Chairperson and Members

State of Hawaii  
Honolulu, Hawaii

Land Board Members:

SUBJECT: AMENDMENT TO THE LANAI COOPERATIVE GAME DEVELOPMENT  
AND MANAGEMENT AGREEMENT WITH LANAI RESORTS, LLC TO  
EXTEND THE AGREEMENT TO FEBRUARY 28, 2022

Since March 1, 1992, the Department has been party to a cooperative agreement for a Game Development and Management Plan, originally with Dole Food Company, Inc. on the island of Lānaʻi, for the purposes of preserving, protecting, conserving, and propagating game birds and animals which covers the maintenance, management, and operation of public hunting areas and game reserves (Agreement, Attachment 2). The parties amended the Agreement in 2002, 2012, 2015 and 2018, and the current end date is February 28, 2021 (Amendments 2-4, Attachment 3). Since both parties are interested in extending the Agreement when it expires, we have jointly developed this amendment to the Agreement to facilitate a smooth transition in 2021. See attachment 4 for new lease agreement amendment.

The only proposed change, aside from an extension, is that the Agreement requires the parties work collectively to develop a management plan for the state leased portion of Lānaʻi to be completed by February 28, 2021. A steering document has been developed to provide a comprehensive overview of the management and research needs of all natural resources within the Lānaʻi Cooperative Game Management Area (LCGMA) and presents the direction and intent of DOFAW for the management and stewardship of these lands to support the continuation of a long-term cooperative agreement. The steering document is meant to serve as a precursor to a comprehensive strategic management plan for the LCGMA. Through the collaborated efforts in developing the steering document Lānaʻi Resorts has chosen to continue with another one-year lease with the Department for the area. This steering document shall be completed by December 2020. The management plan developed under this agreement will be submitted for approval by the Board.

Upon Board approval of this amendment, the amendment will be submitted to the Attorney General along with a request for approval as to form.

The fifth amendment extension, along with the original Agreement and the past amendments, are attached for your reference.

#### CHAPTER 343 - ENVIRONMENTAL ASSESSMENT:

DOFAW activities to be conducted under the terms of the cooperative Agreement include a continuation of operations and repair and maintenance of existing infrastructure, as well as data collection, research, experimental management, and resource evaluation activities. These are minor actions that will probably have minimal or no significant effects on the environment and are exempt from the requirement to prepare an environmental assessment in accordance with Chapter 343, HRS, and Chapter 11-200-8, Hawaiʻi Administrative Rules, under the Department's following exemption classes (Exemption List for the Department of Land and Natural Resources, Reviewed and Concurred Upon by the Environmental Council on June 05, 2015):

Exemption Class 1: Operations, repairs or maintenance of existing structures, facilities, equipment or topographical features, involving negligible or no expansion or change of use beyond that previously existing.

Exemption Class 2: Replacement or reconstruction of existing structure and facilities where the new structure will be located generally on the same site and will have substantially the same purpose, capacity, density, height, and dimensions as the structure replaced.

Exemption Class 4: Minor alteration in the conditions of land, water, or vegetation.

Exemption Class 5: Basic data collection, research, experimental management, and resource evaluation activities which do not result in a serious or major disturbance to an environmental resource.

#### RECOMMENDATION:

That the Board:

1. Delegate authority to the Chair to negotiate and execute a Cooperative Agreement with the Lānaʻi Resorts, LLC, subject to the approval as to form of the Department of the Attorney General.
2. Authorize the Chairperson to determine and approve Chapter 343, Hawaii Revised Statutes (HRS) environmental compliance requirements, including approval of declarations of exemptions, as applicable.

Respectfully submitted,

DAVID G. SMITH, Administrator  
Division of Forestry and Wildlife

The following types of projects will not be exempt:

1. Projects requiring detailed analyses as provided in an environmental assessment under HRS §343-5. These include, but are not limited to places listed on the Federal or State registers of historic places.

4. Major projects without a program to encourage public input into the design or siting of the project.

Pursuant to HAR § 11-200-8 (B), all exemptions under the classes in this section are inapplicable when the cumulative impact of planned successive actions of the same type, in the same place,

List of Exemptions - Page 1

Pursuant to the administrative rules promulgated under authority of section 343-6(7), HRS, specifically section 11-200-8; the DLNR has determined that the following types of actions, where they fall within the given classes of action, shall generally be exempt from the preparation of an environmental assessment.

(2) The Board will install management practices and facilities and provide personnel to obtain a population of game birds and mammals on such areas where game populations may be benefitted and where the environment will sustain regeneration of the vegetation and minimize the threat to endangered species.

(3) The Board will print and issue maps of the entire Island of Lanai and show thereon the location of areas within the CGMA closed to hunting, from time to time and the boundaries of the CGMA and the portion of the Island excluded from this Agreement, hereinafter called "Excluded Area", and such other information which is mutually agreed to by the Board and the Cooperator.

Land Board Members:

SUBJECT: AMENDMENT TO THE LANAI COOPERATIVE GAME DEVELOPMENT  
AND MANAGEMENT AGREEMENT WITH LANAI RESORTS, LLC TO  
EXTEND THE AGREEMENT TO FEBRUARY 28, 2021.

SUMMARY:

Since March 1, 1992, the Department has been party to a cooperative agreement for a Game Development and Management Plan, originally with Dole Food Company, Inc. on the island of Lānaʻi, for the purposes of preserving, protecting, conserving, and propagating game birds and animals which covers the maintenance, management, and operation of public hunting areas and game reserves (Agreement, Attachment 2). The parties amended the Agreement in 2002, 2012, and 2015, and the current end date is February 28, 2018 (Amendments 2-4, Attachment 3). Since both parties are interested in extending the Agreement when it expires, we have jointly developed this amendment to the Agreement to facilitate a smooth transition in 2018.

The only proposed change, aside from an extension, is that the Agreement requires the parties work collectively to develop a management plan for the state leased portion of Lānaʻi to be completed by February 28, 2021. The management plan developed under this agreement would be submitted for approval by the Board.

Upon Board approval of this amendment, the amendment will be submitted to the Attorney General along with a request for approval as to form.

The fifth amendment, along with the original Agreement and the past amendments, are attached for your reference.

CHAPTER 343 - ENVIRONMENTAL ASSESSMENT:

DOFAW activities to be conducted under the terms of the cooperative Agreement include a continuation of operations and repair and maintenance of existing infrastructure, as well as data collection, research, experimental management, and resource evaluation activities. These are minor actions that will probably have minimal or no significant effects on the environment and are exempt from the requirement to prepare an environmental assessment in accordance with Chapter 343, HRS, and Chapter 11-200-8, Hawaiʻi Administrative Rules, under the Department's following exemption classes (Exemption List for the Department of Land and

Exemption Class 2: Replacement or reconstruction of existing structure and facilities where the new structure will be located generally on the same site and will have substantially the same purpose, capacity, density, height, and dimensions as the structure replaced.

Exemption Class 4: Minor alteration in the conditions of land, water, or vegetation.

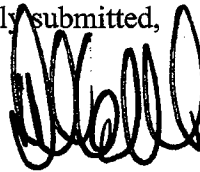

Exemption Class 5: Basic data collection, research, experimental management, and resource evaluation activities which do not result in a serious or major disturbance to an environmental resource.

RECOMMENDATION:
