

Regarding Mauna Kea site visit September 26, 2016

Harry Fergerstrom has only one area that he may share on this date that is particularly connected to the TMT site. The location is very close to the entrance of the proposed TMT site. Mr Fergerstrom is aware of many sacred sites on the summit that are used by different persons at various times.

Because of the sacredness of the summit, it would be a breach of trust to show those sites.

I am able to speak of the sacredness of the Northwestern plateau and it's light connection that spans the island chain. I can speak of several burials at the site as well as speak on water caves (2).

Dated this day August 17, 2016
