

Maui Holomua TalkStory Community Input

A. Maui's marine status today as I see it...

Please share your mana'o on the current state of Maui's fish stocks, marine life, and nearshore reef.

SPECIES AT-RISK OR OF CONCERN:
In my observations, these species of fish or marine life are in decline, dying off or at-risk

SPECIES THRIVING:
In my observations, these species of fish or marine life are thriving and I believe these species are NOT being overfished or over-harvested.

Use markers on the map below to indicate the following types of areas and include detailed notes to help us understand why you marked the area(s). Please use colors indicated below to indicate status of various areas.

HIGH ALERT: AREAS AT-RISK OR OF CONCERN
Use a red or orange marker to mark locations where you believe there are significant threats to resources. Please include details to help understand your concerns.

AREAS TO WATCH
Use a blue or purple marker to mark locations where you believe there may be emerging threats to resources. Please include details to help understand your concerns.

THRIVING AREAS
Use a green marker to mark locations where you believe there are no threats and should remain unperturbed. Please include details to help understand your concerns.

HANA

B. Today, I am inspired by....

Please share what, if anything, you heard, saw or learned today that resonated with you, inspired you and/or should be considered in Maui's marine management for the future.

Out sail down one bay, cause then people will hop over to someone else's area to fish.

Certain areas are for rule making packages (kipalau) - need to be all aware of the whole package.

This area is thriving for opahi so can go there but not for other resources.

We all shooting for same goal = resources available, but the individual packages are going to differ

C. Let's make Maui's Navigation Team...

What will they do? They will work together as a team to review science, Maui data and community input, then set management goals and design a network of fishing regulations and management priorities for Maui's nearshore reef. (Management can include education, signage, enhanced outreach, restoration and additional monitoring.)

Maui's Navigation Team Members should be (?) :

An ideal person to serve on the Navigation Team would be:
A Maui local : Lives on Maui

A fisherman, or other resource user, with first-hand knowledge and expertise:

- Actively participates in fishing or other ocean-based activity
- Familiar with Maui's geography, reefs, nearshore waters and ocean resources

Well - respected in their representative group with a strong network:

- Has good relationships with the resource user community they represent
- Willing and able to serve as a bridge between their community and the Navigation Team, including sharing perspectives, ideas and feedback.

Open-minded, collaborative and willing to focus on developing solutions:

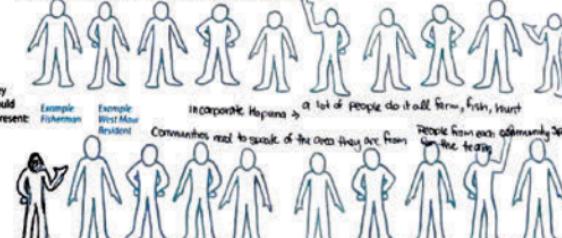

- Able to consider and balance local regional perspectives with diverse Maui-wide perspectives
- Flexible and able to work collaboratively.

Committed to participating fully

- Supports the purpose and goal of the Holomua Initiative
- Digitally connected, willing and able to access Zoom and digital tools.
- Available for four half-day virtual meetings each month from Jan - May.
- Willing to stand with the Navigation Team and present Navigation Team's draft proposal with larger public before it's finalized.

Team Composition...

We hope to enlist up to 20 members to form Maui's Holomua Navigation Team. Together, they will represent all of Maui's people who currently fish or engage with Maui's ocean resources. What type of fishing, ocean user, region or interest might they represent?

Which qualifications for Members, if any, is essential and should be preserved as the Navigation Team can best represent Maui's ocean resource users?

Born & raised - descendants of the area actively fishing (or not) the knowledge from the past of the particular area

Which qualifications for Members, if any, should be eliminated, changed or added to the Navigation Team can best represent Maui's ocean resource users?

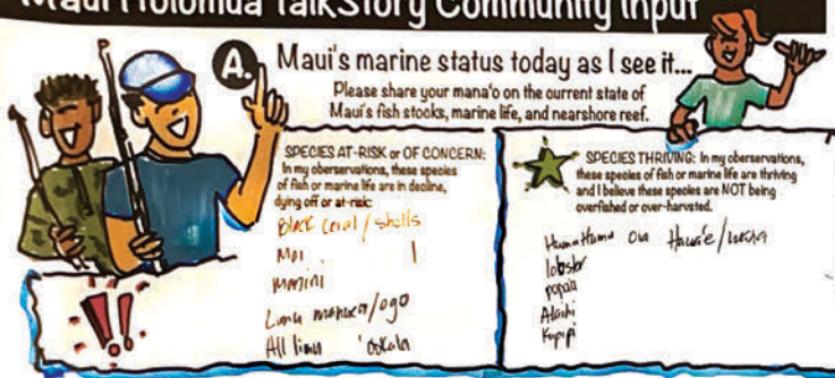

Kanaki Lal
Hank Ihara
Lester Laiisi
Claudie Kalakau

KOOLILOHA - No land can be grandfathered in partnership with local communities

Try ask these folks...

Who do you think would be a good candidate to consider including on this team? Please include their full name, why you think they would be a good fit and information that may help us connect with them. (Feel free to include yourself if you are interested!)

Use markers on the map below to indicate the following types of areas and include detailed notes to help us understand why you marked the area(s).
Please use colors indicated below to indicate status of various areas

AREAS OF CONCERN
Use a red or orange marker to mark an area or concern area you believe are at risk and deserve more attention. Please include details so we can understand your concerns.

AREAS TO MARK
Use a blue or green marker to mark an area or concern area you believe are declining, but need some focus to maintain its health. Please include details so we can understand your concerns.

THRIVING AREAS
Use a green marker to mark an area or concern area that are thriving, and should remain unimpeded. Please include details so we can understand your concerns.

No financial tour fishing in Hana District

HĀNA

B. Today, I am inspired by....

Please share what, if anything, you heard, saw or learned today that resonated with you, inspired you and/or should be considered in Maui's marine management for the future.

- advance Kipahulu CSFA
- open and closed seasons
- more scientific studies
- Respecting Kanaka cultural rights
- Bag limits
- methods of fishing (net, pole, scuba...)
- net size limits?
- Ko'e size limits

C. Anything else to share?

What else?
Other ways the community can or should be involved in this process?
What's missing?

- + who chooses the finalist for the navigation team?
- + wait for comment on the chapter 91 process...
- + charge fees to commercial fishing license to tourist fishing (non resident license)
- + don't leave alone the ~~MMI~~ stones
- + no aquarium fishing
- + no tour commercial fishing (tour bus)

C. Let's make Maui's Navigation Team...

What is the Maui Navigation Team? The Maui Navigation Team will represent Maui ocean users who currently fish or engage with ocean resources from Maui's nearshore waters and who want to ensure future generations are able to do the same.

What will they do? They will work together as a team to review science, Maui data and community input, then set management goals and design a network of fishing regulations and management priorities for Maui's nearshore reef. (Management can include education, signage, enhanced outreach, restoration and additional monitoring.)

Maui's Navigation Team Members should be (?) :

An ideal person to serve on the Navigation Team would be:

A Maui local : Lives on Maui

A fisherman, or other resource user, with first-hand knowledge and expertise:

- Actively participates in fishing or other ocean-based activity
- Familiar with Maui's geography, reefs, nearshore waters and ocean resources

Well-respected in their representative group with a strong network:

A. Maui's marine status today as I see it...

Please share your mana'o on the current state of Maui's fish stocks, marine life, and nearshore reef.

SPECIES AT-RISK OR OF CONCERN:
In my observations, these species of fish or marine life are in decline, dying off or at-risk:

- Blue Marlin
- Yellowtail
- Sea turtle
- Kīlauea
- Monk seal
- Green sea turtle
- Monk seal
- SSI

SPECIES THRIVING: In my observations, these species of fish or marine life are thriving, and I believe these species are NOT being overfished or over-harvested.

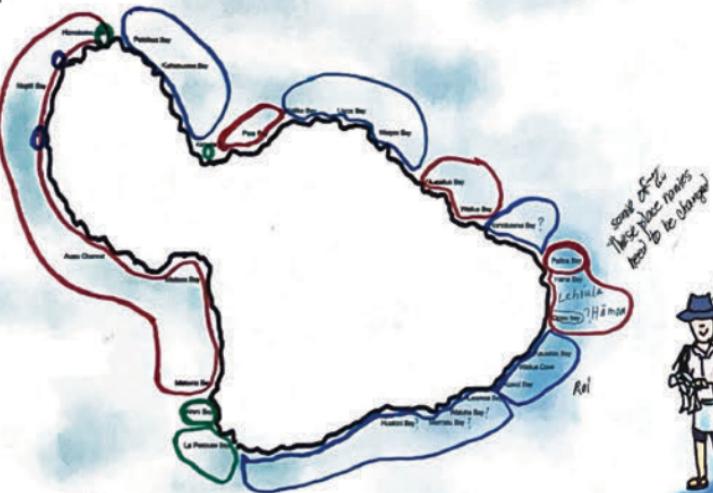

- Ahi
- Koi
- Tuna
- Tuna
- Eels
- Marlin

Use markers on the map below to indicate the following types of areas and include detailed notes to help us understand why you marked the area(s).

HIGH ALERT AREAS AT-RISK OR OF CONCERN:
Use a red marker to mark areas you believe deserve more attention. Please include details to further explain your concerns.

DISTURBANCE:
Use blue purple marker to mark areas you believe are changing, but need some time to see what happens. Please include details to further explain your concerns.

THREATS:
Use a person's mark to indicate areas where threats are likely to affect our ocean resources.

HĀNA

B. Today, I am inspired by....

Please share what, if anything, you heard, saw or learned today that resonated with you, inspired you and/or should be considered in Maui's marine management for the future.

TBD :)

C. Anything else to share?

What else?
Other ways the community can or should be involved in this process?
What's missing?

- MAKE sure to consider land-based sources of nearshore stress. Mana'a to natural approach (river runoff, sedimentation)
- Tourist overflow areas (ex reservation system for Wai'anae) has caused more tourists to overflow into other important/traditional places in East Maui & Lanai
- make sure funding is continued once plans in place (enforcement) team to continue communication with community

C. Let's make Maui's Navigation Team...

What is the Maui Navigation Team? The Maui Navigation team will represent Maui ocean users who currently fish or engage with ocean resources from Maui's nearshore waters and who want to ensure future generations are able to do the same.

What will they do? They will work together as a team to review science, Maui data and community input, then set management goals and design a network of fishing regulations and management priorities for Maui's nearshore reef. (Management can include education, signage, enhanced outreach, restoration and additional monitoring.)

Maui's Navigation Team Members should be (?):

An ideal person to serve on the Navigation Team would be:

A Maui local : Lives on Maui

A fisherman, or other resource user, with first-hand knowledge and expertise:

- Actively participates in fishing or other ocean-based activity
- Familiar with Maui's geography, reefs, nearshore waters and ocean resources

Well - respected in their representative group with a strong network:

- Has good relationships with the resource user community they represent
- Willing and able to serve as a bridge between their community and the Navigation Team, including sharing perspectives, ideas and feedback.

Open-minded, collaborative and willing to focus on developing solutions:
Able to consider and balance local regional perspectives with diverse Maui-wide perspectives

- Flexible and able to work collaboratively.

Committed to participating fully

- Supports the purpose and goal of the Holomua Initiative
- Digitally connected, willing and able to access Zoom and digital tools
- Available for four half-day journal meetings each month from Jan - May
- Willing to stand with their Navigation Team and present Navigation Team's draft proposal with larger public before it's finalized.

Team Composition...

We hope to enlist up to 20 members to form Maui's Holomua Navigation Team. Together, they will represent all of Maui's people who currently fish or engage with Maui's ocean resources. What type of fishing, ocean user, region or interest might they represent?

They should represent:

Example Fisherman

Example West Maui Resident

- diff type of user

- diff age groups

- diff gender

- cultural practitioner

- Hank Eharihi - Hāna local

- Russel Stoner - Maui local

They should represent:

Conservationists

Scientists who can communicate well

- educators

- focus on Maui people, fish & brush out if need to

Which qualifications for Members, if any, is essential and should be preserved to the Navigation Team can best represent Maui's ocean resource users?

Which qualifications for Members, if any, should be eliminated, changed or added to the Navigation Team can best represent Maui's ocean resource users?

The level of participation required eliminates key people whose voices should be heard. Can you offer alternative means or just no to voice? People with no voice to list are so many! Already doing the work that's a lot/lots of time @ can provide compensation? That would be a game-changer!

Try ask these folks...

Who do you think would be a good candidate to consider including on this team? Please include their full name, why you think they would be a fit and information that may help us connect with them. (Feel free to include yourself if you're interested)

- Sot Keli'i

- Sot Keli'i whakalauha - Lāna'i raised, good communicator, global conservation work but also locally active known policy

- Hank Eharihi - Hāna local, boats in the ground, long time authentic

- Bailey Spy - young, educated, driven, willing to learn, works within the community

- Fawn Helekaiki - cultural practitioner, communicator

- Malia Alea Fahamana - teacher

- Russel Stoner - Maui local
