

## All about Pu'u Koa

Pu'u koa are Hawai'i's largest *tree* bug. They live on *koa*, a native tree in Hawai'i. They also live on **KOAI'A** (a close cousin of the koa tree), and a native shrub called '**A'ALI'I**'.

Pu'u koa can be **GREEN** with red markings, *red* with green markings, or **BLUE!** No matter what color they are, they are all *glittering* and *metallic!*

Pu'u koa eat using their **PROBOSCIS**, a special mouth part used for *piercing* and *sucking* the sap out of young koa **SEEDS**.
