INTRODUCTION

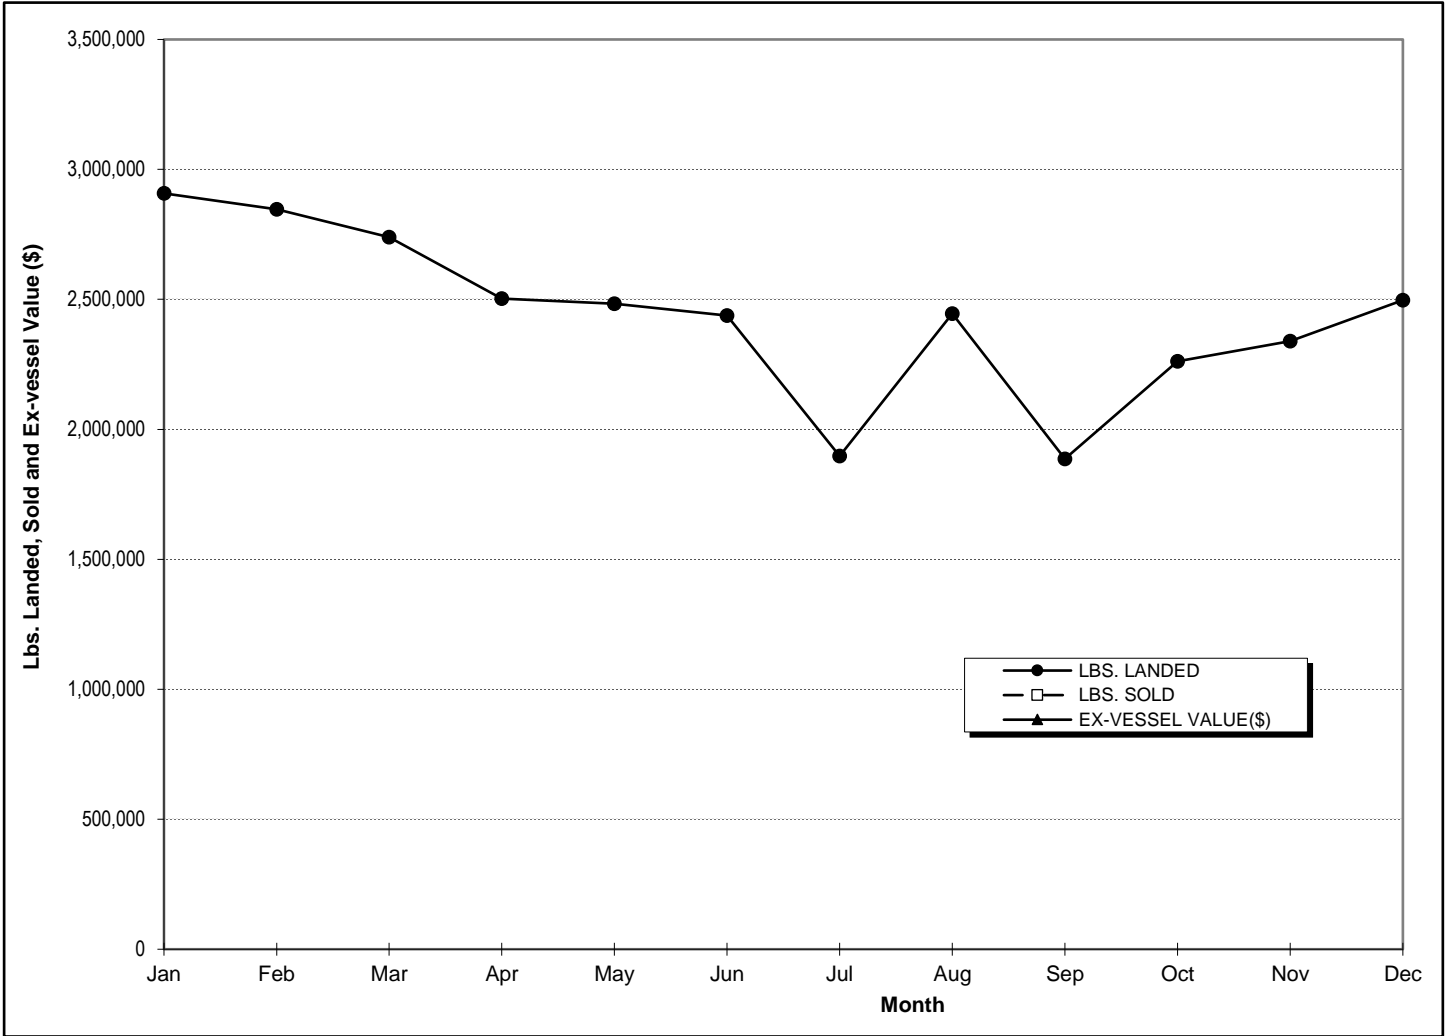

The information presented in this Commercial Marine Landing Summary Trend Report is compiled from fishing reports submitted by licensed fishermen. Commercial fishers are required to obtain commercial marine licenses and submit fishing reports to DLNR-DAR. In previous editions of these summary trend reports, including 1997 through 2001, only ex-vessel landing data (pounds sold and value of pounds sold) were reported. On October 2002, DLNR-DAR implemented new and revised commercial fishing report forms to improve the collection of fishing effort and total catch data. Since then commercial fishers no longer report ex-vessel landings on their fishing reports. The ex-vessel landing data are collected from commercial fish dealers. DLNR-DAR is in the process of integrating fishing effort and catch data from fishing reports with ex-vessel landing data from commercial marine dealer reports. Until this process is completed, ex-vessel landing information by fisheries will not be available. Therefore, this commercial marine landings summary trend report only contains catch data or pounds landed. When the data integration process is completed, this summary trend report will be revised and the catch data will be replaced with ex-vessel value landing data.

Other things to note:

Data collection and management of commercial fish landings data are a dynamic process. DLNR-DAR staff are continually reviewing information and making edits to ensure data accuracy. Due to ongoing quality control and data edits, values from previous years may differ. Data may be incomplete due to late submission and processing of fish catch records.

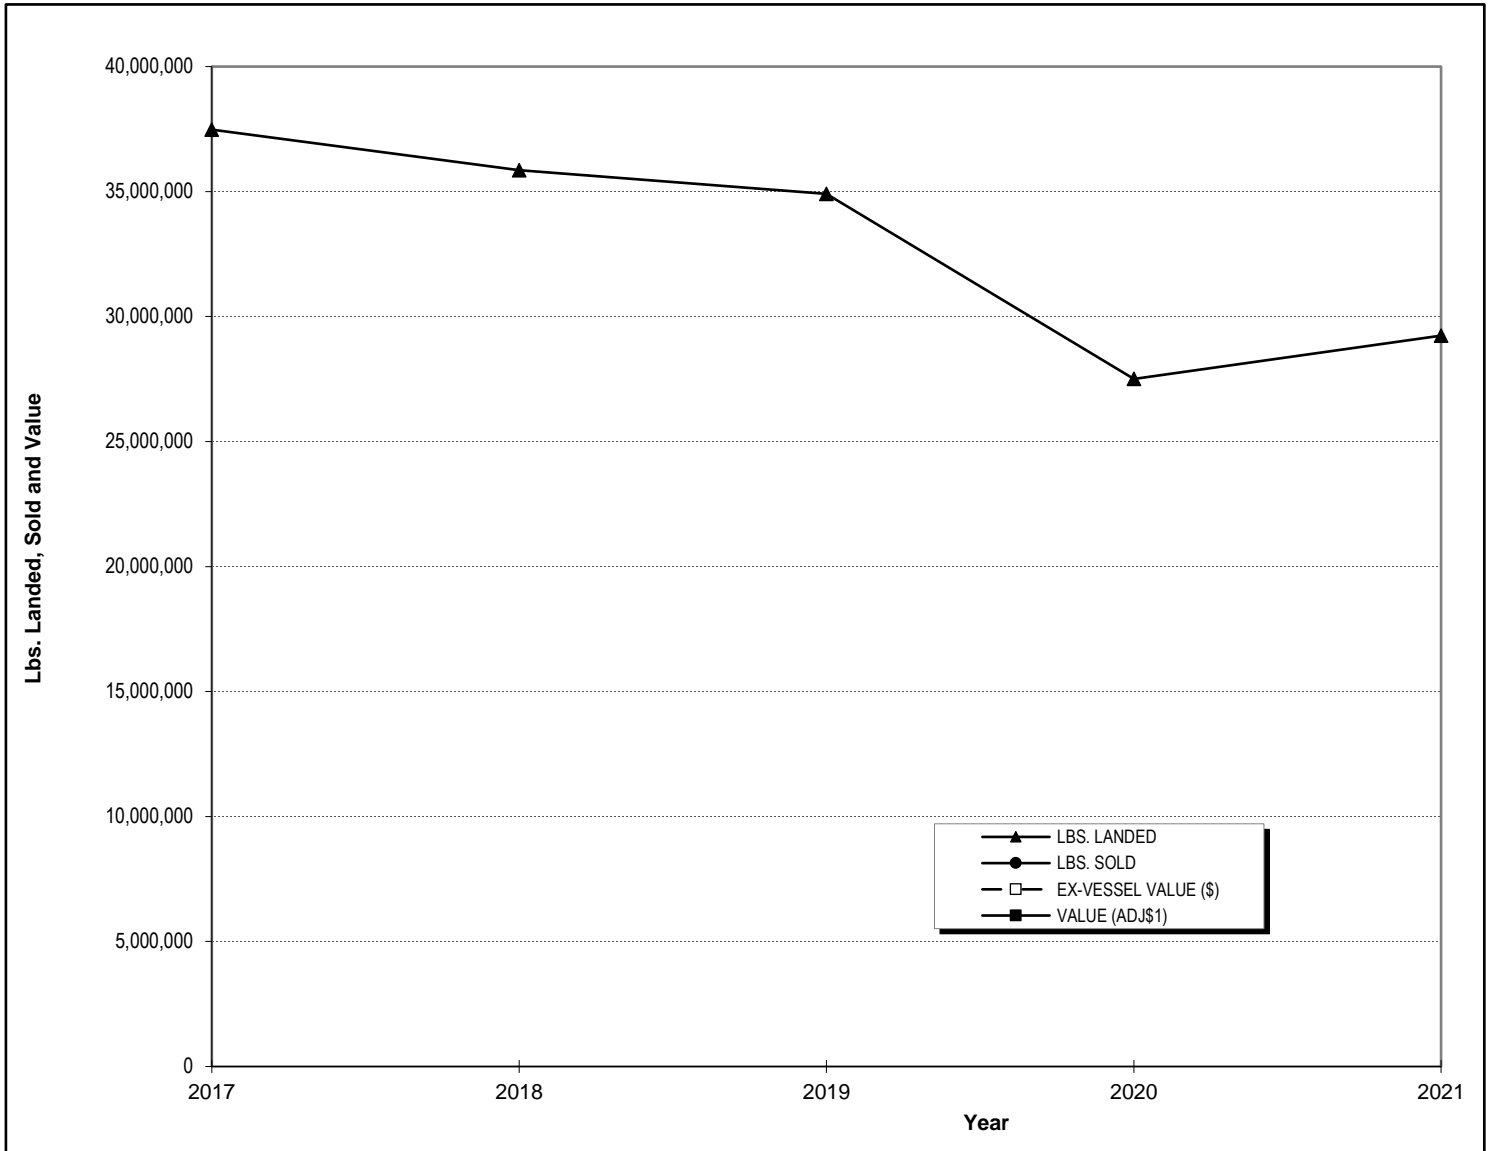

This summary report does not include collections of shells or aquarium fishes. Both shells and aquarium fishes are reported by numbers as opposed to pounds and therefore not consistent with the format of this landings report. Additionally, longline reports exclude landings of lancetfish, snake mackrel, and ribbonfish.
