ALL ABOUT 'ŌPAE 'ULA

- 'Ōpae 'ula are a small species of shrimp found in Hawai'i and nowhere else in the world!
- 'Ōpae 'ula live in anchialine pools. Anchialine pools are bodies of water at the shore that are connected to the ocean. The water level in an anchialine pool goes up and down with the tide.
- 'Ōpae 'ula can grow up to 1.5 centimeters in length, but are usually smaller.
- 'Ōpae 'ula feed on algae and utilize the oxygen that the algae creates when it photosynthesizes (makes its own food using sunlight and carbon dioxide).
