# WAILEA AGREEMENT

---

Relating to the Disinterment and Reburial of  
Native Hawaiian Graves At the Site of the  
Grand Hyatt Wailea, Maui

---

---

MEMORANDUM OF AGREEMENT

Relating to the Disinterment and Reburial of  
Two Native Hawaiian Platform Graves At the Site of the  
Grand Hyatt Wailea, Maui

---

This Memorandum of Agreement (MOA) is concluded to fulfill the Shoreline Management Area permit condition regarding the disinterment and reburial of two historic-period platform graves on the grounds of the Grand Hyatt Hotel, Wailea project by the Maui Planning Commission.

The great likelihood that these graves held Native Hawaiians compelled the Office of Hawaiian Affairs to seek explicit assurances regarding the respectful treatment of the remains. Consistent with Office practice, every effort was made to locate family members and to honor their wishes. However, no known genetic family could be found.

This Agreement, then, is concluded by the Office of Hawaiian Affairs as the representative of the cultural Hawaiian family.

● GENERAL CONDITIONS

1. Any and all costs associated with the terms of this Agreement shall be borne by the Grand Wailea Company.
2. Before formal disinterment begins, a blessing will be conducted at the Wailea graves. This ceremony will not be publicized. Additional blessings before reburial begins and a closing ceremony will be conducted at the reinterment grounds.

● DISINTERMENT

1. Archaeological teams will adhere to the highest standards of professional conduct, displaying respect and sensitivity to the removal and curation of human remains;
2. Removal will retain individual integrity, and any associated burial artifacts will be retained and reburied with the individual;

3. Any osteological study shall be conducted by Project Archaeologists Paul H. Rosendahl, Inc. in a dignified manner to meet the needs of a reasonable scientific study, and a recognition of traditional Native Hawaiian beliefs and respect for ancestral bones.

4. Curation of the remains shall be on the Island of Maui, and only for the time necessary to allow for undisturbed reburial on the grounds of project.

5. Prior to the commencement of any grading work, all rocks and stones from the existing burial platforms shall be completely recovered from the site by hand and safely stored near the reburial site. Conspicuous marking and construction workforce education shall protect the stones from disturbance.

• REINTERMENT

1. The reburial site will be on the grounds of the project area identified on the accompanying map (ATTACHMENT 1).

2. Reburial will be of individuals, wrapped in kapa with all associated burial artifacts.

3. Individuals will then be reburied underground. The association and arrangement of the burials within the reinterment site will approximate their original associations.

4. Reconstruction of the burial platforms (Attachment 2) over the graves will then be completed. This reburial site area will be landscaped and maintained.

5. An appropriate marker will be installed on the site and the inscription will be provided by the Office of Hawaiian Affairs in consultation with the company.

---

Terms and Conditions Relating to  
Previously Unknown Native Hawaiian Burials At Wailea

---

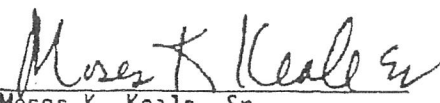

By mutual consent, the Grand Wailea Company and the Office of Hawaiian Affairs agree to expand this MOA to address culturally-sensitive and appropriate disinterment and reburial of previously unknown Native Hawaiian burials unintentionally disturbed by construction activities at the project site.

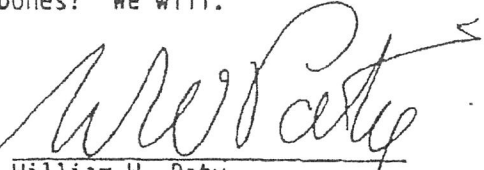

The "General Conditions" and "Disinterment" conditions numbered 1 through 4, and "Reinterment" conditions numbered 1 through 3 shall also apply to this section of the MOA. However, the following additional condition will further guide the respectful treatment of Native Hawaiian burials affected by the Grand Hyatt Wailea project.

• REINTERMENT

1. Once reburial of individuals is complete, an earth mound shall be formed to designate the reburial area. Green ti plantings will be incorporated into the landscaping of this area to further mark the reburial area.
