I. CALL TO ORDER

II. ROLL CALL/PULE

III. MINUTES

A. Approval of the Minutes for December 18, 2025.

IV. NEW BUSINESS

A. Discussion Regarding the Burial Sites Working Group.

B. Discussion and Determination of the Lineal Descendancy Recognition Application of the Applicant, Zae-Michael M. Apele, to Unidentified Native

Hawaiian Skeletal Remains, SIHP # 50-10-45-31430, Located at 15-1570 Maku'u Drive, Hawaiian Paradise Park, Waikahekahe Ahupua'a, Puna District, Island of Hawai'i, TMK: (3) 1-5-023:040.

The Council may elect to go into executive session pursuant to HRS § 6E-43.5(e). The Council may close a meeting whenever location or description of a Native Hawaiian Burial site is under consideration. The chairperson, by concurrence of a majority of members present at the meeting, shall be authorized to require the public to leave the meeting while the confidential matter is being discussed and reopen the meeting once the confidential matter is no longer being considered.

- C. Discussion and Determination of the Lineal Descendancy Recognition Application of the Applicant, Eranious McNeil Murray, to Keakaonalii, Interred at Family Burial Cave, Kolomikimiki, SIHP # 50-10-18-18545, Located at, Kaulana Ahupua'a, North Kona District, Island of Hawai'i, TMK: (3) 7-2-005:004.**

The Council may elect to go into executive session pursuant to HRS § 6E-43.5(e). The Council may close a meeting whenever location or description of a Native Hawaiian Burial site is under consideration. The chairperson, by concurrence of a majority of members present at the meeting, shall be authorized to require the public to leave the meeting while the confidential matter is being discussed and reopen the meeting once the confidential matter is no longer being considered.

- D. Discussion Regarding the Presentation by Office of Hawaiian Affairs on their 2026 Legislative Package, House Bill 2104/Senate Bill 2538 and House Bill 2102/Senate Bill 2536, Relating to the Island Burial Councils and Historic Preservation.**

V. INADVERTENTS/COMMUNICATIONS

- A. Discussion Regarding Inadvertent Discovery of Human Skeletal Remains on the Hawai'i Preparatory Academy Upper Campus, Kauniho and Waiaka 2nd Ahupua'a, South Kohala District, Island of Hawai'i TMK: (3) 6-5-001:033.**
- B. Discussion Regarding Letter from County of Hawaii Department of Public Works, Dated December 30, 2025, Pertaining to Section 106 Consultation of Safe Routes to Waiakea Schools.**
- C. Discussion Regarding Letter from Bowers + Kubota, Dated January 7, 2026, Pertaining to the Section 106 Consultation State Hawaii Public Housing Authority's 2025 Environmental Review Project.**
- D. Discussion Regarding Letter from Department of Transportation, Dated January 16, 2026, Pertaining to the Section 106 Consultation for Hawaii Belt Road Guardrail and Shoulder Improvements Vicinity of Kaaluu Bridge to Kuwaikahi Stream Bridge.**

VI. ANNOUNCEMENTS

- A. The Next HIBC Meeting is scheduled for Thursday, March 19, 2026, 9:30 A.M., TBD.**

VII. ADJOURNMENT

To Provide Written Testimony:

We encourage interested persons to submit written testimony in advance of the meeting, which will be distributed to Board members prior to the meeting and allow a timely review. Please submit written testimony via email to: traven.apiki@hawaii.gov. Written testimonies can also be mailed to: 40 Po'okela Street, Hilo, HI 96720. Written testimonies may be posted upon the HIBC meeting website; as a precaution, please be mindful with any personal information prior to submitting unless you intend it to be shared. Late written testimony will be retained as part of the record and distributed to HIBC members as soon as practicable, but we cannot ensure the HIBC will receive it in sufficient time to review, prior to decision-making.

To Provide In-Person Oral Testimony:

Attend in-person at: 19 E. Kāwili Street, Hilo HI 96720.

To Provide Testimony by Telephone:

On the day of the meeting at the start of the agenda item you wish to testify on, dial +1 253-205-0468 and follow the prompts.

To Provide Video/Zoom Testimony:

Please send your request in a timely manner to: traven.apiki@hawaii.gov with your information, email address, and the agenda item you wish to testify on. Once your request has been received, you will receive a confirmation email with pertinent information. You may testify without signing up in advance.

We kindly ask that all oral/video testimony be limited to not more than three (3) minutes. We ask that you identify yourself and any affiliation before speaking, but you can choose not to do so.

Pursuant to HRS § 92-3, all interested persons shall be afforded an opportunity to present oral testimony or submit data, views, or arguments, in writing on any agenda item. Public Testimony for items listed on the agenda is strongly recommended to be limited to three minutes per agenda item. We ask that you identify yourself and any affiliation before speaking, but you can choose not to do so.

The HIBC may go into Executive Session pursuant to HRS § 92-5(a)(4), to consult with its attorney on questions and issues pertaining to the Board's powers, duties, privileges, immunities, and liabilities.

Pursuant to HRS § 6E-43.5(e), the council may hold a closed meeting if the location and description of a burial site are under consideration.

Pursuant to §92-2.5(d) HRS, if a meeting must be cancelled due to lack of quorum, the present council members may elect to continue to receive testimony and presentations on items on the agenda.

It is strongly recommended that any member of the public who requests an item to be placed on a burial council meeting agenda must make this request with the Burial Sites Program staff at least two weeks preceding the scheduled meeting date. This request shall be accompanied by all related documents. Failure to comply with this procedure may delay the item to the following month's agenda.

Materials related to items on the agenda are available for review at the State Historic Preservation Division located at 40 Po'okela St., Hilo, HI 96720.

If you need an auxiliary aid/service or other accommodation due to a disability, please contact (808) 829-9322 or traven.apiki@hawaii.gov as soon as possible. Requests made as early as possible have a greater likelihood of being fulfilled. Upon request, this agenda and other materials are available in alternate/accessible formats.

January 13, 2026

PROJECT NO: 2024PR00161
DOC NO: 2601TA03

TO: Hawai'i Island Burial Council Members

FROM: Jessica Puff, State Historic Preservation Administrator

SUBJECT: **Descendancy Recognition Application of Zae-Michael M. Apele to Unidentified Native Hawaiian Skeletal Remains, SIHP # 50-10-45-31430, Located at 15-1570 Maku'u Drive, Hawaiian Paradise Park, Waikahekahe Ahupua'a, Puna District, Island of Hawai'i, TMK: (3) 1-5-023:040.**

For the purpose of establishing and substantiating a lineal descendant claim to the human skeletal remains, located at the above property, the named individual, below, has submitted an application to the Department of Land and Natural Resources, State Historic Preservation Division (SHPD) for assessment and verification pursuant to Hawai'i Administrative Rules §13-300-35.

Lineal descendant means with respect to Native Hawaiian skeletal remains, a claimant who has established to the satisfaction of the council, direct or collateral genealogical connections to certain Native Hawaiian skeletal remains.

Based on the above definition, the applicant has not provided any kind of evidence that would indicate a direct or collateral genealogical connection to the unidentified Native Hawaiian skeletal remains, SIHP # 50-10-45-31430.

Therefore, the SHPD recommends deferral of this lineal descendancy claim.

Should you have any additional questions or concerns, please contact our Hawai'i Island Burial Sites Specialist, Traven Apiki at traven.apiki@hawaii.gov.

PROJECT NO:
DOC NO: 2602TA01

TO: Hawai'i Island Burial Council Members

FROM: Jessica Puff, State Historic Preservation Administrator

SUBJECT: **Lineal Descendancy Recognition Application of Eranious M. Murray II to Keakaonalii, Interred at Family Burial Cave, Kolomikimiki, SIHP # 50-10-18-18545, Located at, Kaulana Ahupua'a, North Kona District, Island of Hawai'i, TMK: (3) 7-2-005:004.**

For the purpose of establishing and substantiating a lineal descendant claim to the human skeletal remains, located at the above property, the named individual, below, has submitted an application to the Department of Land and Natural Resources, State Historic Preservation Division (SHPD) for assessment and verification pursuant to Hawai'i Administrative Rules §13-300-35.

The Administrative Rules require that the applicant provide evidence of direct or collateral genealogical connections to certain Native Hawaiian skeletal remains. In this case, the applicant has submitted information genealogically connecting himself to the Native Hawaiian skeletal remains of Keakaonalii, who is interred at the above location.

Therefore the SHPD recommends that the HIBC recognize Eranious M. Murray II as a lineal descendant to the above named individual.

Should you have any additional questions or concerns, please contact our Hawai'i Island Burial Sites Specialist, Traven Apiki at traven.apiki@hawaii.gov.

TO 136, 141 TO 142; (3) 2-4-045: 065

On behalf of the Federal Highway Administration (FHWA), the County of Hawai'i Department of Public Works (DPW) is hereby notifying you that on December 10, 2025, Section 106 of the National Historic Preservation Act (NHPA) of 1966 (amended, 2006), was amended revising the scope of work for the subject Safe Routes to School project with the Department of Land and Natural Resources State Historic Preservation Office (SHPO). The previous consultation with the SHPO, did not include the installation of waterlines throughout the Area of Potential Effect

(APE) as a part of the original scope of work. The additional waterlines are located within the previously disturbed travel way and will require an excavation of no more than 12 feet.

This proposed federally funded DPW project is considered a federal action and undertaking, as defined in 36 *Code of Federal Regulations (CFR)*, Part §800.16(y). Effective May 1, 2016, FHWA has issued a Programmatic Delegation of Authority allowing the HDOT and local public agencies to conduct NHPA Section 106 consultations with the SHPO, Native Hawaiian Organizations (NHO), and other consulting parties per 36 *CFR*, Section 800.2 (c) (4). The FHWA will remain responsible for all findings and determinations charged to the agency during the Section 106 process.

Consultations

Entitled consulting parties during the Section 106 process includes the Advisory Council of Historic Preservation, SHPO, NHO, and if applicable, local governments and applicants for federal assistance, permits, licenses and other approvals.

NHO and/or Hawaiian Descendants

NHO and Native Hawaiian descendants with ancestral, lineal or cultural ties to, cultural and historical property knowledge of and/or concerns for, and cultural or religious attachment to the proposed APE are asked to provide a response to this letter within 30 days of notification.

Other Individuals and Organizations

Individuals and organizations with legal, economic, or historic preservation interest are requested to respond within 30 days of notification and demonstrate your interest in the proposed undertaking and provide intent to participate in the Section 106 process. Your participation is subject to FHWA approval.

Request for Comment on the Area of Potential Effect (APE)

There are no changes to the Area of Potential Effects (APE) in the proposed Safe Routes to School project. The APE will remain along Kilauea Avenue approximately 1.75 miles between Ohea Street and Haihai Street. The ground in this area has been previously disturbed. The construction work will involve the installation of sidewalks, bicycle lanes, retaining walls, and drainage improvements along the road shoulders. The drainage improvements include the installation of drywells of 5' diameter and approximately 28' deep.

Construction staging and parking areas will be restricted to the project area ROW. Construction activities will extend the APE into private property at limited points along the roadways. On Kilauea Avenue, the limits of grading will extend from the edge of the existing pavement to a maximum of approximately 27 ft. along the roadway.

There will be an addition of new waterlines that are to be installed along Kilauea Avenue, replacing the existing watermain that will be abandoned in place. The vertical profiles for the new waterlines have not been finalized, but they will generally be designed with approximately 3

feet of cover from the top of the pipes to the finished grade. An excavation of no more than 12 feet will be needed for this work.

Identification of Historic Properties within the APE

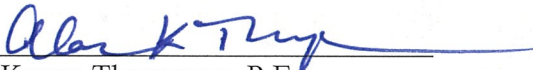

We welcome any information you may have on historical and cultural sites that have been recorded in or which you may have knowledge of within the proposed APE. In addition, if you are acquainted with any persons or organization that is knowledgeable about the proposed APE, or any descendants with ancestral, lineal or cultural ties to or cultural knowledge and/or historical properties information of or concerns for, and cultural or religious attachment to the proposed project area, we would appreciate receiving their names and contact information within 30 days of notice.

Conclusion

We would appreciate a written response within 30 days from date of receipt to Centrie "Hoku" Carter via email at Centrie.carter@hawaiicounty.gov, or by U.S. Postal Service to 101 Pauahi Street, Suite 7, Hilo, Hawai'i.

Please feel free to contact Centrie "Hoku" Carter, Civil Engineer, Engineering Division, Department of Public Works, County of Hawai'i, at centrie.carter@hawaiicounty.gov or (808) 961-8943.

Sincerely,

 Alan Keone Thompson, P.E.
Division Chief, Engineering Division

Subject: National Historic Preservation Act (NHPA) Section 106 Consultation
State Hawai'i Public Housing Authority's 2025 Environmental Review Project
Tax Map Keys: (1) 6-7-016:028, (3) 8-1-002:049, (3) 2-4-056:021, (3) 1-6-143:035,
(4) 5-2-008:056, (4) 2-1-003:017, and (4) 4-6-014:105
Statewide, Hawai'i

Dear Mr. Calpito:

The State of Hawai'i (Hawai'i), Hawai'i Public Housing Authority (HPHA) is initiating National Historic Preservation Act (NHPA) Section 106 consultation as part of their 2025 federal environmental review for potential repairs for certain low-income housing projects (2025 Environmental Review Project). This project involves potential repair and rehabilitation improvements that may be implemented by HPHA for seven (7) housing projects over the next five years. These housing projects are located on the islands of O'ahu, Kaua'i, and Hawai'i as identified below, and more information is provided on the attachment.

1. Hale Ho'olulu; 4264 Ala Muku Place, Kīlauea, Kaua'i
2. Hale Ho'onanea; 4401 Waialo Road, 'Ele'ele, Kaua'i
3. Hale Nana Kai O Kea; 4850 Kawaihau Road, Kapa'a, Kaua'i
4. Hale Ho'okipa; 81-1038 Nani Kuipuna Place, Kealahakua, Hawai'i
5. Hale Olaloa; 144 Kamana Street, Hilo, Hawai'i
6. Hale Aloha O Puna; 16-189 Pili Mua Street, Kea'au, Hawai'i
7. Kupuna Home O Waialua; 67-088 Goodale Avenue, Waialua, O'ahu

Federal funding from the U.S. Department of Housing and Urban Development (HUD) would be used for repair and rehabilitation projects needed for these housing projects. Repair and rehabilitation improvements implemented would not be considered a "major construction activity." Such improvements would involve one or a combination of several HUD designated categories of Categorically Excluded (CatEx) actions identified under 24 CFR 58.35(a). As a result, HPHA is conducting this environmental review to satisfy HUD CatEx requirements which includes Section 106 consultation under the NHPA.

Page 2

These seven housing projects have or will reach 50 years in age within the five-year period for which repair and rehabilitation improvements may be implemented (2026-2031). Therefore, they are being assessed for historic significance and we appreciate any comments your organization may have. A historic architectural assessment conducted determined that only Hale Hookipa, Hale Olaloa, and Kupuna Home O Waialua still retain some historic architectural significance because the other housing sites have undergone several building renovations and repairs over the decades. If moderate soil disturbance (>3 feet deep) may be required for repair work (e.g. water line repair, drainage, etc.), various minimization measures are proposed to address potential subsurface historic sites. These measures were previously developed for other HPHA housing projects in coordination with the State Historic Preservation Division and are similarly planned to be incorporated.

HPHA is considering a “no adverse effect” for repair and rehabilitation improvements to four housing sites and “no effect” to the other three sites because they don’t meet historic significance criteria or have low potential for archaeological effects. The improvements also only involve repair and rehabilitation improvements that would not significantly alter the housing developments. Minimization measures are proposed to address historic architecture and archaeology, and the attachment provides more information for your review.

We would appreciate receiving written comments within thirty (30) calendar days from receiving this. Written comments should be emailed to rsato@bowersandkubota.com or mailed to the following address:

Mr. Ronald Sato, AICP
Bowers + Kubota Consulting, Inc.
1601 Kapiolani Boulevard, Suite 1110
Honolulu, Hawai‘i 96814

If you have any questions, please feel free to contact me at (808) 521-5361 or by email at rsato@bowersandkubota.com.

Sincerely yours,
Bowers + Kubota Consulting, Inc.

PROJECT INFORMATION

January 7, 2026

Subject: National Historic Preservation Act (NHPA) Section 106 Consultation
State Hawai'i Public Housing Authority's (HPHA) 2025 Environmental Review (ER) Project
Tax Map Keys: (1) 6-7-016:028, (3) 8-1-002:049, (3) 2-4-056:021, (3) 1-6-143:035,
(4) 5-2-008:056, (4) 2-1-003:017, and (4) 4-6-014:105
Statewide, Hawai'i

The State of Hawai'i (Hawai'i), Hawai'i Public Housing Authority (HPHA) is initiating National Historic Preservation Act (NHPA) Section 106 consultation as part of their 2025 federal environmental review for potential repairs for certain low-income housing projects (2025 Environmental Review Project). This project involves potential repair and rehabilitation improvements that may be implemented by HPHA for seven (7) housing projects over the next five years (2026-2031). Bowers + Kubota Consulting, Inc. (B+K) is assisting the HPHA with this undertaking and Section 106 consultation.

Federal funding from the U.S. Department of Housing and Urban Development (HUD) would be used for repair and rehabilitation projects needed for these housing projects. As a result, HPHA is conducting Section 106 consultation under the NHPA to support environmental review of these activities to satisfy HUD Categorical Exclusion requirements under the National Environmental Policy Act.

A. Description of the Undertaking

The HPHA is responsible for providing affordable and adequate housing to low-income individuals and families across the State. As such, HPHA is responsible for repairing and maintaining their properties in keeping with this mission. HPHA is proposing to implement repair or rehabilitation improvements to seven housing projects located on the islands of O'ahu, Kaua'i, and Hawai'i as identified below. Figures 1 to 7 in Appendix 1 include a location map and site plan of these housing sites.

1. Hale Ho'olulu; 4264 Ala Muku Place, Kilauea, Kaua'i
2. Hale Hoonanea; 4401 Waialo Road, Eleele, Kaua'i
3. Hale Nana Kai O Kea; 4850 Kawaihau Road, Kapa'a, Kaua'i
4. Hale Hookipa; 81-1038 Nani Kuipuna Place, Kealahou, Hawai'i
5. Hale Olaloa; 144 Kamana Street, Hilo, Hawai'i
6. Hale Aloha O Puna; 16-189 Pili Mua Street, Keaau, Hawai'i
7. Kupuna Home O Waialua; 67-088 Goodale Avenue, Waialua, O'ahu

Description of Improvements

Repair and rehabilitation improvements (the Undertaking) implemented would not be considered a "major construction activity" under HUD's regulations. Such improvements would involve one or a combination of several HUD designated categories of Categorically Excluded (CatEx) actions identified under 24 CFR 58.35(a) identified below.

-
1. Acquisition, repair, improvement, reconstruction, or rehabilitation of public facilities and improvements (other than buildings) when the facilities and improvements are in place and will be retained in the same use without change in size or capacity of more than 20 percent (e.g. replacement of water or sewer lines, reconstruction of curbs and sidewalks, repaving of streets).
 2. Special projects directed to the removal of material and architectural barriers that restrict the mobility of and accessibility to elderly and handicapped persons.
 3. Rehabilitation of buildings and improvements when the following conditions are met:
 - 3.a. In the case of a building for residential use (with one to four units), the density is not increased beyond four units, and the land use is not changed;
 - 3.b. In the case of multifamily residential buildings: 3.b.1) Unit density is not changed by more than 20 percent; 3.b.2) The project does not involve changes in land use from residential to non-residential; and 3.b.3) The estimated cost of rehabilitation is less than 75 percent of the total estimated cost of replacement after rehabilitation.
 - 3.c. In the case of non-residential structures, including commercial industrial, and public buildings: 3.c.1) The facilities and improvements are in place and will not be changed in size or capacity by more than 20 percent; and 3.c.2) The activity does not involve a change in land use, such as from non-residential to residential, commercial to industrial, or from one industrial use to another.
 - 4.a. An individual action on up to four dwelling units where there is a maximum of four units on any one site. The units can be four one-unit buildings or one four-unit buildings or any combination in between; or
 - 4.b. An individual action on a project of five or more housing units developed on scattered sites when the sites are more than 2,000 feet apart and there are not more than four housing units on any one site.
 - 4.c. Paragraphs 4.a. and 4.b. do not apply to rehabilitation of a building for residential use (with one to four units) (see section 3.a.).
 5. Acquisition (including leasing) or disposition of, or equity loans on an existing structure, or acquisition (including leasing) of vacant land provided that the structure or land acquired, financed, or disposed of will be retained for the same use.
 6. Combinations of the above activities.

Types of repair and renovation improvements could also consist of site and dwelling improvements that may include modernization of buildings (interior and exterior), infrastructure repair and upgrades (sewer, water, drainage), utility repair and upgrades (mechanical, electrical, gas), telecommunication antenna improvements, abatement of hazardous materials, accessibility improvements, concrete repair, solar hot water installation with installation of tank less gas-fired instantaneous backup, site lighting, tree trimming, resurfacing or paving of parking lots and sidewalks, and wall repair. For projects with elevators, improvements could consist of elevator upgrades.

Area of Potential Effect (APE)

The area of potential effect (APE) for this undertaking is each of these site's property boundaries, as the anticipated repair and maintenance work would typically be minor and occur within the property parcels. Site maps of each property are included as Appendix 1.

B. Identification of Existing Historic Properties

Seven (7) housing projects have or will reach 50 years in age within the five-year period for which repair and rehabilitation improvements may be implemented (2026-2031). Therefore, they are being assessed for their historic significance under State or National Historic Register criteria.

Existing Historic Architectural Properties

MASON conducted a Reconnaissance Level Survey (RLS) to evaluate their historic architectural significance and determined that three of the housing sites retain historical significance. The other four housing sites did not retain historical significance due to prior renovations that have occurred over the decades. Sites were assessed under Hawai'i Administrative Rules (HAR) §13-275-6, Hawai'i Register of Historic Places (HRHP) (pursuant to HAR §13-198-8 (1)), and National Register of Historic Places (NRHP) significance and integrity criteria. Table 1 summarizes the results and additional information on their assessment is provided.

Table 1: Summary of Historic Architecture Significance Evaluations and Integrity Assessments for Housing Sites					
HPHA Housing Site	Island	Year Built	HAR Significance	NRHP Significance	Integrity
Hale Ho'olulu	Kaua'i	1974	No	No	No
Hale Ho'onanea	Kaua'i	1976	No	No	No
Hale Nana Kai O Kea	Kaua'i	1977	No	No	No
Hale Hookipa	Hawai'i	1976	Yes*	Yes**	Yes
Hale Olaloa	Hawai'i	1976	Yes*	Yes**	Yes
Hale Aloha O Puna	Hawai'i	1977	No	No	No
Kupuna Home O Wai'alua	O'ahu	1977	Yes*	Yes**	Yes

* Significance evaluation based on property being 50 years in age by 2026.

** Significance evaluation based on property being 50 years in age by 2027; property does not meet NRHP Criterion Consideration G exceptional importance threshold.

Hale Ho'olulu (Kaua'i)

Hale Ho'olulu is an elderly housing site located at 4264 Ala Muku Place in Kilauea on the north side of the island of Kaua'i. The parcel is approximately one acre and identified as Tax Map Key (TMK) (4) 5-2-008:056. The housing site was constructed in 1974 and reached 50 years of age in 2024. The development consists of five single-story buildings including a community building and mix of one-bedroom duplexes and studio quadplexes. The site includes a paved parking area with a wooden fenced trash and propane tank enclosure. Surrounding uses include a mixed-use neighborhood and undeveloped parcels.

Since its construction, Hale Ho'olulu has undergone various alterations and renovations, including repairs following Hurricane Iniki in 1992. All five buildings and the propane tank enclosure on the site were assessed and were found as not meeting significance criteria under HAR or NRHP. While some structures retained full or partial integrity of significance, neither the site as a whole nor any of the buildings individually were assessed as being historically significant.

Hale Ho'onanea (Kaua'i)

Hale Ho'onanea is a public housing development located at 4401 Waialo Road in 'Ele'ele on the south side of the island of Kaua'i. The development exists on an approximately 2.4-acre parcel identified as TMK (4) 2-1-003:017. This housing site was constructed in 1976 and will reach 50 years of age in 2026. It consists of a mix of one-bedroom and studio duplexes, a community center building, and two paved parking areas which are accessible via Waialo Road. Surrounding uses include a mix of residential, commercial, industrial, and institutional areas, as well as Port Allen Small Boat Harbor to the south.

Hale Ho'onanea has undergone some alterations, including various interior and exterior repairs following Hurricane Iniki in 1992. All 21 buildings as well as 3 trash enclosures on the site were assessed and were found to not meet significance criterion under HAR or NRHP. While some structures retained full or partial integrity of significance, neither the site as a whole nor any of the buildings individually were assessed as being historically significant.

Hale Nana Kai O Kea (Kaua'i)

Hale Nana Kai O Kea is an elderly housing site located at 4850 Kawaihau Road in Kapa'a on the island of Kaua'i. The parcel is approximately 3.5 acres and is identified as TMK (4) 4-6-014:105. The site was originally constructed in 1977 and contains a community building with a mix of 38 studio and one-bedroom units spread throughout 20 single-story buildings. Surrounding land uses include a mix of residential, public, recreational, medical, and educational uses. The housing site is directly adjacent to Samuel Mahelona Memorial Hospital to the west and a hospice development to the south, with large open spaces generally to the west.

This housing development has undergone various alterations and repairs including roofing replacement, window modifications, and extensive repairs and reconstruction following damage from Hurricane Iniki in 1992. Twenty-four resources were assessed at this site which included all structures, 3 trash enclosures, and a propane tank enclosure. None of these structures were deemed individually significant, nor were they deemed as contributing to a potential historic due to extensive alterations to the original structures and landscaping.

Hale Ho'okipa (Hawai'i)

Hale Ho'okipa is an elderly housing development situated on an approximately 5.9-acre parcel of land identified as TMK (3) 8-1-002:049 in Kealahou on the west side of Hawai'i Island. The site is located at 81-1011 Nani Kupuna Place and consists of 32 one-bedroom units within 7 one-story buildings. The site includes paved parking areas and a central community building. Surrounding land uses include residential and agricultural uses, a Hongwanji temple and cemetery to the west, and a Hawai'i National Guard armory to the south.

Hale Ho'okipa has undergone minimal alterations since its construction, with only door replacements and minor maintenance work likely being completed. Eight individual resources were assessed on this property. These resources include all eight residential and community structures as well as the trash and propane tank enclosures. The residential and community structures were deemed as retaining their original integrity and fulfilling Criterion C (distinctive characteristics of the type, period, etc.). While none

of these structures were identified as individually significant, their maintained integrity and collective contribution to the neighborhood identifies them as contributing to a potential historic district.

Hale Olaloa (Hawai'i)

Hale Olaloa is an elderly housing development situated on an approximately 6.5-acre parcel identified as TMK (3) 2-4-056:021 in Waiākea on Hawai'i Island. The site is located at 144 Kamana Street and consists of a mix of approximately 50 studio and one-bedroom units spread throughout 26 single-story buildings which were originally constructed in 1976. The development includes a community building and paved internal roadways and parking lots accessible via Kamana Street. Surrounding land uses vary, with single-family dwellings, neighborhood-scale commercial, community uses, and undeveloped State-owned parcels surrounding the site.

Hale Olaloa has undergone some internal and external renovations since its construction, mainly in the 2000s when some site amenities were removed, and unit interiors and roofing were replaced or repaired. All 26 buildings, 4 trash enclosures, and a mortared basalt wall on the site were assessed. While all structures were deemed as not individually significant, this housing area collectively meets Criterion C and contributes to a potential historic district.

Hale Aloha O Puna (Hawai'i)

Hale Aloha O Puna is an elderly housing area located on an approximately 1.9-acre parcel identified as (3) 1-6-143:035 in Kea'au on the island of Hawai'i. The address for this housing site is 16-189 Pili Mua Street and it consists of 30 studio and one-bedroom units in nine buildings. The site was constructed in 1977 and features a community building and two paved parking lots, both accessible from Pili Mua Street. Surrounding land uses include residential, community/public services such as a fire station and health center, and undeveloped lands.

A total of 16 resources were assessed at this site, including all residential structures, the community building, and all trash and propane tank enclosures. The site has undergone various alterations since its original construction including roof, window, and door replacements, repainting, and the installation of new lighting, signage, and a new propane enclosure. Due to the extensive alterations, these structures were not designated as individually significant or contributing to a potential historic district.

Kupuna Home O Waialua (O'ahu)

Kupuna Home O Waialua is an elderly housing development situated on an approximately 3.3-acre parcel identified as TMK (1) 6-7-016:028 in Waialua on the island of O'ahu. The site is located at 67-088 Goodale Avenue and consists of approximately 40 studio and one-bedroom units spread throughout 20 single-story buildings. Kupuna Home O Waialua was originally constructed in 1977 and will reach 50 years of age in 2027. The development includes a community building and two paved parking lots, one accessible via Goodale Avenue and the other from Nahoa Street. Surrounding land uses include rural residential neighborhoods and agriculture as well as a Catholic church and school to the south.

Twenty-four total resources, which include the residential structures, community building, trash enclosures, and a metal shed, were assessed. While these structures were not deemed as individually significant, all these structures fully or partially retain their integrity in a majority of the significance

categories. Additionally, all residential structures and the community building meet Criterion C and contribute to a potential historic district.

Existing Historic Archaeological Properties

Research was conducted for the housing sites to characterize the potential for subsurface historic properties based upon available information. This consisted of reviewing TMK, locational data, and soil-types for the properties, researching the SHPD HICRIS geodatabase for public reports identifying existing historic sites present at the sites and within a 0.25-mile radius, and reviewing site investigation information and photos. Based upon this, the following is a summary of results.

1. Hale Ho'olulu (Kilauea, Kaua'i). Low Potential for Sites
The housing site is located about 1.0 mile away from the shoreline and within a developed residential subdivision area, has Makapili silty clay soils (MeB) generally occurring on broad upland ridges (not sandy soils), and no HICRIS reports available indicating historic sites on the property. Given the site's location and conditions, the potential for subsurface sites should be low.
2. Hale Hoonanea (Ele'ele, Kaua'i). Low Potential for Sites
The housing site is located about 600 feet away from the shoreline associated with Port Allen Small Boat Harbor, within a developed residential, commercial and heavier industrial area, has Makaweli silty clay loam (MgC) common with sugarcane and pasture, and no HICRIS reports available indicating historic sites on the property. Given the site's location and conditions in this heavily developed area, the potential for subsurface sites should be low.
3. Hale Nana Kai O Kea (Kapa'a, Kaua'i). Higher Potential for Sites
The housing site is located only about 400 feet away from the shoreline situated north of Kapa'a Beach Park, is on a small plateau below (makai) a hospital and school overlooking the coastline, has Lihue silty clay (LhB) of which burials have been found, and no HICRIS reports available indicating historic sites on the property. However, given the location near the shoreline and soil type, there may be a higher potential for subsurface sites.
4. Hale Hookipa (Kealakekua, Hawai'i). Low Potential for Sites
The housing site is located well inland about 2.2 miles away from the shoreline and within a developed mixed-use residential development area, is primarily within lava flows (Kona complex) and a small area within Honuaulu hydrous silt loam, and no HICRIS reports available indicating historic sites on the property. The potential for historic sites should be low, unless new improvements are conducted within the undeveloped areas of the parcel.
5. Hale Olaloa (Hilo, Hawai'i). Low Potential for Sites
The housing site is located less than 1.0 mile away from the shoreline and within a developed residential subdivision area along a drainageway, has Panaewa-Urban land complex soils, and no HICRIS reports available indicating historic sites on the property. The potential for historic sites should be low, unless new improvements are conducted within the undeveloped areas (about 30% of parcel).
6. Hale Aloha O Puna (Kea'au, Hawai'i). Low Potential for Sites
The housing site is located over 4.0 miles away from the shoreline and within a developed mixed-use and residential area associated Kea'au town, has Panaewa very cobbly hydrous soils, and no HICRIS reports available indicating historic sites on the property. Given the site's location and conditions, the potential for subsurface sites should be low.

-
7. Kupuna Home O Waialua (Waialua, O'ahu). Higher Potential for Sites
The housing site is located about 1.0 mile away from the shoreline and within a developed residential area with a history of large-scale agriculture, has Waialua silty clay (WkA) of which burials have been found in this region, and no HICRIS reports available indicating historic sites on the property. Given the site's location, soil conditions, there may be a higher potential for subsurface sites in this area.

C. Assessment and Preliminary Effect Determination Being Considered

The Undertaking, or project, consists of implementing repair and rehabilitation improvements to existing buildings and accessory structures along with site improvements (ex. repaving parking, utility line repairs, etc.) as previously identified. Such improvements would typically be minor in disturbance and nature in contrast to new development construction. Such activities are not considered by HUD to be a "major construction activity" and fall under HUD's categories of Categorically Excluded (CatEx) as previously identified.

Based upon the RLS study and assessment of existing site conditions, a finding of "no adverse effect" is being considered for four (4) of these housing properties, and a finding of "no effect on historic properties" for the remaining three (3) housing sites. In addition, minimization measures already approved with the State Historic Preservation Division (SHPD) for other housing projects would similarly apply to these projects as discussed.

1. Hale Ho'olulu (Kilauea, Kaua'i) No Effect on Historic Properties
The housing site was found as not meeting the significance criteria under HAR or NRHP for historic architecture. The potential for historic archaeological subsurface sites being present or impacted by repair and rehabilitation improvements should also be low. Therefore, a "no effect on historic properties" determination is being considered for this housing site.
2. Hale Hoonanea (Ele'ele, Kaua'i) No Effect on Historic Properties
The housing site was found as not meeting the significance criteria under HAR or NRHP for historic architecture as buildings have undergone alterations for repairs following Hurricane Iniki. The potential for historic archaeological subsurface sites being present or impacted by repair and rehabilitation improvements should also be low given the urbanized area around the boat harbor. Therefore, a "no effect on historic properties" determination is being considered for this housing site.
3. Hale Nana Kai O Kea (Kapa'a, Kaua'i) No Adverse Effect
The housing site was found as not meeting the significance criteria under HAR or NRHP for historic architecture. Buildings have undergone alterations for repairs following Hurricane Iniki and none of these structures were deemed individually significant. The potential for historic archaeological subsurface sites being present or impacted by improvements is higher due to the property's location near the shoreline and presence of Lihue silty clay (LhB) of which burials have been found. Minimization measures addressing archaeology would be implemented for this site as discussed later. Therefore, a "no adverse effect" on historic properties determination is being considered for this housing site.

-
- | | | |
|----|---|----------------------------------|
| 4. | Hale Hookipa (Kealakekua, Hawai'i) | No Adverse Effect |
| | The housing site was found to meet the significance criteria under HAR or NRHP for historic architecture. The residential and community structures retain their original integrity and fulfill Criterion C. The potential for historic archaeological subsurface sites being present or impacted by improvements should also be low given the distance from the shoreline, within lava flows soil type (Kona complex), and location within a developed mixed-use residential development area. Minimization measures addressing historic architecture would be implemented for this site as discussed later. Therefore, a "no adverse effect" on historic properties determination is being considered for this housing site. | |
| 5. | Hale Olaloa (Hilo, Hawai'i) | No Adverse Effect |
| | The housing site was found to meet the significance criteria under HAR or NRHP for historic architecture. While all structures were deemed as not individually significant, this housing area collectively meets Criterion C and contributes to a potential historic district. The potential for historic archaeological subsurface sites being present or impacted by improvements should be low given the distance from the shoreline, Panaewa-Urban land complex soils type, and being within a developed residential subdivision area. Minimization measures addressing historic architecture would be implemented for this site as discussed later. Therefore, a "no adverse effect" on historic properties determination is being considered for this housing site. | |
| 6. | Hale Aloha O Puna (Kea'au, Hawai'i) | No Effect on Historic Properties |
| | The housing site was found as not meeting the significance criteria under HAR or NRHP for historic architecture as buildings have undergone various alterations since its original construction. The potential for historic archaeological subsurface sites being present or impacted by improvements should also be low given its location well inland, Panaewa very cobbly hydrous soils, and being within a developed Kea'au town area. Therefore, a "no effect on historic properties" determination is being considered for this housing site. | |
| 7. | Kupuna Home O Waialua (Waialua, O'ahu) | No Adverse Effect |
| | The housing site was found to meet the significance criteria under HAR or NRHP for historic architecture. These structures were not deemed as individually significant, but they retain their integrity in a majority of the significance categories. The potential for historic archaeological subsurface sites being present or impacted by improvements would be higher since the property has Waialua silty clay (WkA) of which burials have been found in this region. Minimization measures addressing both historic architecture and archaeology would be implemented for this site as discussed later. Therefore, a "no adverse effect" on historic properties determination is being considered for this housing site. | |

Proposed Minimization Measures

A finding of "no adverse effect" on historic properties is being considered for four of the seven housing sites and minimization measures addressing historic architecture or archaeology is proposed that would further ensure no significant or adverse effects occur from repair and rehabilitation improvements. These measures were developed in consultation with the SHPD as part of prior reviews of other housing projects. Thus, implementation of these same measures for these applicable housing projects would ensure consistency in addressing historic sites that may be affected.

Building Modifying Repair and Rehabilitation Improvements (Historic Architecture):

This applies to the following three housing projects: 1) Hale Hookipa (Kealahou, Hawai'i); 2) Hale Olaloa (Hilo, Hawai'i); and 3) Kupuna Home O Waialua (Waialua, O'ahu).

1. When considering rehabilitation improvements or building modifications: 1) the buildings' character defining features shall be retained; and 2) the renovations shall adhere to the Secretary of the Interior's Standards for Rehabilitation.
2. HPHA will contract a person or persons with qualifications that meet the Secretary of the Interior's Professional Qualifications for Architectural History, Architecture, or Historic Architecture per 36 CFR, Part 61.
3. Provide SHPD with detailed information regarding the methods and materials for implementing the SOI's Standards for Rehabilitation at this housing site.
4. A qualified historic preservation professional will be contracted by HPHA to evaluate and document whether improvements proposed under a rehabilitation or building modification project meets the Secretary of the Interior's Standards for Rehabilitation. Such documentation would be reviewed by the SHPD as part of Section 6E, HRS review as part of building permits being obtained from the respective County.
5. If rehabilitation improvements or building modifications cannot adhere to the Secretary of the Interior's Standards for Rehabilitation, Section 106 consultation would be reopened for that project to address effects and necessary measures to minimize or mitigate effects.

Ground Disturbing Repair and Rehabilitation Improvements (Archaeology):

This applies to the following two housing projects: 1) Hale Nana Kai O Kea (Kapa'a, Kaua'i); and 2) Kupuna Home O Waialua (Waialua, O'ahu).

1. If ground disturbing activity is anticipated, HPHA must consult with the SHPD to determine effect to historic subsurface properties and to identify appropriate required archaeological documentation and/or mitigation.
2. Submit detailed plans, specifications and a detailed scope of work once the plans have been developed.
3. Submit information (maps, photos, addresses) regarding locations where mature trees (larger than 6 inches in diameter) associated with buildings or structures that are 50 years of age or older are to be removed to SHPD for review, comment, and meaningful consultation.
4. Submit a TMK map showing the full extent of the project area within the affected parcel(s).
5. Submit description and photographs of current vegetation cover and condition of the project area, including structures, roads, wall or other features within the project area.
6. Submit summary of land use history, such as previous intensive cultivation, grubbing or grading.
7. Submit copies or dates of previously approved permits, survey reports, and/or prior SHPD review letters that pertain to the property.
8. In the event subsurface human remains or other indications of human activity older than 50 years are encountered during construction activities, all work would stop immediately and the SHPD notified. The treatment of any human remains encountered would be determined and conducted in accordance with applicable requirements of Chapter 13-300, Hawai'i Administrative Rules (Rules of Practice and Procedure Relating to Burial Sites and Human Remains).

TAX MAP KEYS: (3) 3-5-002:999, (3) 3-5-003:999, (3) 3-5-004:999,
(3) 3-5-005:999, AND (3) 3-5-008:999
HAWAII BELT ROAD RIGHT-OF-WAY

On behalf of the Federal Highway Administration (FHWA), the State of Hawaii, Department of Transportation (HDOT) is notifying you that on November 11, 2025, Section 106 of the National Historic Preservation Act (NHPA) of 1966 (amended, 2006), was initiated with the State Historic Preservation Officer (SHPO) for the subject of Hawaii Belt Road Guardrail and Shoulder Improvements, Vicinity of Kaaluu Bridge to Kuwaikahi Stream Bridge.

The proposed federally funded HDOT project is considered a federal action and undertaking as defined in 36 Code of Federal Regulations (CFR), Part 800.16(y). Effective May 1, 2016, FHWA issued a Delegation of Authority allowing HDOT and local public agencies to conduct NHPA Section 106 consultations with the SHPO, Native Hawaiian Organizations (NHO), and qualified consulting parties per 36 CFR, Part 800.2(c)(4). The FHWA will remain responsible for all findings and determinations charged to the agency during the Section 106 process.

Overview of the Undertaking

HDOT proposes to update and install various shoulder and guardrail improvements along a 1.65-mile segment of Hawaii Belt Road, Route 19, in Hamakua, Hawaii Island. The Area of Potential Effects (APE) starts around Mile Post (M.P.) 24.75, in the vicinity of Kuwaikahi Stream Bridge (Bridge No. 001000190307474), where Phase 2 ended, and ends near M.P. 23.1, in the vicinity of Kaaluu Bridge (Bridge No. 001000190307644). See Attachment 1: Area of Potential Effects. The approximate coordinates of the project are 155°13'45.4"W 19°58'56.4"N at the western end and 155°12'28"W 19°58'6"N at the eastern end. The improvements will include shoulder resurfacing; guardrail improvements including guardrail end post connection upgrades at bridge crossings, roadway signage, pavement marker upgrades, and installation of milled rumble strips.

The total combined APE is approximately 766,840 square feet (17.6 acres). The approximate width of the APE varies; however, it is located solely within the right-of-way of Hawaii Belt Road. All work, including staging and stockpiling, will occur on the paved surface of the highway and shoulders.

Consultations

Entitled consulting parties during the Section 106 process includes the Advisory Council of Historic Preservation, SHPO, NHO, and if applicable, local governments and applicants for federal assistance, permits, licenses and other approvals.

NHO and/or Hawaiian Descendants

NHO and Native Hawaiian descendants with ancestral, lineal or cultural ties to, cultural and historical property knowledge of and/or concerns for, and cultural or religious attachments to the proposed APE are asked to provide a response to this letter within thirty (30) days of notification.

Other Individuals and Organizations

Individuals and organizations with legal, economic, or historic preservation interest are requested to respond within thirty (30) days of notification, demonstrate interest in the proposed undertaking, and provide intent to participate in the Section 106 process. Your participation is subject to FHWA approval.

Identification of Historic Properties within the APE

We welcome any information you may have on cultural sites that have been recorded in or which you may have knowledge of within the proposed APE. In addition, if you are acquainted with any persons or organizations that are knowledgeable about the proposed APE, or any descendants with ancestral, lineal or cultural ties to or cultural knowledge and/or historical properties information of, or concerns for, and cultural or religious attachment to the proposed APE, we would appreciate receiving their names and contact information within thirty (30) days of this notice.

DAWN N.S. CHANG, CHAIRPERSON

Conclusion

On behalf of FHWA and HDOT by way of this letter, is notifying you of the proposed Hawaii Belt Road Guardrail and Shoulder Improvements, Vicinity of Kaaluu Bridge to Kuwaikahi Stream Bridge. Should you wish to participate in the Section 106 process, we request your written intent. Please also provide your comments on the proposed APE, any information you may have on cultural and/or historical sites that have been recorded within the APE, as well as the names and contact information of people/organizations who may have cultural affiliations and historical properties information in the vicinity of the proposed APE.

We would appreciate all responses in writing within thirty (30) days from the date of receipt to our HDOT Project Manager, Ms. Courtney Supe by email at courtney.k.supe@hawaii.gov, or by U.S. Postal Service to the Hawaii Department of Transportation, Highways, Hawaii District Office, 50 Makaala Street, Hilo, Hawaii 96720.
