian people. This would be one more huge time that they would be coming in, sticking that dagger in and just twisting it again. This would be one more time. This is not the time to be doing that. This is not the time to be doing that. You have been making your own history. MS. ANNELLE AMARAL: Okay. When you were asking
7 8 9 10 11	have MR. MIKE MABERRY: One of the adjacent property owners like von Tempsky property or Haleakala MS. NANCY McMAHON: So we're holding it in trust. If you can think of it, the State is holding it in	6 7 8 9 10 11	from the Hawaiian culture, Hawaiian people. This would be one more huge time that they would be coming in, sticking that dagger in and just twisting it again. This would be one more time. This is not the time to be doing that. This is not the time to be doing that. You have been making your own history. MS. ANNELLE AMARAL: Okay. When you were asking that question, and with us miscommunicating, I was going
7 8 9 10 11 12	have MR. MIKE MABERRY: One of the adjacent property owners like von Tempsky property or Haleakala MS. NANCY McMAHON: So we're holding it in trust. If you can think of it, the State is holding it in trust. But they are there is no governing body that is	6 7 9 10 11 12 13 14	from the Hawaiian culture, Hawaiian people. This would be one more huge time that they would be coming in, sticking that dagger in and just twisting it again. This would be one more time. This is not the time to be doing that. This is not the time to be doing that. You have been making your own history. MS. ANNELLE AMARAL: Okay. When you were asking that question, and with us miscommunicating, I was going to say probably because we need a break. We have been at
7 8 9 10 11 12 13	have MR. MIKE MABERRY: One of the adjacent property owners like von Tempsky property or Haleakala MS. NANCY McMAHON: So we're holding it in trust. If you can think of it, the State is holding it in trust. But they are there is no governing body that is over-sighting that. And DLNR has the lease to them. MR. MIKE MABERRY: No. No, we do not have a lease.	6 7 8 9 10 11 12 13 14 15	from the Hawaiian culture, Hawaiian people. This would be one more huge time that they would be coming in, sticking that dagger in and just twisting it again. This would be one more time. This is not the time to be doing that. This is not the time to be doing that. You have been making your own history. MS. ANNELLE AMARAL: Okay. CRAIG FOLTZ: I understand. MS. LEIOHU RYDER: And it continues to be that way. DR. CRAIG FOLTZ: I understand why you would ask that question. MS. LEIOHU RYDER: Yeah. So DR. CRAIG FOLTZ: We do have centers, for example, which are not facilities of this scale, that are 	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	DR. CRAIG FOLTZ: A natural state MR. MIKE MABERRY: A natural state. DR. CRAIG FOLTZ: as defined by someone. MR. MIKE MABERRY: Right. MS. LEIOHU RYDER: Okay. This is Leiohu Ryo Then I further state that we move to remove whatever is up on that mountain as part of the agreement, all of it. MS. ANNELLE AMARAL: Say that again, Leiohu MS. LEIOHU RYDER: I said that I for the record, I want to state that we move to remove all of the activities on those 18 acres of land. DR. CRAIG FOLTZ: Just so MS. LEIOHU RYDER: Everything. DR. CRAIG FOLTZ: As a point of clarification. None of those facilities up there are currently supported by the National Science Foundation. MS. LEIOHU RYDER: Yes. But if if if AUR is going to get the lease from the State of Hawaii via the the Astronomy, then that has to come into play with

18 (Pages 66 to 69)

	70		72
1	Leiohu and correct me if I am wrong but the National	1	be responsible for constructing and operations.
2	Science Foundation can only talk about that project that	2	MS. CHARLENE DWIN VAUGHN: Okay.
3	is under their jurisdiction, they cannot speak for all the	3	MR. MIKE MABERRY: But NSF would own the
4	other projects up on the mountain. So you would have to	4	building. So NSF would be the entity that would be
5	speak to someone else about that.	5	responsible.
6	I am not sure who, but	6	DR. CRAIG FOLTZ: We put enough money in escrow
7	MS. LEIOHU RYDER: The Parks?	7	at an appropriate time.
8	MS. ANNELLE AMARAL: Okay.	8	MR. MIKE MABERRY: Yeah.
9	MS. MIKAHALA HELM: Wait a minute. I'm sorry.	9	MS. CHARLENE DWIN VAUGHN: Okay.
10	Mikahala Helm.	10	DR. CRAIG FOLTZ: And signatories to the MOA, as
11	Mike, didn't you say that it is under UH and	11	it designates for example, OHA was a signatory 50
12	your program that you lease out the land to the different	12	years pass, they say, wait, you signed up for this, take
13	entities? And so it should be in your control to know how	13	it back. And the NSF would comply.
14	long that lease is and when that could be taken back and	14	MS. ANNELLE AMARAL: I am
15	when it could be returned to its natural state.	15	MS. NANCY McMAHON: I think what I heard, and
16	MR. MIKE MABERRY: Yes, we could. We could put	16	this is a
17	terms and conditions in leases so that that would be	17	MS. ANNELLE AMARAL: Nancy.
18	that would be a requirement.	18	MS. NANCY McMAHON: This is a possible
19	Just so that you know, though, under	19	mitigation. Part of the MOA is no more projects by NSF up
20	conservation district rules right now, at the end of a	20	there for after 50, and the agreement is this project
21	project term, if you vacate the site, you must return it	21	will be taken down in 50 years. In addition, all the
22	to its natural condition.	22	other structures built up there are all to come down, too,
23	MS. MIKAHALA HELM: I'm sorry. It's puzzling	23	at the end of 50 years. Is that what I heard, correct?
24	because how is it that Reber hasn't been returned to its	24	MR. MIKE MABERRY: Within the State. Because
25	natural	25	I apologize. This is Mike.
	71		73
1	71 MR. MIKE MABERRY: Because it predated	1	73 Within Kolekole, there are other structures,
1 2		1 2	
	MR. MIKE MABERRY: Because it predated MS. MIKAHALA HELM: condition? MR. MIKE MABERRY: It's a preexisting		Within Kolekole, there are other structures, towers and facilities, that are not under the control of the Institute for Astronomy or the University of Hawaii.
2	MR. MIKE MABERRY: Because it predated MS. MIKAHALA HELM: condition?	2	Within Kolekole, there are other structures, towers and facilities, that are not under the control of the Institute for Astronomy or the University of Hawaii. MS. NANCY McMAHON: Right. But you are going to
2 3	MR. MIKE MABERRY: Because it predated MS. MIKAHALA HELM: condition? MR. MIKE MABERRY: It's a preexisting	2 3	Within Kolekole, there are other structures, towers and facilities, that are not under the control of the Institute for Astronomy or the University of Hawaii.
2 3 4	MR. MIKE MABERRY: Because it predated MS. MIKAHALA HELM: condition? MR. MIKE MABERRY: It's a preexisting non-conforming structure that is actually a historic site.	2 3 4	Within Kolekole, there are other structures, towers and facilities, that are not under the control of the Institute for Astronomy or the University of Hawaii. MS. NANCY McMAHON: Right. But you are going to
2 3 4 5	MR. MIKE MABERRY: Because it predated MS. MIKAHALA HELM: condition? MR. MIKE MABERRY: It's a preexisting non-conforming structure that is actually a historic site. CRAIG FOLTZ: That may not be acceptable. MS. NANCY McMAHON: But it's a proposal. MR. MIKE MABERRY: That is a proposal. MR. MIKE MABERRY: That is a proposal that is up there. MS. CHARLENE DWIN VAUGHN: That is what we ar talking about. MS. NANCY McMAHON: She is trying give you some
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	MR. MIKE MABERRY: Because it predated MS. MIKAHALA HELM: condition? MR. MIKE MABERRY: It's a preexisting non-conforming structure that is actually a historic site. It's actually on the registry, believe it or not. MS. MIKAHALA HELM: Uh-huh. MS. CHARLENE DWIN VAUGHN: But if we were to agree to such an arrangement, it would have to be negotiated as part of Section 106. And I guess my question then would be who would enforce this? You are talking about long-term compliance over the years. How would this be enforced? MR. MIKE MABERRY: I'm sorry. If MS. CHARLENE DWIN VAUGHN: If an arrangement was made to take properties back to their natural state MR. MIKE MABERRY: Right. MS. CHARLENE DWIN VAUGHN: as the leases expire, how would MR. MIKE MABERRY: If it's under 106, then it would be under that document. MS. CHARLENE DWIN VAUGHN: But NSF is gone, they are out of here, once this agreement we're talking	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	towers and facilities, that are not under the control of the Institute for Astronomy or the University of Hawaii. MS. NANCY McMAHON: Right. But you are going to be a signatory to the MOA, if there was one. MR. MIKE MABERRY: I have we have no again MS. NANCY McMAHON: Only to the land that you are responsible for? MR. MIKE MABERRY: Yes. MS. NANCY McMAHON: I was trying to clarify that, too. She asked that question. What is under your control is that the institute the University of Hawaii then will also have to renegotiate whatever leases everything will end, there will be no more nothing. DR. CRAIG FOLTZ: That may not be acceptable. MS. NANCY McMAHON: But it's a proposal. MR. MIKE MABERRY: That is a proposal. MS. NANCY McMAHON: It's a proposal that is up there. MS. CHARLENE DWIN VAUGHN: That is what we are talking about.

	74		76
1	MS. CAROLINE BLANCO: So if I can sort of pare	1	you that this is not just a kind of consultation. This is
2	back what I have been hearing to be sure that I understand	2	an invitation to really go into the bowels of the
3	it. Is the proposal that whenever any existing lease	3	ancestral traditions of not just Hawaii, but the
4	let's say the Air Force or whoever else is up there, when	4	indigenousness of Earth herself. And to maybe learn
5	that lease ends, it would be returned to its natural state	5	something of science from an indigenous perspective
6	with no more future developmental allowed, is that what I	6	related to the relationship of beingness with the sun.
7	was hearing, or just returned to the natural state? I am	7	DR. CRAIG FOLTZ: Thank you.
8	not sure.	8	MS. LEIOHU RYDER: So that is why I brought that
9	MS. LEIOHU RYDER: Yes. Yes.	9	up.
10	MS. CAROLINE BLANCO: I want to be sure we're	10	MS. ANNELLE AMARAL: I need, however, to come
11	all talking about the same thing.	11	back to what is being what is being discussed, what is
12	MS. LEIOHU RYDER: Yes. But the reason why I	12	being proposed. So I need a focus.
13	brought that up is because it was brought up earlier, you	13	And that is Caroline's question, is the
14	know, when we said the life of a project. That is why I	14	proposal, when all leases end, that the responsibility is
15	asked the question, do you have an example of this. And	15	to return them to the natural state beyond NSF.
16	he is saying this will be the first.	16	MS. NANCY McMAHON: I just want to answer. I
17	MR. WARREN SHIBUYA: That's right.	17	think well, it's how the question was how much
18	DR. CRAIG FOLTZ: The first astronomical	18	it's for the cultural people here, how much have they lost
19	MS. LEIOHU RYDER: Astronomical. But, see, it's	19	already. But the issue is how much do you want to do this
20	federal.	20	project and what are you willing to give up on your end.
21	DR. CRAIG FOLTZ: That is	21	So that is the proposal.
22	MS. LEIOHU RYDER: You are still attached to the	22	MS. ANNELLE AMARAL: I think, though, what I
23	Federal Government.	23	heard earlier was one of the mitigation measures that was
24	DR. CRAIG FOLTZ: But I am not the Federal	24	suggested was the 50-year time limit and then return to
25	Government.	25	the natural state. And I didn't I mean, that is on the
			77
	75		
1	MS. LEIOHU RYDER: No, you are not. But through	1	table already and being proposed. But this one is all,
2	this contract, this subcontract, this sublease, this 106,	2	all
3	this specific objective, you are all linked in a series of	3	MS. NANCY MCMAHON: All.
4	wanting to develop the sacredness of this sacred, unique	4	MS. ANNELLE AMARAL: structures.
5	one-of-a-kind consciousness of our spirituality on Maui.	5	MS. NANCY McMAHON: I heard her say all.
6	So when I when I it kind of awakens me	6	MS. ANNELLE AMARAL: Not those projects under
7	because I have experienced the desecration of Kahoolawe	7	MS. NANCY McMAHON: Everybody. MS. ANNELLE AMARAL: NSF, but those that are
8	and the the mismanagement and and we still are not	8	under the jurisdiction of University of Hawaii. Yes?
9	able, because it's not in its pristineness prior to what	9	MS. NANCY McMAHON: I think that is because
10	that land went through. There is Makua. There is Pearl	10	there are several signatories to the proposal that are
11	Harbor. And there's countless other not just	12	stakeholders, although there are a number of other owners
12	astronomical, but we are talking federal sites that the	13	up there. But the major ones that have impacted the
13	appendages, the internal organs of these sacred islands in	14	summit has been the Park Service, has been the University,
14	the Pacific Rim, the blood of many of us has been	15	has been the Air Force, has been the State. All these
15	compromised, with a capital C. And so you must understand	16	players are going to have signatures to a very important
16	that we are not we are spirituality to us is a life	17	document that, in the long-term, has a bigger role.
17	force. All things are sacred on this land. Yes, we have an astronomy facility from the	18	MS. CAROLINE BLANCO: If I can clarify, though.
18		19	The Air Force and some of the other organizations, they
19 20	University of Hawaii up there and the Star Wars and the	20	have not at all been involved in this.
		1 20	
	military and all top secret things that are putting	21	MS NANCY MCMAHON. I know
21	humanity at risk on these islands as well as the sea. All	21	MS. NANCY McMAHON: I know. MS. CAROLINE BLANCO: And the Park Service has.
21 22	humanity at risk on these islands as well as the sea. All of that, that we are not supposed to know about, but we	22	MS. CAROLINE BLANCO: And the Park Service has.
21 22 23	humanity at risk on these islands as well as the sea. All- of that, that we are not supposed to know about, but we know.	22 23	MS. CAROLINE BLANCO: And the Park Service has. And just to make sure folks understand the Park
21 22	humanity at risk on these islands as well as the sea. All of that, that we are not supposed to know about, but we	22	MS. CAROLINE BLANCO: And the Park Service has.

	70		
1	78	7	8
1	Park road. And so there is a regulation that requires a	1	Raymond and I had a discussion about this two years ago.
2	Special Use Permit for the Park to issue. And they need	2	MS. ANNELLE AMARAL: I sure.
3	to issue the permit because that is the only access up to	3	MS. JAMIE FERNANDEZ: I have a question.
4	the summit. So we're working with them now with regard to	4	MR. JEREMY WAGNER: It was a an idea about
5	how that permit would be issued and how environmental	5	mitigation, the sunset clause on a project like this.
6	compliance would be handled with that. So that is their	6	MS. OHUA MORANDO: Ohua Morando.
7	role in this.	7	I guess I want to go on record to I guess to
8	I just wanted to be sure folks knew about that.	8	say that I want to replicate what Leiohu had said about
9	MR. JEREMY WAGNER: So all the Park facilities	9	you can't mitigate spirituality. And we are looking at
10	and everything is	10	what we are going to say and how it's all going to be
11	MS. NANCY McMAHON: That could be a stipulation	11	written up. And it's going to go to all these different
12	on the MOA. That could	12	people who are not going to be from here, who come from
13	MS. CLAIRE APANA: Red Hill, right?	13	science perspective.
14	MS. NANCY McMAHON: Could we get but I think	14	And we know right now that science is the the
15	it was good this is a different direction we're going	15	route of education, because I am in education. And
16	right at this moment.	16	science is career paths towards science, to natural
17	MR. JEFF BARR: Oh, yeah.	17	resource management, to all of these careers. But what we
18	MS. PUA AIU: But, you know what	18	are finding is that the cultural component of learning
19	MS. NANCY McMAHON: And it's a big picture.	19	these so-called fields weighs more, and heavily more,
20	It's a very big picture for all of us, if we want to go	20	towards indigenous cultures here in Hawaii, our Hawaiian
21	there.	21	cultural identity. You take that away, you just got the
22	MS. PUA AIU: And I think that the science	22	books and the academics. But when you add the culture to
23	people in this room are sitting there going, well, you	23	it, it's stronger. It becomes real. It becomes part of
24	cannot do that. But, hello, I mean, these people have	24	who they are at that academic science level.
25	been sitting here for all day now saying you're asking us	25	So I want to go on record as saying, is science
	79		8
1	for a lot. So I think it's a fair thing to put on the	1	going to weigh more on deciding this through? Because our
2	table	2	cultural identity is that, is the deciding factor. And I
3	MS. CAROLINE BLANCO: I don't think that was the	3	want that to be I want that to be stated, our spiritual
4	feeling of the folks here.	4	cultural identity.
5	MR. WARREN SHIBUYA: No.	5	And we are saying no, we are saying avoidance,
6	MS. CAROLINE BLANCO: It is a big idea. We are	6	because we don't want to lose that. We don't want that to
7	open to all of them.	7	be brushed aside as unimportant. Because in our education
8	MS. NANCY McMAHON: That is a big compromise	8	programs, that is very important, that's deep.
9	from their side, from what they left it, to saying and	9	MS. ANNELLE AMARAL: So, Ohua, how, then, do y
10	it's sort of like when the bombing stopped on Kahoolawe,	10	bring in the or do you balance, then, with the cultural
11	the tradeoff, the bigger the you know, and the	11	piece here in this decision, if we are talking about the
12	healing hasn't it won't heal everything, but it will	12	end of 50 years?
13	for the people in this room, their grand kids, in 50	13	MS. OHUA MORANDO: You are talking about that's
		14	gone through, that it's passed, right?
14	vears, it might. But it is a big picture. But at least		
14 15	years, it might. But it is a big picture. But at least we're moving somewhere and I appreciate it. Thank you for	15	MS. ANNELLE AMARAL: What?
15	we're moving somewhere and I appreciate it. Thank you for	15 16	MS. ANNELLE AMAKAL: What? MS. OHUA MORANDO: You are talking mitigation.
15 16	we're moving somewhere and I appreciate it. Thank you for putting that on the table. I think that is it gives		
15 16 17	we're moving somewhere and I appreciate it. Thank you for putting that on the table. I think that is it gives everybody something to think about.	16 17	MS. OHUA MORANDO: You are talking mitigation. MS. ANNELLE AMARAL: I was following this train
15 16 17 18	we're moving somewhere and I appreciate it. Thank you for putting that on the table. I think that is it gives everybody something to think about. MS. 1	My point is if they don't understand how we	1	sum of its part.
2	feel, which is what was mentioned earlier, they don't know	2	And what you trying to do when I say it's not
З	what it is.	3	you cannot mitigate these kinds of things. So when you
4	MS. ANNELLE AMARAL: Yeah.	4	have the interaction of the sky and the Earth working
5	MS. OHUA MORANDO: They are deciding at a whole	5	together, you have the development you go and do
6	different level again, which is what Joyclynn said.	6	science now of microorganism going onto the coral,
7	MS. ANNELLE AMARAL: Yeah.	7	going onto the fishes, going onto the shellfish, going
8	MS. OHUA MORANDO: So I want to make sure that	8	onto the sea mammals, going onto the plants on Earth. And
9	that is what we are saying as as Kanaka Maoli and	9	all these things happen at night without light. Now, this
10	Native Hawaiians. That is what we are saying, is can't	10	is part of the Kumulipo, the creation chant.
11	mitigate. No.	11	When it goes on to that and still man hasn't
12	MS. ANNELLE AMARAL: Okay. So you don't agree	12	come yet. All these things have been created and man
13	with	13	still hasn't come yet.
14	MR. ED LINDSEY: I have something to say.	14	Now, when the plants, the birds and other things
15	MS. ANNELLE AMARAL: Could you identify	15	on land have been created, then guess who came after that?
16	yourself, please, sir?	16	Man.
17	MR. ED LINDSEY: My name is Ed Lindsey.	17	And all of these creations, all this creation
18	I am for avoidance at all costs. Some things	18	things are all related. And who is tied to the coral and
19	just cannot be mitigated.	19	who is tied to Earth and the sky? We are.
20	How do you mitigate your grandchild? How do you	20	So what you trying to do is say, well, we can
21	mitigate your ancestry?	21	just take this part, commoditize it and to this mental
22	It cannot be mitigated. Because you guys are	22	part and try to fix things up, but Hawaiian thinking don't
23	just talking about things, objects. Here we are we	23	go that direction. It's a holistic thing. We are
24	talking about something that goes deeper than objects. We	24	connected to everything. And it's when these things are
25	are talking about aloha.	25	destroyed and they are off balance, then we're in trouble.

You are causing a crack, a big, big crack in the ethos of the Hawaiian creation.
2 3 4 5 6 7 8 9 10 11 12 13 14	When we talk about the sky and the Earth and things, there are living, breathing entities that cannot be mitigated. Can a church be mitigated to destroy it? Cannot mitigate that. Can you go around and dig up your ancestors', your grandma, your grandpa, graves and mitigate it? Not unless if it's for the benefit of the whole, the entire community, and everybody said, well, then you have to give a little. But these kinds of things cannot be mitigated. I take you back to the Kumulipo. I don't know if you guys are aware of the Kumulipo. That is the Hawaiian chant of creation.	2 3 4 5 6 7 8 9 10 11 12 13 14	What is proposed to be done on top of Haleakala is one of the things that will cause a big puka, a hole, in the creation scene of what our our ancestors. And we represent those ancestors. There's something bigger than what the minds can think. And to say who can mitigate it, I don't I want to use strong language but I think that is baloney. You cannot mitigate these kinds of things. And when you stop toying with all the facts and you're going to do all these kind of things like that, 50 years, oh, no, we can't do that, that is all baloney. You are causing a crack, a big, big crack in the ethos of the Hawaiian creation. Now, if you think you're greater than that and
2 3 4 5 6 7 8 9 10 11 12 13 14 15	When we talk about the sky and the Earth and things, there are living, breathing entities that cannot be mitigated. Can a church be mitigated to destroy it? 1	MS. ANNELLE AMARAL: Mitigation.	1	MS. OHUA MORANDO: That was mine.
2	MS. OHUA MORANDO: Is that how you are looking	2	MS. MIKAHALA HELM: I did want to
3	at it, because you are saying no in the beginning?	3	MS. ANNELLE AMARAL: No pressure. Go ahead
4	MR. JASON JEREMIAH: Right.	4	Mikahala.
5	MS. OHUA MORANDO: And at the end, if it goes	5	MS. MIKAHALA HELM: I just want to ask a
6	through, then it's a mitigation?	6	question and then just share some mana'o.
7	MS. CHARLENE DWIN VAUGHN: That is how the	7	And my question would be just if maybe Mike
8	letter basically	8	or Craig or Charlie, someone, if you could just explain
9	MS. OHUA MORANDO: Sound and looked?	9	where the east ahu is, yeah.
10	MR. ED LINDSEY: I would say	10	And in this proposed ATST, I would like to ask,
11	MS. OHUA MORANDO: It's a no first.	11	so that everybody has a clear picture because I went up
12	MR. ED LINDSEY: we don't want anything.	12	there and visited it, and I know but how close is the
13	MS. CHARLENE DWIN VAUGHN: You don't want	13	proposed ATST would be to the east ahu, if it's in the
14	anything?	14	second site, as well as the Reber, which is not far away?
15	MR. ED LINDSEY: No, we don't.	15	Can you tell how close it would be?
16	MS. CHARLENE DWIN VAUGHN: Okay.	16	MR. MIKE MABERRY: Okay. For those of you wh
17	MS. OHUA MORANDO: I just want to make a	17	weren't in the earlier meeting, just so that you
18	comment.	18	understand, because it hadn't been discussed this evening,
19	MS. ANNELLE AMARAL: Okay. You wanted to	19	the west-facing ahu was given as an asking for forgiveness
20	MS. OHUA MORANDO: Because we're going to end	20	for not consulting in the past and for projects that were
21	soon, right?	21	built.
22	MS. ANNELLE AMARAL: 9:00, we're going to end.	22	During talks with the Billy Fields and his crew,
23	MS. OHUA MORANDO: I want to make a quick	23	who built the west-facing ahu, when we discussed the
24	comment.	24	possibility of future development based on our long-range
25	Ohua Morando.	25	development plan, they asked what what might be
	91		9
1	You know, we're talking and we're saying, okay,	1	considered. And we mentioned this project. And they
2	50 years, 50 years, 50 years. Right? Like it's just a	2	asked us to show them where it would it could possibly
3	number thrown out, as Uncle is saying. But take a look	3	be, what the preferred sites were. Well, preferred and
4	around this room. Who is going to be here 50 years?	4	the alternative site. We went to the preferred site again
5	MS. MIKAHALA HELM: Charlie, you got a pill?	5	because the alternative site is already developed. It's
6	MS. OHUA MORANDO: That is just my first thing	6	completely developed. We went to that site. They chose
7	that I wanted to say is, like, who is going to be here in	7	the spot on the far edge of the puu, of the cinder cone,
8	this room 50 years. Because I know my kids are going to	8	the far southeast edge. And they took stones from the
9	be here, my grand kids going to be here. And we are	9	proposed project area and made the ahu.
10	making decisions based on the next generations.	10	And so I will turn to Jeff Barr. And,
11	And, you know, maybe we should have the kids	11	hopefully, he can I've stalled enough to give him time
12	come in and say, "Do you want this built on Haleakala?"	12	that he has looked at it and can give us a distance.
14			MR. JEFF BARR: I don't actually have I am
	Because they are going to be the ones here. And they are	113	
13	Because they are going to be the ones here. And they are going to look at what we are doing and what we have done.	13 14	
13 14	going to look at what we are doing and what we have done.	14	Jeff Barr, the architect for the ATST project. And I
13 14 15	going to look at what we are doing and what we have done. And they are going to say, "How come you didn't do	14 15	Jeff Barr, the architect for the ATST project. And I don't actually have the exact number for you. But it's
13 14 15 16	going to look at what we are doing and what we have done. And they are going to say, "How come you didn't do anything about it," or, "why did you do that?"	14 15 16	Jeff Barr, the architect for the ATST project. And I don't actually have the exact number for you. But it's approximately from the side of the enclosure, the tall
13 14 15 16 17	going to look at what we are doing and what we have done. And they are going to say, "How come you didn't do anything about it," or, "why did you do that?" MS. JOYCLYNN COSTA: Uh-huh.	14 15 16 17	Jeff Barr, the architect for the ATST project. And I don't actually have the exact number for you. But it's approximately from the side of the enclosure, the tall structure, the south side of the tall structure that
13 14 15 16 17 18	going to look at what we are doing and what we have done. And they are going to say, "How come you didn't do anything about it," or, "why did you do that?" MS. TRANSCRIPTS – DEIS PUBLIC COMMENT MEETINGS

- (1) Cameron Center, September 27, 2006
- (2) Hannibal Tavares Community Center, September 28, 2006
- (3) Kula Community Center, September 29, 2006

Appendix D(1): Transcripts DEIS Public Comment Meeting, Cameron Center, September 27, 2006 Т

		1		1	TRANSCRIPT OF PROCEEDINGS
	1	ADVANCED TECHNOLOGY SOLAR TELESCOPE (ATST)		3	MR. FEIN: Aloha, ladies and gentlemen, my name is
	2			4	Dr. Charlie Fein, and I'm the vice-president of KC
	3	PUBLIC MEETING		5	Environmental Incorporated. KC Environmental is the
	5			6	environmental consulting company that prepared the
	6			7	environmental impact statement the draft environmental
	7			8	impact statement that many of you are either holding in your
	8			9	hands or have read.
	9		1	10	I would like to welcome you this evening, and I
	0		1	11	would like to tell you that there have been numerous other
	1	PROCEEDINGS	1	12	meetings on this project to this point. There were three
	.3	EKOGEDING		13	public meetings held in July 2005. And since that time,
1	4	Held at the Cameron Center Auditorium, Wailuku, Maui,	1	14	there have been six additional meetings on Maui. Some of
1	15	Hawaii, commencing at 7:04 p.m. on September 27, 2006.	1	15	those meetings were with smaller groups, some with larger
1	6		1	16	groups, some actually on site on the mountain and so on. So
1	7		1	17	there have been a progression of meetings concerning this
	.8		1	18	project since July of 2005.
	20		1	19	The purpose of this meeting tonight is to hear
	21		2	20	comments from the public on the draft environmental impact
	22		2	21	statement. These comments will be recorded and will become
2	23	REPORTED BY: GLORIA T. BEDIAMOL, CSR/RMR #262	2	22	part of the administrative record for the project, and all
2	24		2	23	comments will be addressed in the final environmental impact
2	25		2	24	statement, either individually or collectively, depending on
			2	25	the nature of the comment.
					IWADO COURT REPORTERS, INC.
					(808) 244-9300
1					4
		2		1	We encourage comments on the EIS. That's what
		A P P E A R A N C E S		2	we're here for. And, in fact, if you do wish to provide a
	1	RYPERRANCE 5		3	comment, you have several ways to do that. One is to sign
	3	MEETING FACILITATORS:		4	up, as many of you have, to provide oral testimony tonight.
	4	David Brass and Cheri Nashiwa, Mediation		5	We have a stenographer who will record everything that's
	5	Services of Maui		6	being said. If your comments are in Hawaiian, they will be
	6	FANEL MEMBERS PRESENT:		7	recorded and translated and will become available as part of
	7	Dr. Jeff Kuhn - Associate Director of the University of Hawaii, Institute for Astronomy		8	the administrative record on request. You can also provide
	8	(Oahu) Dr. Craig Foltz - Program Officer with the		9	a written comment, we have forms outside, or you can put it
	10	National Science Foundation, Washington, D.C.	1	10	on any piece of paper you choose to put the comment on and
	11	Dr. Charlie Fein - KC Environmental (Maui)	1	11	either drop it off at the front of the room, or you have
1	12	Jeremy Wagner - ATST Project Manager with National Solar Observatory, Tucson, Arizona	1	12	until October 23rd, the end of the comment period, public
1	13	Jeff Barr - ATST Project Architect	1	13	comment period, to provide those comments either to my
	14	Mike Maberry - Assistant Director, University of Hawaii, Institute for Astronomy (Maui)	1	14	company, the address for which is on the side table outside,
	15	Bijan Gilanshah - General counsel of the National 19:0		15	or you can provide them to the National Science Foundation,
	16 17	Science Foundation	1	16	again, the address is outside.
	18			17	If you wish to provide oral testimony but not read
	19	4		18	it yourself, you may provide that testimony and let our
	20	3		19	facilitators know, and they can read your testimony for you.
-	21			20	Now, although there are representatives of the
	22		1	21	project here, we respect the comments that we have received
	23			22	at earlier meetings, and we will not be providing
	24			23	presentations here tonight on the project. If you direct a
				24	question to us, we will respond as is appropriate.
			12	25	However, please bear in mind that the expertise of

1	more than 30 individuals went into the draft environmental	1	venues.	
2	impact statement, and it would be impractical for all of	2	As he had mentioned also, if you are not	
	those individuals to be here tonight. So there may be some	3	comfortable coming up and speaking into the microphone but	
-	questions, if there are questions, that we cannot answer	4	you have something you want to be part of the record of this	
5	tonight.	5	meeting, feel free to write it down, give it to Cheri or I,	
6	Also, the draft environmental impact statement is,	6	and we will read it into the mic for you.	
7	as it's called, a draft. And we are aware that it can	7	The purpose of the microphone and the structure	
8	contain errors, we also know that there will be differences	9	that we have imposed is to insure the court reporter, who is here, can get the information that's being given so that it	
9	of opinion about the content and the conclusions, and we	10		
10	encourage everybody to participate in the public comment	11	does get incorporated into this process.	
11	process in order to explore those.	12	So, again, we're just here to facilitate the process. We're not connected with any of the players that	
13	So, allow me to introduce the individuals that are	13	are here. We're here in the same way that we're in a	
13	here with us this evening. Craig Foltz. Craig is	14	regular mediation in the community to facilitate	
A second	representing the National Science Foundation and is the	15	communication. I will have Cheri go over the ground rules	
15	program officer for this project; Jeremy Wagner, the project manager from the National Solar Observatory; Jeff Barr, the	16	I'm sorry, we do have an agenda, and it's a very loose	
17	project architect; Professor Jeff Kuhn from the University	17	agenda. We're in the opening right now. Cheri will go over	
18	of Hawaii Institute for Astronomy; Mike Maberry, Assistant	18	the ground rules, and we'll go directly into comments from	
19	director of the Institute for Astronomy; Bijan Gilanshah,	19	the group. If you have not already signed up on the sign-up	
20	office of the general counsel of the National Science	20	sheet, we're going to be reading the names off of that and	
21	Foundation. These folks are here and available to answer	21	go in the order that people have signed up. So please sign	
22	questions about the project.	22	up on the sign-up sheet if you would like to speak.	
23	We have brought materials, but that's not what	23	We'll be taking a break at 8:00 for about five	
24	this is about. It's about your comments directly related to	24	minutes to give the court reporter a break from recording,	
25	the draft environmental impact statement which was published	25	another break at 9:00, and then we're going to wrap up at

We've provided it in either hard copy or on a CD. It's also available on the web site listed outside. The web site for the Advanced Technology Solar Telescope. With that, I'm going to introduce our facilitators for the evening. They will present the ground rules for the discussion and will then open the floor for public comments. David. MR. BRASS: My name is David Brass, and I'm a facilitator with Mediation Services of Maui. And Cheri Nashiwa and I will be facilitating the testimony tonight. Our role is to create an atmosphere where it's possible for everyone to speak their concerns in a way that allows for all voices to be heard. One of the things that we're going to be doing is, based on the number of people who signed up and our guests who are possible late arrivals, we've determined a time limit to testimony. If that is insufficient for you to speak what you need to speak, as Dr. Fein mentioned, there's the opportunity to write testimony, there's also two more meetings coming up tomorrow night and Friday night. Hopefully, there will be opportunities for you to cover the	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	MS. NASHIWA: Again, my name is Cheri. We're going to go over the ground rules now, and this is for the process of making comments. We ask that all cell phones be turned off or on silent mode because they are distracting. Of course, you need to sign up if you wish to speak, because David will be announcing the names. Also, when you do com- up to speak, the court reporter asked that you state your name before making your statement. One person speak at a time. That also is because the court reporter is recording. And if there's more than one person speaking, she basically stops recording, because she can't get both people. Speak into the microphone slowly and clearly. Use respectful language and tone, and again the time limit is four minutes with the one minute wrap-up. And what will happen is I'll be standing next to the speaker next to the microphone, I'll be timing the speaker, and when your four minutes are up, I'll flash you the yellow card that means to wrap up your comment within a minute. MR. BRASS: Do we have the sign-in sheet? I'm going to ask that you bear with me. I may mispronounce a name. That's another reason to make sure that you state your name when you get up to the mic so that the court reporter has an opportunity to capture that information.	e

And I thank you for your open hearts and minds in hearing our comments tonight. I think it's important for all of us. There's a lot at stake, and I think that coming from the big island where we have dealt with issues with Maunakea for many years, I come with a bit of a bias because I come with some experience. And so I want to share some of my concerns about this project. The first thing that we found on the big island, many of us, is that we have to begin with a pule. The pule is filled with respect, and it's remembering that the maunas	s
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	gentlemen are available. As of Friday, they are in different parts of the world. Unfortunately, the timing is such that the fair is this week, but that's another reason for having three meetings. There's no requirement in the law to have three meetings, but if an individual or a group cannot make one meeting, then we had two others to provide an opportunity for them. If you are going to the fair on all three nights, you are going to be eating a lot of food and having a good time. MR. MEDEIROS: Well, a lot of people in the community participate in the fair. They not only attend, but they have other obligations at the fair. MR. FEIN: That's one of the problems with living in a small community like this. Any time you schedule a meeting, as a member of a nonprofit, I've gone through this many times. We have had public meetings for various presenters, and it turns out to be the same night as some other big event. There's not much we can do about that.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	the testimony portion. As I said, I may mispronounce your name. Hopefully, I will get close enough that you will recognize it. Haumea Hanakahi. HAUMEA HANAKAHI: Aloha kakou, I would like to open just in recognition. (Hawaiian language was spoken) I come recently from the big island, and I've made Maui my home now. I thank all the people that are here tonight from the community as well as from across the ocean. And I thank you for your open hearts and minds in hearing our comments tonight. I think it's important for all of us. As far as mitigation, it's a real concern that the fox may be guarding the hen house once again. As on Maunakea, we had proponents coming up with a plan of how to manage the mountain. It doesn't really make sense for the fox to decide how to manage the mountain. And so by providing a cultural monitor, simply having someone of Hawaiian blood standing there watching as land is desecrated does not mitigate anything. We need to have a much more comprehensive plan that is approved by the communities and a nonbiased board.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	disrespectful to say I got a time limit. You guys should be sitting on the floor. I just wanted to talk about the environmental impact statement. As a Hawaiian, I believe that I came from the stuff that that mountain came from. That the creatures, the koa, the ohi'a, the weke'ula I came from that. When I look at that, I'm going to look at that, and I'm going to see that. You are probably missing one important species on there. That guy right there, those two guys. And I'm sure if I went and looked at other area EISs, I'm going to find the same thing. And the last thing I love science, biology, and astronomy and all of this. I love that, and that's why I believe that everything I just said is true. MR. BRASS: Foster Ampong. FOSTER AMPONG: Aloha. Good evening. My name is Foster Ampong, born and raised and presently residing on the island of Maui. Normally, I would just speak from my na'au, from my gut, because that's the way we speak the truth. But I had to write this down today. And so I've already submitted it in the comment box. So there's documentation on what I'm going to be articulating and expressing tonight. Also, I would like all of you to know that on behalf of Na

We were told over and over again, No. No. No. However, in court documents, it came out that yes, mercury was used. It's used to replace the mirror to dissolve the old one and replace it with the new. I don't have all the terminology for it, but it's used in every observatory. So what's the disposal process there? Where does this go? It used to go on Maunakea right into the ground. We also don't have a complete listing of hazardous materials. Where is the complete list? Where is the plan of where this goes? Who takes care of this? Does it go into our oceans then, our endangered reefs where we get our fish from, where we feed our children? These are concerns that need to be addressed. As far as mitigation, it's a real concern that the fox may be guarding the hen house once again. As on Maunakea, we had proponents coming up with a plan of how to manage the mountain. It doesn't really make sense for the fox to decide how to manage the mountain. And so by providing a cultural monitor, simply having someone of Hawaiian blood standing there watching as land is desecrated does not mitigate anything. We need to have a much more comprehensive plan that is approved by the communities and a nonbiased board.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	disrespectful to say I got a time limit. And I don't know how much you all are familiar with the history of Hawaii, but if you aren't, I would really suggest there's a play up at Iao theater in Wailuku, Friday, Saturday Sunday night. It's called the Queen's Story. It's Queen Liliuokalani who was overthrown illegally by the United States government. And there's a lot of injustice that's gone on here both environmental and political and there's been cultural genecide that's happened here. And I think anybody who walks into this environment without taking that seriously
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	referring to. The mind, the psychology, the body, the emotions, the soul, our spirituality. In every person upon this planet is essentially part of this delicate balance. A balance which must be maintained. I believe to achieve this balance, the psychological, emotional and spiritual concerns of the community must be seriously weighed in equally and without prejudice or bias. It seems the scientific objectives can still be met at Bear Lake or La Palma. Together with the fact that the development of the ATST facility here on top of Haleakala will only exasperate (sic) negative conditions the community presently are addressing here on Maui. No more time or money should be put into selling this proposal to the community of Maui. To imply Haleakala is the only location to achieve your objectives is misleading. It is the same as saying you need to reach Maui from California today. You insist on flying first class, but there are no but there are only coach seats available. ⁵ Would you choose not to get to your destination because you will sit nowhere else other than first class? Or, would you be willing to accept the	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	kupunas and the older people of Hawaii. Aloha aina is that's like part of the religion. That's part of the spirituality. It's love of the land, caring for the land. Captain cook classified the Hawaiian people as the world's greatest ecologists. And we have a mountain here that is revered. It's known throughout Polynesia and considered sacred throughout Polynesia from all over. This is like the Sistine chapel of the Hawaiians. And so when I look at the statement, the environmental impact statement, and it says that there's no environmental justice issues here. I question the very foundation. And I don't know how much you all are familiar with the history of Hawaii, but if you aren't, I would really suggest there's a play up at Iao theater in Wailuku, Friday, Saturday Sunday night. ADVANCED TECHNOLOGY SOLAR TELESCOPE (ATST)	
PUBLIC MEETING	

	PUBLIC	MEETI	
4	21		23
1	almost 40 years, and he worked next to the blue cube, which	1	our people came out to testify. And if you look at the DEIS
2	was a Satellight tracking facility for the U.S. military.	2	in its pendency, it lists that distribution list. And it
-	And it was pretty well known to all of us. And I worked in	3	appears that all these post cards and whatnot are mailed to
_	Silicon Valley. It was pretty well known that we were	4	all of these people, and I know who they are. However, many
5	pretty much at ground zero in the event of the hostilities	5	of the Hawaiian people are coming out because word of mouth
6	with the Soviet Union at that time. I think the intelligent	6	to these Section 106. That's why you remember that the May
7	estimates I heard about said we have redundant weapons	7	Paukukalo meeting was much larger than the March because w
8	targeted at us. And if this is a military operation up	8	had time to get the word out personally of what is happening
9	here, I'm not taking a stand for or against what you are	9	proposed to Haleakala.
0	proposing doing or for or against what is happening up there	10	My concern is this: The meetings that are held
1	right now, but I'm just saying that if that is a military	11	that are scheduled today or tomorrow or the next day, I
2	especially an offensive military type of operation up there,	12	don't know which days you are having Section 106 meetings,
3	that there's going to be nuclear weapons targeted at it, and	13	are limited to those who have submitted avoidance
4	that should be taken into account in the environmental	14	proposals not avoidance, I'm sorry. The exact opposite.
5	impact statement. Thank you very much.	15	Mitigation and minimization proposals. My concern is where
6	MR. FOLTZ: Could I make a response? My name is a	16	is the voice that you continue to hear this evening? Where
17	Craig Foltz, I'm an astronomer, and I do work with the	17	is the voice in that DEIS, besides small little sentences,
8	National Science Foundation. I'm not a solar astronomer.	18	that say the consultation occurred?
19	First of all, a question came up with respect to	19	There's stenographic recordings of all of this
20	Pan Star. This project is unrelated to this project. This	20	numerous testimony, oral testimony, which is what many of us
21	project is not designed to do any space surveillance nor is	21	do against this telescope. They want avoidance. Why do we
22	it designed to look toward potentially hazardous objects.	22	want avoidance? Because Haleakala is precious, and it is
23	And I have said this before in the past, and I'd stake my	23	an integral part of us as Hawaiians and to our culture.
24	reputation on it, that this is an academic telescope. This	24	When I read in the DEIS, page 239, no action alternative
25	is aimed at understanding the sun. That is academic. It	25	would limit solar astronomy to current technology and delay

-	22		24
1	doesn't mean it it does not have importance to us in	1	critical observation of tests, etcetera. However, the price
2	terms of our civil lives. But there is nothing about the	2	to our Hawaiian people for the impact on our culture and our
3	ATST that is in any way related to any present or future	3	personal identity would be devastating.
4	weapon system.	4	And so my concern I hope you will address
5	MR. BRASS: A reminder for people who came in	5	this is with how this whole DEIS comment period is being
6	late, if you would like to testify, there's a sign-up sheet	6	addressed, the sincerity in getting our community's input
7	on the table. We ask that you sign up so that we can assure	7	both from Section 106 for Hawaiians and non-Hawaiians alike,
8	that everyone has an opportunity to speak.	8	then I think that we need to be sure that in the
9	MIKAHALA HELM: Aloha kakou. My name is Mikahala	9	environmental impact statement that these are clearly listed
10	Helm. And I will be submitting my written testimony in	10	there. The oral testimony and everything must be listed
11	response to the DEIS prior to the by the mailing	11	there to show the depth of concern and support for avoiding
12	deadline.	12	this telescope on Haleakala.
3	This evening, I felt this was important to mention	13	In addition, I would like to also express my
4	certain things, particularly some concerns that I have. And	14	concern that this meeting I understand, Charlie, you said
15	this is about the DEIS process as well as the Section 106	15	they can only come on this particular time. But for our
		16	community, this particular evening has at least two major
	process. I have participated, I'm a consultant, Section 106	1	meetings, one is the super ferry and one is this. So from
16	process. I have participated, I'm a consultant, Section 106 consultant, and I have participated in the March and May	17	
6 7		17 18	mauka to makai we are being affected. And this is the
6 7 8	consultant, and I have participated in the March and May		mauka to makai we are being affected. And this is the

1	comfortable about the selection of Haleakala because of the	1	everything is falling down in Hawaii. It's just like that
2	importance of that mountain as well as other mountains here	2	Amazon. There's no Amazon anymore. The Amazon jungles, th
3	in the Hawaiian islands have to the people that live here.	3	new city is right here. You damaging Hawaii nei by building
4	Not only to the Hawaiians by blood but the Hawaiians at	4	more of these things. And it's not for us. We don't get
		5	the recognition that we were born to have. Yet you guys use
5	heart.	6	the Hawaiian culture every single day of my life, 56 years,
6	So for us this is something that is disconcerting.	-	
7	It's very serious. Maui is a popular place for many, many	7	that's all I've been hearing. Everybody else get the gift,
8	reasons and to many, many people. And the impact of that	8	the money. Kanakas no more nothing. But the culture, the
9	popularity is felt in many areas by those who live here.	9	spiritual and ke akua and that's all we live there for. Ke
0	There's a tremendous impact and, I guess, from my	10	akua, there's a triangle that we go by. Ke akua, ohana,
1	perspective I'm concerned about the cultural impact by those	11	aina. You understand the triangle of life in the kanaka's
2	who live here and those who have been connected to these	12	life, you ain't never going to understand us. By building
3	islands for many, many generations.	13	more of these things that is not even for us. I'm sorry,
4	So, as a member of the community, I would like to	14	but no can. I oppose. Mahalo.
5	add my two cents and say that I do, at this time, oppose the	15	MR. BRASS: Jonah Kamakahiikaika o'kalani Kapu.
6	building of any telescopes on Haleakala. Thank you very	16	This will be the last speaker before the break.
7	much.	17	JONAH KAPU: I no need the microphone. Aloha
8	MR. BRASS: Napahu (sic) Dizon? Sorry, I screwed	18	kakou. My name is Jonah Kamakahiikaika o'kalani Kapu. I'm
9	up your name.	19	the seventh generation. I'm from Lahaina. I might be on
0	NAPAHI DIZON: Aloha kakou. My name is Albert	20	the west side and this thing might be on the east side, but
1	Napahi Dizon. I'm a sixth generation. Any time that	21	I still get something for say.
2	somebody poke a hole in the aina, I cry. Every time when	22	When this environmental impact draft was started,
	they try to build, whether it's for water and now another	23	was there one kupuna, was there one kanaka with you guys wh
	telescope, it hurts me inside because I am of this land. I	24	said or who actually gave you guys one like, one brief
24		100	thing shout what you guve doing right now? Was there? I
	am a kanaka maoli. I'm born of this land. And to build	25	thing about what you guys doing right now? Was there? I

ADVANCED TECHNOLOGY SOLAR TELESCOPE (ATST)	
PUBLIC MEETING	

	ADVANCED TECHNOLOGY PUBLIC I			27, 20
	29		31	
1	mean, not anybody moved from Maui in eight years living in	1	table. If you would like us to read your testimony, feel	
2	Maui eight years ago who moved from the mainland. Not that.	2	free to see Cheri or I to read it for you or you can submit	
~	People from the aina, people from pili koko, the blood.	3	written testimony.	
	Right there, my uncle, who came on before, right	4	(Recess at 7:57 p.m.)	
5	now he is a makua. Pretty soon he might hala, and we got to	5	MR. FEIN: I'm going to I would like to start	
6	be the next generation for stand up. Because this right	6	the process again. Before we continue with the public	
7	now, what if the thing get passed? What, next two years	7	testimony, there is one response that we would like to make	e.
8	after that going have one other one coming up, one other one	8	As we did with the issue of military involvement and pan	
9	coming up just like Maunakea.	9	stars, there needs to be a clarification about mercury	
10	Come on now, why you guys no just build it on	10	because it certainly was an issue on the big island. I'm	
11	Maunakea? Get four or five of them over there. No need one.	11	going to ask project architect Jeff Barr to say a few words	
12	I no like drive around Maui looking at Haleakala and all	12	about that.	
13	you see is this big white ball. Come on now. I been on big	13	JEFF BARR: I would like to talk briefly I	
14	island, I seen Maunakea, and it's like I just like broke	14	don't want to take much of your time. There were two	
15	that. I no care about this. Why you guys like learn about	15	speakers that addressed the issue about the potential	
16	the sun for? I mean, come on now. I know the thing stay	16	hazardous material, mercury in particular. There's no	
17	affecting our environment and affecting the world a lot; but	17	mercury associated with the ATST at all. That is not an	
18	still yet, that's not you guys' responsibility.	18	issue. All the hazardous materials that are part of it,	
19	E ke akua like this happen, so be it. Maybe he's	19	it's not a long list, but all the hazardous materials, as	
20	trying for tell us that this world gotta change already,	20	EPA defines them, are included in the list in the draft EIS;	
21	because right now, now get this, we stay dealing with	21	so it is available. It specifically is about the mirror	
22	development, come on now. How much more issues we're going	22	cleaning and stripping process. The first speaker, the lady	
23	to have to fight for just so you guys finally need one slap	23	who talked about that, is absolutely right. That's where	
24	behind your head from our kupunas telling you guys to wake	24	most of the chemicals get used and all of the effluent, all	
25	up. Right now this is not pono.	25	of the wash water and the water that comes off of that that	C

1	Like what auntie said about the mercury and stuff	1	has any chemical containment at all in it will be contained	
2	like that, where is that all going to go? Maunakea, they	2	and stored and transported off the site and disposed of in a	1
3	said they get one place for go but, no, straight into the	3	proper way. It won't be disposed of on Haleakala. So	
4	mountain. Come on now. We seen you guys. We wen' fight	4	that's all I wanted to say.	
5	against with you guys already. We know how you guys play.	5	MR. BRASS: We're going to continue with people	
6	I say one thing, but then when this come, all of a sudden	6	who have signed up: I apologize if I misread your name.	
7	you guys going to go into an opposite direction. Us we keep	7	A VOICE: I would like to ask for clarification on	
8	one straight line. No wander off. We stay pono. We stay	8	that. You said contained and stored and disposed of.	
9	righteous.	9	Where?	
10	This right now, like I said, it isn't pono. What	10	MR. FEIN: All hazardous waste in this state is	
11	going happen to my keiki and the next generation coming	11	handled through a transporting storage and disposal facility	/
12	after me? What will happen to them? I mean, the aina is	12	that is licensed to handle that material. In other words,	
13	already dying. What now? Our mountains going die? The sky	13	any facility on this island or anywhere in the state that	
14	going die, the ocean. I mean, come on now.	14	produces hazardous waste is under the same requirement t	to
15	So much damned messed up things in the ocean	15	manage it and dispose of it in the federally certified	
16	killing our reefs, killing our fish. Now we gotta go Burger	16	manner that this material would be.	
17	King, Dairy Queen. That's the new monarchy, Burger King and	17	FOSTER AMPONG: I think for me I would need to	
18	Dairy Queen. That's not funny. You think I not scared? I do	18	reassured with specifics. When you say properly contained	0
19	anything for my people. I stand for this land because I die	19	and disposed of by private contractor, where exactly	
20	for this land. If I have to, I will. That's all I gotta	20	what is it contained in? Is it a 55-gallon barrel? Is this	
21	say. Mahalo.	21	going to be trucked down to Kahului, put on a barge, and	
22	MR. BRASS: We'll take a five-minute break to give	22	removed from the state? Is it going to be trucked down two	
-	the court reporter a chance to wrap. A reminder that if you	23	miles in the summit and stored I think what we want to	
24	would like to speak and you have not signed up in the	24	hear is the specific, something definitive about the	250
25	sign-in sheet, please sign up on the sheet outside on the	25	hazardous material, how it's going to be removed, and whe IWADO COURT REPORTERS, INC.	ie

1	it's going to be moved to. So to say that it's going to be	1	you up until now.
2	properly disposed of is really it doesn't leave room for	2	Sometimes very bad things can happen by mistake.
3	any assurance for us.	3	Sometimes very bad things can happen by inadvertence.
	MR. FEIN: The material will be stored in	4	Sometimes very bad things can happen because details are
5	certified containers. There are containers that are	5	looked into. And things like this can especially happen in
6	appropriate for each kind of hazardous material. Those	6	areas where we don't really understand what's happening. W
7	containers are placed in an area that has containment, so	7	don't really understand the culture, the ecology, and we
8	that any containers that were to leak would, in fact, leak	8	don't, for some reason, want to take the time to learn.
9	into the containment area and be held in that area.	9	A good example of this is, is some years ago some
0	The hazardous material that becomes hazardous	10	people from back there came and brought goats to the island
1	waste after use is stored in the certified containers. They	11	of Molokai thinking this is going to be great. We're going
2	would be taken down the mountain. It is, in fact, shipped	12	to help these people eat. But the scientists that figured
3	to Oahu. There's a facility on Oahu, Campbell Industrial	13	that out forgot one thing. Goats, by their nature,
4	Park, that manages most of the hazardous waste for the	14	procreate, and now that island is overrun with goats. The
5	state, and they are licensed to do so.	15	goats are eating all of the native habitat, and they are in
6	All of that handling must be done by people who	16	a terrible mess over there.
7	are licensed to handle it, transport it. You can't just put	17	Now, I notice in your I apologize I have a
8	it on a truck. It has to be put on a vehicle that's	18	chronic problem with my throat, and I'm not able to clear
9	certified to carry that.	19	it, but I noticed in your page 36 under cultural resources
20	FOSTER AMPONG: Is this explanatory in the DEIS?	20	you admit and acknowledge you know this. The cultural
21	Is this in writing in the environmental impact statement?	21	resources of Kolekole date back more than a thousand years
2	JEFF BARR: You are right. It says a statement	22	and are an integral part of the Hawaiian culture, both past
3	such as properly disposed of.	23	and present. In ancient times, commoners could not even
24	FOSTER AMPONG: You understand my point, that it's	24	walk on the summit because it belonged to the Gods. This
25	pretty vague.	25	was a time when people knew, maybe a lot of what you are

-	34		36
1	JEFF BARR: I understand your point.	1	trying to figure out about the stars and the heavens, they
2	FOSTER AMPONG: I can say it's the same thing,	2	figured out how to navigate without telescopes, and they
3	but I could go in the back of my yard and throw it down the	3	figured out that this was a sacred place where they
4	mountain, and then I can turn around and say, hey, I	4	shouldn't even walk.
5	properly disposed of it. It's not in my property. It	5	I want to share a life experience I had with you.
6	rolled into yours.	6	I think you'll identify with this, and I hope you'll take it
7	MR. FEIN: I appreciate that because that is	7	to heart. I hope you take your scientist hats off, I mean
8	something that was handled too generally in the DEIS and	8	no disrespect, I was a math major, when you think about
9	needs to be further explained and it will be. And your	9	this. I was talking to a Hawaiian friend mine and he was
0		10	telling me about all these cultural disrespects and so
	input		
1	FOSTER AMPONG: And please don't be offended, but	11	forth. I was there, I got on my soap box and said, You
2	for over 150 years well into 200 years, foreigners, haoles	12	gotta do this, you gotta do this. And he says, Why should I
3	have come to our island and told us, hey, we promise you	13	do anything? And I said, It's unfair. He looked at me in
4	this. We guarantee you this. And look at what is happening	14	the eyes and he said, Well, isn't that your problem, not
5	to us now? So we need some honest, sincere, definitive	15	mine? And that's what the people here are talking to you
6	explanations in the DEIS, period, before you go any further,	16	about. This is your problem to show respect for this area.
7	or just cut your losses and go to Bear Lake.	17	And to think about what is happening. Throughout history,
8	MR. FEIN: Thank you very much.	18	if somebody wanted to desecrate a culture, what would they
9	MR. BRASS: We're going to continue with	19	do? They would tear down the statues of their heroes,
0	testimony. Again, I apologize if I misread your name. The	20	they'd go into their sacred spots and desecrate them.
1	next speaker is Richard McCarty.	21	Because once you take that away, the culture is gone.
2	RICHARD McCARTY: Aloha. My name is Richard	22	They can't survive, once you take the special
	McCarty, and mahalo to everybody that came and spoke. I	23	areas away and the things that are important to a culture.
4	need to talk about this from a little different slant, and I	24	So I would ask you to please join me. This is our
5	fully respect all of the ideas that have been brought before	25	problem. We need to do this. I am embarrassed that the

I've been in this world long enough to understand. We will have to fight like Maunakea. We will have to fight. We will have to struggle. If it means civil disobedience, that's what it's going to take. And if NSF wants to put their face back in this process, go ahead. It's nothing new. The same kind of science blew up in the 1950s, same kind of mentality. Whole islands disappeared from the face of this
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	over a thousand generations kealiiwahilani (phonetic) came from the heavens above, of the heavens above, the stars above, and made it with La'ila'i (phonetic) and I descend from that geneology through the kumulipo. I am the stars. Other great kupuna: Pele, Maui, Poliahu (phonetic) had all come and lived upon Haleakala, this akua, land of the Gods. Let's talk a little bit about history. Because when I look at your culture reports it sounds like, man, some people missed some classes or courses here. There's a bunch of history that was just ignored. 1842, President Taylor recognizes the Hawaiian independence of the Hawaiian kingdom. 1843 joined by the European countries, the European powers of France and England. And so Hawaii became part of what is called a family of nations. That's part of history. 1893, we have the armed invasion of U.S. marines	6 7 8 9 10 11 12 13 14 15 16 17 18 19	much lies you can put, I don't care if you have \$180,000,000 it don't cover the truth, because our people will fight. MR. BRASS: We will provide an opportunity at the end. KALEI KAIO: Our people will fight. Let me just finish by saying this, go ahead do what you gotta do. I've been in this world long enough to understand. We will have to fight like Maunakea. We will have to fight. We will have to struggle. If it means civil disobedience, that's what it's going to take. And if NSF wants to put their face back in this process, go ahead. It's nothing new. The same kind of science blew up in the 1950s, same kind of mentality. Whole islands disappeared from the face of this earth because of science. That's your people.
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	over a thousand generations kealiiwahilani (phonetic) came from the heavens above, of the heavens above, the stars above, and made it with La'ila'i (phonetic) and I descend from that geneology through the kumulipo. I understand you've come from a long way, far away. I came from Lahaina. You've not had any meetings in Lahaina. You've ignored places on this island that have much to say about this telescope. You've been dismissive here this evening about families and communities and organizations that wait all year to raise money for their families and for their clubs and for their keiki at the fair. That tells me you don't understand. You don't	13 14 15 16 17 18 19 20 21 22	the soft cushion under our feet that the native understory affords us. We never notice the cooling sensation of soft mud that's oozing up between or toes as we pass near a gentle stream of water. We never take time for walk the forest and enjoy the playful game of the i'iwi and apapane as they battle over ownership of a certain ohi'a and koa tree. We never notice the tiny droplets that form and run down the koa tree as the thick moisture filled clouds pass through the trees. We never worked the lo'i of the kalo lehua during

I would like to represent the
2 3 4 5 6 7 8 9 10 11 12 13	very young person to accompany my mother on many trips as she visited the kupuna of our villages. And I remember as a child of about six years old going with my mother to speak to a kupuna. And, of course, she only spoke in Hawaiian to her, and so I was not privileged to understand most of it. But she did relate to me later that this kupuna who died at 106 in the 1950s was a chanter for some of our Kamehameha alii. She spoke to my mother about many things. And when things were kapu, things were of sacredness, she would not pass on that information to my mother. And those things included where alii were buried and so forth. We were taught by our kupuna to respect our aina,	2 3 4 5 6 7 8 9 10 11 12 13	I would say that even if it was, you would not know that or you would not be an authority to disclose that information. So we cannot believe that as being absolutely true. So what I say is respect the voices of the Hawaiian people, our ancestors and our aumakua, and I join with the rest of them as I say that I oppose this project. Mahalo. MR. BRASS: Verna Nahulu. VERNA NAHULU: My name is Verna Kaiulani Nahulu. I'm a school teacher, retired elementary school teacher, and I would like to present a different perspective than has been stated here tonight. I would like to represent the children. There are so many things that we don't know

	PUBLIC	MEETI	
	53		55
1	here today.	1	(Recess at 8:57 p.m.)
2	For instance, many of us do not know that the sun	2	MR. BRASS: One last chance, if you would like to
2	has a 27-day rotation system. And why don't we know it?	3	sign up to speak, and then Cheri and I will figure out how
	Because we were never told. There is the powerful	4	many minutes each of the speakers who signed up will have.
5	gravitational force of the sun that we never knew because we	5	We have four people who five people who have
6	were never told. We were held to our past and to our	6	signed up to speak. Anyone else who would like to speak for
7	grandparents' past. I would like to see us let go to the	7	the first time or again? We have about 40 minutes left
8	children of today and tomorrow and to be able to learn even	8	before we need to start wrapping things up. So we're going
9	more. We have solar technology today that is giving us the	9	to give each person about eight minutes to speak, and we
10	power we need, giving us inventions that we need. I would	10	appreciate your cooperation with the time limits. It's the
11	like to see the children move forward, and I personally	11	only way we can figure out to give an equal chance for
12	consider the ATST a blessing and a gift to Maui and to our	12	people to speak.
13	country.	13	The first speaker is Kapali Keahi.
14	I know that there are resistances to this, and I	14	KAPALI KEAHI: I wanted to speak last, but that's
15	respect everything that has been spoken tonight. But there	15	okay. That's everybody. Anyway, aloha kakou to the ohana
16	are even more to be said, and there is the children to	16	over here and the kupunas from this area aloha no. My name
17	consider. The children have the future, and we are not part	17	is Kapali Keahi, I'm from Lahaina. I never read the EIS,
18	of their future. The children's future belongs to them and	18	but I no really read EIS. To tell you the truth, like, what
19	their children. And I would like to see the ATST as an	19	I know is, like, we always confronted with developments that
20	opportunity for them to learn about the sun that all of us	20	is really not in our best interest and not in our favor. So
21	have no idea about yet. But the children can take that	21	we always shoot 'em down from the get go. And mainly we
22	information and soar with it.	22	like see things happen the way we want it to happen. And
23		23	right now, it's not a good time for you guys. It's never
23	I am a native Hawaiian, and this is my mana'o.	23	going be. As long as that flag is waving, it's never going
	There are no children here to speak for their future. And	24	be one good time for you guys. And we can say this now in
25	this is why I am here. I am here to speak for their future.	23

1	frankly, just you guys should just go back to where you come	1	understand that.
2	from and stay there. Thank you. Aloha everybody. Aloha.	2	So tonight, when the meeting is concluded, you
2	MR. BRASS: Kamaile Kekahua.	3	will know 99 percent of the people that spoke out tonight
N	KAMAILE KEKAHUA: Aloha. I wanted to be the first	4	are against the ATST being built on Haleakala. And that
5	one to speak but that's okay. I thought I wen' sign up	5	should weigh very heavily on your next on the final EIS
6	first. Are you familiar with Pele?	6	draft. That's number one.
7	MR. FOLTZ: To some extent.	7	The other thing I wanted to share with you is that
8	KAMILE KEKAHUA: To the extent as in she's a deity	8	you heard many people speak tonight, the young, the opio,
9	of the volcano on the island of Hawaii. Well, this is	9	you heard our makua Kaio, Mr. Kanamu. You heard them say ua
10	actually a sharp rebuke to what was mentioned before. And	10	mau ke ea o ka aina i ka pono, the life of our land is
11	for the life of me first of all, I have to say that I'm	11	perpetuated in righteousness. But understand for us kanaka
12	going to speak for those children that are not here.	12	maoli, it goes a lot deeper than just those words. The
13	Because (Hawaiian language spoken). I am a child of this	13	those words were spoken back in 1845 when Admiral Thomas from the British government had to return the government and
14	land of my ancestors and I'm also a child of my predecessors.	14	
16	I mentioned Pele because for the life of me I	16	the authority and the sovereignty sovereignty of the Hawaiian kingdom to Kaukeuli (phonetic) and forgive my
17	cannot understand how it is that Pele is for education in a	17	frankness, some idiot before him invaded the kingdom
18	way where she would allow and want for a structure that is	18	unlawfully. And as Kalekoa had stated, and he progressively
19	15 stories tall to be built right on top of what exactly she	19	and accurately explained to you chronologically how the
20	is.	20	Hawaiian kingdom, my ancestors, were recognized throughout
21	Earlier, I was talking to Keahi, and we were	21	the world as an independent sovereign state completely. And
22	talking about something else, and he was saying, Well, it's	22	he also mentioned and articulated for you that today, the
23	not like they are Gods. And, you know what, a lot of times	23	State of Hawaii, who claims to have title by way of that
24	scientists that have come to Hawaii have tried to play	24	executive order in 1960 to have title to that land doesn't
25	exactly that role as a god, to dictate the ways that we do	25	have it completely. I'm sure, if you, being an attorney, a

1	things instead of learning exactly from that ancient wisdom	1	man of law, would research the facts you would discover
2	that was here prior to any kind of impact to Hawaii.	2	this. Granted the State of Hawaii of would never admit
3	Scientists have brought their foreign concepts	3	this, right now as we have in the past and we are currently
4	here, some have worked, a lot hasn't. However, that does	4	and we will be in the future, we kanaka maoli will stand up
5	not mean that some would be a 15 or 14-story tall building	5	and fight for our rights, for our land, for our identity.
6	right on top of Haleakala. And the question is: Who is it	6	To sum it up, what all these people were
7	for? As it was earlier mentioned, is it for us? Because it	7	expressing to you so eloquently, even though you heard many
8	is not for us. It is not for the Hawaiian people. It is	8	of them with their passion and some of them had eha, and
9	not for the Hawaiian people of different ethnicities. We're	9	rightfully so, the ill feelings because of the injustices
10	Hawaiian, but I'm Hawaiian something else, something else,	10	and atrocities that were committed to our kupunas. And that
11	something else. I come from many backgrounds. However, we	11	was passed on from generation to generation up until now.
12	speak from our Hawaiian core, because this is where we are	12	Even as we speak, these crimes are still being committed.
13	from. And I just have to end too with saying I resist, I	13	You had cultural genecide and spiritual genecide and future
14	resist for my generation, I resist for my son's generation,	14	genecide. The theft of our identity. Not only our land,
15	and I resist as a keiki.	15	but imagine a whole race of people suffering the Stockholm
16	MR. BRASS: Foster Ampong.	16	Syndrome right now. A clinical condition, and you probably
17	FOSTER AMPONG: Aloha again. I felt compelled and	17	recognize this made famous, the Patty Hearst case back in
18	very important for me to get on the record and, excuse me,	18	the '70s, a whole people suffering the Stockholm Syndrome
19	the sister before me made the please I know this is going	19	thinking that the only way we would survive from today's
20	to sound anal and technical, but this is the kind of thing	20	world is to agree and cooperate with our captors.
21	that I do. For the record, so you hear it verbally from me,	21	On one hand, I can speak and articulate myself on
22	those opposing the ATST tonight who have already spoken up	22	one level. Right now, I'm giving you everything from my
1	until me, have been 15 against it. There was only one	23	na'au. Need to take heed of what has been said and spoken
1			
24	person that supported the construction. And I feel very	24	tonight. Even for the young men who showed their feelings,
24 25	person that supported the construction. And I feel very strongly and deeply that it's important that all of you	24 25	that's passion. Yes, they are angry; yes, they are hurt.
	person that supported the construction. And I feel very		

	PUBLIC	MEETI	NG	_
	61		63	
	1 But don't discount them. They are speaking from their	1	the keiki Bob. It's something that is thought out in the	
	2 heart, from their soul. Kalekoa very educated man, well	2	Hawaiian culture. Not to make light of things, but my point	
	respected. He spoke from his na'au. That's his soul.	3	is that in our culture things are done purposefully. Any	
N	Now, we want you to speak to us, okay? And I got	4	way, that's my short mana'o.	
	5 to tell you this in all honesty and fairness. You guys	5	One thing that I gathered in all of these meetings	
	6 screwed up the way you guys arranged and scheduled this	6	that I have been to, is I seen the power that is needed for	
	7 meeting completely. And, for the record, let's not mince	7	the air force telescope. The power production that's needed	
	8 words, let's cut to the chase. You guys screwed up. In the	8	is massive. Estimated ten percent of Maui's electricity to	
	9 future, talk to the people from Maui. Don't be afraid to go	9	run that one. This one is way bigger. Way bigger. Much	
	0 out to the rest of the community to listen to what they	10	bigger. That makes me a little nervous because, yes, we do	
1		11	have the windmills but my mana'o on that is that's a	
	2 say. Go back to Paukukalo, go to kula, go to Haiku, go to	12	sustainable type of energy. So I have a little bit of a	
1	3 Hana, go to Lahaina, go to Kihei. Come to Olowalu where I	13	different spinoff on that. But what we're looking at is a	
	4 live. Only get maybe ten or 20 people, but I guarantee you	14	structure here that the power production of it, and don't	
	5 we all show up.	15	get me wrong, in the air force I worked avionics. I know	
	6 Listen to the people. Take the effort. Be	16	what is power. I worked on big aircrafts that needed a lot	
	7 sincere. Don't schedule meetings like you have on this	17	of power. Our national guard has a new C-17, the latest and	
	8 I understand you had some challenges, but I'm pretty sure	18	the greatest aircraft in the world. And, believe me, that	
	9 you all can overcome that. So I will end with that. And,	19	jet has power. So that's a concern for me.	
	20 again, don't build this thing on Haleakala. Go to the other	20	The other thing is, I just came from the north	
2		21	western Hawaiian island meeting and what kills me is to	
	2 earlier mentioned. Thank you.	22	compare it to the Haleakala meeting that I was there last	
	MR. BRASS: I apologize for not being able to say	23	night. The bottom line is all of these people are trying to	
	4 this. The last name is Kamakawiwaole.	24	do something to save things, something now. It's a reactive	
2	5 KAHO'OKIPA'OLU'OLU KAMAKAWIWAOLE: Aloha kakou.	25	situation now, because all of them know from the start the

This afternoon I had a luncheon with the Maui high-tech park and discussing the air force facilities up there. Just a little bit of background, obviously I'm born and raise, maybe not obviously to everybody, but I'm born and raised in Hawaii, retired air force 20 years. So I have seen at least 20 countries in my lifetime. And in my own fantasy way, I would like to believe that in all of my travels, I liken myself to Kawika Kalakaua, because he went out and he got educated by being with other people of different cultures. So I just wanted to share my mana'o of where I'm coming from. I have seen other countries and other cultures. I have been living with people of different cultures. The virtue of my name Kaho'okipa'olu'olu, means to welcome and comfort, a keeper of comfort. And that's important to me as a Hawaiian because, one, I believe my kupuna had given me that name. It's something that's selected to us as a culture. Names are not just name 	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	destruction that has happened. And I'm not saying that it's because of all outsiders. A lot of it may have had to do with us. Maybe as Hawaiians we need to be more educated and better educated to take care of our own aina. I say that because, like I said, I've been around the world and I know get choke guys smarter than me. But I also realize, especially come from the north western Hawaiian monument. All of a sudden everybody is like, whoa, we gotta save Hawaii. And for those of you who don't know, the north western Hawaiian island that's 140,000 square miles we gotta save. That's a big place from Las Vegas to Dallas. They made that comparison. So why are we going to do something my mana'o is, why we going build this thing and then years from now we're going to say, you know, we gotta save Haleakala. Now the president gotta go make a monument for something to happen? I'm very opposed to this building for that reason. I understand the technology. Believe me. I worked in advanced avionics, fiberoptics, what have you. I worked on the U-2 spy planes. So I know about technology, and I appreciate technology. I truly do. But this is just wrong. And you talk about the keikis and stuff, yeah. That's exactly what we're here for. It's for the keikis. And I	d
1 1 1 1 1 1 1 1 1 1 2 2 2	 My name is Kaho'okipa'olu'olu Kamakawiwaole. And I just wanted to share a little perspective because actually I'd rather talk to you guys. I had a busy day these past couple of days, actually yesterday. Just to give you a short brief, I just came from the north western Hawaiian island monument meeting. Last night I was at the Haleakala meeting upcountry, and here I am here rushing over here. This afternoon I had a luncheon with the Maui high-tech park and discussing the air force facilities up there. Just a little bit of background, obviously I'm born and raise, maybe not obviously to everybody, but I'm born and raised in Hawaii, retired air force 20 years. So I have seen at least 20 countries in my lifetime. And in my own fantasy way, I would like to believe that in all of my travels, I liken myself to Kawika Kalakaua, because he went out and he got educated by being with other people of different cultures. So I just wanted to share my mana'o of where I'm coming from. I have seen other countries and other cultures. I have been living with people of different cultures. The virtue of my name Kaho'okipa'olu'olu, means to welcome and comfort, a keeper of comfort. And that's important to me as a Hawaiian because, one, I believe my kupuna had given me that name. It's something that's 	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	destruction that has happened. And I'm not saying that it's because of all outsiders. A lot of it may have had to do with us. Maybe as Hawaiians we need to be more educated and better educated to take care of our own aina. I say that because, like I said, I've been around the world and I know get choke guys smarter than me. But I also realize, especially come from the north western Hawaiian monument. All of a sudden everybody is like, whoa, we gotta save Hawaii. And for those of you who don't know, the north western Hawaiian island that's 140,000 square miles we gotta save. That's a big place from Las Vegas to Dallas. They made that comparison. So why are we going to do something my mana'o is, why we going build this thing and then years from now we're going to say, you know, we gotta save Haleakala. Now the president gotta go make a monument for something to happen? I'm very opposed to this building for that reason. I understand the technology. Believe me. So that would be the primary metal that will be contained and transported off the mountain and disposed of properly. Again, we need to define that better. But I don't think mercury is used in the stripping process, at least not in the cleaning and stripping. Mercury has been used in the past for telescopes for bearings and, in some cases, for the mirror itself. And none of that is intended to be used for ATST. So I don't believe mercury is. And, again, I might be ill-informed on this, but I don't think I'm an architect. I'm not an expert on the subject. But from what I understand, what we have put into the EIS, and there was another point made that we would say one thing and do another thing, that's not true. What we say in the EIS we really are bound to do. And the chemicals that we know of that are hazardous are listed, and we've described in detail how we intend to treat	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	like a thousandth of the diameter of a human hair. You sense that and you correct the mirror. As Dr. Kuhn said, the actuators are on the back. This is not new technology it's modern technology. This is not advanced technology. But this is technology that's well worked out. The mirror support system are clean. They are clean in a sense of producing very little waste, and the mirror stripping is an issue that needs to be dealt with. It is dealt with it's dealt with on telescopes around the world. I'm not saying there have not been problems in the past, but the regulations are tight, and we will describe them more clearly. I hope that helps. A VOICE: Being familiar with the stripping process, is there still mercury involved in that? MR. FOLTZ: No. We (inaudible) it's much more difficult to contain the fluids when you are in the telescope. We do not use mercury salts. The surface is aluminum. As Jeff said, typically you use a dilute acid,
23456789012345678901	JEFF BARR: The chemicals that are the first place what they are stripping off the mirror will be aluminum. 1	telescope will not. We would not make the decision to build	1	telescope that I was the director of was a six and a half
2	such a design.	2	meter telescope, a nighttime telescope.
1	A VOICE: Do you know if the air force	3	A VOICE: This is four meters?
N.	MR. FOLTZ: I don't know anything about the	4	MR. FOLTZ: This is four meters.
5	telescope. I defer to Jeff. No. According to that.	5	A VOICE: You are looking at the sun, right, so
6	A VOICE: But on Maunakea they have it?	6	four meters is big in diameter. So is this telescope going
7	MR. FOLTZ: I'm not an expert on the telescope on	7	to be used to capture or absorb the sun?
8	Maunakea. I have used it, but I'm not an expert on their	8	MR. FOLTZ: Would you like me to explain why it
9	design. So I would be remiss if I said absolutely not. You	9	has to be that size?
10	probably know better than that I. But this is a new	10	A VOICE: No, no, no. For the point I'm getting
11	telescope. Mercury is a hot button element. Say mercury,	11	at is it's okay. You telling me it's four meters that's
12	don't put that in the design. It's like we're not going	12	fine. But I'm kind of looking at it where you are looking
13	don't do that. It's stupid.	13	at the sun, you want to build this telescope to study the
14	A VOICE: You understand our concern because we	14	sun, but then I'm not a scientist
15	were told over and over again that there was no mercury	15	MR. FOLTZ: I understand.
16	being used, and then we found out in the documents it was	16	A VOICE: But the sun has a lot of power. So
17	not only used but it had leached into the ground.	17	looking at it through a magnifying lens is one thing, but
18	MR. FOLTZ: I understand that, and I don't know	18	what it's telling me also is that you could also capture the
19	that in detail, and I'm not in any way disputing what you	19	power and that lens could be used as well to do that.
20	are saying, nor am I trying to soft petal your concern. You	20	MR. FOLTZ: You could make this telescope I'm
21	have every right to be concerned. And all I could say is	21	not being disrespectful. You could make it a solar hot
22	where the spill I pledge to you, if you personally want	22	A VOICE: That's my point. Now I can get to the
23	to go up and inventory the chemicals, and I'm still working	23	point in question that I have. Will this facility or any
24	for NSF, if someone in this room wants to go see whether	24	other facility that you may build in the future be used to
25	there are weapon systems in that building, I'll make sure	25	capture or harness the sun's power?

1	A VOICE: I really appreciate your candor and your	1	care of me. And that's where I am today. I want to share
2	honesty. Thank you. So I'm not going to apologize for my	2	this other one. Manukani is a pu'u right below the
3	candor.	3	observatory. I wonder why Hawaiians call it manukani.
4	MR. FOLTZ: I don't expect one.	4	Manukani.
5	A VOICE: It still does not give me the confidence	5	So I went camping up there by myself. This was in
6	or the reassurance that an accident could be unavoidable.	6	1997 when I wrote this one. And I asked akua, why manukani?
7	And with your explanation that you lost a colleague and a	7	I took my guitar up there all of these are songs I
8	friend and that there are telescopes throughout the world	8	took my guitar up there and I sat there and camped up in the
9	and there have been accidents. With all due respect to your	9	mountains, and I asked akua why manukani? The sun went
10	president, when you say that you guys are being honest and	10	down, the moon came up, the moon went and gone, the sun cam
11	truthful, Bush said the same thing. We know, hello, that	11	back out and still no answer.
12	guy lied through his teeth.	12	In search of the meaning, I found myself on top of
13	My point is this: Right now, technically, I have	13	the pu'u manukani. All alone I sat and waited. The reward
14	not heard any factual or confident assurances that this will	14	for waiting was the sound of a thousand birds singing,
15	be safe for the general public. And I have	15	chirping, and screeching. Only there were no birds and no
16	MR. BRASS: Can I interrupt you so that we can	16	trees. The Hawaiians call it manukani. Manu is the bird,
17	give this one gentleman who signed up a chance to speak?	17	kani is the sound. On top of the pu'u o manukani, looking
18	A VOICE: Okay. Let me conclude by this. I'm not	18	out into the sea on top of the pu'u o manukani the birds
19	confident. Even more so, I'm even more scared and more	19	began to sing to me. At first I'm siting all alone. It
20	opposed now than I was two hours ago when I walked in. And	20	feels like there's nobody home. The Kona winds come from
	I don't want nobody hurt. So the safety factor is extremely	21	the sea, the clouds are all surrounding me. I feel the
21		22	chill run through my bones. It seems to say, I'm not alone.
	Important.		And as the clouds fly over me, I hear the sound of manukani.
	important. MR. FOLTZ: I understand. I don't expect you to	23	And as the clouds hy over the, i hear the sound of manukani.
22	MR. FOLTZ: I understand. I don't expect you to	23	I hear the birds of manukani. The Hawaiians call it
24	MR. FOLTZ: I understand. I don't expect you to trust me.		I hear the birds of manukani. The Hawaiians call it
22	MR. FOLTZ: I understand. I don't expect you to	24	

 1 the sea, on top of the pu'u o manukani a makiki screeches 2 from the tree, the l'iwi sings to me, the chirping apapane in the trees. Oh, yeah. One more please. While everybody 5 thinks it's funny to say with a laugh of the town will keep 6 on laughing, yes keep on laughing, you're going to take us 7 all down. Humpty dumpty sat on a wall, humpty dumpty had a 8 great big fall. For all the soldiers on the land and all of 9 the sailors on the seashore and all of the fighters in the 10 sky, tell me is there going to be war? Is there going to be 11 war? Humpty dumpty sat on a wall, humpty dumpty had a great 12 big fall. 13 Kahoolawe, Kahakuloa, Kaneohe, Nilhau, Pearl 14 Harbor, Diamond Head, Bello's Field and Kahuku, Schofield 15 Barracks, Moanalua, Barber's Point and Makua, Wheeler Field, 16 Punchbowl, Mokuleia, Haleakala. House of the sun or house 17 of star wars. Do you want any more? We cannot give you any 18 more? Is there going to be war? Humpty dumpty sat on the 19 wall, humpty dumpty dua great big fall. It's time for 20 action to stop the faction. The desecration of our land. 	ed printed at were hatever e mation nto the there's d is you look stimony
 2 from the tree, the i'iwi sings to me, the chirping apapane in the trees. 3 A VOICE: Will all of this that's been record this evening be in the public record? Meaning, that is in the EIS in addition to the Section 106 meetings the on laughing, yes keep on laughing, you're going to take us 7 all down. Humpty dumpty sat on a wall, humpty dumpty had a great big fall. For all the soldiers on the land and all of 9 the sailors on the seashore and all of the fighters in the 10 sky, tell me is there going to be war? Is there going to be war? Humpty dumpty sat on a wall, humpty dumpty had a great big fall. 13 Kahoolawe, Kahakuloa, Kaneohe, Niihau, Pearl 14 Harbor, Diamond Head, Bello's Field and Kahuku, Schofield 15 Barracks, Moanalua, Barber's Point and Makua, Wheeler Field, 16 Punchbowl, Mokuleia, Haleakala. 1	A VOICE: It goes into the public record	1	said that, I mean that should make a difference whether
2	(inaudible)	2	National Science Foundation makes a decision on funding this
	BIJAN GILANSHAH: by people and all comments	3	project or not.
_	have to be addressed and arranged and similar comments	4	BIJAN GILANSHAH: That's a good point. When I
5	(inaudible).	5	seen it in other documents, often you will see several
6	A VOICE: This is confusing. It's not a direct	6	commenters say X. That's a typical EIS document. Several
7	answer.	7	many, dah, dah, dah. Let me look at that and see why that is
8	MR. WAGNER: I think there's confusion about the	8	standard practice and see what we can do to assess the
9	difference between a transcript which is translating and	9	differences. But it is standard practice, and I don't know
10	codifying everything that's said and taking the comments	10	how it developed or but it's vague
11	then and putting them in the document. I mean, the comments	11	A VOICE: Don't you think it's fair to take the
12	about we're concerned about mercury goes into the document.	12	transcript, a letter, as a group.
13	All of the words that are said go into the transcript. Does	13	BIJAN GILANSHAH: I'll look at that too. The
14	that make sense?	14	interesting thing is bury (inaudible) bury stuff. The EPA
15	A VOICE: No, that doesn't make sense right now.	15	says, don't do that. I want you to insert it into the actual
16	I feel completely confused, and I'm pretty well educated.	16	text of the document versus just throwing it 300 pages to
17	A VOICE: So everything tonight gets transcribed?	17	people. It may or may not read page 272.
18	Is this verbatim when it comes out? Is this verbatim?	18	MR. BRASS: We need to wrap up. We need to be ou
19	THE COURT REPORTER: As much as I can. As much as	19	of here.
20	I can.	20	A VOICE: Who is in charge of selecting the script
21	A VOICE: You stated that you, not you but the	21	that goes in if it's not verbatim? And is that a neutral
22	other gentleman, stated that in the final EIS, what is said	22	person, or is that a person, a proponent of the project?
23	here doesn't all get put into the EIS.	23	How does that work?
24	BIJAN GILANSHAH: you are saying the verbatim	24	BIJAN GILANSHAH: It's an agency
25	transcript. I will double check and make sure that doesn't	25	A VOICE: There's no control on the selective

1 DR. FEIN: Good evening and aloha, ladies and gentlemen. My name is Dr. Charlie Fein. I am the 2 vice president of KC Environmental Incorporated. KC 3 Environmental was the preparer of the Draft 4 5 Environmental Impact Statement that we are discussing this evening. I'm going to make some б 7 brief remarks to begin with and then we'll proceed 8 with the public comment part of the program.

9 There have been quite a few meetings on the 10 Advanced Technology Solar Telescope already, public meetings. If you did read the Draft Environmental 11 Impact Statement, Chapter or Section 5 describes 12 13 nine previous meetings, three beginning in July 2005 and other informal and formal meetings that have 14 15 been held since. These other meetings occurred with various organizations, groups, individuals, on Maui 16 at various times throughout the last 15 months. And 17 as I said, these are all documented in Section 5 of 18 the DEIS. 19

20 So tonight the purpose of this meeting is 21 specifically to hear comments from the public on the 22 Draft Environmental Impact Statement for the 23 Advanced Technology Solar Telescope. Those comments 24 will be recorded and become part of the 25 administrative record for this project and

ultimately all comments will be addressed

individually or collectively in the final

3 Environmental Impact Statement.

1

2

4 If you wish to comment, there are several ways 5 to do so. If you wish to provide vocal testimony 6 this evening, we ask that you sign up and provide 7 your name so that you will be called upon in turn to 8 give that testimony.

9 You can also provide written comments. We have 10 comment forms at the front of the room. If you wish to comment on those forms, you write whatever you 11 12 choose to write and put it in the drop-off box. You 13 also have until October 23rd to provide written comments on the document, the end of the comment 14 15 period. And there is one more meeting tomorrow 16 evening at the same time at the Kula Community 17 Center and if you wish to attend and provide 18 comments there, you're welcome to do so.

19Although there are representatives of the20project here, we respect the comments that we've21received from earlier meetings and we are not22providing presentations this evening. If you direct23your question to any of us, we will respond as24appropriate. However, bear in mind that this25document was prepared in part by more than 30

IWADO COURT REPORTERS, INC.

individuals. They could not all be here this
 evening for practical reasons and so there may be
 questions that come up that we cannot answer. We
 will, however, ultimately answer all the questions
 you have.

6 The EIS is a draft. We're aware that it can 7 contain errors. We also know that there will be 8 differences of opinion about the content and the 9 conclusions. And that's why we encourage everybody 10 to participate in the public comment process.

With that, allow me to introduce the 11 12 individuals who are here this evening. Craig Foltz, 13 representing the National Science Foundation, is the 14 program officer for the project. Jeremy Wagner, 15 project manager from the National Solar Observatory. 16 Jeff Barr, the project architect. Dr. Jeff Kuhn, Associate Director of the University of Hawaii 17 Institute for Astronomy. Mike Maberry, the 18 assistant director for IFA here on Maui. And Bijan 19 Gillanshah, Office of the General Counsel of NSL. 20 21 All of these individuals are here to listen to the 22 comments tonight.

Our primary purpose tonight is to hear your
comments on the Draft Environmental Impact
Statement. With that, I'm going to turn the process

IWADO COURT REPORTERS, INC.

1 over to our mediators who will explain -- or

2 facilitators, I'm sorry, who will explain the ground 3 rules for this evening. David.

DAVID BRASS: Good evening. My name is David 4 Brass and this is Cheri Nashiwa. We're both 5 facilitators with Mediation Services of Maui. And б we are not here as mediators. Mediators work with 7 8 parties to help then come up with their own 9 resolution to a conflict. We're here to provide --10 hopefully to provide a safe, respectful environment that allows everyone to state their comments 11 12 regarding the draft environmental impact. We're not 13 affiliated with any of the parties in this. We're simply here to create a process that allows everyone 14 15 to speak.

In order to ensure that everyone who wants to speak has an opportunity to speak, we are going to be working with time limits on the speech. So if you have more to say than can be said within the time constraints, please take advantage of the other meeting tomorrow night and also take advantage of the opportunities for written comments.

23 What I'm going to do now is I'm going to turn 24 the mike over to Cheri -- I'm sorry, I always forget 25 about this part. We have an agenda. It's a simple

IWADO COURT REPORTERS, INC.

1agenda. We're in this part right now, opening and2ground rules. We're going to take a break at 8:003and a break at 9:00. Part of the reason for those4breaks is that we have a court reporter here who is5recording all of the proceeds of the meeting and she6needs a break. So we'll take a five-minute break at78:00 and 9:00.

Those are opportunities, if you haven't already 8 9 signed up to speak, for you to go ahead and sign up. 10 After the 9:00 break, we'll collect all the remaining sign-up sheets and that's what we'll work 11 12 with to call your names and have you come up and 13 submit your comments. So if you haven't signed up to speak and you would like to speak, please go back 14 15 and sign up on one of the sheets. They will bring 16 then up to us and we'll continue to call names.

We do have to close at 9:50 because the county requires that we be out of here at 10:00, which means we need to clean up the whole room or the people who set it up need to clean up the whole room by 10:00.

22 CHERI NASHIWA: So here are the ground rules 23 that we will be enforcing tonight. Turn off all 24 cell phones or put it on silent just because they're 25 distracting. Again, sign up to speak. One person

IWADO COURT REPORTERS, INC.

speak at a time. And that is again for the court reporter, she can't type two people talking at one time. Speak into the microphone, again for the court reporter, slowly and clearly. Use respectful language and tone. And time limit is four minutes with a one-minute wrap up.

7 What's going to happen is you'll be using this 8 microphone to speak into. At the one-minute wrap up 9 -- after your four minutes, I will come and stand 10 next to you and show you the yellow card which means 11 to wrap it up and you have one minute to wrap up. 12 That's just for fairness for everyone who wants to 13 speak tonight.

14 So if we're ready, David will be announcing the 15 names of the people who signed up. Again, state 16 your name when you're at the microphone.

17 DAVID BRASS: It's important that you state 18 your name clearly at the beginning. I will do my 19 best to read names. I'm not particularly good at 20 handwritings, so I may mispronounce your name and I 21 apologize in advance for that.

22 Our first person to speak tonight is Mary23 Evanson.

24 MARY EVANSON: Thank you very much for this25 opportunity to speak. My name is Mary Evanson. And

IWADO COURT REPORTERS, INC.

I didn't bring my glasses, so I hope I can read this.

Although I was born and raised on Oahu, I came
to Maui often when I was a child. And Maui was
always No Ka Oi, the very best.

6 I have always loved Haleakala and am very 7 protective of it. There is only one Haleakala on 8 this planet and it is a very beautiful and spiritual 9 place for many people and it must be protected 10 forever.

I understand why Haleakala was chosen for this 11 12 ATST project and I understand why the university 13 wants it bad, the prestige that it would bring to the university. But what is the cost to our small 14 15 island and what is the cost to future generations? 16 This project is so huge, it will change Haleakala 17 forever. Please, find another place for this 18 project.

19I am deeply troubled by the Draft EIS. This20document has many errors and it is printed and21distributed to many individuals, to libraries, and22is on the internet. A document like this should be23checked and double checked and checked once again24before it is posted on the internet. People from25all over the world now can check in and learn all

IWADO COURT REPORTERS, INC.

kinds of erroneous things about this project, about
 Haleakala.

I really expected more from this document that
has the National Science Foundation logo on the
cover.

I just want to bring up a few of the mistakes б or errors that I found in it. This an error that I 7 brought to the preparer of the documents' a while 8 9 ago. This is a map. It has Haleakala Highway going 10 through Science City. I brought it to their attention and their response was oh, this came from 11 the Maui County website. Therefore it must be 12 13 right. I don't think so. The fact that he knew 14 this was wrong and copied it again. Do two wrongs 15 make a right? No. It may be manini, but it is an 16 error that should have been corrected.

The other error that I found -- I don't know 17 how many times, I lost track of how many times 18 Haleakala Crater Road is mentioned. And I also 19 20 mentioned this to the preparer sometime ago. There 21 is no Haleakala Crater Road anymore. There used to 22 be. But several years ago the Maui Fire Department felt, for safety concern, Haleakala Highway should 23 24 extend from Hana Highway all the way up to the top of the mountain, and therefore Haleakala Crater Road 25

IWADO COURT REPORTERS, INC.

1 is no more.

2 There is mentioned a couple of times ko'a. 3 Ko'a is a shrine that one finds down on the 4 shoreline. They're saying there is a ko'a up on the 5 top of the mountain? I don't think so. I asked two 6 archeologists about this and they confirmed that no, 7 probably not. There is some coral up there, but it 8 has nothing to do with a shoreline.

9 Also, they have the west and east ahu that were 10 constructed up there. In some places of the Draft EIS it says they were constructed and others they 11 12 were reconstructed, that they were -- this is just a 13 little example of the errors that I found in the document. There may be others. I hope not, but I 14 15 do not feel comfortable with the document. Thank 16 you.

DAVID BRASS: There is I believe a collection
box for written testimony on the table, so if you
would like to leave your full testimony there, I
would encourage you to do so.

21 The next speaker is Penrod Vladika.

22 PENROD VLADIKA: Good evening and thank you for 23 this opportunity to speak to everybody here. I'm 24 vice principal at Kalama Intermediate School. This 25 is my twenty-first year as an educator in public

schools. I have a degree in geology and a minor in
 mathematics, master's in education.

3 Last year I formed an astronomy club at Kalama 4 Intermediate School and have been very active with 5 the Haleakala Amateur Astronomers. Rob Ratkowski is 6 here to represent that group. And also with the 7 Institute For Astronomy, several astronomers that 8 have been collaborating with our school and our 9 students.

10I'm real excited about this. The kids are real11excited about this. We had our first star party12last Saturday. And I was hoping to show a couple13slides of that. Obviously I'm in favor of the14telescope and the construction of this very15important instrument.

16 I'm in favor of the Pan-STARRS of course also.
17 And our students are going to be working with the
18 astronomers and these two instruments in the future
19 when they're finished with their construction.

20 So, a picture is worth a thousand words. I 21 brought a few pictures to show you of some images 22 that some of our students have been -- well, I made 23 my main point.

Anyway, I purchased a solar telescope myself and I do a lot of solar imaging and it's been a lot

IWADO COURT REPORTERS, INC.

1 of fun for me and I just wanted to share that with students. So I bring my solar telephone up to 2 Kalama. I take it up to the summit for the best 3 imaging because that's where the best imaging is. I 4 compare notes with other solar amateur astronomers 5 from around the world and the imaging from up at the б summit is just suburb. It's just obviously the best 7 8 place in the world to do this. And what's so much 9 fun about that is setting it up there and seeing all 10 the people come from around the world to ask to look and see and to experience the joy of discovery. And 11 12 that's what it's all about for me is to have this 13 opportunity for children to learn and to discover.

And one of the projects we're really interested in is with the Pan-STARRS is to find some of these earth-crossing asteroids that have hit the earth in the past and had a tremendous impact on life on earth in the past and we now know that the possibility of that event happening again is very real, that's why Pan-STARRS was built.

And our students are going to be involved in a workshop with the IFA here in October to learn how to use different imaging packages and software to analyze asteroids and be able to determine their orbits. So these are middle school students --

IWADO COURT REPORTERS, INC.

APPENDIX D(2): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, PUKALANI COMMUNITY CENTER, SEPTEMBER 28, 2006

1 sixth, seventh, and eighth grade students. That's just real exciting for me because my passion is 2 astronomy also. I taught astronomy for six years to 3 gifted students in eighth grade in Texas and that 4 was just an enormously enriching experience for me 5 and I think for the kids, too. What else can I say б 7 here? I just -- I have one minute? I'm sorry you 8 can't see the images.

9 I think again I can be here later if anybody 10 wants to see these. We had about 40 students and 11 parents come up last Saturday night and look through 12 a variety of telescopes and got to see things that 13 they had never seen before.

14One of my first impressions that got me15involved in astronomy was going to up to Los Angeles16and looking through the 12-inch size refractor that17they had their images of the moon looking at live18viewing of the moon. That first got my interest.19And then going up to Mt. Palomar in San Diego area20and looking at the enormous observatories there.

I see there is a unification of science and the mountain also. It's called the House of the Sun. You know, to me it's an addition, it's unifying in a way and it's very spiritual also to me as just an average citizen. Thank you.

IWADO COURT REPORTERS, INC.

1 DAVID BRASS: A reminder that if you would like to speak tonight, there are sign-up sheets back in 2 the back of the room. Please sign up if you would 3 like to speak. 4 Our next speaker is Marilyn Parris. 5 MARILYN PARRIS: Aloha. I'm Marilyn H. б 7 Parris, superintendent of Haleakala National Park. And we are the adjacent neighbor to the 8 9 observatories. 10 Established in 1916, Haleakala National Park houses the last and best opportunity to preserve for 11 12 all times a maturing Hawaiian volcanic landscape 13 which has nurtured and sustained unique biotic ecosystems and a rich cultural heritage. 14 15 The park's purpose as established by law is to 16 preserve the scenic character and associated 17 Hawaiian culture, while simultaneously providing educational, inspirational, and recreational 18 opportunities compatible with preserving the natural 19 20 and cultural resources and values within the park. The significance of the park mission and purpose I 21 think is validated by our current visitation which 22 is at 1.7 million a year and our visitation is 23 24 growing. 25 Haleakala National Park represents a highly

IWADO COURT REPORTERS, INC.

diverse volcanic, geological and biological habitat
ranging from over 10,000 feet to sea level. It
contains the relatively few intact remnants of a
unique and disappearing Hawaiian biota found nowhere
else in the world and for which has been designated
as part of the world biosphere reserve system.

Haleakala National Park includes over 24,000
acres of remote and pristine designated wilderness,
acclaimed for its beauty, serenity, and tranquility
where visitors can temporarily escape from civilized
society. It contains abundant archeological and
historical remains of the pre-European contact
Hawaiian civilization.

Haleakala National Park is Maui's number one
tourist destination and an integral part of the
tourist-based island economy.

17 The National Park Service's primary mission at Haleakala National Park is to ensure these resources 18 and values remain authentically represented and 19 20 available for the enjoyment of all peoples in 21 perpetuity. The preservation of Haleakala nurtures 22 the mind, body and spirit of these islands, her unique environment, and her many peoples. 23 It is the National Park Service's contention 24 that this Draft EIS falls far short in adequately 25

IWADO COURT REPORTERS, INC.

evaluating the numerous cumulative impacts to our resources, our visitor experiences, and our overall park operations with the construction of this ATST. Therefore, the National Park Service must strongly oppose the construction of this facility adjacent to our boundary based on the information presented within this Draft EIS.

8 We will be submitting more detailed 9 documentations of these omissions, shortfalls, and 10 our concerns to the National Science Foundation. 11 Thank you.

DAVID BRASS: Before I call the next person, I neglected to mention that we have a representative from the Maui News here who is recording to assist her in make an accurate report of this meeting. If you would prefer not to be audio recorded, just let her know and she'll turn off her recorder.

18 The next person is Frank Skowronski.

19 FRANK SKOWRONSKI: My name is Frank Skowronski.
20 I'm the principal in a very modest tech firm on
21 Maui, licensed to practice in the state since 1978.
22 I will leave the spiritual implications to Haleakala
23 to my others and try to concentrate on the
24 architecture and structure of the building.
25 I have a couple questions from the people or to

IWADO COURT REPORTERS, INC.

1 the people who prepared this statement. And one of them is that is there some location in the EIS that 2 does a comparison of the size and scope and scale of 3 the projected improvement as compared to other 4 existing structures on the island of Maui? Is this 5 buried in the EIS or have I overlooked it? б 7 SPEAKER: No, we don't have a comparison. FRANK Skowronski: In lieu of that, may I offer 8 9 some observations about the size and scale of the 10 proposed construction. The Maui Medical Group is a well known building 11 12 in Wailuku. It's on Main Street and High. It's 13 seven stories tall. It's 68 feet high. It's about a 6,000 square foot footprint. As I read your 14 15 Environmental Impact Statement, you're proposing to 16 build a structure that is over twice that size, both in its height and in its footprint. Is that a 17 correct characterization? 18 SPEAKER: Yes. 19 20 FRANK Skowronski: The Maui County office 21 building, which is on High Street just a half a block away from the previous building, is an 22 eight-story structure that's 104 feet tall. It has 23 24 a footprint of approximately 10,000 square feet -- a little over 10,000 square feet. And the proposed 25

IWADO COURT REPORTERS, INC.

APPENDIX D(2): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, PUKALANI COMMUNITY CENTER, SEPTEMBER 28, 2006

1 construction that you're asking for on Haleakala is going to be another four stories taller than that? 2 SPEAKER: Approximately 40 feet higher. 3 FRANK Skowronski: Approximately the same 4 footprint. Okay. The other structures on Maui that 5 compare to this -- the Maui Marriott on the б 7 Kaanapali coast is 136 feet tall. This building is proposed at 143 feet tall. The Alii Towers on the 8 9 Kaanapali coast is approximately 142 feet high, 10 11 stories. The new proposed Maui Hyatt Vacation Club is proposed at 12 stories, 144 feet high. 11 12 Okay. As constructed and as the island exists now, 13 your proposed construction on Haleakala is going to be the tallest building that's ever been constructed 14 15 on this island. Not the tallest structure -- there 16 are towers, there is the windmills, there is a 17 couple of other events that have been constructed that are taller, but as far as a mass is concerned, 18 as far as a structure is concerned, this is going to 19 be the tallest structure ever built in the county. 20 21 Is that a fair characterization? Am I missing any 22 of the buildings? Okay.

The County of Maui Building Code allows only a
12-story structure. So if you were to build this
structure any place other than federally owned land,

IWADO COURT REPORTERS, INC.

APPENDIX D(2): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, PUKALANI COMMUNITY CENTER, SEPTEMBER 28, 2006

1 you would not be able to get a building permit because you would be too high. But you don't have 2 to get a building permit to build on this site. Is 3 that true? 4 SPEAKER: That is correct. 5 FRANK Skowronski: So there will be no county, б 7 state, or federal reviews of the construction drawings of this proposed construction. 8 9 SPEAKER: That is incorrect. 10 FRANK Skowronski: Okay. Which -- who --SPEAKER: The State of Hawaii requires all 11 construction plans to be submitted with a 12 13 conservation district use application. Those plans, blue lines, and all of the construction details 14 15 including the construction plan will be reviewed 16 carefully by the state and become part of the 17 application process. FRANK Skowronski: But not a building permit. 18 You will not be applying for a building permit. 19 20 SPEAKER: That's correct. A county building 21 permit is not required. 22 FRANK Skowronski: On the Appendix G, there is a reference to a soil placement area. Can you 23 24 explain what the soil placement area is on the top of -- in the course of this construction? 25

IWADO COURT REPORTERS, INC.

1 SPEAKER: Yes. I actually have some graphics I could show you, and it's in the EIS, in the Draft 2 EIS, showing the locations where -- I can just 3 verbally describe it might be --4 FRANK Skowronski: Well, it makes reference to 5 4,000 cubic yards of cut rock and fill that you will б 7 be moving around on the top of the mountain. 8 SPEAKER: Maybe I should use a microphone. I 9 would like to actually address some of this stuff 10 because -- not cutting into your time. But yes, right, in order to place the building, we have to 11 create a platform. And at the primary site, that's 12 13 going to take about 2,500 cubic yards of removed material. And it won't be removed off the top of 14 15 the mountain. Because of cultural reasons, it has 16 to be placed there on the mountain. So there are other areas we've identified where the soil removed 17 will be placed. Of course, as you know, there will 18 be additional excavation for foundation and that 19 20 soil also will stay on the mountain and also be 21 placed in one of -- we've identified two locations. FRANK Skowronski: As I understand the soils 22

23 report and the proposed construction, the
24 construction is a double sleeve construction in
25 which you have an 84-foot diameter concrete mat that

IWADO COURT REPORTERS, INC.

APPENDIX D(2): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, PUKALANI COMMUNITY CENTER, SEPTEMBER 28, 2006

- houses the telescope, and then wrapped around there
 is another foundation that sleeves over to hold the
 enclosure.
- 4 SPEAKER: Right.

5 FRANK Skowronski: Now, that perimeter footing 6 is being held up by 123-foot diameter caissons that 7 go 21 feet into the top of the soil.

8 SPEAKER: You've got it just about exactly 9 right except for the fact that the caissons will 10 also be under the mat foundation for the pier as 11 well. There is a total of 21 caissons and the 12 average length on those is 16 feet. I think 21 feet 13 was --

14 FRANK Skowronski: So is the excavation of the 15 footings and the caissons that are going to be 16 replaced on top of the mountain in the effect as if 17 it's a pu'u?

SPEAKER: One of the soil placement areas --18 and this is not something we invented out of whole 19 20 thought -- came out of the scoping meetings. One of 21 the soil placement areas is what's now referred to as the Reber Circle site and it previously was a 22 pu'u or a hill there. And in order to restore that 23 24 hill and to actually do some restoration as part of the project, that was suggested to us by Kapuna 25

IWADO COURT REPORTERS, INC.

APPENDIX D(2): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, PUKALANI COMMUNITY CENTER, SEPTEMBER 28, 2006

Maxwell that that would be an appropriate placement
 of the soil and would actually do some beneficial
 reconstruction.

DAVID BRASS: Actually, to be fair to everyone
else, could you guys talk later? Get those
questions answered later.

7 FRANK Skowronski: The idea here is that you're building a 14-story building that you 8 9 couldn't possibly build anyplace else on the island 10 aand you're going 21 feet into the soil to hold it up. And you're building something that is the 11 12 largest structure -- tallest structure that's ever 13 been built on the island and you're putting it on the highest elevation and the highest parcel that is 14 15 buildable on the island at the highest wind force and this construction warrants an EIS of no 16 significant impact? Is that the essential 17 implication of the Draft EIS? 18 DAVID BRASS: Mr. Skowronski, I'm sorry, there 19 20 is more people signed up. 21 FRANK Skowronski: I'm sorry. Thank you. DAVID BRASS: The next speaker is Verna Nahulu. 22 VERNA NAHULU: My name is Verna Nahulu. I'm a 23 24 retired elementary schoolteacher and I live in Keokea, Maui. I really -- I'm coming here to 25

IWADO COURT REPORTERS, INC.

represent the children. And I feel that we are criticizing the outside of a structure as if we had a Stradivarious lying inside of a case and we are criticizing the case when the real value, the real value is inside. And I feel that ATST is a Stradivarious. It has so much value for the children who should be allowed to own their future.

8 And as a native Hawaiian, I see that there is 9 so much that we were not allowed to learn because in 10 our time our grandparents kept us tied in with their 11 past and we were not allowed to go forward into our 12 own future.

13 For example, the sun has a 27-day rotation 14 period and we never knew this, although we studied the sun and skys, we never knew this. And why? 15 16 Because certain information is not allowed to the 17 children because the children are being held to the 18 past traditions, et cetera. And I am here to say that it is time for us to allow our children a 19 20 forward look at the education that can come from the 21 ATST. So much is being offered, so much to learn, to discover, and I don't want the children to be 22 23 held back.

I've written a book for children under six tolearn physics. I think the children have to begin

IWADO COURT REPORTERS, INC.

learning from the very beginning and my book introduces the language of physics as well as the excitement of measurement. And I'm just not -- I'm in favor of the ATST, obviously, because I don't think our children have the opportunity for higher learning here, especially the very young children, so much as is kept from us.

8 Gravitational force of the sun, we were never 9 informed of that. And why? Because it is not part 10 of our grandparents' past. And so much is held away from us. And my whole presence here is to ask that 11 12 the children be allowed the education that comes 13 from such a structure, from within the structure, and not be held back any more. And very young 14 15 children need to begin very early. There is solar 16 technology, everything about solar technology is 17 going on. This is a solar telescope that our children can learn and discover and should be 18 allowed the freedom of education. Thank you very 19 20 much.

21 SPEAKER: At this point we're going to take a 22 5-minute break to give people an opportunity to sign 23 up to speak. So if you would like to speak, I would 24 encourage you to go back and sign up on one of the 25 sign-up sheets.

IWADO COURT REPORTERS, INC.

- 1Reminder that there will be another meeting2tomorrow evening at the Kula Community Center at37:00 and that you may also submit written testimony4until October 23rd. Take a 5-minute break now and5please sign up if you would like to speak.
- 6 (Brief recess.)

7 DAVID BRASS: At this point no one else has 8 signed up to speak, so what I would like to do is 9 give you one last opportunity to sign up to speak. 10 And if no one wants to speak, then the meeting will be over for this evening. One last opportunity to 11 go up and sign up on the sign-up sheet to speak if 12 13 you would like to speak tonight. Otherwise, we'll conclude this meeting. 14

15 A VOICE: Some people are not coming until 16 later because it's until 10:00, so they're doing the 17 fair. So, I mean, because it's set for 7:00 to 18 10:00, I don't think it's fair to close it up. 19 DAVID BRASS: Why don't we take a longer break

20 then and wait. And when we've got at least five
21 people signed up on the sheet, I will call the
22 meeting back together.

23 (Brief recess.)

24 DAVID BRASS: In case anyone came in after we 25 went over the ground rules, we ask that you turn off

IWADO COURT REPORTERS, INC.

1 your cell phone so there are no interruptions. We ask that you sign up to speak. We do ask you to 2 speak one at a time because the court reporter can 3 only record one voice at a time. So if two people 4 are speaking, she'll miss something. We do ask that 5 you speak into the microphone slowly and clearly so б 7 the court reporter can capture what you're saying. 8 It's helpful if you say your name at the beginning 9 so that she has that as part of the information. 10 Please use respectful language and respectful tone in your comments. And there is a time limit of four 11 12 minutes and then we'll -- Cheri will give you a 13 reminder of one minute to wrap up your comments. If you have more extensive comments that you would like 14 15 to make, there is another opportunity to speak tomorrow night up at the Kula Community Center. 16 There is also the possibility up until October 23rd 17 to submit written testimony. So I believe the forms 18 are on the back table for written testimony or you 19 20 can simply write it yourself.

21 Richard Lucas.

22 RICHARD LUCAS: Thank you. My name is Richard 23 Lucas. I live in Haiku. This is such an exciting 24 proposal here. You guys are going to be up at the 25 top of Haleakala in this 14-story building. You're

IWADO COURT REPORTERS, INC.

1 going to be watching the sun all day long, learning from the sun, finding all of these great new 2 discoveries, and yet during your shift when you go 3 down to the bathroom and you wash your hands and you 4 turn on the hot water, it's being generated from 5 burning fossil fuels down from Haleakala because you б 7 can't even put a single solar panel up here like we 8 do in our houses so we're not burning up as much as 9 of this carbon in your one little facility.

10 This is your picture here. Thanks for bringing this. This is a picture of all the clutter on the 11 top of Haleakala. This is what it looks like. Wait 12 13 a minute. This is your facility here, so let's just take that out for a second. You see all these other 14 15 buildings and all of this other activity that's going on up there. Okay. 500 KVA is the power load 16 of all of these facilities. Now, ignore all the 17 other facilities. Look at your one little facility. 18 670 KVA. You're using one and a third times more 19 20 power than all of the other facilities on this 21 mountain top.

And where is that power coming from? Well, you're expecting Maui Electric to generate it for you. And where does Maui Electric get their fuel? They import more oil. We all know what oil has

IWADO COURT REPORTERS, INC.

gotten us into. They are going to import more oil
 to give you guys the electricity to exceed the power
 requirements of the entire top of this mountain.

My question for you is a real simple one. What 4 is there in your proposal that's going to offset the 5 amount of carbon that Maui Electric is putting into б the air that we breathe and our kids breathe and our 7 grandchildren breathe here on this island? What are 8 9 you going to do in terms of carbon credits? Are you 10 going to plant trees? Are you going to pay others to plant trees? How are you going to offset all of 11 12 this additional pollution that you're putting into 13 our air so that you can run your air conditioners up here on the top of Haleakala? 14

15 SPEAKER: Would you like a response?

16 RICHARD LUCAS: Yes, that's why I asked the 17 question.

SPEAKER: The National Solar Observatory intends to close two observatories, one in Arizona and one in New Mexico, and so the net will be reduction.

22 RICHARD LUCAS: And how much of a reduction? 23 SPEAKER: I can get those numbers and we can 24 address that. But that is our intent is to take 25 those two operating facilities and close them and

IWADO COURT REPORTERS, INC.

1 then operate ATST.

2	RICHARD LUCAS: Okay. And so if there remains
3	a balance, do you have any proposal for offsetting
4	with carbon credits or other actions to offset the
5	amount of carbon that's going to be produced into
6	the atmosphere to power your facility here or power
7	the difference between your facility here and the
8	two facilities you're closing?

9 SPEAKER: I'm not sure I follow. I'm not sure 10 I follow the --

11 RICHARD LUCAS: If you close two facilities and 12 they amount to 50 percent of the power requirements 13 of this new facility that you're building, are there 14 any proposed actions to offset the carbon production 15 for that 50 percent differential? And if not, are 16 you willing to at least consider that and look into 17 that possibility?

SPEAKER: Yes, we are willing to consider that. 18 I would like to ask Jeff, though, to speak to your 19 specific -- first of all, I wanted to make one 20 21 correction when you held up the picture. You put your hand over -- you put your hand over the 22 23 Pan-STARRS telescope. That's actually a photograph of the facility as it is now. The solar telescope 24 25 is not on that rendering.

IWADO COURT REPORTERS, INC.

- 1 RICHARD LUCAS: Okay.

2	SPEAKER: But a minor error. The solar
3	telescope is considerably bigger and does have
4	significant energy needs because of the cooling
5	requirements.
6	We've looked briefly at the possibility of
7	using photovoltaics and Jeff Barr may want to
8	comment on that.
9	JEFF BARR: We have I fully admit there is
10	something a little counterintuitive to have Advanced
11	Technology Solar Telescope that has a higher than
12	average power requirement and not take advantage of
13	solar generated power.
14	We looked into that and we actually had a study
15	that MECO sponsored, Maui Electric Company
16	sponsored, on what logical and efficient ways for us
17	to reduce our power consumption overall, our peak as
18	well as our sort of overall average use. And they
19	suggested a lot of alternative technologies and they
20	looked at the possibility of using solar power. And
21	in fact, you can see here on the side this refers to
22	approximately the kind of panels that were available
23	as a kind of off the shelf.
24	I mean, we really even though we're a solar

25 observatory, studying solar physics, we don't have

IWADO COURT REPORTERS, INC.

1 any kind of access to any advanced kind of solar panels that as you say you wouldn't use on your own 2 house. So basically we have the kind of off the 3 shelf technology and showing what it would take --4 the other thing that I have shown here on this 5 picture is they're dark. This is a picture of some б 7 solar panels installed on the roof on a hangar in 8 Pearl City and this is typical. As most everybody 9 knows who's seen them, solar panels, photovoltaics, 10 are dark in color. For the same reason we can't paint the building itself a dark color like the 11 mountain rock, we can't cover it with these dark 12 13 panels without doing more harm than good, requiring 14 more cooling than the panels would actually provide 15 themselves in terms of what it would do to the 16 temperature of the air around the telescope.

17 So we're stuck with the idea of then putting 18 them in site areas around and maybe taking advantage of the roof of the utility building and some of the 19 other areas. This is 2,000 photovoltaic panels 20 21 which were the same type referred to in the MECO 22 study, about 14 feet each, providing 155 watts each, based on a fairly efficient type of panel. This 23 24 amount of site space -- and I've taken some liberties here. I made this up. This isn't 25

IWADO COURT REPORTERS, INC.

1 something MECO generated. If I extrapolate what they have, how much area would I have to cover in 2 order to generate enough power to make a significant 3 difference in terms of the power needed for ATST, 4 which as you state is a significant number. And you 5 had it just about right that 670 kilowatts of power, б 7 I can -- what's shown here would generate about half 8 of that. This would provide something like 9 330 kilowatts. So we would be halfway to our peak 10 requirement by covering virtually every area, every site area and getting pretty darn close to the 11 12 petrel burrows and some of the other environmentally 13 sensitive areas around -- archeological sites and a lot of other kinds of spaces that it would be 14 15 insensitive of us to probably put solar panels in 16 all these places that I've shown here and it would 17 require an entirely new EIS, really, because we would be expanding our footprint by something like 18 three or four times, as you can see. 19

20 So the bottom line is that as counterintuitive 21 as it is, a solar panel is not really an efficient 22 energy savings alternative for the project and this 23 was clearly stated in the MECO study and confirmed 24 by our own investigation into the subject. And as I 25 say, we may end up doing something, we might do a

IWADO COURT REPORTERS, INC.

APPENDIX D(2): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, PUKALANI COMMUNITY CENTER, SEPTEMBER 28, 2006

kind of a demonstration project of some kind, but
 it's a kind of a nonstarter as a rule.

RICHARD LUCAS: The MECO study as I see this 3 dealt with whether or not you could accomplish 4 energy savings. In other words, save money as 5 opposed to dealing with the issue that I raised and б 7 that is offsetting the carbon that's being produced 8 by burning fossil fuels to power up your facility. 9 I mean, obviously this just creates a bigger problem 10 by taking up more space up there.

SPEAKER: Yes. One of the problems with the 11 solar cell technology is that when you do a 12 13 calculation like that, you're ignoring the energy that was used to fabricate the solar cells, which is 14 15 substantial. And when you take the energy that was 16 used to fabricate the cells, add it in and compare it with the energy that's generated by the cells, 17 there is a loss of 15 percent. 18

19RICHARD LUCAS: I understand that. My question20wasn't directed to covering the whole site with21solar cells. My question was directed to carbon22dumping and carbon credits to offset the power usage23that's generated by your site.24So I mean you've answered my question, which

25 was is it something you'll look into. I would

IWADO COURT REPORTERS, INC.

1	appreciate to see, you know, after you look into it,
2	what your conclusions are.
3	SPEAKER: This could be included in the final
4	EIS and we certainly appreciate it.
5	RICHARD LUCAS: I appreciate that. Thank you
6	very much.
7	DAVID BRASS: Next speaker is Suzanne Burns.
8	SUZANNE BURNS: This has been a real eye opener
9	for me. I've never been to anything like this
10	except for the first meeting that we had. You
11	remember that one, Jim.
12	SPEAKER: Yes, I do. Thank you.
13	Suzanne BURNS: I've been told I've said things
14	that have touched people at that meeting. I don't
15	intend to just touch people. So I'm going to try
16	again.
17	I went up to the top of Haleakala this summer
18	and I worked at EOS. Now just after the meeting, I
19	found out I was going to be at EOS and I was really
20	torn up this whole summer even when I was up there.
21	I mean, throughout the time I was up there.
22	I don't know if you guys know this, but when
23	you go on sacred ground, if you are a woman and it's
24	not one of the three good weeks of the month, then
25	you don't go. Well, I was up at you know what I

IWADO COURT REPORTERS, INC.

1 mean. We'll leave it. If you work for two months straight, there is going to be some breaking of that 2 rule, as a woman. I broke that rule. I needed to 3 use the bathroom while I was up there, so I broke a 4 couple more rules. Things you just don't do on 5 sacred land. б 7 I talked to one of my kupuna. It was really 8 hard for me to continue on the path doing my project 9 just knowing how much my Hawaiian friends and 10 relatives felt against it. I didn't realize how special Haleakala was 11 12 until I went there. There was a couple scientists 13 in this room that taught me that as well. So here's something I wrote after my experience 14 15 and I hope it does something more than just touch

16 you.

I am Hawaiian and this is my home. I would
like to welcome you to my home if you behave as you
would like any guest in your home.

20 When I come to your home, I will try to learn 21 your ways and to keep harmony. When something is 22 meant for me, I will only take enough for me and my 23 family. I will not diminish your natural resources 24 or supplies for profit. I will not take what is not 25 mine to take.

IWADO COURT REPORTERS, INC.

APPENDIX D(2): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, PUKALANI COMMUNITY CENTER, SEPTEMBER 28, 2006

When I come to your home, I will treat your 1 things with respect. I will not desecrate your 2 3 sacred objects, alters and cemeteries. I will not trespass where I am not welcome. 4 When you show me your hideaways, I will keep 5 then as our secret so your grandchildren can enjoy б 7 then. 8 I will protect your natural resources by 9 cleaning up after myself. I will be careful not to 10 bring things that don't belong in your mountains, valleys, streams, and oceans. I will be careful not 11 12 to disturb nature's sometimes delicate structure. I 13 will not justify any cause to be great enough to disrespect your cultural rights or rights as a human 14 15 being. 16 I hope we can share and learn from each other. 17 I hope we can respect each other despite our religions and despite what we believe. 18 I am a student of MCC. I am a neo budding 19 scientist. I think I'm shooting myself in the foot 20 21 here, you know, cutting some possibilities, but 22 that's okay because there is always science, you can go to the second site, you can make it -- push 23 24 yourself beyond the limits that you have today and 25 make it better.

IWADO COURT REPORTERS, INC.

1 You can have lots of telescopes, but you got one Haleakala. You got one culture here. There is 2 one Haleakala. And very few places that are sacred 3 to us and that one is just deteriorating. So please 4 think about what I said. And it's not just for you, 5 Jeremy, it's for everyone. Thank you. б 7 DAVID BRASS: Mele Stokesberry. 8 MELE STOKESBERRY: Hello. My name is Mele 9 Stokesberry and I'm a Kula resident. And I brought 10 this picture up here to show you and just ask everybody to think about how big this is. It really 11 12 doesn't show in this picture quite how big it is. 13 It's going to be 143 feet high and 10 -- well, 143.10 feet high. 14 15 Maybe that number doesn't mean anything to you,

16 so compare it to this. The telescope will be at the 17 same height as the top of our county building in 18 Wailuku and then add -- that's at 90 something feet. 19 And then add another 44, 50 feet to that at least. 20 Okay.

21 So this is my statement. I oppose the 143-foot 22 high ATST being built on Haleakala. There are other 23 places that it could be built and it's probably a 24 good project, but I don't think it belongs on 25 Haleakala. Its tremendous size cannot be placed on

IWADO COURT REPORTERS, INC.

APPENDIX D(2): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, PUKALANI COMMUNITY CENTER, SEPTEMBER 28, 2006

Haleakala without irreversible harm of a very 1 serious nature to the endangered petrels whose 2 burrows are all around the proposed site, without 3 ruinous harms to the view planes, serenity and 4 sacredness of the mountain, and without as yet not 5 fully charted harm to the entire summit environment б due to the tremendous amount of excavation and 7 disturbance that it will entail. 8

9 Although I am a board member of the Friends of
10 Haleakala National Park, a group that also opposes
11 the ATST, I am speaking as an individual. Thank
12 you. Aloha.

13 KAHOOKIPA OLU KAMAKAWIWOOLE: And I'm back. 14 Just have a couple more things I was thinking about 15 last night as I left the meeting that we had in 16 Wailuku. And according to your EIS, I read a lot of statements that says your studies, your surveys, and 17 I'm sure as testimony was last night and probably 18 tonight before I came, too, there is a lot of 19 20 cultural issues and feelings that come out where 21 this project is concerned. And again to auntie who described the height and the physicalness of it, 22 they describe it in the EIS and what they do is they 23 24 try to convince you, you know, it is big, it's massive, and it's white, and you're going to see it 25

IWADO COURT REPORTERS, INC.

for miles, [inaudible] so that actually all you're going to see is that little piece on the top. And that, according to this, is not a severe impact. It's not a severe impact.

Let me demonstrate it another way. Let me try 5 to analyze it another way. If a man is standing б 7 here and I punch him right in the face, picking that 8 event, okay. Now, shut off all the lights. It's 9 pitch black. I'm going to punch him in the face. 10 He doesn't see it coming, he doesn't see my fist. Does that change the severity of the impact? 11 12 Whether it's 140 feet high or whether it's 13 14 centimeters high, it doesn't belong up there. Period. End. 14

15 Also in here I notice that you talk about 16 mitigation. Why is mitigation even in here? Why 17 would there be a need to mitigate unless something 18 was going to be wrong in the first place? Mitigation, by definition, you need soften it up. 19 20 You need to lessen that blow, that impact. Why 21 would you even add it in here unless there was something to bring to cause that you would have to 22 put it in writing to cover your okoles? 23 24 I find it very disturbing that even in the -in how you guys describe mitigation, minimize the 25

IWADO COURT REPORTERS, INC.

1 impact. How? By trying to fake out the public that you know what, this big building is not that big, 2 it's not that white, the visualization that you're 3 going to see and the height and everything is a 4 manini thing because of the way it's situated, 5 you're only going to see this much. Again, I refer б 7 back to my demonstration. Is the height and the weight and the color really -- is that the issue? 8 9 That's not the issue.

10 And even on one of their definitions, avoid the impact all together by not taking a certain action 11 or parts of an action, it's right in the EIS. Then 12 13 don't take part in the action. Don't do it. And that's A, that's the option of mitigation. Don't do 14 15 it. Don't take the action. It's in your EIS and 16 yet we're not willing to follow it. It's incredible 17 to me.

18 Also, I'm not the smartest Hawaiian here and I'm not the smartest person, I don't claim to be, 19 20 but what I like to do when I find myself in issues 21 and in this kind of debating issues is I like to 22 surround myself with smart people. And I'm glad you guys are here because it's incredible how much I've 23 learned from your EIS. In here you claim to 24 mitigate the cultural aspects by providing programs. 25

IWADO COURT REPORTERS, INC.

1 Programs, in your specific writing, to Native Hawaiians and women. Now, if I'm not mistaken, and 2 this is federally funded, unless I'm mistaken. You 3 guys need to teach me that trick because I'm going 4 to fight right now with my own [inaudible], my own 5 Princess Pauahi in her personal monies cannot even б 7 provide for Native Hawaiian programs, the school 8 that she provided for. She cannot even do that now. 9 That same federal government is fighting us and 10 telling us we cannot do that with somebody's personal money. But yet you guys are a federal 11 12 agency saying you guys going to come to Maui and 13 give us this program. That's incredible because I need to know that and take it to the Ninth Circuit 14 15 Court and tell then you guys are mistaken because 16 I've got these smart brothers in here that are 17 promising us this special program for Native Hawaiians. That's incredible. 18

19Technology is going to boom, I believe that.20Like I said last night, I'm a 20-year veteran of21electronics, optic fibers. I love technology. I'm22in a three-year IT program right now with the County23of Maui. Technology is going to happen. I will24embrace it. I love it. But not at the point, like25auntie point out, that you're going to somebody's

IWADO COURT REPORTERS, INC.

1 house, tell them what's good for them and tell them we know you're not happy, we got this other thing 2 we're going to do for you to soften the load. 3 One last thing I want to --4 SPEAKER: I have something for him real quick. 5 Is it okay? It was an answer that I found. б The 7 only answer that -- your question about why 8 mitigation is in here is to make the impact -- the 9 only thing I could say so far as the mitigation is 10 to make the significant impact of the potential impact on the resources and effective environment to 11 12 the historic and cultural resources mitigatable to 13 be less than significant. KAHOOKIPA OLU KAMAKAWIWOOLE: Well, and like 14

15 you said, I'm reading right out of Section 1508, 16 which is quoted in the EIS, and it says right in 17 here there, it says including avoiding the impact 18 altogether by not taking a certain action or 19 actions. Don't take the action to build.

20 DAVID BRASS: At this point that's all the 21 people signed up so far, so what I would like to 22 suggest is we take another couple of minute break to 23 give people a last opportunity to sign up. And this 24 is a real serious 5-minute break, see if people 25 still want to speak still and if not, we'll wrap

PROCEEDINGS

1

2

3 MR. FEIN: Aloha and good evening everyone, and 4 thank you for coming this evening. There have been various 5 public meetings on the Advanced Technology Solar Telescope before this beginning in July of 2005. In fact, this is the 6 7 twelfth public meeting since that time. There have been 8 meetings with groups like this, formal meetings. There have 9 been informal meetings. There have been visitations to the 10 site. There have been meetings with groups at other venues 11 and so on. So this is really the twelfth meeting for the 12 public. The purpose of this meeting is different from 13 earlier meetings. The purpose of this meeting is to hear 14 comments from the public on the Draft Environmental Impact Statement. This impact statement was prepared by my 15 16 company, and my name is Dr. Charlie Fein. KC Environmental 17 Incorporated is the company that prepared the document, and the document was submitted for public review on September 18 19 8th. There is a 45-day public comment period of which we are somewhere in the middle. That public comment period 20 ends on October 23rd. 21

Everything you say here tonight we submit becomes part of the administrative record for the project. All comments will be addressed individually or collectively in the final Environmental Impact Statement, and that's a

APPENDIX D(3): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, KULA COMMUNITY CENTER, SEPTEMBER 29, 2006

matter of law. So anything that you submit will be 1 addressed and there are several ways to submit comments. 2 3 One is by giving oral testimony this evening. The second is 4 by submitting written comments. We've provided a comment 5 sheet, or you can prepare comments on your own. You can submit them tonight. There's a drop box in the back of the 6 7 room or you can mail them to either myself at KC 8 Environmental, and the address is in the back of the room or 9 to the National Science Foundation. So there are other 10 opportunities to comment besides this evening.

11 Now, although there are representatives of the 12 project here tonight, we respect the comments we received at 13 earlier meetings, and we are not going to be providing 14 presentations to you this evening on the project. If you direct a question to one of the individuals here, we will 15 16 answer as appropriate. However, I will point out that the 17 Draft Environmental Impact Statement was prepared by more than 30 individuals; that is, the contributions of more than 18 19 30 individuals went into the document. And as a practical 20 matter, they cannot all be here tonight and there may be questions that we could not answer, but we will ultimately 21 22 answer all of the questions that are posed. The EIS is a 23 draft, and I'm going to emphasize that again. It is a draft 24 document, and we are aware that it may contain errors. And 25 we know that there will be differences of opinion about the

APPENDIX D(3): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, KULA COMMUNITY CENTER, SEPTEMBER 29, 2006

1 content and conclusions. It is not a final document. It is
2 a document for the public to review and comment on and
3 provide input that would be important for the final
4 Environmental Impact Statement. That's why we encourage
5 everybody to participate in this process and I'm pleased to
6 say the participation has been very good during these days
7 of public meetings.

8 With that, I would like to make a couple of other 9 comments. First of all, we have a videographer here this 10 evening. The videographer has nothing to do with the 11 project or with my company. She's an independent 12 individual. If you do not wish to have your testimony 13 videotaped, all you need to do is ask that you not be 14 recorded and you will not be recorded.

MR. RIZZO: Where would this videotape be shown?
MS. PRINCE: I'm hoping to submit it to Akaku
Community Television.

18 MR. RIZZO: The whole thing?

19 MS. PRINCE: The whole thing.

20 MR. RIZZO: Thank you.

21 MR. FEIN: Before we continue, I would like to 22 just introduce the individuals who are here with us this 23 evening representing the project. First Craig Foltz 24 representing the National Science Foundation as the program 25 officer for this project; Jeremy Wagner, the manager for the

National Solar Observatory; Jeff Barr, the project 1 architect; Dr. Jeff Kuhn, Associate Director of the 2 3 Institute for Astronomy University of Hawaii; Mike Maberry, 4 Associate Director for the Institute for Astronomy, and Bijan Gilanshah with the Office of the National Counsel of 5 the National Science Foundation. With that, I'm going to 6 7 turn this proceeding over to our facilitators who are here 8 this evening to provide the context for the ground rules for 9 giving testimony. David.

10 MR. BRASS: Hi, my name is David Brass, and I'm 11 the facilitator with Mediation Services of Maui. We've been 12 asked to come to these meetings to facilitate the process of 13 testimony and ensure that everyone is provided with a safe, 14 respectful environment to submit their testimony.

MS. PRINCE: Hi. Earlier you asked me not to videotape you, so do you want me to keep the camera on now, or do you want me to turn it off?

18 MR. BRASS: You can go ahead and videotape me.
19 MS. PRINCE: Okay. Thank you.

20 MR. BRASS: So we're here just to provide the 21 context for people of a safe environment to make your 22 testimony. We're going to be following a fairly loose 23 agenda tonight. We're in the opening part of the agenda. 24 Cheri is going to be going over the ground rules in a few 25 moments, and then we'll open up for comments. We ask that you sign up on the signup sheets at the table by either door if you would like to make comments tonight. We'll take a break around 8:00. Part of the reason for that is to give the court reporter an opportunity to rest her fingers, and it's also an opportunity for people who haven't signed up yet to make comments to do so. And then we'll go back and receive more comments.

8 We'll take another break at 9 to see if there's 9 anyone else who would like to sign up to make comments. And 10 then if there are more people to make comments, we will 11 continue to receive comments until about 9:50. And we'll 12 need to close by 9:50 so that we have time to -- for the 13 staff that set up the room to clean up the room and be out 14 of here by the agreed upon time, which is 10:00. So I'm 15 going to turn the mic over to Cheri to go over the ground 16 rules.

MS. NASHIWA: Okay. The ground rules that we'll 17 be following tonight and that I plan to enforce is that we 18 19 ask that all cell phones be turned off or be on silent. You 20 must sign up to speak, and David will be announcing the names to call you up to make your statement. One person 21 22 speak at a time, and of course, that's because of the court 23 reporter is recording, and she can only type one person 24 speaking. Speak into the microphone slowly and clearly. 25 Use respectful language and tone, and just to be fair to

everyone in the room, we will be doing -- we'll be allowing 1 four minutes of comment plus a one-minute wrapup. So what's 2 3 going to happen is you'll be standing at that middle mic. 4 After that four minutes, I'll come stand next to you and 5 show you this yellow card to wrap up. And after that one minute, I'll ask you to stop. I guess we can get started. 6 7 MR. BRASS: I'll apologize in advance if I 8 mispronounce your name. I'll do the best that I can. The 9 first commenter is Warren Shibuya.

MR. SHIBUYA: Good evening, National Science 10 11 Foundation, National Solar Observatory, KC Environmental, 12 Inc., and University of Hawaii Institute for Astronomy, I'm 13 Warren Shibuya. I'm retired. Mahalo for this opportunity 14 to testify on the Advanced Technology Solar Telescope project proposal for the siting on the summit of Haleakala, 15 Maui. I listened to numerous testimonies and tried to find 16 17 a possible workable arrangement amongst various very valid community interests and concerns and comments as reflected 18 19 in the EIS.

20 Tonight I present four proposals for public and 21 ATST consideration and hope that this begins a positive 22 dialogue and working discussion amongst us. I do not 23 represent any interest group, but I serve on Maui's General 24 Plan Advisory Committee to develop plans to 2030. 25 Unfortunately, these four points do not fix injustices, but

APPENDIX D(3): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, KULA COMMUNITY CENTER, SEPTEMBER 29, 2006

provides a heading toward a workable win-win for almost 1 everyone. First of all, I ask NSF, NSO, UH-IOA, which is 2 3 the Institute for Astronomy and state, contribute to and 4 subscribe to a work force development program on Maui and hire Maui residents to work on the ATST project, not only 5 the usual OJT, which is on-the-job training, but 6 7 programming, educational funding, supporting studies of 8 mathematics, physical and gaseous sciences, solar physics, 9 thermal and plasma dynamics, engineering and Hawaiian 10 culture.

11 This proposal needs joint community, state and 12 business support; state to provide land facilities and 13 faculties to create a four-year university Hawaiian college 14 of sciences, technology and engineering on Maui emphasizing close partnership with ATST and NSF. Secondly, ATST is to 15 16 employ Maui residents as much as possible and develop ATST 17 work force to a close working relationship amongst NSF, NSO, 18 UH, state, Maui County and contributions from private and 19 business partners, startup organizations to manage 20 development and implement plans, coordinating funds for construction and staffing needs, everyone's buy-in and 21 22 long-term commitment to making this proposal and ATST 23 project work for everyone. No one group can do it alone. 24 All mentoring and bootstrap type programs needs everyone's 25 involved commitment.

> APPENDIX D(3): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, KULA COMMUNITY CENTER, SEPTEMBER 29, 2006

Thirdly, as initially suggested by Uncle Charlie 1 2 Maxwell, ATST establish a Maui solar and Hawaiian cultural 3 center featuring staff multimedia facilities and systems to 4 share information, educate and ignite the passion and 5 encourage Maui students getting needed skills and seek ATST employment. This cultural center informs the Hawaiian 6 7 culture through programs, explanation of online solar images 8 and solar disturbance impact on earth and satellite 9 communications, our environment and even astronauts in space and customized curriculum or presentations for residents, 10 11 students educators and visitors.

12 Maui solar and cultural center would proudly share 13 ancient Polynesian navigational ohana concept and malama 14 aina skills, accomplishments and beliefs. Four, ATST adopt and enter in written contract a sunset for the ATST 15 16 structure and program. Suggest at least four cycles with 17 each cycle is 23.5 years each cycle for a total of approximately 90 years. This sunset clause is precedent 18 19 setting and requires ATST to remove ATST structures and 20 restore use of summit grounds to original sacred configuration. Also asking UH Institute for Astronomy to 21 22 remove most of remaining historical radio telescope 23 structure used in the early 1950's by UH professor Dr. Grote 24 Reber.

25

With consent and job science surveillance by

APPENDIX D(3): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, KULA COMMUNITY CENTER, SEPTEMBER 29, 2006

appointed Hawaiian members, you can then find yourselves
 site 5443 would be restored to its original pu'u, which is
 24 feet higher than what it is today. ATST excavation
 surcharge would fill this.

5 Also, as I testified earlier, Hawaiian names or 6 nomenclature would replace all nonHawaiian streets, road 7 facility names, currently posted at the Haleakala summit. 8 Please support these proposals and allow them to happen for 9 everyone. Mahalo for your patience and understanding.

10 MR. BRASS: I forgot to mention that if you are 11 more comfortable having one of us, Cheri or I, read your 12 testimony, you're welcome to write something and hand it to 13 us at any time and we'll be happy to read it for you 14 tonight. The next commenter is Mary Evanson.

MS. EVANSON: Thank you for this opportunity to be 15 16 here this evening. Tonight I'm going to be speaking for the 17 Friends of Haleakala National Park. My name is Mary 18 Evanson, and I'm the vice-president of the group. This is a 19 draft that we will be handing in tonight, and then there 20 will be a final that we will mail in before the end of the comment period. The Friends of Haleakala National Park 21 22 strongly oppose its locating the Advanced Technology Solar 23 Telescope project on Haleakala. This project will adversely 24 change the summit of Haleakala forever causing irrevocable 25 loss of natural, cultural and scenic resources negatively

APPENDIX D(3): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, KULA COMMUNITY CENTER, SEPTEMBER 29, 2006

1 impacting the significance of Haleakala National Park.

2 Another site should be given priority for the 3 ATST. The Friends ask that the no action alternative be 4 selected for Haleakala, and we challenge the draft EIS's 5 assumption that significant impacts to the natural and cultural resources can be mitigated. We reject the 6 7 conclusion on Page 4-12 that impacts to the endangered 8 Hawaiian petrel and the 'ua'u are less than significant. 9 There is no evidence that suggests that construction noise, vibration or human proximity will not impact the 'ua'u 10 11 nesting sites. The fact that mitigations are proposed on 12 Page 4-81 supports the credibility of our assertion. We 13 reject the conclusion of Page 4-6 to 4-8 that construction 14 and operations related impacts are significant but mitigable to less than significant impacts. 15

Native Hawaiians in written and verbal comments 16 have overwhelmingly stated that the construction and 17 18 operation of ATST constitute significant impacts and that no 19 mitigation the draft EIS provides will compensate for the 20 defilement of the cultural and spiritual values this project represents. It is clear to the Friends that the majority of 21 native Hawaiians prefer the no action alternative. The 22 23 mitigations proposed on Pages 4-79 and 4-80 have been 24 derived from the Cultural Resource Evaluations and 25 Traditional Practices reports of January 2006.

> APPENDIX D(3): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, KULA COMMUNITY CENTER, SEPTEMBER 29, 2006

1 This document was commissioned by the promoters of 2 the ATST, and as a result, lacks credibility as an unbiased 3 expression of the thinking of the native Hawaiians. Even 4 the principal author has stated opposition to this project 5 and was motivated to propose token mitigation feeling the 6 project was a done deal based on his past experience.

7 The Friends believe that the ATST promoter should 8 listen foremost to the native Hawaiians who are unaffiliated 9 with the Institute for Astronomy. We understand the project's funding source, the National Science Foundation, 10 11 has not yet conducted the required senior review, and 12 furthermore, it will not be available to the public until 13 November. The Friends would like to know why the public 14 comment period closes before this review has been disclosed. 15 Thank you very much.

16 MR. BRASS: Leslie Bruce.

17 MR. FOLTZ: May I respond very briefly? My name 18 is Craig Foltz. I'm the program officer and the facilities 19 lead for the Division of Astronomical Sciences at the National Science Foundation. The senior review that you 20 referred to, Mary, is absolutely unaffiliated this with 21 project. It is a review of our current facilities with an 22 23 eye towards how we move into the future. The 24 recommendations of that review do not bear in any way on the 25 recommendation or not, to fund this or not. And the

APPENDIX D(3): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, KULA COMMUNITY CENTER, SEPTEMBER 29, 2006

deadline for this submittal was set, and it was actually set 1 before the release date, before the release date for the 2 3 senior review was set. But thank you for your comments. 4 MR. BRASS: Leslie Bruce. 5 MS. BRUCE: Good evening. My name is Leslie Ann Bruce. I was born on Maui, and when I was a child, my 6 7 father provided bamboo for his structures. I presently am a 8 resident of Hana, and I represent only myself this evening. 9 I'm a retired teacher and writer who currently serves on the General Plan Advisory Committee of Maui County. This 10 11 proposed use of Haleakala summit for another telescope is 12 undesirable, culturally offensive and ethically 13 questionable. It's undesirable because it is a further 14 covering of our mountain's open space and special viewscapes. It destroys our sense of place. It is 15

16 culturally offensive because it further intrudes on our 17 sacred Hawaiian aina.

Haleakala, as we all know, has mythological 18 19 significance of the highest value. It is a storied place 20 for the island 's namesake, Maui, who has Pan Pacific importance to many Polynesian cultures in addition to 21 22 Hawaiian culture. People I know on the island, including 23 myself, feel hurt, offended and invaded by outsiders' 24 intrusions on our wahipana, our sacred places, that lose 25 their pristine character and cultural significance by being

APPENDIX D(3): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, KULA COMMUNITY CENTER, SEPTEMBER 29, 2006 used for large, obtrusive structures that obliterate the
 emptiness we value so highly on our mountaintop.

3 The NSF proposal is ethically questionable because 4 it imposes on Hawaiian people, Hawaiian culture and the singularly important place on Maui that should suffer no 5 more intrusions. NSF should decide to do what is best for 6 7 Haleakala. Please choose the action -- no action 8 alternative and move your Advanced Technology Solar 9 Telescope elsewhere. Thank you for this opportunity to 10 share my manao with you.

```
11
```

MR. BRASS: Melissa Prince.

12 MS. PRINCE: Good evening, my name is Melissa 13 Prince, and I'm the one videotaping the meeting tonight. I 14 do a lot of government meetings. I do it for free usually. I just want to give you all an idea of what I go through. 15 16 This week on Wednesday night, there was a meeting for the 17 Superferry at the Wailuku Community Center, so I managed to get there. I wanted to be here for this meeting tonight --18 19 that night, but it was conflicting. You had the same meeting on the same night. And also the County Fair is 20 happening this weekend. And then Thursday night the Akaku 21 board was having an important meeting. They were getting 22 23 ready to hire a new CEO.

For those of you who are following the free speech arguments that are going on, our channel has been under

APPENDIX D(3): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, KULA COMMUNITY CENTER, SEPTEMBER 29, 2006

heavy attack. We are worried that we could lose our right to speak out, and so I attended that meeting. So now I come up here on Friday night and I come up here to take the meeting, and I'm asked not -- you know, to turn off the camera. And from what I understand, if it's a public meeting in a public place, I have a right to record it.

7 However, personally I will turn off the camera if 8 somebody feels uncomfortable. I will do that. But thank 9 you for those of you who have spoken allowing me to tape. And I just want to make it clear. Somebody was saying that 10 11 the last tape that I turned in with this commentary at the 12 Hawaiian Homes hall, I turned in the middle portion of the 13 whole meeting, and they said, well, you took it out of 14 context. I just want you to all know I try not to do that. I don't want to even edit. To tell you the truth, I don't 15 16 have time to edit. I do so many government meetings, they 17 can go on for hours. I'm not getting paid for this. So I 18 apologize for taking out the middle portion, but I felt like 19 that was where most of the public testimony was. So I turned it in. 20

And then I turned in the third thing a few weeks later. And I haven't even yet turned in the first hour, so I will try to do that. But I just want you all to know I try not to manipulate the footage if I can. You know, but lately just to let you all know, heads up, Akaku has been

APPENDIX D(3): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, KULA COMMUNITY CENTER, SEPTEMBER 29, 2006

rejecting some of my tapes saying that the audio is too low 1 and because I don't have a fancy computer at home to do my 2 3 own editing. It's hard to get to Akaku. I can't always get 4 the audio backup, so I've had two things rejected. You 5 know, the Navy is planning to increase testing and training in Hawai`i waters. I went there and taped that. That was 6 7 rejected because the audio was junk. And then the U.S. 8 Interior Department was here, the Hawaiian director was 9 here. That was rejected because the audio was too low. I mean, you know, I'm trying. I'm trying to get 10

11 the news out because Maui News doesn't always carry these 12 things. So I'm just trying to stay as neutral as possible. 13 I'm a little upset right now because I'm tired. I was in 14 Wailuku this morning, ran home to Haiku and I'm up here now, 15 so I am wiped out. Okay. Thank you. That is all. 16 MR. BRASS: Verna Nahulu.

17 MS. NAHULU: Good evening, my name is Verna Kai'ulani Nahulu. I'm a retired elementary school teacher, 18 19 a member of the Kula Board of Directors and a chairperson of 20 the street-naming commission. I am a native Hawaiian living on the Hawaiian homestead in Keokea, so I am a native 21 22 Hawaiian who is strongly in favor of the ATST. There are no 23 children here to give their testimony, and so I feel that 24 I'm partly representing the children in Maui. There is so 25 much to learn from -- from new technology in our world

APPENDIX D(3): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, KULA COMMUNITY CENTER, SEPTEMBER 29, 2006 today, that an island way out in the Pacific, sometimes we don't have the facilities, we don't have enough of the educators that are in the mainland at other schools. I have taught in Hawai`i as well as the mainland. We are sometimes left out. Our children are sometimes left out of information going on nationally, and we're out here, so we don't get all of the information that we need.

8 Now, here comes ATST. They are a great source of 9 information and can share their discoveries, their knowledge, and I feel that the ATST is a great blessing and 10 11 a gift to our children, our children's future and our 12 children's education. I feel personally that there are a 13 lot of things that I didn't learn as a child from my 14 grandparents because they were concerned that we should be more connected to their past. I feel today that our 15 children should own their future and that we should not hold 16 17 them back to our past, that they should speed on ahead.

18 They belong to the world of tomorrow and they 19 should be able to speed on ahead with knowledge that the ATST can provide here as well as knowledge of other 20 facilities like the ATST. I don't think we should negate 21 their contribution. I think we should -- it should all be 22 23 included here and as far as my native brothers and sisters 24 are concerned about the sacredness and the -- our native 25 culture's advanced gods, godesses and all the people that we

APPENDIX D(3): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, KULA COMMUNITY CENTER, SEPTEMBER 29, 2006

also learn from. I'm a channeler of Pele. And very, very early on, I asked her what's your take on the ATST. And she says I am strongly in favor of it. She said do everything you can to have them be installed at the summit because I feel that Haleakala is for education. For those people who feel that Pele's home is in Haleakala, Pele's home is in Halemaumau.

8 She asks me to come to Halema'uma'u for 9 conferences there and that is where she resides. She said Haleakala is for the education of people and the children 10 11 here. So in wrapping up, I would like to say that my 12 Hawaiian ancestors felt it was so important to know about 13 the sun, to know about the stars and to know the skies, 14 because when we traveled throughout the Pacific, through 15 Easter Island, to Tahiti, to far places, okay, to far 16 places, that it was necessary to know about the sun.

17 Why we are keeping this knowledge away from our 18 children today, I do not know. So I just want to come and 19 say that the ATST is like a Stradivarius violin in a case, 20 and we are criticizing the case instead of looking inside 21 the case and seeing that there is something of great value. 22 Thank you for listening.

23 MR. BRASS: Next we have written testimony from 24 Mele Stokesberry submitted by e-mail. The 143-foot high 25 Advanced Technology Solar Telescope, ATST, that is proposed

to dominate the top of Haleakala with a 40-foot deep excavation under it must not be built at this location. It's tremendous size cannot be placed on the summit of Haleakala without irreversible harm of a very serious nature to the endangered petrels whose burrows are all around the proposed sites.

7 The ATST would also cause ruinous harm to the 8 viewplanes, serenity and the sacredness of the mountain and 9 its yet not fully characterized harm to the entire summit environment due to the huge excavation and disturbance it 10 11 will invade. There are other acceptable sites in the world 12 for this telescope. The location is an intrusive structure 13 in the middle of a national park in the middle of an area of 14 archeological importance and fragile habitat of endangered species and on the summit of a mountain sacred to the host 15 16 cultural people. It's just bad ecology and bad politics. 17 Although I am a board member of the Friends of 18 Haleakala National Park, a group that also opposes the ATST, 19 I am submitting this testimony as an individual. Mele

20 Stokesberry, Kula, Maui.

21 The next commenter is Dick Mayer.

22 MR. MAYER: Thank you very much. I'm 23 vice-president of the Kula Community Association, but I'm 24 not speaking today on behalf of the association. We will be 25 submitting our comments separately before the deadline. I'm

also on the General Plan Advisory Committee for Maui County, 1 and we will also be looking at this area. It's part of our 2 3 overall plan over the next six months to a year. At your 4 scoping meetings, I made a number of comments, wrote them down. Unfortunately you made replies or you had replies in 5 your draft to many of the people who submitted comments that 6 7 day or subsequently. My comments were left without your 8 reaction, your comment, and I think that is something that's 9 negligent on your part.

I made, for example, the comment that at the 10 11 scoping meetings you were saying that the height of the 12 telescope would be 92 feet, and you repeatedly on several 13 occasions during the meeting left that impression. You also 14 left that impression with Maui News and did not correct it 15 in due time with the Maui News. And finally, we find out 16 it's not 92 feet, which would have been lower than the 17 present facility up there, but it's 143 feet high. And I think that has mislead the public and maybe has lulled the 18 19 public into thinking it's a smaller facility than it 20 actually is. To compound the problem, the photos which were taken of the facility were aerial photos, which made the 21 building and the site and the impact of the buildings much 22 23 smaller impacts in some respects. The photos were taken 24 from an angle such that it looked like the top of the 25 building was far below the summit of Haleakala when, in

> APPENDIX D(3): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, KULA COMMUNITY CENTER, SEPTEMBER 29, 2006

fact, the top of this telescope would be approximately 100 feet higher than anything else on the top of that mountain. It will look like the nipple on the top of a breast if you can imagine the analogy there sticking up quite bit above the summit of the mountain, 100 feet taller than the top of the mountain.

7 What I didn't see in looking through the draft were a description of the impact on Haleakala National Park 8 9 and the visual element at the top of that mountain. We have somewhere in the order of 2 million people a year going to 10 11 the summit of Haleakala in this building with it's site A 12 and B is going to be right in the face of these people. 13 It's a very bright object up there, and it's certainly going 14 to be a visual -- in the visual viewplane. You have some photos up there that simulate it, but it doesn't give I 15 16 think the true impression of how big this building will be 17 right near the very summit of the mountain.

18 You also have only looked at areas within the 19 18-acre site as if that's the only area on Haleakala that 20 you looked at. You looked all over the world and then decided to stay only within that 18-acre area, which is very 21 22 close to the national park, the national treasure of the 23 United States. And I'm speaking on areas not related to the 24 concerns of Hawaiians and their cultural history, because I 25 think those have been very well documented, but rather from

the viewpoint of the general public of the United States 1 that comes to Hawai`i and people around the world who come 2 3 to Maui as one of our major tourist sites to enjoy the 4 tranquility, the beauty, the scenes, the views, the sunrises, the sunsets on top of Haleakala and have this 5 facility put right in their face very close across that 6 7 little divide rather than looking at other sites on top of 8 the mountain maybe a mile away from the summit 9 three-quarters of a mile away, further to the south, maybe dropping it to down to 9,800 feet so it wouldn't stick above 10 11 the top of the mountain.

12 The community plan for upcountry Maui calls for a 13 master plan of the summit. The university did a master plan 14 only of their 18 acres. There is a strong need to have a master plan that will integrate the use of the top of that 15 16 mountain by the Air Force, the University of Hawaii, the 17 Hawaiians, who wish the preserve the cultural qualities of the top of the mountain -- I'll keep going, thank you -- as 18 19 well as the national park and the various telescopes up 20 there. That master plan is called for in the community plan of this county, which is the law of this county. So until 21 22 that master plan is done, I believe this is jumping ahead in 23 the timetable of what needs to be done unless the federal 24 government with their \$180 million they claim for this 25 project wishes to help us do that master plan so that we can

> APPENDIX D(3): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, KULA COMMUNITY CENTER, SEPTEMBER 29, 2006

1 site the facility properly. And I thank you very much.

2 MR. FEIN: I'm going to briefly respond to two 3 items. The first was the incorrect reporting by the Maui 4 News in our very first scoping meeting of the height of the 5 telescope at 92 feet. That was an error. The figures that we brought, the graphics that we brought correctly showed 6 7 the 143-foot structure. And it was unfortunate that it was 8 misreported. There was a correction. Unfortunately, those 9 kinds of things do get stuck in the public eye.

Secondly, this building is not -- would not be 100 10 11 feet taller than anything on the summit. The advanced 12 electrooptical system or AEOS telescope is 120 feet above 13 ground level. This telescope would be at maximum 23 feet 14 taller than that, although in a different location on the summit. So, in fact, it would be 23 feet taller than that 15 16 building if they were both at the same ground level, which 17 they are not. I just wanted to make those comments.

MR. MAYER: I believe some of that was incorrect. 18 19 At the scoping meeting, several people asked the question on 20 the height of the building, and it was stated at the meeting, not in the Maui News, that the height of the 21 22 building was 92 feet. And many people left that meeting 23 thinking it was 92 feet. The diagrams behind correctly said 24 143 feet, but the individuals conducting that meeting 25 repeated 92 feet several times.

MR. BRASS: Suzanne.

1

2 MS. BURNS: Hello, my name is Suzanne Burns. I 3 wanted to comment in regards to what auntie just said. I'm 4 sorry, I didn't get your name. 5 MS NAHULU: I'm Verna. 6 MS. BURNS: I know it's hard to stand up alone and 7 so I appreciate your strength, but you spoke on behalf of 8 Pele, which I don't understand because I don't have that 9 ability, so I won't go further than that. But you spoke on behalf of children. A lot of people that are doing things 10 11 for the children right now are at the Fair and that's why 12 they're not here talking. And I talked to the kids at my 13 college and nobody is interested in going and studying this. 14 They like the stars, but this is for the sun. 15 MS NAHULU: Elementary school kids? MS. BURNS: Yes. 16 17 MS NAHULU: Not college kids? 18 MS. BURNS: And when they grow up, they would 19 probably still like to enjoy Haleakala, the ones I talked 20 to. So if you can get those kids to back you up, please. I have no more right now. Thanks. 21 22 MR. BRASS: Kaho'o Kamakawiwo'ole. 23 MR. KAMAKAWIWO'OLE: Aloha, I'm Kaho'o 24 Kamakawiwo'ole, and I just have a couple of comments. 25 Again, I was thinking about the keikis and all this new

APPENDIX D(3): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, KULA COMMUNITY CENTER, SEPTEMBER 29, 2006

advanced technology is going to provide them. You know, we 1 2 already have the Faulkes Telescope north up there, and it's 3 interesting to me as I study more about this that the 4 Faulkes, the capabilities of this telescope can be done remotely. In fact, a lot of the information is being sent 5 all the way back and controlled by the United Kingdom. I'm 6 7 sure that if we could borrow that technology, if we don't 8 have it already, we could position this scope wherever it 9 needs to be other than Haleakala, funnel all of that data back to all of the State of Hawai`i DOE and the kids can 10 11 control it and see what it's like.

12 And with all that federal money that you have, 13 take the whole class from Hawai`i to wherever this other 14 location is. That's the best education we can give our keikis is get them off of Maui and see how other people are 15 16 doing business. That is a whole other education the kids 17 are not going to get here. My second comment is just that I think in reading the EIS, it's very shortsighted. As uncle 18 19 has stated already right before I walked in, it only is 20 looking at the po'o, only at the top of what they call what they're trying to include in this EIS. The fact of the 21 22 matter is Haleakala has been and is known to be a sanctuary, 23 if you will, and I don't mean -- I mean sanctuary in a sense 24 of a church sanctuary, a sacred sanctuary. And please, we 25 cannot, we cannot allow it to be a sanctuary like a reserve

sanctuary. We don't want to go there. We're there now with
 the northwest Hawaiian islands.

3 And one of the things that I brought back from 4 having discussions about our monument now is that the idea is to bring the monument to bring the islands to the 5 children, because we can't take the children to the islands, 6 it's so devastated already. And I don't want to see the day 7 8 when I can only talk about and show pictures of Haleakala 9 and being on the summit to my kids. I want to take them there and not have to rely on having to bring pictures to my 10 11 kids and my grandkids. Thank you.

MR. BRASS: At this point, we're going to take a short break. And this is an opportunity to sign up if you haven't already. It's about 8:00, so we'll take a break now, and if you would like to testify, please sign up. And we'll reconvene in about five to ten minutes.

17 (Recess taken.)

18 MR. BRASS: We're going to come back together now 19 if you could return to your seats. If you want to continue 20 your conversation, if you could step outside so the people 21 in the room can hear. I believe we're going to start with a 22 response to one of the last comments from one of the project 23 representatives.

24 MR. BARR: My name is Jeff Barr, and I'm the 25 project architect. I'm the person who made the original

> APPENDIX D(3): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, KULA COMMUNITY CENTER, SEPTEMBER 29, 2006

presentation Mr. Mayer referred to regarding the height of 1 the telescope and the building. And this is from memory and 2 3 I'm pretty certain of it, but I pointed out at that time 4 that the center of the telescope, the center of the mirror was at 92 feet, which is 28 meters above the ground and that 5 was required for seeing reasons, for clearance of the 6 7 imaging of the telescope. And I also pointed out that the 8 building was higher than that, and it was required to --9 it's dimension was determined by rotational and maintenance requirements of the telescope. 10

11 And again, I mean if there's one moment I could 12 relive, it would be to make it clearer. The slide that I 13 had up also had the 143-foot dimension on it, but again, it 14 probably could have been clearer. And I certainly should have made that clearer in the beginning. And when I saw 15 16 that in error in the paper, we made a correction as quickly as we can as Charlie pointed out. But again, I don't -- I'm 17 almost certain that I did not say that the building was only 18 19 92 feet all, although I did make it clear that the building 20 height was set by the telescope height, which was 92 feet, so I just wanted to add that. 21

22 MR. FEIN: And we would also like to respond 23 formally to the question as to why not put this facility in 24 the saddle area.

25 MR. MAYER: Let me phrase the question.

APPENDIX D(3): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, KULA COMMUNITY CENTER, SEPTEMBER 29, 2006

MR. FEIN: Go ahead, Dick.

1

2 MR. MAYER: I took the liberty of grabbing one of 3 your things here. This is the significant criteria for this 4 decision, and one of the things is the visual impact and there are several other things of that sort on here. I'm 5 asking the question why put it right in the face of the two 6 7 million tourists and local residents who go up to that the 8 top of that mountain who want to enjoy the views of the 9 natural environment? It's really right in their face. Air Force did it. That doesn't mean this one should also do it. 10 11 And I'm asking why only that 18-acre site was 12 looked at and why a site a half-mile to the south in the 13 saddle was not seriously looked at or evaluated or commented 14 on in this EIS. It seems if it would be put down there, it would be around two or 300 feet elevation lower. I don't 15 know how much effect that would have on the solar 16 17 observations. And it would certainly take it out of the 18 face of most of the people who go up to the top of that 19 mountain. 20 MR. WAGNER: I'll respond to that. Hello, my name

is Jeremy Wagner. I'm the project manager for ATST. There's several questions there, and I'll try and answer them as best I can. The 18 acres, and Mike you might want to address that, but the 18 acres was set aside by executive order for observatory purposes. A long range development

plan was produced by IFA-U of H, which was reviewed by the 1 public. And it included two sites in the long range 2 3 development plan for a telescope like ATST potentially. 4 When we looked at sites around the world, we identified sites that could be potentially good sites for a telescope 5 with requirements like ATST. And the site up on Haleakala 6 7 within that 18 acres which was identified for observatory 8 purposes was considered, okay.

9 Putting the telescope outside of that in the saddle presents a number of issues. One, whether or not you 10 11 can actually build a telescope there. It isn't a site that 12 is commensurate with the requirements for this telescope 13 because it is down in a saddle. And in order to meet the 14 science requirements, the observing requirements for ATST, 15 you have to be up out of the ground layer. You have to be 16 up out of the disturbed air that comes out across the surface of Haleakala. And so if you went into the saddle, 17 18 it is lower, but the telescope would actually have to be 19 significantly higher and essentially the same height that it 20 is at the top based on my assumptions about rotors, wind produced rotors coming off of the top of the mountain, based 21 22 on the trade winds. And so it actually doesn't help 23 telescopes there because it's not a good site for 24 telescopes, for example.

25

That's why the telescopes end up being situated on

APPENDIX D(3): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, KULA COMMUNITY CENTER, SEPTEMBER 29, 2006

ridges upon the top of the mountains typically, okay. It is 1 also more visible -- this is my understanding based on the 2 3 viewplane work that's been done -- a saddle position is much 4 more visible to the communities down below. That's one of the reasons -- we've looked at the alternate site and the 5 primary site, the B site up on Haleakala Observatory and 6 7 there's a trade there between how visible they are. Because the Reber circle site, which is the alternate site, is 8 9 higher and more visible. The Mees site is lower and less visible because it's further away from the ridge. It's 10 11 blocked by the Air Force facility. It's blocked by the 12 ridge itself, so there's a trade between those two sites, 13 which were identified in the long range development plan for 14 the 18.166 acres, which was identified by the executive board for observatory purposes on Haleakala. And I hope 15 16 that helps.

17 MR. MAYER: But you didn't look down there at all. You didn't do any testing. That low area, it's very broad. 18 19 It's not like you're sitting there in a little canyon. 20 You're in a very broad area, and you could put it further away from the edge of the hill. And the point I'm making is 21 it looks at all the alternate sites, 180 sites around the 22 23 world, and you only looked at the 18-acre site right in the 24 face of everybody who is up there.

25 MR. WAGNER: I'm not an eco expert, but there is a

APPENDIX D(3): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, KULA COMMUNITY CENTER, SEPTEMBER 29, 2006

reasonableness issue. There are many, many sites which can 1 be considered unreasonable because you couldn't consider 2 3 building there. And so there are many, many sites in the 4 world, but they won't support the requirements for the 5 telescope, and they're not reasonable to build. The top of the Sears Tower, for example, you could put a telescope up 6 7 there, but it's not reasonable, nor is it a good site. 8 Haleakala, I mean Uncle Charlie told me once, and he's not 9 here, but Uncle Charlie told me once that it took us years of studying -- I mean I'm a haole, I'm a mainland haole --10 11 and it took me years of study to figure out what Hawaiians 12 knew, that Haleakala is an excellent site to observe the 13 sun.

14 MS NAHULU: May I respond?

15 MR. BRASS: If you have a question.

16 MS NAHULU: I would like to respond. Short. I've been to Haleakala. In order to see Science City, I have to 17 18 go up further to the 10,000-foot level to see Science City. 19 I have never, ever had those telescopes in my face. I have looked down to the summit with the pu'us and everything. I 20 do not see Science City. It is in the back. I see only the 21 22 summit below me, and I've been up there many times. So I 23 think it is a mistake saying that it is in our face because 24 it certainly is not. I have to go up to Science City to see 25 those things, and I do. Thank you.

MR. WAGNER: Thank you.

1

2 MR. BRASS: Thank you. Our next commenter will be 3 Michael Howden.

MR. HOWDEN: My name is Michael Howden. I live in 4 5 Kula, and I've lived on Maui in Kaupo and Ulupalakua for close to 40 years now. I really come to share my manao in 6 7 terms of relative to my training as a haumana with Papa 8 Henry Auwai, Lahau Lapahau and the Hawaiian culture. One of 9 the things I noticed in beginning to read this report that pu'u kolekole was considered a place of prayer and inner 10 11 attunement. And I've got to say that for all of us who love 12 this mountain and who have been touched by it, it doesn't 13 matter in my heart whether you have ku'oko'a, but how you 14 receive it.

15 And I find the -- I find this incredible that this 16 European scientific mindset would want to impose upon a 17 sacred landscape what can only be considered in spiritual terms really a monstrosity. This is a place of prayer. 18 19 It's a place sacred for ceremony. And I think at some 20 point, this madness toward building and accumulation and the carelessness with which this is approached in terms of 21 imposing on this landscape something that would be not only 22 23 cultural desecration, but an aesthetic and spiritual desecration. And I don't -- I don't see this obviously 24 25 simply as a native Hawaiian issue. I see it as a community

APPENDIX D(3): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, KULA COMMUNITY CENTER, SEPTEMBER 29, 2006

issue and really in some senses a metaphor for Maui's destiny, whether we simply become concerned so much with externals or whether what Maui has been and what Hawai`i has been in terms of a place of healing and a place of prayer and of great inner nourishment or whether we just go onward.

6 I mean we don't know how to live on the earth. 7 We're -- you know, I work on the -- I'm a member of the 8 Board of Water Supply for Maui County, and the issues before 9 us are really like the poisoning of the water sources. And when we look at that as a board, then we have to look at, 10 11 well, what kind of agriculture do you have on top of these 12 water resources and what are the health effects of all this. 13 And you can't look at it as just one thing. And I don't 14 think that -- you know, I mean I admire what I've learned from science. But I think science has been very impersonal 15 16 and amoral. And science has also produced what the Hopis 17 call the gourd of ashes, the nuclear weapons, which threaten life on earth, all life on earth. 18

And we just keep on doing this when there are people who are homeless, people who are dispossessed. I mean we're not looking at what the needs of our community are, and we're just going on toward this madness. Thank you.

24 MR. BRASS: Do you have your written testimony 25 ready? That's all the people who have signed up so far to

speak. So what we're going to do is we're going to take
 another break for about ten minutes and give you an
 opportunity to sign up to speak if you wish.

4 (Recess taken.)

5 MR. BRASS: We're going to come back together now. 6 If you would like to speak and haven't, please sign up and 7 do so. We have one speaker signed up so far. Frank Rizzo. 8 MR. RIZZO: Good evening, aloha everyone. I just

9 want to say a couple of things. I've been to a number of these meetings. I've had a unique opportunity over the last 10 11 20 years of accompanying hundreds of school children from 12 Maui up to the observatories. And as far as school field 13 trips go, kids are kind of giddy. But what I've seen many, 14 many times are just a small group of these children that are 15 very excited and just really in awe of what's going on up there at the different facilities. And I just think it's an 16 important thing. I believe that this is a great 17

18 opportunity.

19 It's opportunity knocking at the door to have a 20 facility like this. How appropriate, a solar observatory 21 state-of-the-art up at the house of the sun. I've heard a 22 lot of testimony from a lot of different people. To make a 23 long story short, the thing that really kind of gets me 24 though is listening to a lot of the Hawaiian people that 25 have been showing up at all these meetings and they're very, very disturbed that this is going to be going on sacred
 land. And I can relate to that. And to me, I've got mixed
 emotions on that. I think that would be very disrespectful.

4 I don't know enough about Haleakala to know how much of the mountain is sacred. Is it the whole mountain? 5 Is it just the area around the national park? Is it certain 6 7 sections? I don't know that, so I guess I am just going to 8 end it here. I am in favor of it. If it could go in an 9 area around the summit that is respectful to the Hawaiian people, if that could be pursued, I think that would be a 10 11 great thing for everybody.

12 I know people are concerned what it looks like. 13 It's an observatory. It's going to look like an 14 observatory. You talk about ugly buildings. The County building is an ugly building. And somebody else was talking 15 16 about Haleakala National Park keeping it, you know, pristine 17 and just experiencing Haleakala National Park. I wish the 18 park lady was here, because I would tell them to get rid of 19 the bike tours and that would really clean up Haleakala 20 National Park. But anyway, I'm in favor for it. I think it's a great opportunity. If it could be done in harmony 21 22 with the community, mostly with the Hawaiian people, I think 23 that would -- you know, it's a challenge, but if that can be done, I think it would work out. And thank you everybody 24 25 for your time.

APPENDIX D(3): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, KULA COMMUNITY CENTER, SEPTEMBER 29, 2006

MR. MAYER: Are you a teacher?

2 MR. RIZZO: I'm not a teacher, no. I have 3 accompanied, yes, hundreds of children up there for over 20 4 years.

MR. MAYER: In what capacity?

1

5

6 MR. RIZZO: Photography, taking photographs of 7 these people and just, you know, listening to a lot of them. 8 And, you know, it's just -- like I said, it's a school field 9 trip. You get 20 to 30 kids, but there's 2 or 3 kids in the group that are asking all the questions. They're very 10 11 excited, "Can I come back up?" My minute still going there. 12 I'm wrapping it up, by the way. I've been to too many of these things already. A lot of the local children really 13 14 express interest and they're pleased to know that they can get a great education here, especially that they don't have 15 16 to go to the mainland. They can stay with their families. 17 They can get the education that they want and have got an 18 opportunity to do some fantastic science, some great 19 technology and something really worthwhile here in Hawai`i. And I don't know, that's just kind of -- I've got 20 a young son and he's interested in science. And aside from 21 aesthetics and all that other stuff, you do want to kind of 22 23 keep the observatories together. Yeah, it's huge. It's 140

feet and whatever it is, but today I was driving around the island. And I was looking up at the summit all day today,

APPENDIX D(3): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, KULA COMMUNITY CENTER, SEPTEMBER 29, 2006

and it was cloudy and you can't really see it. And when 1 it's not cloudy, you've got that shiny AEOS dome up there. 2 3 It is what it is. People don't want it looking like Mauna 4 Kea. I guess enough said. I just wanted to pass along the 5 children aspect of it, you know, the local community here, because there is an interest with the local people, the 6 7 local children that I've seen that, you know, they're 8 excited about what's going on over here. 9 And, you know, they don't have to go to the

10 mainland to do something like that. They can do it here.
11 Anyway, thank you.

MR. FEIN: There is nobody else signed up this evening, but we have this room until 10:00. So we are not going to leave right now. There's still an opportunity to speak if you wish to sign up. Did you have --

16 MS. BURNS: Can I just make a request?

17 MR. FEIN: Yes.

18 MS. BURNS: Suzanne Burns. I know this might be 19 farfetched, but because the meetings are set up at the same 20 time as the Superferry and the Fair, I mean you can see the difference in the showup. Could you please -- I mean I know 21 that I talked to -- is it Shannon? Sharon, sorry. And I 22 23 know this is the only time that you all could make it down 24 here. And I know there's going to be a lot of people who 25 have some questions. So maybe you all can't make it, but

APPENDIX D(3): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, KULA COMMUNITY CENTER, SEPTEMBER 29, 2006

it's for us to speak, so if you could please think or 1 consider setting up a time where we could in a Hawaiian 2 3 community. You know, this is not -- not a lot of Hawaiians 4 live up here. So please consider it before the 23rd, just 5 let them speak. Is that a possibility? I know you guys went out, and this is what, the ninth session? 6 7 MR. FEIN: Yeah, the twelfth. 8 MS. BURNS: Twelfth session I know. 9 MR. FEIN: The comment period that ends on the 10 23rd means that you can submit any question you want up to 11 that point. And it will be responded to as quickly as we 12 possibly can. 13 MS. BURNS: So it's going to be responded to -- we 14 can write until the 23rd, and then we'll have a response? 15 MR. FEIN: Yes. 16 MS. BURNS: Can we write again in response to your 17 response? 18 MR. FEIN: You can write 100 times if you wish. 19 MS. BURNS: Okay. And it will all go into the 20 record? MR. FEIN: Yes, that's correct. 21 22 MS. BURNS: Is this going to go on Akaku? 23 MS. PRINCE: I hope so. MS. BURNS: Last chance, everybody, write for the 24 23rd, 23rd of October. 25

1 MR. FEIN: I probably should clarify that one 2 thing. If, for example, let's say you do write 100 times, 3 let's just use that as an example, and each time you say I 4 would like -- I would like NSF to consider building this 5 facility on the moon, and you do that 100 times, we will respond to it collectively, not, you know, each time. There 6 7 is a -- you know, that is the question, and we will respond 8 to the question, but not 100 times. 9 MS. BURNS: Well, I wasn't planning on dragging 10 anything out. 11 MR. FEIN: No. 12 MS. BURNS: Thank you, 13 MS. MONRO: I don't usually speak in front of people. My name is Sharon Loando Monro. But I just wanted 14 15 to let you know, Suzanne, that you're welcome to take all of 16 the public comment sheets tonight since this is the last 17 meeting and please distribute it to anybody you want to and they can submit it back to us, okay. 18 19 MS. BURNS: Thank you. 20 MR. BRASS: So my understanding is that at this point, we're going to kind of take a break again. And the 21 22 representatives will still be here to answer questions and 23 if anyone else should sign up to provide comment, then we'll 24 receive that comment as well. 25 MR. MAYER: I made a comment during the break that

I need to make publicly on the record. The photos, the 1 pictures that are taken, the two of them that are again 2 3 aerial shoots are the same misleading type of photos -- it 4 gives you a nice dissection of the whole area. And that's fine, but the true pictures that we need to have are 5 pictures taken from ground level from the observatory at the 6 7 summit of Haleakala. In the draft document, there's some photos there, but when the public comes out and meets, they 8 9 see those. And certainly these are so much better quality 10 than are in the publication.

11 The original photos of pictures or diagrams that 12 are in the draft and eventually in the final should be from 13 ground level from the summit at the highest point there, 14 what would the tourists, the two million tourists a year that go up there actually see. That would be one thing. 15 16 And the second thing is I would like to know what the impact 17 would be on the national park and on the experience in the 18 national park of this observatory and the collective 19 assemblage of observatories that are being built up there. 20 Thank you.

21 MR. BRASS: Okay. So we're going to go into a 22 break, and please feel free to sign up if you would like to 23 if you haven't had a chance to make a comment and you would 24 like to or talk to any of the representatives here.

25 I'm just checking in with everyone to find out if

APPENDIX D(3): TRANSCRIPTS – DEIS PUBLIC COMMENT MEETING, KULA COMMUNITY CENTER, SEPTEMBER 29, 2006

anyone else would like to sign up to make comments this evening. Last call. Okay. So it appears there's no one else who would like to provide comments, so we're going to go ahead and close the meeting tonight. Thank you for coming. б (The meeting ended at 9:25 p.m.)
