

State of Hawai'i Ballast Water Data Q1

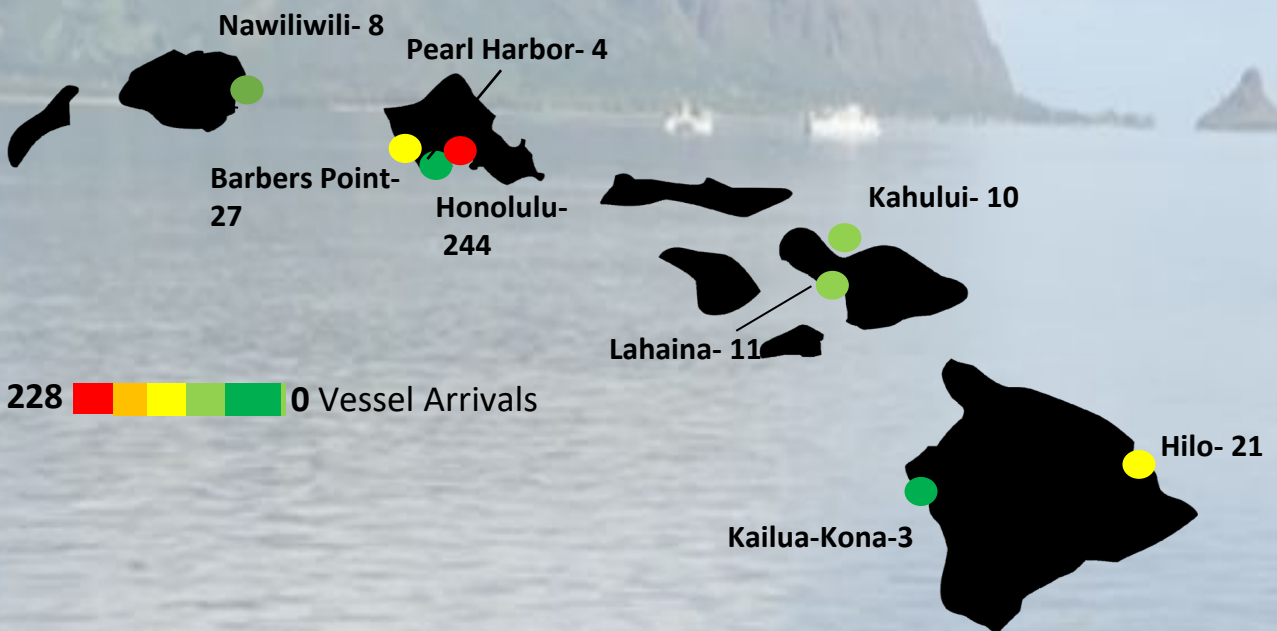

(January 1- March 31, 2023)

Overview

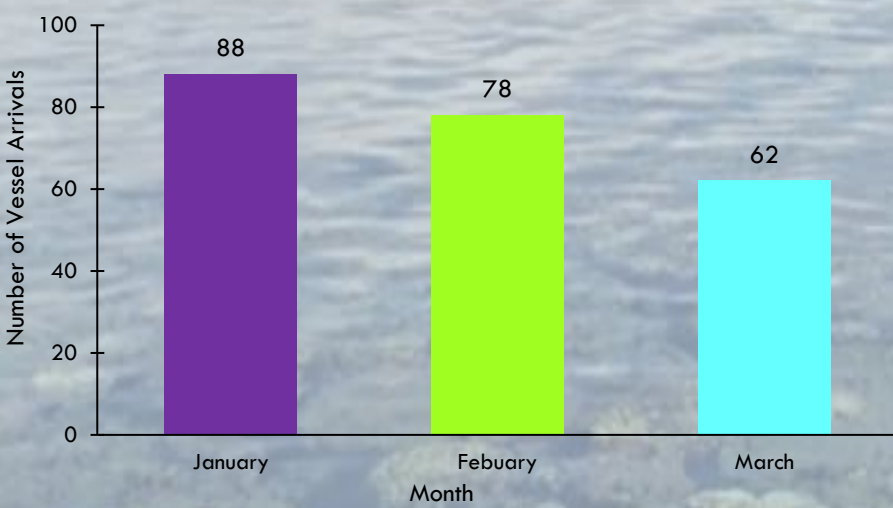

On August 10, 2017, the state of Hawai'i passed into law HAR §13-76 "Non-indigenous Aquatic Species" in the Hawai'i State Administrative Rules, which addresses ballast water regulation and authorizes the Department of Land and Natural Resources (DLNR) Division of Aquatic Resources (DAR) to collect ballast water data on vessels arriving overseas and conduct biosecurity risk assessments. Under the Hawaii State Administrative Rules, vessels are required to submit a Ballast Water Management Report 24 hours prior to their arrival in any Hawaiian port. This report provides us the information used to perform a primary assessment to review and assess possible risks.

	Q1	Q2	Q3	Q4	Total
Vessel Arrivals	228	-	-	-	228
Discharging Arrivals	7	-	-	-	7
Volume of Discharge (m ³)	13,314.7	-	-	-	13,314.7

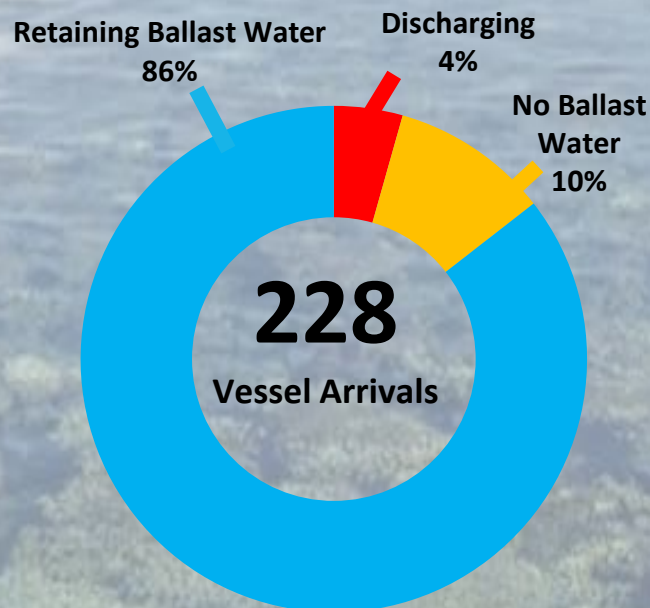

Where are vessels arriving?

Number of Vessel Arrivals per Month

Ballast Water Activity

Program Updates:

- Presented 2022 Vessel Data at the Pacific Ballast Water Group Meeting in Seattle, WA
- Collaborated with Pacific States on creating PAC-Dash, an online dashboard to share ballast data
- Participated in Bishop Museum's Science and Sustainability fair
