Suzanne D. Case, Chairperson
Board of Land and Natural Resources
1151 Punchbowl Street
Honolulu, HI 96813

Re: Revocable Permit No. 7915; Resorttrust Hawaii, LLC, Permittee; Waialae, Honolulu, Oahu,
Tax Map Key: (1) 3-5-023:041

Aloha Chairperson Case and Members of the Board of Land & Natural Resources:

Thank you for approving RP 7915 for the current year. I wanted to send the board an update of the signage and ground plaques that were fully installed on the state parcel on November 17, 2021. As required by the board, the vertical sign was replaced with new verbiage and an image of the ground plaques was added. We also installed the ground plaques in the 4 locations designated. Below are images of the installed signage for your records and review.

I wanted to also give some background on the signage approval and installation timeline. On November 20, 2020, I met with DLNR staff to conduct a site visit on the state parcel and to review requirements of the RP that was approved for 2021. I was advised that I would await a proposal on signage verbiage and signage locations as determined by staff and then reviewed with Chair Case.

On April 15, 2021, I reached out via electronic mail to DLNR staff inquiring on an update. I was informed that work was still in progress on a proposal. I remained in contact with DLNR staff during the summer.

On August 10, 2021, DLNR staff conducted a second site visit on the state parcel and proposed verbiage and signage location for review. On August 11, 2021, I proposed new verbiage which I believed would add clarity to the public on the boundary line which was reviewed and approved. I then began work with the signage company to create mockups of signage and on September 19, 2021, asked DLNR staff to inquire with the Department of Planning and Permitting if they had any concerns with the ground plaque signage and installation locations on the state parcel before producing the signage.

On October 8, 2021 I received notification from DLNR staff that the proposal of signage, mockups, verbiage, installation locations, and a review with the Department of Planning and Permitting was complete and signage production could begin. On that same day, I advised the signage company to begin production. Due to signage product availability and shipping issues associated with the Covid-19 Pandemic, signage production was delayed

with estimated arrival to the resort on November 15, 2021. We began installation of the signage on November 16th and installation was completed by the afternoon of November 17, 2021.

The Kahala's stewardship under the RP has enhanced public use and enjoyment of the beach and RP premises, and protected the resource not only through keeping the area pristine and open, but also by providing a fresh water shower and restrooms located on hotel property for public use. The nearest official public restroom and showers are at Waialae Beach Park, a six minute walk from the beach fronting the hotel.

Should you require further details or additional images, please do not hesitate in reaching out to me directly.
