1 – Nay (Smith)

Comments: The Board determined that the FEIS is inadequate as supported by staff submittal. The Board also made the following findings:

1. The FEIS complied with the procedural requirements;
2. Regarding content requirements, the FEIS is insufficient as there is a clear lack of baseline data for the Board to make an

- informed decision that the impacts of the natural, historical, biological and cultural resources have not been satisfied; and
3. The DLNR comments on the draft EIS were not satisfactorily addressed in the Final EIS. In addition to consideration of the contents of the staff submittal, the Board identified the following deficiencies:
 - 1) The biological studies, both terrestrial and aquatic, due not provide information to determine impact to biological resources.
 - 2) The archeological surveys don't cover the full extent of area that is required to allow the Board to to allow the Board to determine the impact to historic and cultural resources.
 - 3) There was insufficient consultation with Aha Moku and other key individuals.
 - 4) In turn, there was not enough information for a Ka Pa'akai Analysis to be conducted.
 - 5) The Conservation District Use issues were not addressed.
 - 6) The Groundwater issues were not addressed.
 - 7) Adequately considering staff comments regarding the use of state lands for forest reserves once current leases expire.
 - 8) Issue of use of terminology such as "real estate transaction".

06:35:43 There being no further business, Chair Chang adjourned the meeting.

Respectfully Submitted:

Reeana Wright

Acting Land Board Secretary

Approved for Submittal:
