

WHAT YOU CAN DO TO HELP PREVENT THE SPREAD

PLACE STAMP
HERE

ADDRESS:

'Ōhi'a lehua (*Metrosideros polymorpha*) is the backbone of Hawai'i's native forests and watersheds which are our source of fresh water. A newly identified disease known as **Rapid 'Ōhi'a Death (ROD)** is caused by a **fungus** called *Ceratocystis fimbriata*. ROD has killed thousands of 'ōhi'a trees across the island of Hawai'i. We can all help **prevent the spread of ROD**.
