Subject: [EXTERNAL] E hoʻolāʻau hou ka ʻAlalā.
Date: Tuesday, January 9, 2024 10:14:05 AM

Aloha,

'Alalā are important seed disperser and a very important part of the native forest ecosystem.

A corvid once lived on Maui. ʻAlalā can help in the restoration of the forest ecosystem on Maui.

Please bring ʻAlalā return to the wild. If the population of ʻalalā increases like nēnē on Kauaʻi (while more forests are being restored on Hawaiʻi Island), perhaps they can be translocated to Hawaiʻi island in hundreds.

E hoʻolāʻau hou ka ʻAlalā.

Mahalo nui,

Kumiko
