National Register of Historic Places Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in National Register Bulletin, How to Complete the National Register of Historic Places Registration Form. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions.

1. Name of Property
   Historic name: ___Harold and Lucille Headrick Residence _______
   Other names/site number: ___La Pietra Condominium Unit 7 ______________________
   Name of related multiple property listing: __________La Pietra Townhouse ______________________
   (Enter "N/A" if property is not part of a multiple property listing)

2. Location
   Street & number: ___3030 La Pietra Circle ______________________
   City or town: __Honolulu State: __Hawaii County: __Honolulu _______
   Not For Publication: ___ Vici

3. State/Federal Agency Certification
   As the designated authority under the National Historic Preservation Act, as amended,
   I hereby certify that this ___ nomination ___ request for determination of eligibility meets
   the documentation standards for registering properties in the National Register of Historic
   Places and meets the procedural and professional requirements set forth in 36 CFR Part 60.
   In my opinion, the property ___ meets ___ does not meet the National Register Criteria. I
   recommend that this property be considered significant at the following
   level(s) of significance:
   ___national ___statewide X ___local
   Applicable National Register Criteria:
   X A ___B ___C ___D

   ________________________________

Architectural Classification
(Enter categories from instructions.)

___Modern___
___Regional Hawaii___

Materials: (enter categories from instructions.)
Principal exterior materials of the property: ___lava rock walls, horizontal lap wood walls, poured concrete foundation.

Narrative Description
(Describe the historic and current physical appearance and condition of the property. Describe contributing and noncontributing resources if applicable. Begin with a summary paragraph that briefly describes the general characteristics of the property, such as its location, type, style, method of construction, setting, size, and significant features. Indicate whether the property has historic integrity.)

Summary Paragraph

The Harold and Lucille Headrick residence is situated in the La Pietra Townhouse complex, a quiet residential neighborhood on the western base of Diamond Head, between La Pietra and Kapiolani Park. It faces southeast and sits along La Pietra Circle on a flat parcel with its front lawn running to the street. It is the left half of a two-story, modern Hawaii style duplex which has lava rock walls on the first story and horizontal lap siding on the second. The unit is slightly recessed from its neighboring unit. The unit has a low pitched, Euroshield shingled, hip-gable roof with overhanging eaves and exposed rafter tails. The building sits on a poured in place reinforced concrete foundation. The two bedroom, two and a half bath townhouse has 2,228 square feet under roof, and is in excellent condition. It retains its historic integrity of location, setting, design, materials, craftsmanship, feelings and associations.
Narrative Description

The Harold and Lucille Headrick residence is located along the east side La Pietra Circle after its initial bend, facing southeast, opposite a large retaining wall, above which is La Pietra School for Girls. A broad, slate paved sidewalk runs from the street to the unit’s inset entry lanai.

The balanced, asymmetric façade of the unit is two bays wide with three projecting, 8’ high lava rock walls demarcating the bays, with a wall extending out from each corner of the unit and another from the middle. The left bay has a pair of sliding doors flanked by single pane fixed windows on the first story and a pair of single pane sliding doors on the second, which extend to the building’s top plate. A balcony projects from the interstice between the first and second stories and runs across the unit’s facade.

The right bay contains the right-of-center entry as well as a pair of single pane sliding windows. The entry is framed by the center projecting wall on its left side and a lava rock pilaster on the right. The windows, like all windows and exterior sliding doors in the townhouse complex, are bronze anodized aluminum, and if not original, replaced the originals in-kind. The entry lanai is sheltered by the projecting second story balcony.

A historic double door with recessed panels provides entry to the unit. The doors retain their original thumb latch and hardware. The doors open on a foyer with openings at either side.

At the foyer’s right (northeast) opening is a front to rear running hall that terminates at the dining area. A non-original hinged door in the southwest wall of the hall opens on a remodeled half bath. This room is an “island” around which flow the hallway, living room and dining area. In the hallway’s northeast wall a door similar to the half bath’s leads into a bedroom. The downstairs bedroom’s ceiling features three exposed, lateral running beams. In the southeast wall a pair of single pane sliding windows provides light and ventilation. New interior louvered shutters regulate the light. In the room’s northwest wall a non-original louvered door opens on the bathroom. The bathroom has been remodeled. The bedroom’s closet is behind a pair of wood, louvered, bi-fold doors immediately opposite the bedroom’s entry door.

The opening to the foyer’s left (southwest) leads into the living room. The living room has an 8’ high tray ceiling. At the front, southeast side, of the living room is a pair of 8’ high, single pane sliding doors, which are flanked on either side by a fixed single pane window. Three pairs of louvered bi-fold shutters control the light entering through these openings. The living room, as well as the entire first floor has a new wood laminate floor with a 4” high baseboard.

The rear, northwest, wall of the living room features a pair of 8’ high, single pane, sliding doors flanked by single pane fixed windows on either side. The doors lead out to a rear,
inset lanai. The lanai has a slate floor, which terminates approximately 3' into the back yard's lawn and provides a paved surface between the lanai and the living room doors. A second story balcony/deck extends across the rear of the unit and encompasses the roof over the lanai. The balcony is supported by lava rock walls at its termini, with their supporting beams extending beyond the ends of the walls. The rear yard is very shallow and slopes down to a mock orange hedge (*Murraya paniculata*) which sits on a 4' to 6'-3" high lava rock retaining wall.

On the interior, a 16" x 19" lava rock column marks the northwest terminus of the living room's rear wall, and to its northeast is the dining area and kitchen. The dining-kitchen area has an 8' high ceiling with four exposed beams running laterally across it. The kitchen runs along the northeast wall and has been remodeled. A louvered door in the kitchen's southeast wall opens on a laundry room.

The southwest wall of the dining-kitchen area is of lava rock and has a pair of 8' high single pane sliding doors, and the northwest wall has a similar pair of sliding doors flanked by single pane fixed windows. Both of these sets of sliding doors open on the lanai.

The northwest wall of the half bath island features a recessed, built-in cabinet. The cabinet is behind a non historic, wood straight run stairway which leads to the second floor. The stair has fifteen floating treads and a wood railing with glass panels. It accesses the completely remodeled second floor with its sitting room, one bedroom and bath. The stair opens on the sitting room, which is to the right (southwest) of the stairs. The sitting room runs the depth of the house and a built-in set of shelves and cabinets with an entertainment center runs the length of the southwest wall. A pair of single pane sliding doors flanked by fixed single pane windows are at either end of the room. Both sets of doors have four sets of wood, bi-fold shutters on the interior and lead out to balconies. The 52" wide balconies have 44" high metal railings, and run the length of the unit. The rear balcony/deck incorporates the roof of the first story's ground floor lanai and has a solid wood floor. It affords views of the lower portion of the townhouse complex and the ocean. The front balcony has a wood slat floor and overlooks La Pietra Circle.

To the left (northeast) of the stair an L-shaped hall with a non-historic louvered door at the northwest end of its northeast wall opens on the master bedroom and bath. Built-in cabinets, drawers and shelves dominate the northeast wall. In the bedroom's northwest wall is a pair of 7' high, single pane sliding doors flanked by single pane fixed windows, which access the rear balcony/deck. In addition to the door's exterior sliding screen doors, four sets of interior, louvered, bi-fold shutters control the light entering the room. In the bedroom's southeast wall a louvered door opens on a hall to the bathroom, which runs to the front of the unit. The northeast wall of the hall is dominated by mirrored, sliding, closet doors. The bathroom has marble floors and granite walls and counter tops. A pair of single pane sliding doors in the bathroom's southeast wall open on the
The Harold and Lucille Headrick residence retains its historic integrity. Alterations include the refinishing of the first floor walls and floor, the remodeling of the kitchen and bathrooms, extension of the second floor over the living room, and the remodeling of the stair and second floor. These alterations are typical interior modifications similar to others found in many of the units in the La Pietra townhouse complex and do not compromise the historic character of the units within the complex. The original spatial configuration and the indoor/outdoor relationships of the unit remain intact and readily recognizable as do the exterior massing, sliding doors, windows, and appearance.
8. **Statement of Significance**

**Applicable National Register Criteria**
(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

- [x] A. Property is associated with events that have made a significant contribution to the broad patterns of our history.

- [ ] B. Property is associated with the lives of persons significant in our past.

- [x] C. Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.

- [ ] D. Property has yielded, or is likely to yield, information important in prehistory or history.

**Criteria Considerations**
(Mark “x” in all the boxes that apply.)

- [ ] A. Owned by a religious institution or used for religious purposes

- [ ] B. Removed from its original location

- [ ] C. A birthplace or grave

- [ ] D. A cemetery

- [ ] E. A reconstructed building, object, or structure

- [ ] F. A commemorative property

- [ ] G. Less than 50 years old or achieving significance within the past 50 years

**Areas of Significance**
(Enter categories from instructions.)

  - Architecture
  - Community Planning and Development

Statement of Significance Summary Paragraph
(Provide a summary paragraph that includes level of significance, applicable criteria, justification for the period of significance, and any applicable criteria considerations.)

The Harold and Lucille Headrick residence is significant on the local level under criterion C, as a good example of a luxury townhouse unit built in Honolulu during the late 1960s in a modern Hawaii style. The unit includes a number of distinctive features and is typical of its period in its design, materials, workmanship and methods of construction. The townhouse is also significant at the local level under criterion A for its associations with the development of townhouse complexes in Hawaii and its associations with the historic preservation movement.

The 1967-1971 period of significance was chosen in accordance with the instructions on how to complete a national register nomination form provided in National Register Bulletin 16A: “For architecturally significant properties, the period of significance is the date of construction.” As noted above, under significant dates, 1971 is the date of
Headrick Residence Honolulu Hawaii

construction. The bulletin further states, “For properties associated with historic trends, such as commercial development, the period of significance is the span of time when the property actively contributed to the trend.” As is noted above under, “significant dates”, 1971 is the year of construction, and 1967-1970 are the years in which historic preservation concerns were raised and resolved.

Narrative Statement of Significance (Provide at least one paragraph for each area of significance.)

The Harold and Lucille Headrick residence’s architectural significance, as well as its associations with townhouse development in Hawaii and historic preservation in Hawaii, are explained in the La Pietra Townhouse multiple property nomination.

The deed to unit 7 of the La Pietra Townhouse development was conveyed to Harold and Lucille Headrick in June 1972. Harold Headrick was the vice president of Headrick Development Company, with his brother R. George Headrick serving as president. Headrick Development Company was the general contractor for La Pietra Townhouses. Harold Headrick came to Hawaii in 1941, and in 1949 was ordained as a minister in the Assembly of God Church. He was superintendent in charge of constructing churches in Hawaii and the Pacific Rim, until 1963, and continued as assistant superintendent until 1968.
