Scenic Route

‘Ōhi‘a for Our Future
The race to a healthy ‘ōhi‘a forest

Rapid ‘Ōhi‘a Death (ROD)

ROD is caused by a fungus that has killed a great number of ‘ōhi‘a trees across Hawai‘i Island. The most important thing we can do is help prevent ROD from spreading.

Clean your boots, tools, and gear!

Reduce the Spread of ROD

Spray with 70% Rubbing Alcohol

Place Cards Here

Department of Land and Natural Resources
Division of Forestry and Wildlife

Good Job! You have disinfected your gear.

Pick up card

ROD infected area! Remain here until you roll a “5” 3 ROLLS PER TURN

ROD infected area! Remain here until you roll a “5” 3 ROLLS PER TURN

Welcome to a healthy ‘Ōhi‘a Forest!

Please keep our forests healthy for future generations.
