RE: TESTIMONY OF JONAS IKAIKA SOLLIDAY “MEMBER” OF PACIFIC MARINE PARTNERS, LLC for: BLNR MEETING JUNE 26, 2020, ITEM J-6: STATE OF HAWAII DEPARTMENT OF LAND AND NATURAL RESOURCES, Division of Boating and Ocean Recreation: RECONSIDERATION OF PRIOR ACTION AND DENIAL OF PETITIONS FOR CONTESTED-CASE HEARING FILED ON BEHALF OF JONAS IKAIKA SOLLIDAY AND PACIFIC MARINE PARTNERS, LLC WITH RESPECT TO ITEM J-1, MAY 22, 2020:

“TERMINATION OF BOATING LEASE NO. LH-19-002, PACIFIC MARINE PARTNERS, LLC, LESSEE, HONO KOHAU SMALL BOAT HARBOR, NORTH KONA, HAWAI’I, TMK: (3) 7-4-008:-003 (POR).”

Aloha Board Members,

I Jonas Ikaika Solliday (“Solliday’”), Speak to you as a member of Pacific Marine Partners, LLC “(PMP”), a limited liability company (“LLC”) organized under the laws of the State of Hawaii. You already have PMP’s Operating Agreement, which is the governing document of an LLC in accordance with “HRS 428-203 Articles of Organization”, which confirms what I am saying. I do so despite the fact that the Division of Boating and Ocean Recreation (“DOBOR”) has refused to recognize me in this capacity and instead chooses to aid and abet the illicit scheming of Con Man Jason Hoopai (“Hoopai”).

I first want to address issues leading up to the termination of lease no. LH-19-002 to PMP and the chaotic and stressful period after PMP moved onto the parcel. It was DOBORS’s failure
to carry out its obligations prior to PMP’s acquisition of the lease that lead to the dire situation PMP confronted at the parcel. It was DOBOR that caused PMP to divert substantial resources and time to deal with problems created by DLNR and DOBOR’s failure to complete a proper due-diligent inspection of the parcel prior to auction, resulting in injuring PMP’s business and/or property and not having any Quiet Enjoyment (Section 30. LH-19-002) by the actions of agents of DLNR and DOBOR. PMP’s resources that otherwise would go to support its principal mission in providing Boat and Marine Storage to the Kona Boating Community, that was being deferred to deal with an illegal trespassing business, and also a neglected and hazardous parcel.

It appears or there is an appearance of discrimination in the handling of PMP’s lease, PMP is a Native Hawaiian owned entity, which Honokohau Harbor lacks ethnic and racial diversity in business ownership and protection. It also appears there is a conspiracy of unfair and deceptive practices by allowing Gentry’s Kona Marina (“GKM”) to: 1) Harm and injure PMP and it’s lease by not fully disclosing the site conditions to DLNR and DOBOR, 2) Construct an illegal un-permitted warehouse with an un-permitted cesspool in the leased parcel, 3) Have an illegal industrial tenant ("Hotspot’s Welding") utilizing the warehouse on PMP’s leased parcel to conduct commercial and industrial welding, 4) Commit the act of un-controlled dumping of hazardous materials and construction waste, 5) Control the access to utilities in the north end of the Harbor and in the leased parcel, in order to monopolize and destroy competition at Honokohau Small Boat Harbor.

In addition to DOBOR’s suspect relation with GKM, It is DOBOR that allowed Hotspot’s Welding to remain on the parcel for many years without challenging its illegality and without addressing its blatant environmental hazards. Then upon PMP’s acquisition of the lease, DOBOR claims PMP got an “as is” property and directs PMP to tackle the illegal trespassing business Hotspot’s Welding, including entering its trespass lawsuit. PMP is still embroiled in and at risk in expensive litigation with Hotspot’s Welding thanks to DOBOR. I suggest DOBOR should be audited and appropriate actions taken to clean up this department. This is the Board’s Kuleana to the public.

Likewise even after being given a copy of PMP’s Operating Agreement as a limited liability company, showing that Hoopai was a member of International and Pacific Enterprises, LLC (‘IPE’), which is an equal member of PMP along with member Solliday. DOBOR’s director
Edward Underwood (“Underwood”) chose to disregard this and intentionally chose to continue exclusively dealing with Con Man Hoopai. Despite uncontroverted evidence, even now DOBOR director Underwood claims I am but an "alleged member" of PMP and that my attorney did not request a contested case on behalf of me as a member of PMP. Hogwash!! DOBOR’s approach to PMP smells of corruption and it is time for the Board to recognize this and in the context of PMP to do what is right.

To start with since, in the context of PMP, Member Jonas Ikaika Solliday has been shut out by DOBOR, I want the Board to know that I will assist in any investigation of DOBOR’s handling of the Honokohau leased parcel and in handling other leases of which I am aware of. I also ask that in the event that I Bid on a future DLNR lease, that I am not blocked from Bidding in light of what PMP member IPE and Hoopai did to defraud myself and DLNR, which wrongdoing was enabled and allowed by DOBOR.

Mahalo,
Jonas Ikaika Solliday
Member of Pacific Marine Partners, LLC

STATEMENT OF FACTS:

1. On or about July 01, 2018, The Hawaii Department of Taxation (Form BB-1): Original Basic Business Application for Pacific Marine Partners, LLC (“PMP”) was filed listing the two PMP Members “International and Pacific Enterprises, LLC (“IPE”) and (“Member Solliday”).

2. On or about July 17, 2018, PMP’s Hawaii Department of Taxation (Form G-44A): Letter of Confirmation of Pacific Marine Partners, LLC, General Excise Tax License ID Number: GE-146-xxx-xxxx-xx, Active from July 01, 2018.

3. On or about July 09, 2018, PMP’s Articles of Organization, was signed and submitted with Hawaii Department of Commerce and Consumer Affairs in accordance with “HRS 428-203 Articles of Organization”.

4. On or about June 01, 2018, a public advertisement was made by DLNR/DOBOR staff and administration on the Star Advertiser’s website and print edition, for the auction of a lease parcel
at the Honokohau Small Boat Harbor on the Island and County of Hawaii in the Kona District, State of Hawaii. In said advertisement, the property up for auction described said property/parcel as being a (“Nine acres graded & gravel lot with chain linked fence”). See Exhibit-1 attached hereto.

5. On or about June 20, 2018, PMP submitted the pre-auction application in order to qualify for bidding on the advertised lease property; Was so approved to bid for and was the winning bidder at the Auction. No pre-bid inspection of the property was allowed to PMP members.

6. On or about July 13, 2018, Jason Hoopai ("Hoopai") and Jonas Ikaika Solliday ("Solliday") attend public auction for Honokohau Harbor dry-land storage facility lease and are awarded the lease as there were no other bidders. Hoopai gave DOBOR a $70,500 check for the rental deposit to secure winning bid.

7. On or about August 30, 2018, PMP member Solliday was finally granted permission by GKM to do a post bid partial inspection of the leased property with DOBOR Harbor Master “Daniel Mersberg” while being followed and instructed to not take any photographs by GKM property manager Tina Prettyman. During this inspection, Solliday noticed that there was an Industrial Metal Building with the business “Hotspot’s Welding” operating in the auctioned parcel, That there was an Industrial Electrical Box, inside of the leased property gate with electricity and water. More over, that only approximately 6 of the 9 acres was graded and gravel, with approximately 10-12 feet high berms littered with tires and debris. No complete fencing and numerous amounts of Hazardous Waste Barrels, Construction Debris and Derelict vessels throughout the auctioned property. PMP’s Counsel Duane Fisher notified DLNR and deputy Hawaii Attorney General William J. Wynhoff ("Wynhoff") the false advertised conditions of the leased parcel. In short, the leased property was not what was advertised to be in the public advertised notice.

**False and Fraudulent Advertisement:**

The Allen court (Hawaii ICA No. 6959), stated: “[T]o constitute fraudulent inducement sufficient to invalidate, (sic) the terms of the contract there must be (1) a representation of a materials fact, (2) made for the purpose of inducing the other party to act, (3) known to be false but reasonably believed true by the other party, and (4) upon which he relies and acts to his damage.” Citing Shanahan v. Schindler, 63 111. App.3d 82, 20 111. Dec. 239, 379 N.Ed2 1307 (1978), and all cited cases therein.

Hawaii Revised Statutes Division 2. Business § 481A-4. Remedies:
   (a) A person likely to be damaged by a deceptive trade practice of another may be granted an injunction against it under the principles of equity and on terms that the court considers reasonable. Proof of monetary damage, loss of profits, or intent to deceive is not required. Relief granted for the copying of an article shall be limited to the prevention of confusion or misunderstanding as to source.
   (b) Costs shall be allowed to the prevailing party unless the court otherwise directs. The court may award attorneys' fees to the prevailing party if (1) the party complaining of a deceptive trade practice has brought an action which the party knew to be groundless, or (2) the party charged with a deceptive trade practice has willfully engaged in the trade practice knowing it to be deceptive.
   (c) The relief provided in this section is in addition to remedies otherwise available against the same conduct under the common law or other statutes of this State.

8. On or about November 01, 2018: PMP takes possession of facility, after long delays by the previous tenant GKM leaving the premises. GKM also left the only gate to the facility damaged, removed the electric motor, and turned off the electricity to the gate, resulting in PMP using a diesel generator to operate the entire facility for nine months at a higher cost.

9. On or around January 2019, Solliday escorted PMP environmental site inspector “Environmental Science International” (“ESI”) project manager Stephanie Davis and PMP attorney Ian Sandison throughout the parcel and to Hotspot’s Welding. ESI discovered an enormous amount of errors and false information from GKM’s Environmental Inspection completed by “Lehua Environmental Inc.”. On or around October 2018, which did not include the un-permitted cesspool located underneath the welding shops concrete foundation and other environmental issues.
10. During ESI’s inspection, Hotspot’s Welding owner Cameron Nofitz (“Cameron”) was nervous by them being at the welding shop as they inspected every inch of the shop and asked him a lot of questions, especially about the un-permitted cesspool located underneath the shops concrete foundation.

11. ESI completed the phase 1 environmental site assessment for the boat storage parcel leased by PMP on February 20, 2019. See Exhibit-2 attached hereto.

12. On or about the beginning of 2019, PMP had more customer boats enter the boat yard, I started to move around debris left behind from GKM so we could fit in more boats and not refuse service. Cameron Nofitz’s business Hotspot’s Welding started picking up a lot of business too, so as he ran out of room on his side he would store his customer’s boats on our side of the parcel. I confronted Cameron numerous times that he needed to pay us storage fees and his excuse as always was that Jason Hoopai told him that he can park his customers boats in boat yard. I spoke to Jason Hoopai about what Cameron stated and he denied giving Cameron permission to store boats for free. After me asking Cameron to pay for his boat storage, he told me to email him an invoice and that he would pay it. Cameron didn’t pay any of his invoices and I would constantly ask Jason Hoopai on what was the progress with PMP Counsel Duane Fisher communicating with DOBOR and AG Wynhoff about Hotspot’s tenancy as PMP was losing money from non-payment from Cameron’s boats he brought in and the use of the space of the illegal trespassing business Hotspot’s Welding, which PMP was paying for.

13. On or about July 23, 2019 attorney Lisa A. Bail in behalf of DLNR sends Hotspot’s Welding counsel at the time Georgette A. Yaindl an eviction notice, which Cameron disregards. Cameron then purchases a commercial boat from one our customers and parks it in our leased parcel, and refuses to pay storage fees or start complying with the eviction notice and remove his belongings.

14. On or about July 30, 2019, Cameron starts sandblasting a large trailer out in the open and dust and sand was flying onto PMP’s customers vessels and it was difficult to breath. I called Cameron and told him to stop, Cameron then states that Jason Hoopai who is on Oahu, gave him consent to sandblast, I couldn’t reach Jason Hoopai by phone, so after experiencing Cameron’s
hostility to stop, I drove to the other side of the Harbor to the DLNR Harbor office, and was informed by DOBOR Harbor Master Chad Provost to go and see the DOCARE law enforcement office before they closed. I spoke to DOCARE Enforcement Commander of the Big Island Lino Kamakau. Lino gives me a copy of a notice of trespassing and tells us to make additional copies for the office and to serve Cameron and record the service with our phone or have the county police do it. I headed back to PMP’s office and start making copies, Hawaii County Police served Cameron the notice of trespassing the next day on July 31, 2019 and informs us to call them if he comes back. I didn’t see Cameron around since he was served, but he was still storing a boat and several trailers in the boat yard, so I gave Cameron a call on August 09, 2019, he was very upset that I called to ask him to pay his late storage fees and he informed me that PMP owes him $30,000 dollars for the couple jobs he did for us and that Jason Hoopai knows about it. I informed Cameron that he only did two small jobs for PMP and why didn’t he send us an invoice and that Hotspot’s Welding has been borrowing my commercial air compressor for nine months. Cameron Noftz finally appears on August 14, 2019 and I called Hawaii County Police to enforce the trespassing notice. Cameron was arrested at Hotspot’s Welding and was released a couple hours later after his attorney Georgette Yaindl told Hawaii County Police that Hotspot’s Welding has a lease and that I was making this all up. Cameron returned the next day and it was business as usual, I completely avoided Hotspot’s and Cameron after that incident and explained the details to attorney Stephanie Thompson who works with PMP attorney Duane Fisher.

15. On November 15, 2019, I caught an associate of Cameron Noftz sneak in the boat yard, I followed him in to the rear portion of the yard. When I approached his vehicle, I noticed that he was naked with a woman out in the open. I called Hawaii County Police department who responded quickly and located the trespassers hiding at Hotspot’s Welding. I seen Cameron come out of the welding shop to speak with the police, his friends got a warning not to enter the boat storage facility. Less than an hour after Hawaii County Police left the Harbor, PMP’s two surveillance Cameras that is located on the exterior of Hotspot’s warehouse went offline, as the wires are located in the warehouse, and it appeared to be intentionally cut or damaged. I drove down to the Kona Police department to make a report and was told that I should get a TRO against Cameron. In the next several days after that incident Cameron would stalk me around the harbor in his SUV every time I left the boat yard and would park outside of the gate and watch me. PMP’s water service was also turned off as the water lines ran through Hotspot’s, I ended up installing new water lines that went around Hotspot’s.
PUBLIC TRUST AND LAND USE ISSUES:

Article XI, Section 1 Hawai‘i Constitution provides as follows: For the benefit of present and future generations, the State and its political subdivisions shall conserve and protect Hawaii’s natural beauty and all natural resources, including land, water, air, minerals and energy sources, and shall promote the development and utilization of these resources in a manner consistent with their conservation and in furtherance of the self sufficiency of the State. All public natural resources are held in trust by the State for the benefit of the people. In re Water use Permit Applications, 94 Hawaii 97, 9 P.3d 409 (2000)(“Waiahole I”), in ruling that under Article XI, Sections 1 and 7 and the sovereign reservation, water is a public trust resource, we stated that “[w]e need not define the full extent of article XI, section 1’s reference to ‘all public resources’ at this juncture.”

HRS Title 8. Public Proceedings and Records Chapter 91 Administrative Procedure §91-9.5 Notification of hearing; service. (a) Unless otherwise provided by law, all parties shall be given written notice of hearing by registered or certified mail with return receipt requested at least fifteen days before the hearing. (b) Unless otherwise provided by law, if service by registered or certified mail is not made because of the refusal to accept service or the board or its agents have been unable to ascertain the address of the party after reasonable and diligent inquiry, the notice of hearing may be given to the party by publication at least once in each of two successive weeks in a newspaper of general circulation. The last published notice shall appear at least fifteen days prior to the date of the hearing. [L 1976, c 100, §1]

IN THE MATTER OF CONTESTED CASE HEARING RE: CONSERVATION DISTRICT USE APPLICATION (CDUA) HA-3568 FOR THE THIRTY METER TELESCOPE AT THE MAUNA KEA SCIENCE RESERVE, KAʻOHE MAUKA, HĀMĀKUA, HAWAI‘I, TMK (3)404015:009: APPEAL FROM THE BOARD OF LAND AND NATURAL RESOURCES (BLNR-CC-16-002 (Agency Appeal) OCTOBER 30, 2018: "With respect to the applicable law, the BLNR properly concluded that “an administrative adjudicator should [not] be allowed to sit with impunity in a case where the circumstances fairly give rise to an appearance of impropriety and reasonably cast suspicion on [the adjudicator’s] impartiality.” Sussel, 71 Haw. at 109, 784 P.2d at 871 (citation omitted), and that administrative adjudicators are held to the same standard as judges. The BLNR also concluded that, like judges, administrators serving as adjudicators are presumed to be unbiased.”

*“Impartiality” means “absence of bias or prejudice in favor of, or against, particular parties or classes of parties, as well as maintenance of an open mind in considering issues that come or may come before a judge.” “Knows” means “actual knowledge of the fact in question. A person’s knowledge may be inferred from circumstances.”

HRS §171-20 Notice of breach or default. Except as otherwise specifically provided in this chapter, in the event of a breach or default of any term, covenant, restriction, or condition of any lease or patent heretofore or hereafter issued under this chapter, the board of land and natural
resources shall deliver a “written notice” of the breach or default by personal service or by registered or certified mail to the party in default and to “each holder of record” having any security interest in the land covered by or subject to the lease or patent making demand upon the party to cure or remedy the breach or default within sixty days from the date of receipt of the notice; provided that where the breach involves a failure to make timely rental payments pursuant to the lease or patent heretofore or hereafter issued under this chapter, the written notice shall include a demand upon the party to cure the breach within less than sixty days, but not less than five business days, after receipt of the notice. Upon failure of the party to cure or remedy the breach or default within the time period provided herein or within such additional period as the board may allow for good cause, the board may, subject to section 171-21 exercise such rights as it may have at law or as set forth in the lease or patent. [L 1962, c 32, pt of §2; am L 1965, c 239, §1; Supp, §103A-20; HRS §171-20; am L 1981, c 160, §1; am L 1991, c 185, §1]

HRS §91-9 Contested cases. notice; hearing; records. (a) Subject to section 91-8.5, in any contested case, all parties shall be afforded an opportunity for hearing after reasonable notice. (b) The notice shall include a statement of:
(1) The date, time, place, and nature of hearing;
(2) The legal authority under which the hearing is to be held;
(3) The particular sections of the statutes and rules involved;
(4) An explicit statement in plain language of the issues involved and the facts alleged by the agency in support thereof; provided that if the agency is unable to state such issues and facts in detail at the time the notice is served, the initial notice may be limited to a statement of the issues involved, and thereafter upon application a bill of particulars shall be furnished;
(5) The fact that any party may retain counsel if the party so desires and the fact that an individual may appear on the individual's own behalf, or a member of a partnership may represent the partnership, or an officer or authorized employee of a corporation or trust or association may represent the corporation, trust, or association.
(c) Opportunities shall be afforded all parties to present evidence and argument on all issues involved.
(d) Any procedure in a contested case may be modified or waived by stipulation of the parties and informal disposition may be made of any contested case by stipulation, agreed settlement, consent order, or default.
(e) For the purpose of agency decisions, the record shall include:
(1) All pleadings, motions, intermediate rulings;
(2) Evidence received or considered, including oral testimony, exhibits, and a statement of matters officially noticed;
(3) Offers of proof and rulings thereon;
(4) Proposed findings and exceptions;
(5) Report of the officer who presided at the hearing;
(6) Staff memoranda submitted to members of the agency in connection with their consideration of the case.
(f) It shall not be necessary to transcribe the record unless requested for purposes of rehearing or court review.

(g) No matters outside the record shall be considered by the agency in making its decision except as provided herein. [L 1961, c 103, §9; Supp, §6C-9; HRS §91-9; am L 1980, c 130, §1; gen ch 1985; am L 2003, c 76, §2]

Article I, Section 5 of the Hawai‘i Constitution: provides that “no person shall be denied the enjoyment of civil rights or be discriminated against in the exercise thereof because of race, religion, sex or ancestry.” The legislature gave meaning to this commitment by creating the Hawai‘i Civil Rights Commission (HCRC), through enactment of Act 219 in 1988 and Acts 386 and 387 in 1989.

Deprivation of Rights Under Color of Law in violation of Title 18, United States Code § 242: This statute makes it a crime for any person acting under color of law, statute, ordinance, regulation, or custom to willfully deprive or cause to be deprived from any person those rights, privileges, or immunities secured or protected by the Constitution and laws of the U.S. This law further prohibits a person acting under color of law, statute, ordinance, regulation or custom to willfully subject or cause to be subjected any person to different punishments, pains, or penalties, than those prescribed for punishment of citizens on account of such person being an alien or by reason of his/her color or race. Acts under "color of any law" include acts not only done by federal, state, or local officials within the bounds or limits of their lawful authority, but also acts done without and beyond the bounds of their lawful authority; provided that, in order for unlawful acts of any official to be done under "color of any law," the unlawful acts must be done while such official is purporting or pretending to act in the performance of his/her official duties. This definition includes, in addition to law enforcement officials, individuals such as Mayors, Council persons, Judges, Nursing Home Proprietors, Security Guards, etc., persons who are bound by laws, statutes ordinances, or customs.

33 U.S.C. §1251 et seq. (1972) The Clean Water Act (CWA) establishes the basic structure for regulating discharges of pollutants into the waters of the United States and regulating quality standards for surface waters. The basis of the CWA was enacted in 1948 and was called the Federal Water Pollution Control Act, but the Act was significantly reorganized and expanded in 1972. "Clean Water Act" became the Act's common name with amendments in 1972. Under the CWA, EPA has implemented pollution control programs such as setting wastewater standards for industry. EPA has also developed national water quality criteria recommendations for pollutants in surface waters.

The CWA made it unlawful to discharge any pollutant from a point source into navigable waters, unless a permit was obtained.

HRS §343-1 Findings and purpose. The legislature finds that the quality of humanity’s environment is critical to humanity’s well being, that humanity’s activities have broad and profound effects upon the interrelations of all components of the environment, and that an
environmental review process will integrate the review of environmental concerns with existing planning processes of the State and counties and alert decision makers to significant environmental effects which may result from the implementation of certain actions. The legislature further finds that the process of reviewing environmental effects is desirable because environmental consciousness is enhanced, cooperation and coordination are encouraged, and public participation during the review process benefits all parties involved and society as a whole.

It is the purpose of this chapter to establish a system of environmental review which will ensure that environmental concerns are given appropriate consideration in decision making along with economic and technical considerations. [L 1979, c 197, §1(1); am L 1983, c 140, §4]

HRS §343-3 Public records and notice. (a) All statements, environmental assessments, and other documents prepared under this chapter shall be made available for inspection by the public during established office hours.
(b) The office shall inform the public of notices filed by agencies of the availability of environmental assessments for review and comments, of determinations that statements are required or not required, of the availability of statements for review and comments, and of the acceptance or nonacceptance of statements.
(c) The office shall inform the public of:
(1) A public comment process or public hearing if a federal agency provides for the public comment process or public hearing to process a habitat conservation plan, safe harbor agreement, or incidental take license pursuant to the federal Endangered Species Act;
(2) A proposed habitat conservation plan or proposed safe harbor agreement, and availability for inspection of the proposed agreement, plan, and application to enter into a planning process for the preparation and implementation of the habitat conservation plan for public review and comment;
(3) A proposed incidental take license as part of a habitat conservation plan or safe harbor agreement; and
(4) An application for the registration of land by accretion pursuant to section 501-33 or 669-1(e) for any land accreted along the ocean.
(d) The office shall inform the public by the publication of a periodic bulletin to be available to persons requesting this information. The bulletin shall be available through the office and public libraries. [L 1974, c 246, pt of §1; ren L 1979, c 197, §1(3); am L 1983, c 140, §6; am L 1992, c 241, §1; am L 1997, c 380, §8; am L 1998, c 237, §7; am L 2003, c 73, §3]

NOTICE OF PUBLIC AUCTION

AUCTION SALE OF BOATING LEASE
AT HONOKOHAU SMALL BOAT HARBOR

Notice is hereby given that the State of Hawai‘i, Department of Land and Natural Resources, Division of Boating and Ocean Recreation, (“DOBOR”) shall conduct a public auction for the sale of a lease of a portion of the Government Land of Kealakehe, located at Honokohau Small Boat Harbor (“Harbor”) at Kealakehe, North Kona, Island of Hawai‘i, State of Hawai‘i.

A. Time and Place of Auction. The Public Auction shall be conducted at the Honokohau Small Boat Harbor District Office in the conference room, 74-380 Kealakehe Parkway, Kailua-Kona, Hawai‘i 96740-2704 on July 13, 2018 at 10:00 AM.

B. General Description and Location of the Land. The portion of government land, situated at Kealakehe, North Kona, Island of Hawaii, State of Hawai‘i, identified by Tax Map Key No.: (3) 7-4-008:003 Portion, containing approximately 392,040 square feet of unimproved graded-gravel land, fenced with chain link fencing, at the Harbor.

C. Term and Use. The term of the Lease shall be ten (10) years, commencing upon the execution of the Lease document. The Premises shall be used for the operation of a boat/trailer storage facility and vehicle parking.

D. Upset Percentage Rent. Percentage annual rent shall be a percentage of gross revenue from all sources within the leased Premises. The percentage rent shall be established by the winning bid at Public Auction with 50% minimum upset percentage. The successful bidder with the highest percentage bid at auction is the winning bid. All subsequent bids must be in whole numbers. The rent shall be determined by either, the base annual rent of $423,000.00 payable in advance, in equal monthly installments on the first (1st) day of each and every month, or the percentage, established by the winning bid, of gross revenue payable on the fifteenth (15th) day of the month, whichever is greater.

E. Availability of Documents for Inspection. The lease documents are available for public inspection during business hours (7:45 AM to 4:30 PM, Monday through Friday, except holidays) at the Honokohau Small Boat Harbors District Office, at 74-380 Kealakehe Parkway, Kailua-Kona, Hawai‘i 96740-2704, or available from the Division of Boating and Ocean Recreation website at
F. **Bidding.** Each prospective Bidder will be required to complete the Bid Intent Package that requires submission of financial statement(s), and other documents, and submit the same to the State, Property Management Office located at 4 Sand Island Access Road, Honolulu, Hawai‘i 96819, no later than 4:00 PM on June 20, 2018. The questionnaires, included as part of the Bid Intent Package will be considered confidential and will not be made available for inspection by the general public.

Any qualified individual, corporation, limited liability company, partnership, joint venture or other entity may bid at the Public Auction after timely submission of an acceptable Bid Intent Package.

G. The State reserves the right to cancel this Public Auction, or to postpone or continue same from time to time, as it may deem necessary, by publication of notice to that effect or by public announcement at the time scheduled therefore.

EXECUTIVE SUMMARY

ESI performed a Phase I Environmental Site Assessment for the property (the Subject Property) located at 74-429 Kealakehe Parkway at Honokohau Harbor Small Boat Harbor, Kailua-Kona, Hawaii. The Subject Property is identified as a 9-acre portion of Tax Map Key Number (3) 7-4-008:003 (the TMK Parcel) and is occupied by a boat storage facility, a welding and fabrication business, and vacant land. The assessment was performed in conformance with ASTM Standard E1527-13 and it complies with EPA regulations under CFR Title 40, Part 312.

The Subject Property is owned by the State of Hawaii and is part of the Hawaiian Home Lands Trusts Lands. Before 1992, Honokohau small boat harbor was under the management authority of the Department of Transportation, Harbors Division. In 1992, management authority was officially transferred from the State Department of Transportation to the Department of Land and Natural Resources (DLNR), Department of Boating and Ocean Recreation. According to DLNR, the Honokohau SBH has been in operation for over thirty years.

This assessment provides a recent, documented account of conditions at the Subject Property that can be referenced by the user Pacific Marine Partners, LLC. The purpose of the assessment was to evaluate if current or past operations at the Subject Property or in the immediate vicinity have impacted or could potentially impact the environmental integrity of the Subject Property. ESI investigated historical uses of the Subject Property, signs of gross surface contamination, PCB-containing items, USTs/ASTs, petroleum pipelines, and evidence of hazardous materials and hazardous wastes.

Based on a review of federal records, the TMK Parcel is listed as an ERNS site due to a release of fuel from a vessel in the harbor to the west. The record indicates that there are no NPL sites within one-mile and no CERCLIS, RCRA-CORRACTS, or TSD sites within one-half mile of the Subject Property. There were no CERCLIS NFRAP sites within one-half mile of the Subject Property. There were no registered LQG, SQGs, and CESQGs within one-quarter mile of the Subject Property.

According to the database search, there are no UST sites within one-quarter mile of the Subject Property. However, one UST site was identified that is located approximately 100 feet southwest of and adjacent to the Subject Property, across Kealakehe Parkway. Three USTs are currently in use at the GKM, Inc. site. There is one LUST site within one-half mile of the Subject Property and topographically upgradient. A request to obtain copies of incidents reported at the Subject Property was submitted to the HFD. No response has been received to date.

There are no voluntary cleanup sites within one-half mile of the Subject Property. Based on records review, there was a release of waste oil to the harbor west of the Subject Property in 2012. There were no hazardous material incidents reported for the Subject Property.

ESI personnel conducted a site inspection on December 6, 2018. During the site inspection the following were observed.
• A number of temporary structures including an office trailer, and one permanent structure with a concrete slab floor.
• An unpaved, small boat storage yard near its apparent storage capacity.
• Small-capacity petroleum storage tanks and pails (fuel and lubricating oil), and de minimis releases of oil from boats and vehicles indicating poor housekeeping.
• A welding and fabrication shop (Hot Spot Marine Fabrication) with small quantities of hazardous materials, such as paints, solvents/thinners, coolant, cleaners, compressed gases, and solid waste.
• Two openings or portals to an apparent septic system, or cesspool, at the location of the Hot Spot fabrication shop at the northwest corner of the Subject Property.
• Uncontrolled dumping of waste materials or waste-like materials consisting of scrap metal, old tires, construction debris, wood and metal debris, unidentifiable materials, a tractor, and an old air compressor on or around the berms at the eastern and northern boundaries of the Subject Property, also indicating poor housekeeping.
• Apparent abandoned or derelict vessels and trailers, some with highly weathered exteriors that have resulted in releases of paints, metals, and other debris to the ground surface.
• An adjacent property to the west with numerous commercial businesses and activities, septic systems, and above ground and underground fuel storage tanks.

ESI considers the apparently undocumented waste water system at the Hot Spot fabrication shop, the uncontrolled dumping, a collection of otherwise de minimis release of oil, paint, or other hazardous substances, solid wastes and abandoned or derelict vessels cited above as recognized environmental conditions. Based on the results of the Phase I assessment, ESI concludes that the potential for releases exists from wastewater generated historically at the location of the Hot Spot shop, from solid wastes discarded or land-filled, the accumulation of waste-like materials (e.g., heavy equipment, scrap metal, various debris, fuel tanks and containers) and from derelict vessels and trailers (i.e., fuels and oil, batteries, paint solids, heavy metals). All of these may have impacted or pose an imminent threat of release that could impact the environmental integrity of the Subject Property, and therefore are considered recognized environmental conditions.

In addition, based on the historical activities at the Subject Property, including the storage, repair and alteration of vessels in storage at the Subject Property since around 1983, and the lack of best management practices typically required by an NPDES permit, the surface soils of the Subject Property may be impacted by the accumulation of releases of hazardous substances (including petroleum) that otherwise might be considered de minimis and that accumulation of releases is considered a recognized environmental condition.
SECTION 1 – INTRODUCTION

This report describes the Phase I Environmental Site Assessment completed by Environmental Science International, Inc. [ESI], on behalf of Pacific Marine Partners, LLC, for the property located at 74-429 Kealakehe Parkway at Honokohau Harbor, Kailua-Kona, Hawaii (Figures 1 and 2), hereinafter referred to as the “Subject Property.” The Subject Property is identified by the County of Hawaii Real Property Tax Office as a portion of Tax Map Key [TMK] No. (3) 7-4-008:003 and consists of approximately 9 acres (Figure 3). The Subject Property is occupied by a boat storage facility, a welding and fabrication business, and vacant land.

1.1 PURPOSE

This assessment was undertaken to gather pertinent information regarding the Subject Property. It was performed to identify conditions at the Subject Property that could result in real or potential hazards or in environmental liabilities, as dictated by federal, state, and local statutes and regulations. Specific concerns investigated included the following: historical uses of the Subject Property, gross surface contamination, polychlorinated biphenyl [PCB]-containing items, underground storage tanks [USTs], aboveground storage tanks [ASTs], underground petroleum pipelines, evidence of the storage or use of hazardous materials, and processes that might generate or require the storage of hazardous wastes.

This assessment provides a recent, documented account of conditions at the Subject Property that can be referenced by the user. The assessment meets what is defined as “good commercial and customary practice” for conducting an environmental site assessment, as outlined in the American Society for Testing and Materials [ASTM] standard practice E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Assessment Process (ASTM, 2013). This assessment complies with Environmental Protection Agency [EPA] regulations under Code of Federal Regulations [CFR] Title 40, Part 312, Innocent Landowners, Standards for Conducting All Appropriate Inquiries (EPA, 2018).

1.2 METHODOLOGY

The methods by which this assessment was performed include a review of historical data and a review of federal and state agency records. Particular emphasis was placed on recent historical uses of the Subject Property, gross surface contamination, PCB-containing items, USTs, hazardous materials, and hazardous wastes.

1.2.1 Review of Historical Data

The historical records review focused on identifying previous landowners, lessees, and land usage. These data were obtained through tax records, State of Hawaii Department of Health [DOH] records, maps, aerial photographs, and personal interviews. Of interest were operating practices on the Subject Property, development plans, and adjacent land use, from the initial utilization of the Subject Property to the present day. Aerial photographs are included in Appendix B.
Tax records were reviewed to determine past owners and lessees of the Subject Property (Appendix C). Letters of correspondence to regulatory agencies and other parties are provided in Appendix D. The information provided by the DOH Solid and Hazardous Waste Branch [SHWB] and Hazard Evaluation and Emergency Response [HEER] Office consists of known environmental incidents (solid and hazardous wastes, wastewater discharges, chemical spills), citations and inspections by regulatory authorities, and current operating permits. Historical maps and aerial photographs present graphic illustrations of past Subject Property use. Other resources were reviewed, such as environmental audits and documents that could provide information concerning current and potential liability.

**Personal Interviews**

Interviews with people knowledgeable about the Subject Property are valuable sources of information concerning past and present activities that may not be found in state or municipal records.

**1.2.2 Review of Regulatory Information**

Federal, state, and county environmental databases were reviewed for evidence of environmental impacts to the Subject Property and surrounding area, in accordance with ASTM Standard E1527-13. These include the following information sources.

**Federal Databases**

1. The EPA National Priorities List [NPL] of hazardous waste sites to be considered for remediation with federal funds, including delisted NPL sites.
3. The Resource Conservation and Recovery Act [RCRA] Generator List, which tracks hazardous waste from the point of generation to the point of disposal. This includes Corrective Action Sites [CORRACTS] and Treatment, Storage, and Disposal [TSD] sites.
4. The Emergency Response Notification System [ERNS] list provides information pertaining to oil dischargers and hazardous substance releases.
5. The Facility Index System contains both facility information and “pointers” to other sources that contain more detail. These include the Resource Conservation and Recovery Information System, the Permit Compliance System, and others.
6. The Federal Hazardous Materials Information Reporting System, which includes hazardous materials spills reported to the Department of Transportation [DOT].
7. The PCB Activity Database System identifies generators, transporters, commercial storers, and/or brokers and disposers of PCBs who are required to notify the EPA of such activities.
State Databases
1. The DOH HEER Office database, which includes state-equivalent CERCLA sites, voluntary cleanup sites, release notifications, and Brownfields sites.
2. The DOH SHWB database, which includes landfill and solid waste disposal sites, UST sites, and Leaking UST [LUST] sites.

County Database
1. Hawaii Fire Department [HFD] database, which lists hazardous material releases and records of response.

In addition to the in-house review of records and databases, ESI uses an independent data provider, Environmental Data Resources, Inc. [EDR]. EDR provides an independent search and database that are used to help ensure that all possible agency and private records for a particular site are retrieved. In addition to the databases noted above, EDR searches several other databases, including Records of Decisions by the State and Federal Judiciary, Federal Superfund Liens, and the RCRA Administrative Tracking System. A copy of the EDR report is included in Appendix E.

1.2.3 Property Inspection

The purpose of a property inspection is to gather evidence of past releases of oil or hazardous materials, soil and groundwater contamination, conditions that could constitute a threat of release of oil or hazardous materials, items suspected to contain PCBs, past or present existence of USTs, the use, or storage of hazardous materials, and waste handling and disposal.

Gross Surface Contamination
Gross surface contamination often is an indication of an ongoing release or a past release of oil or hazardous materials, and it may be indicative of just a fraction of the total extent of subsurface soil or groundwater contamination. Evidence of gross surface contamination includes stained or discolored soils, stressed vegetation, and unusual odors.

PCB-Containing Items
PCBs are synthetic chemicals that were first introduced in 1929. Because of their chemical stability, electrical properties, and heat transfer capabilities, they were widely used in industry, particularly in electrical transformers, capacitors, and fluorescent light ballasts. Researchers in the 1960s found that exposure to PCBs posed a significant human health risk. In 1979, the EPA promulgated the Toxic Substances Control Act [TSCA], which regulates the use and disposal of PCB-containing items.

As part of this assessment, an inventory of electrical transformers in close proximity to the Subject Property was made. Hawaii Electric Light Company (HELCO) maintains an extensive database of Hawaii Electric Light transformers that includes their PCB status. In addition, EPA regulations require that all untested mineral oil transformers manufactured prior to July 1, 1979,
must be considered PCB contaminated. Hawaii Electric Light maintains that all of their transformers in use are in compliance with TSCA and all applicable related regulations.

**UST Systems**
As part of the assessment, an inventory of USTs at and proximal to the Subject Property was made. UST system management is strictly regulated by the EPA (40 CFR Part 280) and by the State of Hawaii, under Chapter 342L of the Hawaii Revised Statutes. Regulations include registering all UST systems with the DOH and the HFD. USTs currently in use must meet rigorous leak detection, corrosion protection, and spill and overfill prevention performance standards. In addition, UST systems that are out of service must be properly closed. Upon closure, an assessment of soil and groundwater contamination must be performed.

**Hazardous Materials**
The proper use and storage of hazardous materials is necessary to ensure a safe work place and prevent possible environmental damage due to spills or leaks of hazardous materials to the environment.

**Hazardous Waste**
Hazardous waste is strictly regulated by the EPA under RCRA. Waste generators are responsible for determining if their waste is hazardous, as defined in 40 CFR Part 261. The degree to which a generator is regulated is dependent upon the type and amount of waste generated. Owners and operators who improperly generate, treat, store, dispose of, or transport hazardous waste may be subject to fines imposed by local and federal regulators. In addition, poor management of hazardous waste may contribute to the contamination of air, soil, surface water, and groundwater. The cleanup of uncontrolled hazardous waste sites can be a costly and lengthy process.

**Asbestos-Containing Materials [ACM]**
Asbestos is the name of naturally occurring minerals that separate into strong, microscopic fibers that are heat resistant and durable. These qualities have made asbestos extremely useful in construction and industry. Asbestos has been used for thermal and acoustical insulation, fireproofing, roofing, flooring tiles, pipe insulation, cement piping, and decoration on exposed surfaces. Prior to 1982, ACM commonly were incorporated into structures.

After 1982, ACM began to be phased out because of health concerns. Asbestos tends to break down into a dust of tiny fibers that remain suspended in air for long periods of time and can be inhaled easily. Because of their durability, these fibers can remain in the body for years. In general, asbestos-related diseases have a latency of 20 to 40 years after exposure.

The presence of ACM does not necessarily imply that a health hazard exists. Unless a material is friable (i.e., it is crumbly and able to release fibers into the air), it poses no risk if left undisturbed. Asbestos disturbance is regulated under the National Emission Standards for Hazardous Air Pollutants [NESHAP] (40 CFR Part 61) and the Asbestos Hazard Emergency Response Act [AHERA] (40 CFR part 763).
Neither a detailed inspection nor an ACM assessment was performed. Note that asbestos is a constituent of potential concern that is excluded from CERCLA and thus not covered under the all-appropriate inquiry rule.

**Important Terms**

Five important terms used in describing conditions at a Subject Property include *material threat*, *historical recognized environmental condition*, *recognized environmental condition*, *controlled recognized environmental condition*, and *de minimis condition*. These terms are defined in the ASTM standard and are described below.

**Material Threat.** A physically observable or obvious threat that is reasonably likely to lead to a release and that could result in an impact to public health or the environment.

**Historical Recognized Environmental Condition.** A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or has met unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, institutional controls, or engineering controls).

**Recognized Environmental Condition.** The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property (1) due to release to the environment, (2) under conditions indicative of a release to the environment, or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

**Controlled Recognized Environmental Condition.** A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., issuance of a *No Further Action* letter or equivalent or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (e.g., engineering controls, institutional controls, activity and use limitations, and/or property use restrictions).

**De Minimis Condition.** A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

An example of a de minimis release of oil is one that is below the reportable quantity defined in the State Contingency Plan (DOH, 1995a). A reportable quantity of oil is defined as (1) a petroleum-hydrocarbon sheen on surface water or any navigable water of the State, (2) free product on groundwater, (3) greater than 25 gallons of oil released into the environment, or (4) less than 25 gallons of oil released that is not contained and remediated within 72 hours.
SECTION 2 – PHYSICAL SETTING

The characteristics of subsurface soils, topography, geology, and hydrogeology in the area of the Subject Property were reviewed. Property characteristics were determined from a review of published federal reports and maps describing the topography, geology, and soil distribution in the area.

2.1 PROPERTY LOCATION AND SETTING

The Subject Property is located at Honokohau Harbor, north of Kailua-Kona on the leeward side of the island of Hawaii. It is bordered on the north by Kaloko-Honokohau National Historical Park, on the east by vacant lava fields, on the south by Blue Ocean Mariculture, and on the west by Kealakehe Parkway. West and across Kealakehe Parkway is Honokohau Harbor Sea Store & Deli, a boat storage and repair business, and Captain Zodiac. A Department of Land and Natural Resources (DLNR) office and number of other small businesses and non-profit groups have been associated with the adjacent properties to the west. A paved boat washing area is adjacent to the northwest corner of the Subject Property (Figure 4). The Subject Property is located west (makai) of the State’s underground injection control [UIC] line, at a surface elevation of approximately 25 feet above mean sea level [amsl] (Figure 2). The nearest major body of surface water is Honokohau Harbor, which is located approximately 300 feet southwest of the Subject Property and directly connected to the Pacific Ocean.

2.2 CLIMATOLOGICAL CONDITIONS

Climatological conditions in the area of the Subject Property consist of warm to moderate temperatures and low to moderate rainfall. The Subject Property is on the leeward side of the island of Hawaii (prevailing east to northeasterly trade winds). The average annual precipitation is approximately 19 inches, which occurs mainly between November and April (Giambellica et al., 2014). Average temperatures range from the low to high 70s (degrees Fahrenheit) (Giambellica et al., 2014). The annual pan evaporation is approximately 80 inches (DLNR, 1985).

2.3 REGIONAL AND PROPERTY GEOLOGY

The island of Hawaii consists of five large shield volcanoes, Mauna Loa, Kilauea, Hualalai, Mauna Kea, and Kohala (MacDonald, et al., 1970). The western side of the island of Hawaii is known as the North and South District of Kona (Macdonald, et al., 1970). The Subject Property is located along the western flank of Hualalai. Hualalai is a dormant volcano that last erupted in the early 1800s. The lavas that erupted during the shield-building phase of Hualalai belong to the Hualalai Volcanic Series. The lavas of the Hualalai Volcanic Series interfinger with the lavas of the Kau Volcanic Series of Mauna Loa on the southern and eastern slopes. Small cinder and spatter cones are scattered at the source of the lava flows (Stearns Macdonald, 1946). On the southern slope, most of the lava flows are covered with a layer of ash. The Subject Property overlies ash and cinder deposits of the Hualalai Volcanic Series.
The soil in the area of the Subject Property consists of Honokohau Complex pahoehoe lava flows (United States Department of Agriculture, 2018). The lava flow soils consist of well-drained, thin organic materials that overlie pahoehoe lava bedrock. These soils are gently sloping to moderately steep.

2.4 REGIONAL AND PROPERTY HYDROGEOLOGY

Groundwater in Hawaii exists in two principal types of aquifers. The first and most important type, in terms of drinking water resources, is the basal aquifer. The basal aquifer exists as a lens of fresh water floating on and displacing seawater within the pore spaces, fractures, and voids of the basalt that forms the underlying mass of each Hawaiian island. The basal aquifer can be both confined and unconfined by overlying caprock. Unlike much older Hawaiian islands, Hawaii island’s basal aquifer is not confined by overlying caprock. Therefore, waters flow freely under gravity to streams and to the coastal reaches of the island from the basal aquifer. Therefore, the second type of aquifer, the caprock aquifer, which consists of various kinds of unconfined and semi-confined groundwater due to the presence of nearly impermeable sediments that form the caprock, does not occur on Hawaii island.

Groundwater in the area of the Subject Property is part of the Keauhou Aquifer System of the Hualalai Aquifer Sector. The aquifer is classified as a basal, unconfined, flank aquifer. It is currently used as a drinking water source. It is classified as a low salinity water aquifer that is irreplaceable, and highly vulnerable to contamination (Mink and Lau, 1993). The depth to basal groundwater, the drinking water source in the area north of the Subject Property, is greater than 100 feet below ground surface. However, as illustrated on Figure 2, the Subject Property is located makai (below) the UIC line and therefore is not considered a current or potential drinking water source.

The shallow water table beneath the Subject Property is likely to be tidally influenced, due to its close proximity to Honokohau Harbor. In the general area of the Subject Property, the direction of groundwater flow is likely to the west, towards the ocean. The nearest water well is located 0.35 miles upgradient from the Subject Property and is used for observation. Table 2.1 summarizes the non-drinking water wells located within 1 mile of the Subject Property. There are no drinking water supply wells located within 1 mile of the Subject Property. Any potential drinking water wells would be located east and upgradient of the Subject Property. Based on the direction and distance to the nearest drinking water well, it is unlikely that releases of hazardous substances at or in the immediate vicinity of the Subject Property have impacted or could impact drinking water sources.

SECTION 3 – PROPERTY INFORMATION

The Subject Property is owned by the State of Hawaii. It is occupied by Pacific Marine Partners LLC doing business as Honokohau Marine Storage, under a lease (revocable permit) with the DLNR.

3.1 PROPERTY DESCRIPTION AND CURRENT LAND USE

The Subject Property consists of a 9-acre portion of a larger parcel (TMK (3) 7-4-008:003) (Figures 3 and 4). The surrounding properties consist primarily of commercial businesses, vacant land, and a national historic park. The surrounding properties are summarized in Table 3.1. The state land use designation for the area is Urban District and the County of Hawaii Zoning Designation is Open District. The Subject Property is located in Flood Zone X, which is determined to be outside the 0.2% annual chance floodplain. The Subject Property is also located within the County of Hawaii Special Management Area.

The western six acres of the Subject Property are occupied by an open, fenced yard that is currently used as a boat storage facility (Honokohau Marine Storage) and a welding and fabrication business (Hot Spots). The boat storage facility is unpaved and covered by gravel (crushed lava rock) and includes over 300 stalls that can be individually rented (Figure 5). Hot Spots is located on the northwestern portion of the Subject Property and is covered with concrete pavement and contains a warehouse and fabrication shop. The eastern three acres of the Subject Property are vacant lava fields.

3.2 PROPERTY HISTORY

Tax information, historical maps, aerial photographs, topographic maps, interviews with people knowledgeable about the Subject Property, and other sources of historical information were used to compile a history of the property and the surrounding area. Aerial photographs from 1954 to 2018 were reviewed. The parcel titleholder and lessees are summarized in Table 3.2. The aerial photographs reviewed are listed in Table 3.3 and are included in Appendix B. The historical maps reviewed are listed in Table 3.4.

The Subject Property and Parcel 003 have been State-owned land since before 1967. The following is an excerpt from the November 9, 2017, Board of Land and Natural Resource, DLNR set aside and right of entry application:

“Before 1992, the Honokohau SBH was under the management authority of the Department of Transportation, Harbors Division (DOT). But in 1991, the legislature passed Act 272, Session Laws of Hawaii (1991), which provided for the transfer of all of the small boat harbors in the State from DOT to DLNR. DOBOR took over management of Honokohau SBH in approximately 1992.

At its meeting of September 22, 2000, Item D-7, the Board approved the set-aside of lands designated as Tax Map Key: (3) 7-4-008:003 por., area 127.3 12 acres (Parcel 3), to
DOBOR. See Exhibit 3 attached. This area included the harbor and general vicinity, including 4.372 acres of submerged lands in the harbor channel.

Executive Order No. 3858 formalizing the set-aside was signed by the Governor on February 13, 2001. However, due to an error in preparing the executive order, it inadvertently set aside more land than the Board had approved. In addition to Parcel 3, Executive Order No. 3858 set aside TMK: (3) 7-4-008:04 1 (Parcel 41), area 7.25 acres, and the subject parcel, TMK: (3) 7-4-008:07 1 (Parcel 71), area 218.45 acres, to DOBOR. Subsequently, at its meeting of December 13, 2002, Item D-38, the Board approved the set-aside of Parcel 71 to DOBOR for marina and marina enhancement purposes. See Exhibit 4 attached. However, the Board's approval action obtained after the execution of Executive Order No. 3858 did not cure the error in the executive order. Accordingly, Land Division staff prepared a second executive order, Executive Order No. 3984 signed by the Governor on April 1, 2003, which cancelled Executive Order No. 3858.

According to West Hawaii Today, “Gentry’s Kona Marina has operated the [boat storage] facility since 2003 when it took over a revocable permit that Gentry Properties had held from 1999 to 2003. From 1994 to 1999, Gentry Properties held a five-year lease that was not renewed; only revocable permits had been issued since.”

Based on the review of historical maps and photographs, in 1954 the Subject Property and surrounding area were undeveloped land. By 1976, the Honokohau Boat Harbor was present, but the Subject Property remained undeveloped. By 1985, the western portion of the Subject Property was being used for storage, and the area to the south was developed with a
warehouse. By 2000, the Subject Property was being used for boat storage and the surrounding area was developed with warehouses and open parking areas.

**Property Owners**
As early as 1952, the State of Hawaii held title to the land occupied by the Subject Property. The land is part of the Hawaiian Home Lands Trust, Section 5(b) lands of the Hawaii Admission Act. Parcel 003 has been subdivided numerous times over the past 50 years. In 1971, an easement was granted to the U.S. government to access the harbor.

**Lessees**
The Parcel 003 and the Subject Property were part of the Kaloko-Honokōhau National Historical Park designated in 1978. Prior to Pacific Marine Partners, LLC, doing business as Honokohau Marine Storage, GKM, Inc., was the last recorded holder of access and use rights under a DLNR revocable permit for the Subject Property. GKM's revocable permit was terminated by DLNR in August 2018.

Other encumbrances reported by DLNR-Land Division over Parcel 003 are summarized in the following grid, which contains information regarding the encumbrances that may have been issued over multiple parcels, or specifically to the area of encumbrances themselves (Public Lands Trust Information System [PLTIS], 2018).

**NOTES:**
The content within the PLTIS, including maps and data, has been collected from multiple city, county, and state sources, and may not have been prepared for legal, engineering, or surveying purposes (PLTIS, 2018).

### 3.3 PREVIOUS ENVIRONMENTAL INVESTIGATIONS

A Phase I Environmental Site Assessment was previously conducted at the Subject Property in October 2018 (Lehua Environmental Inc., 2018). No recognized environmental conditions were identified in connection with the Subject Property. The following *de minimis* items of environmental concern were noted in the report:
Various small petroleum stains were observed throughout the Subject Property during the site inspection. The report stated it appeared that the staining was from small boat and car/truck motor/engine part leaks, which is consistent with site use as a commercial parking area. The report recommended that spill pans/proper containment should be placed under all motorized equipment and storage containers that have the potential to release petroleum products or other potentially hazardous materials.

Various improperly stored small quantities of petroleum product, such as motor oil, were observed at the Subject Property. The report recommended that these items should be properly stored in protected spill containment areas.

Unmarked drums/containers were observed at the Subject Property. The report recommended that all unmarked drums/containers should be properly characterized and disposed of accordingly in accordance with County and State regulations.

Flaking paint chips and paint in poor condition were observed on boats, construction materials, and on the ground surface at the Subject Property in several locations. It was noted that paint chips could contain lead. The report recommended that all loose and flaky paint be removed to prevent potentially lead-containing paint chips from entering the soil and stormwater sheet flow to the surrounding environment, including the ocean at Honokohau Harbor just downgradient from the Subject Property.

The reported petroleum leaks/releases at Honokohau Harbor noted in the environmental database search (ERNS, SHWS), along with the general use of the area as a commercial harbor, represent an environmental concern since the potential for these types of releases is present. […]

No other environmental investigation reports for the Subject property were located during our review of the historical data.
SECTION 4 – RECORDS REVIEW AND PREVIOUS FINDINGS

A summary of the federal, state, and county records that were reviewed is provided below. This summary is based on information contained in the EDR report, state and county records, the Lehua Environmental report, and environmental investigative reports regarding the Subject Property and nearby sites. The record request conducted in the EDR report is dated December 4, 2018.

4.1 FEDERAL REGULATORY RECORDS

Federal regulatory records were reviewed for evidence of environmental conditions at the Subject Property and nearby sites. Environmental conditions identified by regulatory records were evaluated based on the location of the site and the potential that the environmental condition could impact the Subject Property.

4.1.1 NPL Sites

There are no active NPL sites within one mile or delisted NPL sites within one-half mile of the Subject Property.

4.1.2 CERCLIS Sites

There are no CERCLIS sites within one-half mile of the Subject Property.

4.1.3 RCRA CORRACTS and TSD Sites

There are no RCRA CORRACTS or TSD sites within one-half mile of the Subject Property.

4.1.4 RCRA Generators List

There are no registered RCRA generators within one-quarter mile of the Subject Property.

4.1.5 Federal Institutional Control/Engineering Control Sites

The Subject Property does not have any federal institutional or engineering controls.

4.1.6 ERNS Sites

The TMK Parcel that includes the Subject Property is listed as an ERNS site. Based on the EDR report, a discharge of gasoline due to operator error was reported in October 2016. The reporting party stated that while fueling the compressor on a vessel, the error occurred, and gasoline was released to the deck of the vessel and the harbor. The amount spilled was less than 0.5 gallon of fuel. Booms and absorbents were applied, and the material was contained. The responsible company was listed as Blue Ocean Mariculture. Since this spill occurred at the harbor, it is not an environmental concern for the Subject Property.
4.2 State Regulatory Records

State regulatory records were reviewed for evidence of environmental conditions at the Subject Property and nearby sites. Environmental conditions identified by regulatory records were evaluated based on the location of the site and the potential that the environmental condition could impact the Subject Property. No environmental concerns were found. However, the activities conducted on the Subject Property appear to be included in Standard Industrial Code (SIC) Major Group 44: Water Transportation, Industry Group 449: Services Incidental to Water Transportation, subclassification 4493 Marinas. This SIC subclassification includes:

- Boat yards, storage and incidental repair
- Marinas
- Marine basins, operation of
- Yacht basins, operation of

Establishments primarily engaged in operating marinas. These establishments rent boat slips and store boats, and generally perform a range of other services including cleaning and incidental boat repair. They frequently sell food, fuel, and fishing supplies, and may sell boats. Establishments primarily engaged in building or repairing boats and ships are classified in Manufacturing, Industry Group 373. Establishments primarily engaged in the operation of charter or party fishing boats or rental of small recreational boats are classified in Services, Industry 7999.

It therefore may require an NPDES Permit. No record of such a permit was available for the Subject Property.

4.2.1 State Hazardous Material Incident Sites

Based on ESI’s review of the DOH HEER Office records and the EDR report, there was one hazardous material incident within one-half mile of the Subject Property that was reported to the DOH HEER Office (EDR, 2018). The site is listed as Kona Fuel and Marine (fuel dock), with a supplemental location listing of Hualalai Resort. Oil contamination was found in soil and the contaminated soil was removed. Retesting of soil samples yielded results below the DOH environmental action levels. The incident received a determination of no further action [NFA] from the DOH HEER office in 2014.

4.2.2 Voluntary Cleanup Sites

Based on ESI’s review of the DOH HEER Office records and the EDR report, there are no voluntary cleanup sites within one-half mile of the Subject Property.

4.2.3 Solid Waste Landfill Sites

There are no permitted Solid Waste Landfills within one-half mile of the Subject Property.
4.2.4 Brownfields Sites

There are no Brownfields sites within one-half mile of the Subject Property.

4.2.5 UST Sites

According to the EDR report, there are no UST sites within one-quarter mile of the Subject Property. However, the EDR mapping is inaccurate and there is one UST site, GKM, Inc., located approximately 100 feet southwest of the Subject Property on the adjacent property (across Kealakehe Parkway). Three USTs are currently in use at the site (EDR, 2018). The USTs are located on the same property as Honokohau Harbor Sea Store & Deli (Figure 4).

4.2.6 LUST Sites

Based on the review of DOH records, there are two LUST sites within one-half mile of the Subject Property. The two LUST sites are described below.

Kona Fuel and Marine (Fuel Dock) is listed as a LUST site (facility ID 9-600469). The site address is listed as 74-381 Kealakehe Parkway and, according to the DOH Environmental Health Warehouse Map Viewer, the site is located on the south side of the Honokohau Boat Harbor. The release ID is 950088 and site cleanup has been completed. The site received a determination of NFA from the DOH SHWB in 2002 for the release.

GKM, Inc., is listed as a LUST site (facility ID 9-601874). The site address is listed as 74-425 Kealakehe Parkway #23 and, according to the DOH Environmental Health Warehouse Map Viewer, the site is located on the adjacent property (across Kealakehe Parkway) to the southwest of the Subject Property. Two releases are associated with this site: release IDs 050039 and 020012. Site cleanup has been completed for both releases. The site received a determination of NFA from the DOH SHWB in 2002 and 2007 for the releases.

4.2.7 State Institutional/Engineering Control Registry Sites

There are no registered state institutional or engineering controls at the Subject Property.

4.3 COUNTY REGULATORY RECORDS

A request to obtain copies of incidents reported at the Subject Property was submitted to the HFD. No response had been received at the time of the report. Correspondence with the HFD is included in Appendix D.

4.4 ENVIRONMENTAL LIENS AND RESTRICTIONS

We reviewed current recorded tax records at the County of Hawaii and could find no documentation indicating that there are environmental liens, restrictions, or activity and use limitations for the Subject Property (Appendix C).
4.5 **UNDERGROUND PIPELINES**

There are no known underground petroleum-oil-lubricant pipelines on the Subject Property or in the surrounding area.

4.6 **PLANS AND PERMITS**

The County of Hawaii Real Property Tax website lists the building permits for the Subject Property TMK. The majority of the building permits available are for electrical and plumbing installations and alterations. Building permits for structures were primarily for buildings associated with the boat harbor. There were no building permits found specifically for the Subject Property. The Subject Property does not have any permanent buildings, except for the warehouse / fabrication shop used by Hot Spots. The list of available building permits is provided in Appendix F.
SECTION 5 – PROPERTY INSPECTION

ESI personnel conducted an on-site inspection of the Subject Property. The purpose of the inspection was to gather evidence concerning past releases of oil or hazardous materials, soil and groundwater contamination, conditions that could constitute a threat of a release of oil or hazardous materials, items suspected to contain PCBs, evidence of the past or present existence of USTs/ASTs, the use or storage of hazardous materials, and waste handling and disposal.

5.1 PROPERTY INSPECTION

On December 6, 2018, ESI personnel (Ms. Stephanie Davis) conducted an on-site inspection of the Subject Property. Photographic documentation of the inspection is included in Appendix A. A summary of general property observations is included in Table 5.1 and discussed below.

<table>
<thead>
<tr>

</tbody>
</table>
The majority of the Subject Property is occupied by Honokohau Marine Storage, a boat storage facility (Photographs 1 and 2). The northwestern portion of the Subject Property is occupied by Hot Spots, a welding and fabrication business (Photograph 3). A soil/rock berm borders the northern and eastern sides of the area occupied by Honokohau Marine Storage (Photographs 4 and 5). The three acres beyond the berm on the eastern side is vacant (lava fields) (Photograph 6).

The portion of the Subject Property occupied by Honokohau Marine Storage is unpaved and covered by gravel (crushed lava rock). There are over 300 stalls that can be individually rented for boat storage. A fence surrounds the western and southern boundaries and there are two gates that provide access from Kealakehe Parkway. An office trailer is located at the north gate (Figure 5; Photograph 7).

The portion of the Subject Property occupied by Hot Spots is covered with concrete pavement and contains a warehouse / fabrication shop (including laundry and restroom facilities) and several small storage buildings (Photograph 8). Since there are no on-site storm drains to collect surface runoff, a small sump is used to collect rainwater, which is pumped offsite during heavy rainfall events.

5.2 STORAGE DRUMS

No storage drums were observed at the Subject Property, except for open drums at Hot Spots used for storage of miscellaneous wood and metal, and a vessel with a rusted 55-gallon drum that appeared to contain fuel and was stored on the stern of the vessel on the northwestern corner of Honokohau Marine Storage of the Subject Property.

5.3 HAZARDOUS SUBSTANCES, PETROLEUM PRODUCTS, AND WASTE MATERIALS

Honokohau Marine Storage

Hazardous Substances: there were multiple locations where rusted metal pieces and paint chips were observed on the ground (see Figure 5 for locations; Photographs 9 through 12). Boat paint can potentially contain lead, copper, and tributyltin, and these chemicals may have been released to soil.

Petroleum Products:

- several 5-gallon buckets/containers of oil were observed across the boat storage yard (see Figure 5 for locations; Photograph 13);
- small quantities of properly stored oil were observed behind the office trailer;
- two small buckets of grease were observed on the ground at the location of a rusting boat trailer;
- de minimis petroleum stains were observed on the ground at several locations across the boat storage yard; and
- during the on-site inspection, oil was leaking from a boat engine and had created a 2-foot by 2-foot area of stained soil (Photograph 14). ESI notified the on-site manager, Mr. Ikaika Solliday, and he reported that a drip pan would be placed under the engine.
Waste Materials:
- the soil berms along the eastern and northeastern boundaries contain tires and pieces of concrete, wood, and metal debris (Photograph 15);
- on the eastern side of the boat storage area discarded rubber, a boat cover, fencing pipes, chain link fencing, wire mesh, wood debris, metal pieces, and several metal crab/shrimp pots were observed behind the boats (Photograph 16);
- at the southeast corner of the boat storage area, several discarded tires, an abandoned compressor, tractor, generator, and large boat trailer were observed (see Figure 5; Photographs 17 through 20); and
- several abandoned boats were observed along the perimeter of the boat yard; and according to a report by Honokohau Marine Storage, derelict vessels occupy 26 boat stalls or roughly 760 vessel feet.

**Hot Spots Welding and Fabrication**

Hazardous Substances: several welding gas cylinders (e.g., argon, acetylene, and carbon dioxide) and small quantities of general lubricants, cleaners, paints, thinners, and coolant were observed and stored properly (Photograph 21). Two automotive batteries were stored on a pallet and are reportedly recycled as needed.

### 5.4 WELLS

No groundwater monitoring wells or other types of wells were observed.

### 5.5 ABOVEGROUND AND UNDERGROUND STORAGE TANKS

Honokohau Marine Storage currently uses a portable fuel tank to power a generator to provide electricity to the office trailer. No other ASTs or USTs were observed.

### 5.6 GROSS SURFACE CONTAMINATION

As noted above in Section 5.3, there were multiple locations where rusted metal pieces and paint chips were observed on the ground; *de minimis* petroleum stains were observed on the ground at several locations across the boat storage yard; and oil was leaking from a boat engine during the on-site inspection and had created a 2-foot by 2-foot area of stained soil.

### 5.7 PCB-CONTAINING ITEMS

No pole- or pad-mounted transformers were observed on the Subject Property. The abandoned compressor, tractor, and generator located at the southeast corner of the boat storage area may contain small quantities of PCB-containing oil.

### 5.8 POTABLE WATER SUPPLY

Potable water is provided by the Hawaii County Department of Water Supply water system.
5.9 SEWAGE AND DISPOSAL SYSTEM

Honokohau Marine Storage does not have a permitted on-site sewage/disposal system. The storage yard is served by port-a-potty type latrines. Hot Spots reportedly has a septic system (tank and leach field) or cesspool that is used for the restroom and laundry sewage/wastewater. An access port was visible in the concrete pavement (Photograph 22), but it was not apparent whether it was connected to the septic tank or a former cesspool.

According to the DOH Wastewater Branch, there are no records that indicate that the Subject Property has an individual wastewater treatment system (DOH, 2018). Real property records indicate that the adjacent parcel to the west (parcel 7-4-008:042) previously had a sewage/wastewater system (tanks and pumps) and later a “sewer connection” completed in 2014. Records from the DOH also indicate a former cesspool was replaced by a septic system at a “north side comfort station” at the harbor west of the Subject Property; and a septic system (septic/aerobic unit) was installed on the TMK Parcel in 1997 at the Hawaii Big Game Fishing Club facility adjacent to DOCARE offices and west of the Subject Property. Lastly, DLNR Engineering Division records indicate a septic system and absorption bed were planned for the DOCARE offices at the harbor.

5.10 INTERVIEWS

On December 6, 2018, Mr. Ikaika Soliday, Operations Manager for Honokohau Marine Storage, was interviewed. Mr. Soliday has been associated with the Subject Property since November 1, 2018, when the new lease commenced. Mr. Soliday noted the following environmental concerns: oil stains under boats, the abandoned tractor and air compressor may contain small quantities of PCB-containing oil, the berms around the Subject Property may contain debris/solid waste, and there is potentially a cesspool at Hot Spots welding shop. No other environmental concerns were noted.
SECTION 6 – DATA GAPS AND EXCEPTIONS

6.1 DATA GAPS

There are no significant data gaps associated with the Subject Property. A real property field book 1967 entry indicates that in 1965 a “Rubbish Dump Site” and a proposed Kealakehe School were planned for Parcel 003; however, no other information was available regarding the actual establishment of a dump site or landfill on Parcel 003.

The adjacent property to the west includes a number of vendors and tenants over time and tenant occupancy, rights of entry to common areas, and terms of individual leases or leased area are unclear.

6.2 DEVIATIONS

The Phase I Environmental Site Assessment was conducted in accordance with ASTM Standard E1527-13.

6.3 VAPOR ENCROACHMENT CONDITION

No evidence of vapor encroachment was discovered during this assessment.

6.4 LIMITATIONS

There were no limitations while conducting the assessment.
SECTION 7 – FINDINGS AND CONCLUSIONS

ESI performed a Phase I Environmental Site Assessment of the Subject Property. The assessment was performed in conformance with ASTM Standard E1527-13. The purpose of the assessment was to evaluate if current or past operations at the Subject Property or in the immediate vicinity have impacted or could potentially impact the environmental integrity of the Subject Property.

7.1 FINDINGS

Based on a review of federal records, the TMK Parcel, is listed as an ERNS site due to a release of fuel from a vessel in the harbor to the west. The record indicates that there are no NPL sites within one-mile and no CERCLIS, RCRA-CORRACTS, or TSD sites within one-half mile of the Subject Property. There were no CERCLIS NFRAP sites within one-half mile of the Subject Property. There were no registered LQG, SQGs, and CESQGs within one-quarter mile of the Subject Property.

According to the database search, there are no UST sites within one-quarter mile of the Subject Property. However, one UST site was identified that is located approximately 100 feet southwest of the Subject Property, across Kealakehe Parkway. Three USTs are currently in use at the GKM, Inc., site. There is one LUST site within one-half mile of the Subject Property that is topographically upgradient. A request to obtain copies of incidents reported at the Subject Property was submitted to the HFD. No response has been received to date.

There are no voluntary cleanup sites within one-half mile of the Subject Property. Based on a records review, there was a release of waste oil to the harbor west of the Subject Property in 2012. There were no hazardous material incidents reported for the Subject Property.

ESI personnel conducted a site inspection on December 6, 2018. During the site inspection the following were observed.

- A number of temporary structures, including an office trailer and one permanent structure with a concrete slab floor.
- An unpaved, small boat storage yard near its apparent storage capacity.
- Small-capacity petroleum storage tanks and pails (fuel and lubricating oil), and de minimis releases of oil from boats and vehicles indicating poor housekeeping.
- A welding and fabrication shop (Hot Spot Marine Fabrication) with small quantities of hazardous materials, such as paints, solvents/thinners, coolant, cleaners, compressed gases, and solid waste.
- Two openings or portals to an apparent septic system, or cesspool, at the location of the Hot Spot fabrication shop at the northwest corner of the Subject Property.
- Uncontrolled dumping of waste materials or waste-like materials consisting of scrap metal, old tires, construction debris, wood and metal debris, unidentifiable materials, a tractor, and an old air compressor on or around the berms at the eastern and northern boundaries of the Subject Property, also indicating poor housekeeping.
• Apparent abandoned or derelict vessels and trailers, some with highly weathered exteriors that have resulted in releases of paints, metals, and other debris to the ground surface.
• An adjacent property to the west with numerous commercial businesses and activities, septic systems, and above ground and underground fuel storage tanks.

ESI considers the apparently undocumented waste water system at the Hot Spot fabrication shop, the uncontrolled dumping, a collection of otherwise de minimis release of oil, paint, or other hazardous substances, solid wastes and abandoned or derelict vessels cited above as recognized environmental conditions. Based on the results of the Phase I assessment, ESI concludes that the potential for releases exists from wastewater generated historically at the location of the Hot Spot shop, from solid wastes discarded or land-filled, the accumulation of waste-like materials (e.g., heavy equipment, scrap metal, various debris, fuel tanks and containers) and from derelict vessels (i.e., fuels and oil, batteries, pant solids, heavy metals). All of these may have impacted or pose an imminent threat of release that could impact the environmental integrity of the Subject Property, and therefore are considered recognized environmental conditions.

In addition, based on the historical activities at the Subject Property, including the storage, repair and alteration of vessels in storage at the Subject Property since around 1983, and the lack of best management practices typically required by an NPDES permit, the surface soils of the Subject Property may be impacted by the accumulation of releases of hazardous substances (including petroleum) that otherwise might be considered de minimis. and that accumulation of releases is considered a recognized environmental condition.

7.2 CONCLUSIONS

In accordance with Section 12.8 of ASTM Standard E1527-13 (ASTM, 2013), we make the following statement.

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-13 at the Subject Property, identified as a portion of TMK No. (3) 7-4-008:003. Any exceptions to, or deletions from, this practice are described in Section 6 of this report. This assessment has revealed evidence of recognized environmental conditions in connection with the Subject Property.
SECTION 8 – QUALIFICATIONS AND LIMITATIONS

Our professional services have been performed and our findings obtained in accordance with customary principles and practices in the fields of environmental science and engineering. ESI is not responsible for the independent conclusions, opinions, or recommendations made by others based on the information presented in this report.

In compliance with Section 12.13 of ASTM Standard E1527-13 (ASTM, 2013), ESI makes the following statements.

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 40 CFR 312.10.

We have the specific qualifications based on education, training, and experience to assess the nature, history, and setting of the subject property. We have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Correspondence
REQUEST TO ACCESS A GOVERNMENT RECORD

DATE: 05 DEC 2018

TO: DOH/EMD/Solid and Hazardous Waste Branch (Fax: 586-7509)

FROM: Stephanie Davis  
Environmental Science International, 354 Ulunui St. Ste. 304, Kailua, HI 96734  
sdavis@esciencei.com (PH: 808-542-4939)

Although you are not required to provide any personal information, you should provide enough information to allow the agency to contact you about this request. The processing of this request may be stopped if the agency is unable to contact you. Therefore, please provide any information that will allow the agency to contact you (name or alias, telephone or fax number, mailing address, e-mail address, etc.).

I WOULD LIKE THE FOLLOWING GOVERNMENT RECORD:

Describe the government record as specifically as possible so that it can be located. Try to provide a record name, subject matter, date, location, purpose, or names of persons to whom the record refers, or other information that could help the agency identify the record. A complete and accurate description of the government record you request will prevent delays in locating the record. Attach a second page if needed.

All records related to the property located at 74-429 Kealakehe Parkway at Honokohau Harbor, Kailua-Kona, Hawaii 96740 (portion of TMK (3) 7-4-008:003). Property is owned by DLNR and was previously leased to GKM, Inc.

I WOULD LIKE: (please check one or more of the options below)

☒ To inspect the government record.
☒ A copy of the government record: (Please check one of the options below.) See the back of this page for information about fees that you may be required to pay for agency services to process your record request. Note: Copying and transmission charges may also apply to certain options.

☐ Pick up at agency (date and time): ______________________
☐ Mail
☐ Fax (toll free and only if available)
☒ Other, if available (please specify): Email at address above ______________________

☒ If the agency maintains the records in a form other than paper, please advise in which format you would prefer to have the record.

☒ Electronic ☐ Audio ☐ Other (please specify): ______________________

☐ Check this box if you are attaching a request for waiver of fees in the public interest (see waiver information on back).

NOTICE TO REQUESTER

TO: Stephanie Davis, Environmental Science Internationa / sdavis@esciencei.com  
(Requester's name)

FROM: Hawaii Dept. of Health, Solid and Hazardous Waste Branch, Amy Liana, (808) 586-4226, amy.liana@doh.hawaii.gov  
(Agency, and agency contact person's name, telephone number, & email address)

DATE THAT THE RECORD REQUEST WAS RECEIVED BY AGENCY: 12/5/18

DATE OF THIS NOTICE: 12/6/18

GOVERNMENT RECORDS YOU REQUESTED (attach copy of request or provide brief description below):

1.
2.
3.
4.

THIS NOTICE IS TO INFORM YOU THAT YOUR RECORD REQUEST: 

☐ Will be granted in its entirety.

☐ Cannot be granted. Agency is unable to disclose the requested records for the following reason:
   ☐ Agency does not maintain the records. (HRS § 92F-3)
   ☐ Other agency that is believed to maintain records: ________________________________
   ☐ Agency needs further clarification or description of the records requested. Please contact the agency and provide the following information:_______________
   ☐ Request requires agency to create a summary or compilation from records, but requested information is not readily retrievable. (HRS § 92F-11(c))

☐ Will be granted in part and denied in part, OR ☐ Is denied in its entirety
   Although the agency maintains the requested records, it is not disclosing all or part of them based on the exemptions provided in HRS § 92F-13 and/or § 92F-22 or other laws cited below.
   (Describe the portions of records that the agency will not disclose.)

RECORDS OR INFORMATION WITHHELD  APPLICABLE STATUTES  AGENCY JUSTIFICATION

REQUESTER'S RESPONSIBILITIES:

You are required to (1) pay any lawful fees and costs assessed; (2) make any necessary arrangements with the agency to inspect, copy or receive copies as instructed below; and (3) provide the agency any additional information requested. If you do not comply with the requirements set forth in this notice within 20 business days after the postmark date of this notice or the date the agency makes the records available, you will be presumed to have abandoned your request and the agency shall have no further duty to process your request. Once the agency begins to process your request, you may be liable for any fees and costs incurred. If you wish to cancel or modify your request, you must advise the agency upon receipt of this notice.
METHOD & TIMING OF DISCLOSURE:

Records available for public access in their entireties must be disclosed within a reasonable time, not to exceed 10 business days from the date the request was received, or after receipt of any prepayment required. Records not available in their entireties must be disclosed within 5 business days after this notice or after receipt of any prepayment required. HAR § 2-71-13(c). If incremental disclosure is authorized by HAR § 2-71-15, the first increment must be disclosed within 5 business days of this notice or after receipt of any prepayment required.

Method of Disclosure:

☐ Inspection at the following location: ________________________________

☐ As requested, a copy of the record(s) will be provided in the following manner:
  ☐ Available for pick-up at the following location: ________________________________
  ☐ Will be mailed to you.
  ☐ Will be transmitted to you by other means requested: ________________________________

Timing of Disclosure: All records, or the first increment if applicable, will be made available or provided to you:

☐ On ___________________________________ 20___.

☐ After prepayment of 50% of fees and 100% of costs, as estimated below.

For incremental disclosures, each subsequent increment will be disclosed within 20 business days after:

☐ The prior increment (if one prepayment of fees is required and received), or

☐ Receipt of each incremental prepayment, if prepayment for each increment is required.

Records will be disclosed in increments because the records are voluminous and the following extenuating circumstances exist:

☐ Agency must consult with another person to determine whether the record is exempt from disclosure under HRS chapter 92F.

☐ Request requires extensive agency efforts to search, review, or segregate the records or otherwise prepare the records for inspection or copying.

☐ Agency requires additional time to respond to the request in order to avoid an unreasonable interference with its other statutory duties and functions.

☐ A natural disaster or other situation beyond agency’s control prevents agency from responding to the request within 10 business days.

ESTIMATED FEES & COSTS AND PAYMENT:

FEES: For personal record requests under Part III of chapter 92F, HRS, the agency may charge you for its costs only, and fee waivers do not apply.

For public record requests under Part II of chapter 92F, HRS, the agency is authorized to charge you fees to search for, review, and segregate your request (even if a record is subsequently found to not exist or will not be disclosed in its entirety). The agency must waive the first $30 in fees assessed for general requesters, OR in the alternative, the first $60 in fees when the agency finds that the request is made in the public interest. Only one waiver is provided for each request. See HAR §§ 2-71-19, -31 and -32.

COSTS: For either personal or public record requests, the agency may charge you for the costs of copying and delivering records in response to your request, and other lawful fees and costs.

PREPAYMENT: The agency may require prepayment of 50% of the total estimated fees and 100% of the total estimated costs prior to processing your request. If a prepayment is required, the agency may wait to start any search for or review of the records until the prepayment is received by the agency. Additionally, if you have outstanding fees or costs
from previous requests, including abandoned requests, the agency may require prepayment of 100% of the unpaid balance from prior requests before it begins any search or review for the records you are now seeking.

The following is an itemization of what you must pay, based on the estimated fees and costs that the agency will charge you and the applicable waiver amount that will be deducted:

**For public record requests only:**

**Fees:**
- Search: Estimate of time to be spent: [5 hours] $2.50
- Review & segregation: Estimate of time to be spent: [2 hours] $5.00
- Fees waived: [☐ general ($30), OR. ☐ public interest ($60)] $30.00
- Other: [Pursuant to HAR §§ 2-71-19 & 2-71-31]

**Total Estimated Fees:**

**For public or personal record requests:**

**Costs:**
- Copying: Estimate of # of pages to be copied: [ ] $0
- Delivery: Postage [ ] $0
- Other: [ ] $0

**Total Estimated Costs:**

**TOTAL ESTIMATED FEES AND COSTS from above:** [ ] $0

- The estimated fees and costs above are for the first incremental disclosure only. Additional fees and costs, and no further fee waivers, will apply to future incremental disclosures.

- PREPAYMENT IS REQUIRED (50% of fees + 100% of costs, as estimated above) [ ] $0

- UNPAID BALANCE FROM PRIOR REQUESTS (100% must be paid before work begins) [ ] $0

**TOTAL AMOUNT DUE AT THIS TIME** [ ] $0

Payment may be made by: [☐ cash]
[☐ personal check payable to ____________________________]
[☐ other ____________________________]

For questions about this notice or the records being sought, please contact the agency person named at the beginning of this form. Please note that the Office of Information Practices (OIP) does not maintain the records of other agencies, and a requester must seek records directly from the agency it believes maintains the records. If the agency denies or fails to respond to your written request for records or if you have other questions regarding compliance with the UIPA, then you may contact OIP at (808) 586-1400, oip@hawaii.gov, or 250 South Hotel Street, Suite 107, Honolulu, Hawaii 96813.

Timing of Disclosure: All records, or the first increment if applicable, will be made available or provided to you:

☐ On __________________, 20____.

☐ After prepayment of 50% of fees and 100% of costs, as estimated below.

For incremental disclosures, each subsequent increment will be disclosed within 20 business days after:

☐ The prior increment (if one prepayment of fees is required and received), or

☐ Receipt of each incremental prepayment, if prepayment for each increment is required.

Records will be disclosed in increments because the records are voluminous and the following extenuating circumstances exist:

☐ Agency must consult with another person to determine whether the record is exempt from disclosure under HRS chapter 92F.

☐ Request requires extensive agency efforts to search, review, or segregate the records or otherwise prepare the records for inspection or copying.

☐ Agency requires additional time to respond to the request in order to avoid an unreasonable interference with its other statutory duties and functions.

☐ A natural disaster or other situation beyond agency’s control prevents agency from responding to the request within 10 business days.

ESTIMATED FEES & COSTS AND PAYMENT:

FEES: For personal record requests under Part III of chapter 92F, HRS, the agency may charge you for its costs only, and fee waivers do not apply.

For public record requests under Part II of chapter 92F, HRS, the agency is authorized to charge you fees to search for, review, and segregate your request (even if a record is subsequently found to not exist or will not be disclosed in its entirety). The agency must waive the first $30 in fees assessed for general requesters, OR in the alternative, the first $60 in fees when the agency finds that the request is made in the public interest. Only one waiver is provided for each request. See HAR §§ 2-71-19, -31 and -32.

COSTS: For either personal or public record requests, the agency may charge you for the costs of copying and delivering records in response to your request, and other lawful fees and costs.

PREPAYMENT: The agency may require prepayment of 50% of the total estimated fees and 100% of the total estimated costs prior to processing your request. If a prepayment is required, the agency may wait to start any search for or review of the records until the prepayment is received by the agency. Additionally, if you have outstanding fees or costs
from previous requests, including abandoned requests, the agency may require prepayment of 100% of the unpaid balance from prior requests before it begins any search or review for the records you are now seeking.

The following is an itemization of what you must pay, based on the estimated fees and costs that the agency will charge you and the applicable waiver amount that will be deducted:

For public record requests only:

Fees:
- Search: Estimate of time to be spent: 15 hours, $2.50 per each 15-minute period, $37.50
- Review & segregation: Estimate of time to be spent: hours, $30.00 per each 15-minute period
- Fees waived: □ general ($30), OR □ public interest ($60)
- Other: (Only one waiver per request)
  (Pursuant to HAR §§ 2-71-19 & 2-71-31)

Total Estimated Fees: $0

For public or personal record requests:

Costs:
- Copying: Estimate of # of pages to be copied: $0
  (@ $___ per page, pursuant to HRS § 92-21)
- Delivery: $0
- Other: $0

Total Estimated Costs: $0

TOTAL ESTIMATED FEES AND COSTS from above: $0

☐ The estimated fees and costs above are for the first incremental disclosure only. Additional fees and costs, and no further fee waivers, will apply to future incremental disclosures.

☐ PREPAYMENT IS REQUIRED (50% of fees + 100% of costs, as estimated above) $0

☐ UNPAID BALANCE FROM PRIOR REQUESTS (100% must be paid before work begins) $0

TOTAL AMOUNT DUE AT THIS TIME $0

Payment may be made by: □ cash
□ personal check payable to __________________________
□ other ________________________________

For questions about this notice or the records being sought, please contact the agency person named at the beginning of this form. Please note that the Office of Information Practices (OIP) does not maintain the records of other agencies, and a requester must seek records directly from the agency it believes maintains the records. If the agency denies or fails to respond to your written request for records or if you have other questions regarding compliance with the UIPA, then you may contact OIP at (808) 586-1400, oip@hawaii.gov, or 250 South Hotel Street, Suite 107, Honolulu, Hawaii 96813.
REQUEST TO ACCESS A GOVERNMENT RECORD

DATE: 05 DEC 2018

TO: DOH/EMD/Solid and Hazardous Waste Branch, 2827 Waimano Home Road, Pearl City, HI 96782

FROM: Stephanie Davis
Environmental Science International, 354 Uluwatu St. Ste. 304, Kailua, HI 96734
davis@esienv.com (PH: 808-542-4939)

Although you are not required to provide any personal information, you should provide enough information to allow the agency to contact you about this request. The processing of this request may be stopped if the agency is unable to contact you. Therefore, please provide any information that will allow the agency to contact you (name or alias, telephone or fax number, mailing address, e-mail address, etc.).

I WOULD LIKE THE FOLLOWING GOVERNMENT RECORD:

Describe the government record as specifically as possible so that it can be located. Try to provide a record name, subject matter, date, location, purpose, or names of persons to whom the record refers, or other information that could help the agency identify the record. A complete and accurate description of the government record you request will prevent delays in locating the record. Attach a second page if needed.

All records related to the property located at 74-429 Kealakehe Parkway at Honokohau Harbor, Kailua-Kona, Hawaii 96740 (portion of TMK (3) 7-4-008:003). Property is owned by DLNR and was previously leased to GKM, Inc.

I WOULD LIKE: (please check one or more of the options below)

☒ To inspect the record (please check one of the options below.) See the back of this page for information on how to schedule a time to visit the agency. You may be required to pay for agency services to process your request. Certain options may also apply to you.

☐ Pick up
☐ Mail
☐ Fax (toll free and only if available)
☒ Other, if available (please specify): Email at address above

☒ If the agency maintains the records in a form other than paper, please advise in which format you would prefer to have the record.

☒ Electronic ☐ Audio ☐ Other (please specify):

☐ Check this box if you are attaching a request for waiver of fees in the public interest (see waiver information on back).

NOTICE TO REQUESTER

TO: Stephanie Davis, Environmental Science Internationa / s.davis@escienceei.com

( Requester's name )

FROM: Hawaii Dept. of Health, Solid and Hazardous Waste Branch, Amy Liana, (808) 586-4226, amy.liana@doh.hawaii.gov

(Agency, and agency contact person's name, telephone number, & email address)

DATE THAT THE RECORD REQUEST WAS RECEIVED BY AGENCY: 12/5/18

DATE OF THIS NOTICE: 1/20/18

GOVERNMENT RECORDS YOU REQUESTED (attach copy of request or provide brief description below):

1.
2.
3.
4.

THIS NOTICE IS TO INFORM YOU THAT YOUR RECORD REQUEST:

☐ Will be granted in its entirety.

☐ Cannot be granted. Agency is unable to disclose the requested records for the following reason:

☐ Agency does not maintain the records. (HRS § 92F-3)

☐ Other agency that is believed to maintain records:

☐ Agency needs further clarification or description of the records requested. Please contact the agency and provide the following information:

☐ Request requires agency to create a summary or compilation from records, but requested information is not readily retrievable. (HRS § 92F-11(c))

☐ Will be granted in part and denied in part, OR ☐ Is denied in its entirety

Although the agency maintains the requested records, it is not disclosing all or part of them based on the exemptions provided in HRS § 92F-13 and/or § 92F-22 or other laws cited below.
(Describe the portions of records that the agency will not disclose.)

RECORDS OR INFORMATION WITHHELD ☐ APPLICABLE STATUTES ☐ AGENCY JUSTIFICATION

REQUESTER'S RESPONSIBILITIES:

You are required to (1) pay any lawful fees and costs assessed; (2) make any necessary arrangements with the agency to inspect, copy or receive copies as instructed below; and (3) provide the agency any additional information requested. If you do not comply with the requirements set forth in this notice within 20 business days after the postmark date of this notice or the date the agency makes the records available, you will be presumed to have abandoned your request and the agency shall have no further duty to process your request. Once the agency begins to process your request, you may be liable for any fees and costs incurred. If you wish to cancel or modify your request, you must advise the agency upon receipt of this notice.

OIP (rev. 12/1/2015)
METHOD & TIMING OF DISCLOSURE:
Records available for public access in their entirities must be disclosed within a reasonable time, not to exceed 10 business days from the date the request was received, or after receipt of any prepayment required. Records not available in their entirities must be disclosed within 5 business days after this notice or after receipt of any prepayment required. HAR § 2-71-13(c). If incremental disclosure is authorized by HAR § 2-71-15, the first increment must be disclosed within 5 business days of this notice or after receipt of any prepayment required.

Method of Disclosure:

☐ Inspection at the following location:

☐ As requested, a copy of the record(s) will be provided in the following manner:

☐ Available for pick-up at the following location:

☐ Will be mailed to you.

☐ Will be transmitted to you by other means requested:

Timing of Disclosure: All records, or the first increment if applicable, will be made available or provided to you:

☐ On ____________, 20__.

☐ After prepayment of 50% of fees and 100% of costs, as estimated below.

For incremental disclosures, each subsequent increment will be disclosed within 20 business days after:

☐ The prior increment (if one prepayment of fees is required and received), or

☐ Receipt of each incremental prepayment, if prepayment for each increment is required.

Records will be disclosed in increments because the records are voluminous and the following extenuating circumstances exist:

☐ Agency must consult with another person to determine whether the record is exempt from disclosure under HRS chapter 92F.

☐ Request requires extensive agency efforts to search, review, or segregate the records or otherwise prepare the records for inspection or copying.

☐ Agency requires additional time to respond to the request in order to avoid an unreasonable interference with its other statutory duties and functions.

☐ A natural disaster or other situation beyond agency’s control prevents agency from responding to the request within 10 business days.

ESTIMATED FEES & COSTS AND PAYMENT:
FEES: For personal record requests under Part III of chapter 92F, HRS, the agency may charge you for its costs only, and fee waivers do not apply.

For public record requests under Part II of chapter 92F, HRS, the agency is authorized to charge you fees to search for, review, and segregate your request (even if a record is subsequently found to not exist or will not be disclosed in its entirety). The agency must waive the first $30 in fees assessed for general requesters, OR in the alternative, the first $60 in fees when the agency finds that the request is made in the public interest. Only one waiver is provided for each request. See HAR §§ 2-71-19, -31 and -32.

COSTS: For either personal or public record requests, the agency may charge you for the costs of copying and delivering records in response to your request, and other lawful fees and costs.

PREPAYMENT: The agency may require prepayment of 50% of the total estimated fees and 100% of the total estimated costs prior to processing your request. If a prepayment is required, the agency may wait to start any search for or review of the records until the prepayment is received by the agency. Additionally, if you have outstanding fees or costs
from previous requests, including abandoned requests, the agency may require prepayment of 100% of the unpaid balance from prior requests before it begins any search or review for the records you are now seeking.

The following is an itemization of what you must pay, based on the estimated fees and costs that the agency will charge you and the applicable waiver amount that will be deducted:

For public record requests only:

Fees:  
- Search: Estimate of time to be spent: 15 minutes 2.50
- Review & segregation: Estimate of time to be spent: 50.00
- Fees waived: general ($30), OR. public interest ($60) <$ >
- Other: (Pursuant to HAR §§ 2-71-19 & 2-71-31) 0

Total Estimated Fees: 0

For public or personal record requests:

Costs:  
- Copying: Estimate of # of pages to be copied: $ 
  (@ $ per page, pursuant to HRS § 92-21)
- Delivery: Postage
- Other: 

Total Estimated Costs: 0

TOTAL ESTIMATED FEES AND COSTS from above: 0

☐ The estimated fees and costs above are for the first incremental disclosure only. Additional fees and costs, and no further fee waivers, will apply to future incremental disclosures.

☐ PREPAYMENT IS REQUIRED (50% of fees + 100% of costs, as estimated above) $ 0

☐ UNPAID BALANCE FROM PRIOR REQUESTS (100% must be paid before work begins) $ 0

TOTAL AMOUNT DUE AT THIS TIME 0

Payment may be made by: ☐ cash
☐ personal check payable to _____________________________
☐ other _____________________________

For questions about this notice or the records being sought, please contact the agency person named at the beginning of this form. Please note that the Office of Information Practices (OIP) does not maintain the records of other agencies, and a requester must seek records directly from the agency it believes maintains the records. If the agency denies or fails to respond to your written request for records or if you have other questions regarding compliance with the UIPA, then you may contact OIP at (808) 586-1400, oip@hawaii.gov, or 250 South Hotel Street, Suite 107, Honolulu, Hawaii 96813.

mydWwB1web – 2015 Request for Kona Cesspool.doc
Dane Hiromasa from DOH Wastewater Branch (Kona) calls S. Davis regarding request for septic tank/cesspool record.
He says there are no records of a septic tank or cesspool at Hot Shots. They may be connected to the wastewater treatment system at Gentrys across the street. Dane says if they are not connected, it may be a cesspool.

Subject: Emergency Response Record Request

Aloha,

I would like to review the list of emergency response records for the following general area. The records are required for a Phase I Environmental Assessment. Specifically, I am interested in emergency response reports for fuel and hazardous substance releases. Additional records for emergency responses at the property would also be useful.

SURROUNDING SITES: SEARCH RESULTS
Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State- and tribal - equivalent CERCLIS
SHWS: The State Hazardous Waste Sites records are the states’ equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Health.

A review of the SHWS list, as provided by EDR, and dated 01/23/2018 has revealed that there is 1 SHWS site within approximately 1 mile of the target property.

</tr>
</tbody>
</table>
**State and tribal leaking storage tank lists**

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Health’s Active Leaking Underground Storage Tank Log Listing.

A review of the LUST list, as provided by EDR, and dated 08/31/2018 has revealed that there are 2 LUST sites within approximately 0.5 miles of the target property.

**ADDITIONAL ENVIRONMENTAL RECORDS**

**Other Ascertainable Records**

US MINES: Mines Master Index File. The source of this database is the Dept. of Labor, Mine Safety and Health Administration.

A review of the US MINES list, as provided by EDR, has revealed that there is 1 US MINES site within approximately 0.25 miles of the target property.

NO SITES FOUND
To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

### STANDARD ENVIRONMENTAL RECORDS

#### Federal NPL site list

**NPL:** National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA’s Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

**Proposed NPL:** Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

**NPL LIENS:** Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.
Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions
The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing
A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

SEMS: Superfund Enterprise Management System
SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies, and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.
SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA’s knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 08/13/2018
Date Data Arrived at EDR: 10/04/2018
Date Made Active in Reports: 11/16/2018

Federal RCRA CORRACTS facilities list
CORRACTS: Corrective Action Report
CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/01/2018
Date Data Arrived at EDR: 03/28/2018
Date Made Active in Reports: 06/22/2018
Number of Days to Update: 86

Federal RCRA non-CORRACTS TSD facilities list
RCRA-TSDF: RCRA - Treatment, Storage and Disposal
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/01/2018
Date Data Arrived at EDR: 03/28/2018

Number of Days to Update: 86

Federal RCRA generators list
RCRA-LQG: RCRA - Large Quantity Generators
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date Data Arrived at EDR: 03/28/2018
Date Made Active in Reports: 06/22/2018
Number of Days to Update: 86
RCRA-SQG: RCRA - Small Quantity Generators
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.
Date of Government Version: 03/01/2018

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

### State and tribal registered storage tank lists

**FEMA UST: Underground Storage Tank Listing**
- A listing of all FEMA owned underground storage tanks.
  - **Date of Government Version:** 05/15/2017
  - **Source:** FEMA
  - **Telephone:** 202-646-5797
  - **Last EDR Contact:** 10/10/2018
  - **Next Scheduled EDR Contact:** 01/21/2019
  - **Number of Days to Update:** 136
  - **Data Release Frequency:** Varies

**UST: Underground Storage Tank Database**
- Registered Underground Storage Tanks. UST’s are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA) and must be registered with the state department responsible for administering the UST program. Available information varies by state program.
  - **Date of Government Version:** 08/31/2018
  - **Source:** Department of Health
  - **Telephone:** 808-586-4228
  - **Last EDR Contact:** 11/30/2018
  - **Next Scheduled EDR Contact:** 03/11/2019
  - **Number of Days to Update:** 29
  - **Data Release Frequency:** Semi-Annually

**INDIAN UST R5: Underground Storage Tanks on Indian Land**
- The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 5 (Michigan, Minnesota and Wisconsin and Tribal Nations).
  - **Date of Government Version:** 04/12/2018
  - **Source:** EPA Region 5
  - **Telephone:** 312-886-6136
  - **Last EDR Contact:** 10/26/2018
  - **Next Scheduled EDR Contact:** 02/04/2019
  - **Number of Days to Update:** 63
  - **Data Release Frequency:** Varies

**INDIAN UST R6: Underground Storage Tanks on Indian Land**
- The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 6 (Louisiana, Arkansas, Oklahoma, New Mexico, Texas and 65 Tribes).
  - **Date of Government Version:** 04/01/2018
  - **Source:** EPA Region 6
  - **Telephone:** 214-665-7591
  - **Last EDR Contact:** 10/26/2018
  - **Next Scheduled EDR Contact:** 02/04/2019
  - **Number of Days to Update:** 63
  - **Data Release Frequency:** Varies

**INDIAN UST R7: Underground Storage Tanks on Indian Land**
- The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 7 (Iowa, Kansas, Missouri, Nebraska, and 9 Tribal Nations).
  - **Date of Government Version:** 04/24/2018
  - **Source:** EPA Region 7
  - **Telephone:** 913-551-7003
  - **Last EDR Contact:** 10/26/2018
  - **Next Scheduled EDR Contact:** 02/04/2019
  - **Number of Days to Update:** 63
  - **Data Release Frequency:** Varies

**INDIAN UST R9: Underground Storage Tanks on Indian Land**
- The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 9 (Arizona, California, Hawaii, Nevada, the Pacific Islands, and Tribal Nations).
  - **Date of Government Version:** 04/10/2018
  - **Source:** EPA Region 9
  - **Telephone:** 415-972-3368
  - **Last EDR Contact:** 10/26/2018
  - **Next Scheduled EDR Contact:** 02/04/2019
  - **Number of Days to Update:** 63
  - **Data Release Frequency:** Varies
INDIAN UST R10: Underground Storage Tanks on Indian Land

State and tribal Brownfields sites

BROWNFIELDS: Brownfields Sites
With certain legal exclusions and additions, the term ‘brownfield site’ means real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant.

- Date of Government Version: 01/23/2018
- Source: Department of Health
- Telephone: 808-586-4249
- Last EDR Contact: 11/19/2018
- Next Scheduled EDR Contact: 03/04/2019
- Data Release Frequency: Varies

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment.
Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 09/21/2018

Other Ascertainable Records
RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

US FIN ASSUR: Financial Assurance Information

All owners and operators of facilities that treat, store, or dispose of hazardous waste are required to provide proof that they will have sufficient funds to pay for the clean up, closure, and post-closure care of their facilities.
EPA WATCH LIST: EPA WATCH LIST
EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List
The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

TSCA: Toxic Substances Control Act
Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

TRIS: Toxic Chemical Release Inventory System
Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

SSTS: Section 7 Tracking Systems
Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.
**ROD: Records Of Decision**

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

**RMP: Risk Management Plans**

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g. the fire department) should an accident occur.

**RAATS: RCRA Administrative Action Tracking System**

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

**PADS: PCB Activity Database System**

PCB Activity Database. PADS identifies generators, transporters, commercial storers and/or brokers and disposers of PCB’s who are required to notify the EPA of such activities.
ICIS: Integrated Compliance Information System
The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)
A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

MLTS: Material Licensing Tracking System
MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

COAL ASH DOE: Steam-Electric Plant Operation Data
A listing of power plants that store ash in surface ponds.

COAL ASH EPA: Coal Combustion Residues Surface Impoundments List
A listing of coal combustion residues surface impoundments with high hazard potential ratings.

UMTRA: Uranium Mill Tailings Sites
Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, action program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

Date of Government Version: 10/12/2016

US MINES 3: Active Mines & Mineral Plants Database Listing
Active Mines and Mineral Processing Plant operations for commodities monitored by the Minerals Information Team of the USGS.

Date of Government Version: 04/14/2011
Date Data Arrived at EDR: 06/08/2011
Date Made Active in Reports: 09/13/2011
Number of Days to Update: 97
Next Scheduled EDR Contact: 03/11/2019
Data Release Frequency: Varies
ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Data Release Frequency: Varies

EDR HIGH RISK HISTORICAL RECORDS

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR’s researchers. Manufactured gas sites were used in the United States from the 1800’s to 1950’s to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.
EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR’s review was limited to those categories of sources that might, in EDR’s opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as “High Risk Historical Records”, or HRHR. EDR’s HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners
EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR’s review was limited to those categories of sources that might, in EDR’s opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as “High Risk Historical Records”, or HRHR. EDR’s HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Recovered Government Archives

Exclusive Recovered Govt. Archives

RGA HWS: Recovered Government Archive State Hazardous Waste Facilities List
The EDR Recovered Government Archive State Hazardous Waste database provides a list of SHWS incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Health in Hawaii.

RGA LF: Recovered Government Archive Solid Waste Facilities List
The EDR Recovered Government Archive Landfill database provides a list of landfills derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Health in Hawaii.
The EDR Recovered Government Archive Leaking Underground Storage Tank database provides a list of LUST incidents derived from historical databases and includes many records that no longer appear in current government lists. Compiled from Records formerly available from the Department of Health in Hawaii.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.
Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.
GROUNDWATER FLOW DIRECTION INFORMATION
Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY
General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.
HYDROLOGIC INFORMATION
Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION
Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

</tbody>
</table>
GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture’s (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Lava flows, pahoehoe
Soil Surface Texture: bedrock
Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.
Soil Drainage Class: Excessively drained
Hydic Status: Not hydric
Corrosion Potential - Uncoated Steel: Not Reported
Depth to Bedrock Min: > 0 inches
Depth to Watertable Min: > 0 inches

<table>
<thead>
<tr>

<th>Soil Reaction (pH)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>0 inches</td>
<td>59 inches</td>
<td>bedrock</td>
<td>Not reported</td>
</tr>
</tbody>
</table>

Soil Map ID: 2

Soil Component Name: Lava flows, aa
Soil Surface Texture: extremely stony material
Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.
Soil Drainage Class: Excessively drained
Hydic Status: Not hydric
Corrosion Potential - Uncoated Steel: Not Reported
Depth to Bedrock Min: > 152 inches
Depth to Watertable Min: > 0 inches

</tr>
</tbody>
</table>

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory
Source: Office of Planning
Telephone: 808-587-2895

HYDROGEOLOGIC INFORMATION

AQUIFLOW® Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture’s (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.
LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Well Index Database
Source: Commission on Water Resource Management
Telephone: 808-587-0214
CWRM maintains a Well Index Database to track specific information pertaining to the construction and installation of production wells in Hawaii.

OTHER STATE DATABASE INFORMATION

RADON

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IREA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR’s Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

## Hawaii Home

**Real Property Home**

### Owner and Parcel Information

- **Owner Name**: STATE OF HAWAII
- **Parcel Number**: 740080030000
- **Today's Date**: December 19, 2018
- **Neighborhood Code**: L7000-5
- **Project Name**: 74-429 KEALAKEHE PARKWAY
- **Mailing Address**: 74-429 KEALAKEHE PARKWAY

### Land Information

- **Property Class**: RESIDENTIAL
- **Agricultural Use**: NA
- **Acreage**: 5,139,514
- **Square Footage**: 117.987

### Assessment Information

- **Market Value**: $2,807,300
- **Dedicated Use Value**: $650,500
- **Land Taxable Value**: $2,156,800
- **Assessed Building Value**: $650,500

### Commercial Information

- **Project Name**: HONOKOHAI HARBOUR PARK
- **Improvement Number**: 1
- **Parcel Map**: NA
- **Sketch**: NA
- **Structure Type**: RESIDENTIAL
- **Units**: 1
- **Building Card**: NA
- **Effective Year**: 1993
- **Year Built**: 1993

### Commercial Improvement Information

- **Gross Building Description**: OFFICES 9
- **Frame Wall Height**: 70
- **GAR - HT; PAVED FLR**: 9 x 24 x 40
- **Sketch**: 117.987, 5.195, 14
- **GAR - HT; PAVED FLR**: 24 x 40

- **GAR - HT; PAVED FLR**: 24 x 40

### Legal Information

- **Legal Description**: (20000 SF) DROPPED INTO NEW PARCEL 7408-75
- **Parcel Map**: HAWAII FISH CULTURE PARK
- **Parcel Number**: 740080030000
- **Today's Date**: December 19, 2018

---

### Additional Information

- **Previous Parcel**: Previous Parcel
- **Next Parcel**: Next Parcel
- **Search Page**: Return to Main Search Page
- **Real Property Home**: Hawaii Home
- **Real Property Tax Office**: County of Hawaii
