

Testimony

Unless the gov is helping the citizens to help the gov to respond to the CRB problem, it is just going to get bigger and bigger. The public needs an economical way to treat their own trees so that the gov can focus on the public areas!!

....that's the only point I want to drive home...The average citizen cannot afford to treat their own trees as it is too expensive. We need solutions here. I have been battling them in my yard with everything I have!!!
