Aloha DLNR Board,  
Asa resident of Hawaii and a person who has spent much time in the Turtle Bay through James Campbell Reserve area, I STRONGLY support K-2 and ask that the Yue-Sai Kan Settlement be adopted. This transfer of land for conservation is a just solution to the many egregious actions taken place on property at the detriment of our 'aina, native bees, Laysan Albatrosses, and coastline that is habitat to our sea turtles, monk seals and more.

Mahalo for your efforts to adopt K-2.

Best regards,

BLNR Board,

I fully support the approval of the K2 settlement agreement. Having the North Shore Community Land Trust take control of the property is essential to the safety of the albatross and keeping vital open space along the North Shore from becoming ruined.

I am writing in support of Item K-2, Proposed Settlement Agreement between the Department of Land and Natural Resources and Yue-Sai Kan.

As a citizen of the State of Hawaii and island of O'ahu, preservation of our natural spaces is important to me. This settlement seems to be the best possible outcome in this situation to restore and preserve the land affected by the damaging acts committed under Yue-Sai San's ownership.

Thank you,

Aloha Board members,

I'm writing in SUPPORT of Item K2, approving a settlement between Yue-Sai Kan and others. This settlement sends a message to developers and property owners to follow the laws that protect our wildlife. Thank you.

yours,  
Bianca

I am in total support of the proposal in K-2 that Yue-Sai Kan donates her Lot 1 land, buildings, and equipment to North Shore Community Land Trust in exchange for the state charges being dropped.

This action would be a wonderful win for the Laysan Albatross and honu that both nest on her land. North Shore Community Land Trust has been doing an awesome job restoring the conservation land next door at Turtle Bay and maintaining it. I feel they would be a responsible steward.

I volunteer and monitor the albatross on Turtle Bay and Marconi Point land and turtle nesting in the same areas. Adoption of this proposal would ensure that these species, as well as others, will continue to thrive there.
